THE LATE LORD RAGLAN.

THE Allied armies in the Crimea have lost the venerable and illustrious soldier who shared their glory and their sufferings; and who they hoped would be spared to lead them to victory. But Lord Raglan was neither to achieve the crowning triumph which the world yet expects, nor to die the hero's death, at the head of his gallant army. Had he fallen by the bullets of the foe, in the moment of victory, all Europe, and not only his native land, would have rung with his name and fame. Even while lamenting his fate, the universal voice of applause, mingled with sorrow, would have taught younger soldiers to envy his death, as the splendid and befitting termination of a career of glory. But this was not to be. The aged hero was removed from his labours by an enemy that commits more ravages than the sword—an enemy that no valour can resist beyond the appointed hour; and had ceased to exist at a time when all England and France were putting up prayers for his recovery from an indisposition which was believed to be temporary, and indulging the hope that the noble and patient heart, which had borne the brunt and peril of the early hour, would be rewarded ere it ceased to beat by the consummation of previous victories ere the evening or the noon. But though the death of Lord Raglan lacked the characteristics that he himself, like any other soldier, would have chosen, had he been permitted to fix either its time or its manner, it was none the less honourable or noble, and none the less incurred in the fearless discharge of duty, and the cause of his country. There may have been more brilliant, as there have been more successful, generals; but history will confirm the opinion of his grateful contemporaries, that there never was a braver, a gentler, or more heroic spirit in the service of any nation. Though the impatience of ignorant criticism at home may at times have done him injustice; though folly, if not malevolence, may have launched its shafts against his venerable head, and perhaps caused him an amount of annoyance and vexation sufficient to shorten his days, or, at least, to embitter them with a sense of injury, he stood as brave amid English calumny as he did amid the rifle-bullets of the Russians. No word of complaint ever escaped his lips, or his pen. His placid serenity in circumstances that might have tried the temper of the best and wisest of men, had something in it ineffably touching and heroic. But the voice of envy and of ignorance has ceased. There is not a tongue in Great Britain or France to deny his virtue and his glory. Opinions differ as to the amount of his genius; but there is no difference as regards his unsullied honour, his matchless bravery, his stoical endurance, his enlightened patriotism, and his possession of every quality that adorns the character of the gentleman and the soldier no less than of the Christian. A rare thing in a general—and what his great master, Wellington, never acquired—he knew how to inspire affection, as well as respect and obedience. He was a fine specimen of an English gentleman in every quality for which English gentlemen are distinguished, and leaves a memory—

That will smell sweet, and blossom in the dust.

The war is yet young;—but it is instructive to observe what havoc Death has already made amongst the foremost men who have been concerned in it; not the Death which flies on the rifle, and hovers in a thousand shapes over the field of slaughter—but the Death still surer and more insidious—which works in the overwrought brain or the over-agitated heart. Russia has lost her Czar in the struggle, and France and England the two great generals that originally commanded their armies. And not one of these pre-eminent three died, as might have been anticipated, in the fray which the guilty ambition of the one provoked, and the duty of the other two compelled them to direct. All three yielded their breath on the bed of sickness, with frames weakened by anxiety and care, and the weight of a too-enormous responsibility. When the mind reflects upon these things, it asks itself what mighty head shall be next laid low? and what directing energy, now so potent in influencing the destinies of humanity, shall be next removed from amongst us—to be of no more account than the breath of yesterday, or the leaves of the last autumn? The death of the great and guilty Czar Nicholas taught the world a lesson of humility; that of the good Lord Raglan will teach a lesson equally impressive—a lesson as old as history, but as new as this morning and which will continue to "point the moral" and "adorn the tale" till the end of Time.

It would be as vain as it would be impertinent on the part of a public journal to attempt to offer condolences to the bereaved family of the deceased; but, for the sake of the English nation the journalist may point with pride to the proceedings in the two Houses of Parliament on Tuesday night, when the services of Lord Raglan were so feelingly and so unanimously recognised by his brave companions in arms, by the chiefs of political parties, and by the most illustrious and independent members of both branches of the legislature. If we have any fault to find with these proceedings, it is that the provision proposed is not more liberal. Lord Raglan was not wealthy, and at the call of duty gave up not only the repose which his age and long services entitled him to claim, but, as remarked by the Earl of Derby, in an eloquent tribute to his memory, "sacrificed, with a noble disinterestedness at the first call of the Government, prospects at home which might have secured to him considerable pecuniary advantage, and contributed in a large degree to the well-being of his family." But on this point it is needless to dwell. An allowance which has been deemed sufficient has been made for his widow, and his heirs for two generations; and the country, so far from begrudging it, would, if we mistake not, have gladly ratified it, had it been twice as liberal.

In one hope, very generally expressed in both Houses of Parliament, the nation will participate, unclouded by the slightest doubt of its realization;—the hope that the General who is to succeed Lord Raglan will know, as he did, how to cement by kindly feeling and cordial co-operation, the auspicious friendship subsisting between the Allied armies in the East, and the still more auspicious alliance between the French and English nations. Among the many merits of Lord Raglan it is not the least that he taught the English and French soldiers to love and respect each other. For this, also, his name will be long cherished in the grateful remembrance of two powerful nations. Such a man has not lived in vain. It is the boast and the privilege of England that we have yet many

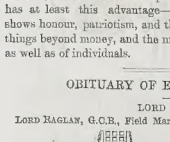
THE LATE LORD RAGLAN, COMMANDER OF THE BRITISH ARMY IN THE CRIMEA

like him—prepared to do as he did, with purity of heart and entireness of devotion. The war as it proceeds will bring them forth to the admiration and love of their countrymen, and prove to ourselves—where the truth most needs enforcement—that we are not, after all, a nation of mere shopkeepers. If war have many evils it has at least this advantage—it exalts the heroic virtues, and shows honour, patriotism, and the love of truth and justice, to be things beyond money, and the most precious possessions of states as well as of individuals.

OBITUARY OF EMINENT PERSONS.

LORD RAGLAN.

LORD RAGLAN, G.C.B., Field Marshal in the Army, and Commander-in-Chief of the British army in the Crimea, has fallen a victim to an attack of dysentery, at a most critical period of his military endeavours. His Lordship (so well known as Lord Fitzroy Somerset), the youngest son of Henry, fifth Duke of Beaufort, K.G., by Elizabeth, his wife, daughter of Admiral the Honourable Edward Boscawen, was born 30th September, 1788, and



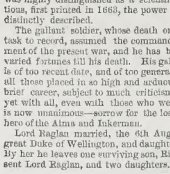
had not consequently completed his sixty-seventh year. Early in life he saw much service in the Peninsular War, and had a cross and five clasps for his distinguished conduct as Aide-de-Camp and Military Secretary to the Duke of Wellington, at Fuentes d'Onoro, Badajoz, Salamanca, Vittoria, Pyrenees, Nivelle, Nive, Orthez, and Toulouse. He was also present at Waterloo, and there lost an arm. For many years previous to his appointment as Master-General of the Ordnance, he acted as Military Secretary to the Commander-in-Chief, and performed the duties of that important office with the greatest satisfaction to the public. He was raised to the peerage in 1852, when he assumed the title of "Raglan," from an ancient inheritance of his family, acquired by Charles Somerset, first Earl of Worcester, K.G., in marriage with the Lady Elizabeth Herbert, daughter and heiress of William Earl of Huntingdon. The Castle of Raglan, in Monmouthshire, stoutly maintained for King Charles I. by Henry, the fifth Earl of Worcester, was amongst the very last places in England from whose battlements the Royal banner waved. The fifth Earl's son, Edward, Marquis of Worcester, from whom Lord Raglan was sixth in descent, was highly distinguished as a scientific discoverer; and in his work on inventions, first printed in 1663, the power and application of the steam-engine are distinctly described.

The gallant soldier, whose death on the field of duty it is our melancholy task to record, assumed the command of the British army at the commencement of the present war, and he has been its indefatigable leader amid all its varied fortunes till his death. His gallant course in our actual armed struggle is of too recent date, and of too general knowledge, to need detail. Like all those placed in so high and arduous a position, he was, during his but too brief career, subject to much criticism—to much that was hasty and unfair: yet with all, even with those who were over-ready to scrutinise, the feeling is now unanimous—sorrow for the loss and reverence for the memory of the hero of the Alma and Inkerman.

Lord Raglan married, the 6th August, 1814, Emily Harriet, niece of the great Duke of Wellington, and daughter of William, late Earl of Mornington. By her he leaves one surviving son, Richard William FitzRoy, second and present Lord Raglan, and two daughters.

THE EARL OF CALEDON.

JAMES DU PRE ALEXANDER, third Earl of Caledon, Viscount Caledon, and Baron Caledon, was the only son of Dupre, the second Earl, by his wife, Lady Catherine Yorke, second daughter of Philip, third Earl of Hardwicke, and was born 27th July, 1812. He was formerly in the Coldstream Guards, and was with his battalion during the rebellion in Canada. He was elected M.P. for the county of Tyrone in 1837. In 1839, while serving with the army in North America, he succeeded to the Earldom and other family honours, on the death of his father. In 1841 he was elected a Representative Peer for Ireland. His Lordship married, the 4th September, 1845, the Lady Anne Gunnston,



youngest daughter of the late Earl of Verulam, by whom he leaves a youthful family of two sons and a daughter; his eldest child, Lord Alexander, just nine years of age, succeeding to the Earldom and extensive family estates. The late Earl was Colonel of the Tyrone Militia.

SIR JOHN POWER, BART.

THIS much-respected and public-spirited Baronet—one of the most honoured citizens of the city of Dublin—died at his seat, Roebuck House, at the advanced age of eighty-four, on the 26th ult. His remains were conveyed to their last resting-place, in the vaults of Marlborough-street Cathedral, on the 28th ult., attended by a most numerous cortege of clergy, gentry, and people of all classes. Sir John was created a Baronet in August, 1841. He was a Deputy-Lieutenant of the County and City of Dublin, and also in the Commission of the Peace. By Mary, his wife, eldest daughter of Thomas Brenan, Esq., he leaves six surviving daughters, and one son, the present Sir James Power, second Baronet, who resides at Edermine House, in the county of Wexford, and long sat in Parliament for that shire. Sir James is married to Jane, daughter and coheir of John Hyacinth Talbot, Esq., of Talbot Hall, co. Wexford—a descendant of the great house of Shrewsbury.

THE HON. CRAVEN FITZHARDINGE BERKELEY, M.P.

THIS gentleman, who died on the 1st inst., at Frankfort, was the youngest son of Frederick Augustus, fifth Earl Berkeley, by his wife, Miss Mary Cole: he was born in May, 1805, and married, first, the 16th September, 1830, Miss Augusta Jones, daughter of the late Sir Horace St. Paul, Bart., and widow of the Hon. G. H. Talbot (father of Lady Edward Fitzalan Howard). This first wife died in 1841; and he married, secondly, in 1847, Miss Charlotte, daughter of the late General Denzil Onslow, and widow of George Newton, Esq., M.P. Hon-pain Mr. Craven Fitzhardinge Berkeley was formerly in the 1st Life Guards: he was Member of Parliament for Cheltenham from 1832 to 1847, and also in the present Parliament. He leaves issue an only daughter, born in 1843.

JAMES SILK BUCKINGHAM, ESQ.

THIS gentleman, known as a writer, traveller, lecturer, and politician, died on the 30th ult. at his residence, Stanhope-lodge, St. John's Wood. Mr. Buckingham was born at Falmouth, in 1786, and began life as a sailor. After commanding several vessels, he flung up his employment rather than act against his principles in conveying slavery, and he retired from the sea service. He then went to India, and, as a newspaper editor, criticised boldly and sharply the conduct of the Government there. This drew upon him the wrath of the ruling power: his journal was stopped, and he was forced to leave the country. He retaliated for this bitterly and justly. The agitation he raised against the system of managing public affairs in India brought on all the reforms of the Company's administration that have since had the sanction of Parliament. Eventually Mr. Buckingham became reconciled to the East India Company; which, in compensation for its former acknowledged severity, accorded him a pension. As a traveller in the East Mr. Buckingham certainly attained his fairest and highest eminence. His published works of travels in Palestine among the Arab tribes, and in Mesopotamia, have become standard books of utility and interest. Mr. Buckingham tried to establish two literary papers in London, the *Sphynx* and the *Athenæum*. These, in his hands, both failed; but the latter, at a reduced price, subsequently got into circulation. He also endeavoured to found a Club, on a large and extensive plan, but this met with much unfair opposition, and did not thrive. As a politician, Mr. Buckingham represented the borough of Sheffield in Parliament for six years, from the time of the passing of the Reform Bill. He also lectured, with great effect, for the Anti-Corn-law League. His various lectures on other subjects proved generally popular. Latterly, Mr. Buckingham had a pension from the Civil List of £200 a year. On the whole, however, Mr. Buckingham's career was not so fortunate as it should have been. He was a man of great natural ability, energetic, industrious, and independent: but the very variety of his avocations proved a check to their prosperity. His manifold struggles led to unprofitable results, and he never reached a position commensurate with his worth and reputation.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

An event of the most painful importance to the literary, the dramatic, and the *grand monde* is now the subject of universal and personal interest and regret. This is the death of Mdme. Emile de Girardin, wife of one of the most remarkable men of the age as *publiciste* and politician; and herself a woman whose genius, beauty, and great qualities of head and heart, placed her in the foremost rank of modern celebrities. Delphine Gay, Madame de Girardin, was the daughter of the well-known Mdme. Sophie Gay, and at an early age became herself remarkable for her poetic talents, her wit, and her beauty. She formed one of the chief attractions in the *salon* of her mother; and among her friends and the admirers of her genius ranked Hortense, the mother of the present Emperor. The *Presse* publishes a most affectionate letter addressed to her by the ex-Queen in reply to the announcement of her marriage. In her earlier works, "Judith" and "Cléopâtre," Mdme. de Girardin adopted the high classic style of tragedy. Both of these were produced at the Théâtre Français, played by Mdlle. Rachel, and have taken rank among the standard tragedies of France. Later she produced "Lady Tartufe"—a comedy of modern manners, of whose European reputation we have no need to remind our readers; "C'est la Faute du Mari;" "La Joie fait Peur," a single act, where the attention of the audience hangs suspended in breathless, tearful interest over—what? an incident hardly in itself sufficiently important to bear the name, since the *dénouement* is known from the commencement of the piece; and, lastly, "Le Chapeau de l'Horloger," a little piece, so sparkling with gaiety, wit, and broad humour, that peals of laughter greet every scene, Madame de Girardin also wrote a series of *feuilletons* under the signature of the "Vicomte de Launay," where the peculiar touch-and-go wit of the best French school of that class shone pre-eminent; "La Canne de M. de Balzac," "Marguerite, ou Deux Amours," and some other specimens in prose and verse, all remarkable in their various styles. It is more than rare, it is almost unique, to find in the history of literature a writer, more especially a woman, whose productions take in the whole range of class, style, and character like those of this remarkable woman: heroism and frivolity; deep passion and keen wit, sombre melancholy and broad humour, wisdom and folly, the most dashing sketches and the finest and most delicately-finished delineations, tears and laughter, alternately pass through the brain, and flow from her pen with equal felicity and facility. Her conversational powers were fully on a par with her genius as a writer. How often has it been our lot to listen delighted to alternate bursts of fine eloquence and of childish gaiety, to the greatest dissertations and to the quaintest and most comical remarks on the most trivial subjects! Her quickness of repartee never failed her; and, when she met with a kindred spirit, it was a perfect *feu d'artifice* of brilliancy. A devoted wife to the man whose name she was so proud to bear; a true, earnest, unswerving friend; an honest and courageous spirit in all circumstances; a judicious and liberal encourager of merit and talent, she held a position in Parisian society which she leaves, and which will, in all probability, long remain, empty. Her funeral, which took place on Monday, was the rendezvous of all that the nation boasts of worth and wit. Jules Janin pronounced a valedictory discourse over the grave, which was succeeded by one from the Abbé Mitraud, the author of a celebrated book, "La Nature des Sociétés Humaines;" and tears and regrets, the most merited and the most sincere, bore a last testimony to the memory of this very memorable woman, thus taken away in the prime of her talent, her celebrity, and her prosperity, by an illness which, though of long standing, but lately manifested the fatal character which distinguished it, and, during this period, caused the most intense sufferings.

The absence of the Empress prevents anything more than small *réunions* at the Court; and, indeed, the arrival of the heat, coming most happily and opportunely, is likely to put a stop to indoor gaieties.

Agriculturists begin to recover their spirits a little, though there seems to be no doubt that the safety of the vines and the lowland crops, which have been most injuriously affected by the inundations, is seriously compromised. Potatoes are, however, incomparably finer and more abundant than they have been for many years past, and promise, in some degree, to repair the loss of other produce.

It is said that a project exists on the part of a sort of company here to purchase or hire twenty of the most admired (by the company) pictures in the Exposition des Beaux-Arts, belonging to private individuals, and to exhibit them during two years in all the principal towns of Europe and America. Among these are named the "Jeanne d'Arc" and the "Vénus Anadyomène," of Ingres; "L'Evêque de Liége" and the "Convulsionnaires de Tanger," of Delacroix; "La Défaite des Cimbres," and "Les Singes," of Decamps; others of French artists; one of a Belgian, and one—we believe the "Order of Release"—of Millais. Six yet remain to be chosen to complete the number.

At the Grand Opera the new work of the Duke Ernest de Saxe-Coburg is under rehearsal. Roger is to play the principal part.

Mdlle. Rachel, attended by her three sisters, her brother, her father, and a small troupe, is, it appears, to start this month for London, where she will give a certain number of representations, after which, *quoi qu'il advienne*, she proposes proceeding to America, where may much luck attend her.

Mdlle. Ristori—"La Ristori"—has, if possible, a greater success in *Marie Stuart* than in her former rôles. At the first representation M. de Lamartine was so much affected by the grand scene between *Marie Stuart* and *Elizabeth*, in the third act, as to be obliged to leave his box.

Mdlle. Georges made her third, and she declares last, reappearance on Thursday night at the Odéon, in her great part of *Cléopâtre* in "Rodogune." We have already noted the two first of these *reapparitions*; the third resembled them.

It is rumoured that Madame George Sand has placed in the hands of Buloz, who is now in Paris, the *livret* of an opera in three acts.

Madame Rose Chéri is in a position that, for the moment, compels her to resign her rôle of the *Baronne* in "Le Demi Monde;" Madame Plessy is about to reappear at the Théâtre Français, in "Tartufe" and "La Ligne Droite." A comedy by Regnier and Paul Foucher, entitled "La Joconde," has been unanimously accepted at this theatre, and will be the first new piece in which the celebrated actress will perform. Regnier himself, Bressant, Geffroy, Got, and Madame Madeleine Brohan will take the other parts.

THE FRENCH EMPEROR'S SPEECH.

The Legislative Session was opened on Monday by a speech from the Emperor to the members of the Senate and the Corps Législatif, who were assembled in the Salle des Maréchaux, at the Tuileries:—

Messieurs les Sénateurs,
Messieurs les Députés,—

The diplomatic negotiations commenced during the course of our last session already made you foresee that I should be obliged to call you together when they came to a termination. Unhappily the Conferences at Vienna have failed in procuring peace, and I come again to appeal to the patriotism of the country and to your own. Were we wanting in moderation in settling the conditions? I do not like to examine the question before you.

One year already had passed since the commencement of the war, and already France and England had saved Turkey, gained two battles, forced Russia to evacuate the Principalities, and to exhaust her forces in the defence of the Crimea. We had, moreover, in our favour the adhesion of Austria and the moral approbation of the rest of Europe. In that situation the Cabinet of Vienna asked us if we would consent to treat upon bases vaguely formulated. Before our successes a refusal on our part seemed natural. Was it not to be supposed, forsooth, that the demands of France and England would increase in proportion to the greatness of the struggle and of the sacrifices already made? Well, France and England did not turn their advantages to account, or even make the most of the rights given to them by previous treaties, so much had they at heart to facilitate peace, and to give an unchallengeable proof of their moderation. We resolved ourselves to ask, in the interests of Germany, the free navigation of the Danube, and a breakwater against the Russian flood which continually obstructed the mouths of that great river. We demanded, in the interests of Austria and of Germany, a better constitution for the Danubian Principalities, that they might serve as a barrier against these repeated invasions of the North. We demanded, in the interest of humanity and justice, the same guarantees for the Christians of every confession under the exclusive protection of the Sultan. In the interests of the Porte, as well as in those of Europe, we demanded that Russia should limit to a reasonable degree, sufficient to shield her against any attack, the number of her ships in the Black Sea—a number which she could only maintain with an aggressive object. Well, all these propositions, which I may call magnanimous from their disinterestedness, and which were approved in principle by Austria, by Prussia, and by Russia herself, have evaporated in the Conferences. Russia, who had consented, in theory, to put an end to her preponderance in the Black Sea, has refused every limitation of her naval forces, and we have still to wait for Austria to fulfil her engagements, which consisted in rendering our treaty of alliance offensive and defensive if the negotiations failed. Austria, it is true, proposed to us to guarantee with her by treaty the independence of Turkey, and to consider, for the future, as a *casus belli* an increase of the number of Russian ships of war exceeding that before the commencement of hostilities. To accept such a proposition was impossible, for it in no manner bound Russia; and, on the contrary, we should apparently have sanctioned her preponderance in the Black Sea by treaty.

The war had to follow its course. The admirable devotion of the Army and Navy will, I trust, soon lead to a happy result. It is for you to provide me with the means to continue the struggle. The country has already shown what resources it has at its command, and the confidence it places in me. Some months since it offered me 1,700,000,000 fr. more than I demanded. A portion of that sum will suffice to maintain its military honour and its rights as a great nation.

I had resolved to go and place myself in the midst of that valiant army, where the presence of the Sovereign could not have failed to produce a happy influence; and, a witness of the heroic efforts of our soldiers, I should have been proud to lead them: but serious questions agitated abroad, which have always remained pending, and the nature of circumstances demanded at home new and important measures. It is, therefore, with regret that I abandon the idea.

My Government will propose to you to vote the annual Recruitment Bill; there will be no extraordinary levy, and the bill will take the usual course necessary for the regularity of the administration of a Recruitment Bill.

In conclusion, gentlemen, let us pay here, solemnly, a just tribute of praise to those who fight for the country; let us mingle our regrets for those whose loss we have to deplore. So great an example of unselfishness and constancy will not have been given in vain to the world. Let us not be discouraged by the sacrifices which are necessary, for, as you are aware, a nation must either abdicate every political character, or, if it possesses the instinct and the will to act conformably to its generous nature, to its historical traditions, to its providential mission, it must learn how to support at times the trials which alone can temper it and restore it to the rank which is its due. Faith in the Almighty, perseverance in our efforts, and we shall obtain a peace worthy of the alliance of two great nations.

RUSSO-CARLIST INTRIGUES IN SPAIN.

Private accounts from the north of Spain still speak of the apprehensions of the Government about Catalonia, and the desperate efforts making by Russian agents to get up an outbreak in that part of the Spanish territory. Cabrera, who is said still to be in the country, is, it appears, most anxious to raise the standard of insurrection on the theatre of his former deeds of ferocity, and believes in the favourable issue of the attempt; while Elio, whom a point of honour rather than any confidence in success, immediate or ormond, forces to the mountain, is very far from being so sanguine. A small number of the French Legitimists are most impatient for the commencement, and, on a recent occasion, an interview took place in London for that purpose, at which a Russian agent of high position is said to have been present, and to have promised every assistance his Government could give. The correspondence between the parties is said to be in the hands of the Spanish and French Governments. The latter is much praised for the frank and loyal exertions it makes to prevent the renewal of civil war in the Peninsula, and its agents continue to exercise the greatest vigilance in the departments close to the frontier. Within the last two or three days 370 Carlist refugees have been arrested by the French police, and transferred to the interior.

A letter from Madrid says—"There is not the least doubt that the Russian Government has supplied the Carlists with funds for the purpose of creating disturbances in Spain."

AMERICA.

The steam-ship *Africa*, which left New York on the 19th ult. arrived at Liverpool on Monday. The only political news of any importance relate to the proceedings of the Know-Nothing Convention of Philadelphia. The Northern party having been defeated had organised a separate meeting, and issued an address to the people. They affirm the following principles:—

1. The unconditional restoration of the Missouri prohibition, by the admission of Kansas and Nebraska as free States.

2. The undisturbed exercise of the elective franchise by settlers in the territories.

3. A modification of the naturalisation laws in a national sense, spiritual freedom, and free Bible schools.

4. The intervention of the Legislature to put a stop to the importation of paupers and convicts on the American shores, and the representation at home and abroad of America by Americans.

In the regular convention a proposition to admit American Catholics to fellowship had been defeated after a warm debate.

The United States revenue cutter *Washington* had intercepted a vessel leaving the harbour of New York, with nearly sixty persons on board, enlisted, as it is alleged, for the Crimea. The fact was reported to the United States district attorney, but he referred the informant to the city authorities.

The accounts given of the growing crops continue to be of the most favourable character. The present yield of wheat and corn throughout the Union will be probably greater than in any previous season.

AUSTRALIA.

The Black Ball royal mail-ship *Lightning* (Capt. Enright) arrived in the Mersey on Saturday morning from Melbourne, with the usual mails, 260 passengers, and 69,060 ounces of gold. A nugget weighing 85 lb., found at the Forest Creek diggings, was also on board. The *Lightning* left Melbourne on the 11th April, in company with the *Briton*, for London, and the *Gipsy Queen*, for Liverpool. The commission appointed to inquire into the grievances existing on the gold-fields have published their report:—They advise the abolition of the licence fee, and the substitution of an export duty. The receipts of gold by escort at Melbourne for the quarter ending March 31, show a decrease of 5785 ounces when compared with the corresponding period of 1854. The shipments from Melbourne for the same time were 119,372 less than in 1854. Several new and apparently productive gold-mines have been discovered near Melbourne and Geelong respectively. A magnificent mass of pure gold weighing 84 lb., from Castlemaine, and one of 40 lb. from Ballarat, had arrived at Melbourne by escort. Trade at Melbourne was improving. Gold at Melbourne was in increased demand, and quoted £3 16s. 6d. per ounce. In the labour market the demand for agricultural servants was on the increase, and wages had consequently an upward tendency.

SWEARING-IN OF THE NEW JUDGE.—Mr. Willes, of the Home Circuit, was sworn in as one of Her Majesty's Judges, on Tuesday, in the room of Mr. Justice Maule, retired, before the Lord Chancellor, at the House of Lords, in his private room. The new Judge had the reputation of being one of the ablest and soundest lawyers at the English bar. He is the son of the late Dr. Willes, of Cork, and was educated in Trinity College, Dublin. Mr. Willes will be the second Irishman who, within the last few years, has been elevated to the English Bench, the other being Mr. Baron Martin, son-in-law of Chief Baron Pollock.

SANATORY IMPROVEMENTS.—Orders have been issued by the Board of Health to the Commissioners of Sewers for the Metropolitan District to construct an extensive range of earthenware drains throughout various overcrowded parts of the east end of London. The workmen have already commenced extensive operations in New and Old Nicholl-street, Bethnal-green, Turk-street, Virginia-row, Teap-street, Waterloo-town, and other places, where the poor inhabitants have hitherto been without drainage, although heavy sewer rates have been rigorously exacted for many years.

ROBBERY OF PLATE AT SIR FREDERICK THESIGER'S, M.P.—A robbery of plate took place this week at the residence of Sir Frederick Thesiger, M.P., No. 1, Bryanston-square, Marylebone, consisting of 39 silver table-spoons, 19 silver dessert table-spoons, 20 table dessert-forks, &c.—crest, a dove with an olive branch.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS. MONDAY.

The LORD CHANCELLOR read a Royal Message, which stated in the following terms her Majesty's most gracious intention to confer some signal mark of her favour upon the widow and successor of Lord Raglan, in consideration of his great and brilliant services:—

VICTORIA REGINA.—Her Majesty, taking into consideration the great and brilliant services performed by the late Barony James Henry Lord Raglan, Field Marshal in her Majesty's Army, and Commander-in-Chief of her Majesty's forces at the seat of war in the East, in the course of the hostilities which have taken place in the Crimea, and being desirous, in recognition of these and his other distinguished merits, to confer some signal marks of her favour upon his widow, Emily Harriet Lady Raglan, and upon his son and successor to the title, Richard Henry Lord Raglan, and the next surviving heir male of the body of the said Richard Henry Lord Raglan, recommends the House of Lords to concur in such measures as may be necessary for the accomplishment of this purpose. V. R.

TICKET-OF-LEAVE MEN.

Lord ST. LEONARDS called attention to the ticket-of-leave system. He considered the experiment a failure, and thought the system would produce great mischief if not carried out more efficiently.

Earl GRANVILLE, admitting that there was some grounds for alarm, thought that the evils of the system, which, in his opinion, had succeeded better than could have been expected, were exaggerated. He, however, promised that the most serious attention of Government should be directed to the subject.

The LORD CHANCELLOR said that in computing the number of persons out on tickets-of-leave, proper allowance was not made for the changes in the law.

The Duke of CAMBRIDGE observed that the condition of the Army ought to be raised as much as possible, and deprecated the enlistment of ticket-of-leave men.

HOUSE OF COMMONS. MONDAY.

THE SUNDAY TRADING BILL.

Lord R. GROSVENOR stated, in reply to a question from Lord Goderich, that though he did not like to be bullied out of a measure which in his conscience he believed to interfere with no man's opinion, religious or otherwise, still as there was little hope of passing the bill at that late period of the Session, he did not think it advisable to keep up the present excitement with regard to the Sunday Trading bill, and he would move that the order of the day for its further progress be discharged.

Mr. OTWAY congratulated the noble Lord on the withdrawal of the bill: and he asked the right honourable the Secretary of State, whose vacillation had caused the excitement, whether he intended to liberate the 100 persons taken into custody yesterday?

Sir G. GREY denied that he had vacillated at all. He was not responsible for the bill, and it was his duty to prevent rioting in the park. There were only seventy-one persons taken into custody, and he certainly did not mean to interfere with the usual course of justice on the rioters.

In answer to other questions from Mr. T. Duncombe, Mr. FOX, and others, Sir G. GREY rose again, and stated that he had received a report from the Police Commissioners, and no report had reached him that the police had exceeded their duty. The first inquiry as to their conduct would be made when the rioters were brought before the police magistrates; if it then appeared that a further investigation was necessary that inquiry would be gone into. The interference with the soldiers in the park had been referred to, but he might state that the officers of the regiment of the Guards to whom the soldiers in question had belonged had thanked the police for their conduct on the occasion.

Mr. G. VERNON bore testimony to the general good humour and forbearance shown by the police during the hours that he was in the park.

After some discussion from Mr. Roebuck, Mr. Wilkinson, and others, the subject dropped.

THE KAFFIR MEDALS.

In reply to Mr. De Vere, Mr. PEEL explained that the medals for the Kaffir War were in course of preparation, and would very soon be distributed.

DESPATCHES FROM THE CRIMEA.

In answer to Mr. Deedes, Lord PALMERSTON stated that despatches from the Commander-in-Chief relating to the affair of the 18th had been received this afternoon, and would appear in the evening's *Gazette*.

SCOTTISH EDUCATION BILL.

The House went into Committee on the Scottish Education Bill.

On the 4th clause, some discussion took place on the mode of examining schoolmasters. Mr E. LOCKHART moved a new clause, to limit the examination of the inspectors to the literary qualifications of schoolmasters only, intending at a future stage to continue the superintendence of the Established Church in the examination of religious qualifications. The LORD ADVOCATE opposed both amendments, not so much on their own account as because of their facilitating the future amendment continuing the power to the Established Church. On a division on the first of these amendments, the Government was beaten by a majority of 93 to 84, on the second the numbers were equal, 87 to 87, when the Chairman gave the casting vote in favour of the amendment, to leave the whole clause open to future discussion.

The other clauses were agreed to, after a lengthened discussion, after which the House resumed, and the report was ordered to be brought up on Thursday.

SIR JOHN PAKINGTON'S EDUCATION BILL.

Sir J. PAKINGTON moved that the order of the day for resuming the adjourned debate on his Education Bill be discharged. One reason for his doing this was the evident unwillingness of the House to go on debating a question which it was not intended to pass this Session. But another reason was the disadvantage to which this bill was exposed in being discussed at intervals so wide apart—the first debate having taken place in May, the second in June, and the third would be in July. But he hoped that in the course of next session this important question would be settled on the principles of his bill.

Lord J. RUSSELL said he considered the education given in this country as superior in its quality to that given in most of the Continental States of Europe, yet what he proposed therein was to afford a broader universal their present system of education rather than to adopt a wholly new system. He might add that the educational system of the New England States of America, though suited to that country, would hardly answer here. He thought, therefore, England had better take her own course. With regard to the Committee of Council, he intimated that the President of Council should be recognised as the Minister for Education, and that an educational committee of the Council, holding the rank of Privy Councillor, should have a seat in that House. The details of course must be left for the consideration of the Cabinet, but he might state that when the names of Privy Councillors were added to meet the views of large towns, the Government would be prepared to buy a scheme for the regulation of the educational department before the House. He also withdrew his bill.

Mr. M. GIBSON, after massing on the ultimate necessity of adopting the secular principle in any system of national education, consented to follow the example set him, and withdrew his own measure, known as the Free Schools Bill.

Mr. Grogan, Mr. Vernon, Lord J. Manners, and other members having briefly spoken, the motion was agreed to, and the three Education Bills withdrawn for the present session.

The orders of the day for all three bills were then discharged.

The Partnership Amendment Bill went into committee *pro formâ*, for the purpose of moving amendments. The same step was taken with the Limited Liability Bill, to be recommitted on Monday next.

HOUSE OF LORDS.—TUESDAY.

LORD RAGLAN'S SERVICES.

After the Clerk had read her Majesty's most gracious Message informing their Lordships of her intention to confer a signal mark of her favour on the widow and heir of the late Lord Raglan,

Lord PANMURE rose to move an Address in answer to her Majesty's Message, and, in doing this, reminded the House of the distinguished services and glorious career of the soldier whose memory they were now called on to honour. In his death it might be truly said that all England had to lament the loss of an intrepid soldier, a great commander, an accomplished gentleman, and a noble and distinguished citizen. Lord Panmure concluded by moving his Address, which was a mere echo of the Message.

Lord DERBY was anxious to take the earliest opportunity of expressing his concurrence in the graceful tribute which Lord Panmure had paid to the memory of the gallant commander whose career had shed additional lustre on the annals of the noble house from which he sprang. Of his military qualities it would become him Lord Derby to speak, but he would assert that few men placed in the position recently filled by Lord Raglan would have so completely overcome the difficulties and embarrassments of a divided command, and thus secured the feelings of mutual confidence and goodwill which happily existed between the Allied armies. In conclusion, he begged most cordially to support the Address.

Lord HARDINGE, after an intimacy of fifty-six years, was anxious to bear testimony to the great merits of Lord Raglan, whose powers and abilities he was convinced were much higher than they were commonly supposed to be.

The Duke of Cambridge and Lord Cardigan in turn declared their conviction that Lord Raglan had evinced great tact and capacity in a most difficult position, and were followed by Lord Galloway, the Duke of Cantire, Lord Ellesmere, Lord Granville, and Lord Brougham, who all gave in the highest terms of Lord Raglan's merits.

The motion was then agreed to, and their Lordships adjourned.

HOUSE OF COMMONS.—TUESDAY.

The House discussed, in Committee, the remaining clauses of the Metropolis Local Management Bill and the early clauses of the Passengers' Act Amendment Bill.

THE ORDER OF THE BATH.

Lord PALMERSTON said the Order of the Bath would be conferred without reference to the projected Order of Merit; and that, in the cases of recommendations for the Order of the Bath in which death should intercept it, the names of the parties would be published, with a record of the recommendation and of the reason why the order was not actually conferred.

LORD RAGLAN'S SERVICES.

The House having resolved itself into a Committee, and the Message of her Majesty with reference to the family of the late Lord Raglan having been read,

Lord PALMERSTON, premising that he had to perform one of the most painful duties that could devolve upon the humblest subject of the Crown—one, however, which would secure the sympathy of the House—said it was his intention to propose, in furtherance of her Majesty's wishes, that a pension of £1000 a year should be granted to Lady Raglan, and £2000 a year to the present Lord Raglan, with remainder to his son. It was unnecessary, he observed, to expatiate upon the merits of the late Lord Raglan, whose whole life had been devoted to the service of his country, and who left at his person a visible token of his readiness to expose his life upon the field of battle. When the command of the army now in the Crimea was offered to him, he might have declined it on the plea of advancing age and important duties at home, but, with the spirit of a soldier, he did not hesitate an instant in making every personal sacrifice to the call of duty to his country and his Sovereign. The noble and gallant Lord had in this command to contend with the greatest difficulties; and, although he had the satisfaction at last of seeing himself at the head of one of the most magnificent armies that had ever quitted the British shore, it must have caused a severe pang to a heart like his to find that his brilliant hopes could not be realised. In addition to his gallantry, his other qualifications eminently fitted him for the situation in which he was placed. The gentleness of his nature, his conciliatory disposition, and his consideration for the feelings of others contributed to knit in the bonds of companionship two armies which had hitherto known each other only as opponents in the field of battle. He moved resolutions to give effect to his proposition.

The motion was seconded by Mr. DISRAELI, who, in an elegant tribute to the late Lord, observed that his qualities were remarkable, and that it might be doubted whether they could be supplied by any of his successors in command.

Sir Dr. L. EVANS added his warm, cordial, and most earnest concurrence, and was followed by Admiral Walcott and Lord J. Russell.

Mr. M. GIBSON took this constitutional opportunity, he said, to make some inquiry of the Government in reference to the policy they were now pursuing in the East. He cordially concurred in the motion, and thought Lord Raglan had been unfairly dealt with. Adverting to the circular of Count Buol, he wished, as Lord J. Russell had admitted that circular to be correct as regarded him, to have some explanation from Lord John. He adverted likewise to the excesses committed at Kertch.

Lord PALMERSTON said he differed from Mr. Gibson as to the fitness of this occasion to enter upon such a discussion. He would not be led by any taunts or challenges of Mr. Gibson or his friends to mix up with a subject which ought to receive the undivided attention of the House the acrimony or party.

The resolutions were then agreed to *nem. con.*

Upon the Speaker resuming the chair,

Mr. GIBSON again asked Lord J. Russell to explain to the House whether the views he now entertained were the same as those he had expressed when Ambassador at Vienna?

Lord J. RUSSELL said he should defer his answer until the question of the policy of the Government was formally before the House. In the mean while, all he should say was, that Mr. Gibson had totally misrepresented what he had said.

Mr. RICH rose to move a resolution on the subject of Army promotion, and was proceeding in his speech when the House was counted out, shortly after half-past seven o'clock.

HOUSE OF COMMONS. WEDNESDAY.

The second reading of the Truck Act Amendment Bill was fixed for to-day, but on the order being called it was discharged.

The House went into committee on the Mortmain Bill, and the various clauses were agreed to with some verbal amendments.

The Burial of Poor Persons Bill was read a second time, and ordered to be committed on Thursday.

The Dwelling-houses (Scotland) Bill and the Stock in Trade Bill were read a third time and passed.

The Coal-mines Inspection Bill passed through Committee.

The Endowed Schools (Ireland) Bill also passed through Committee, and the report was ordered to be received on Thursday.

The Queenborough, &c., Commissions Continuance Bill was read a third time and passed.

The Dissenters' Marriages Bill passed through Committee, and was ordered to be reported on Monday.

The Duchy of Lancaster Lands Bill was read a third time and passed.

HOUSE OF LORDS.—THURSDAY.

INCREASE OF PAY TO THE ARMY.

Lord PANMURE, in reply to the Earl of Ellenborough, said that since he had announced the intention of the Government to grant to the soldier engaged in field operations an increased pay of one shilling a day, to be invested for him in the Savings-bank, he had been informed by high military authorities that unless the soldier got such an addition into his own hands the plan would not be likely to succeed. In the face of such representations he did not think it would be prudent to resort at once to so large an expenditure of the public money at the risk of failure in effecting the object which he had in view. On the other hand, he thought that the payment of the additional shilling a day into the hands of the soldiers would endanger the discipline and general subordination of the Army. Instead, then, of carrying out the plan he had submitted, he proposed to pay into the hands of the soldier as an extra field allowance —precisely as they paid an extra field allowance to the officers—sixpence a day. In respect to the other sixpence, he proposed that the soldier should have the benefit of the arrangement which existed in the Navy, by which he would be enabled to allot the whole or any part of such sixpence to his family or relatives. He proposed that in the event of such sixpence not being allotted by the soldier, the commanding officer should have the power, under certain circumstances, of stopping this money, but that it should be invested for the soldier's benefit, and not be forfeited unless the soldier was condemned by court-martial. The noble Lord then referred to other arrangements that would be made, all tending to the advantage of the soldier.

The Earl of Ellenborough and the Duke of Cambridge severally expressed their opinion of those arrangements.

The bills upon the paper were advanced a stage.

HOUSE OF COMMONS.—THURSDAY.

At the early sitting the House was occupied in Committee with the consideration of the Nuisance Removal Bill. Fifteen clauses of which were agreed to.

The House resumed at six o'clock.

Mr. WILSON, in reply to Mr. Ewart, stated that the quantity of coal supplied from Hernösand and other places on the south coast of the Black Sea was quite sufficient for the entire consumption of the English and French navies

THE LATE DEMONSTRATION IN HYDE-PARK.

Sir G. GREY, in reply to Mr. R. Phillimore, stated he was not aware that there was occasion for any special inquiry into the conduct of the police in Hyde-park on Sunday last. From all he had heard their general conduct had been quite proper; though there might have been specific cases in which they exceeded their duty. Complaints of that character would of course be investigated upon complaint being made.

Mr. T. DUNCOMBE presented petitions from several individuals complaining of the violence of the police towards themselves and others; and praying for inquiry. The hon. gentleman was about commenting upon the allegations of one of these petitions, when Mr. WALPOLE spoke to order, observing that the petition did not come within the class which could be properly discussed upon its presentation.

Mr. DUNCOMBE contended that he was in order.

The SPEAKER, however, decided that the hon. member was out of order. The petition did not relate to a grievance which required an immediate remedy.

Mr. T. DUNCOMBE nevertheless persisted, when

Lord PALMERSTON rose to order, and he in his turn was called to order by Mr. T. Duncombe.

The SPEAKER, on being again called upon, held that it would be disorderly in Mr. Duncombe to discuss the petition.

Mr. DUNCOMBE said he would then move that the House do adjourn, which would put the discussion in order. He was quite sure that if the House did not attend to those petitions, they would regret the proceeding before many days were over. The hon. member was proceeding to read cases, to prove that the allegations in the petitions were well founded, when

Lord PALMERSTON spoke to order, observing that the question before the House was, that the House do now adjourn. The hon. gentleman was certainly not speaking to that question.

Mr. ROEBUCK contended that the course taken by Mr. Duncombe, upon the question of adjournment, was consistent with the practice of the House.

The SPEAKER, having stated the question, expressed his opinion that, unless hon. members kept to the question, the authority of the rules by which the House was governed would be broken down

Mr. WILLIAMS having made a few observations,

Mr. T. DUNCOMBE again rose, and being received with cries of "Spoke, spoke!" said he was in that House in the discharge of his public duty, and had accordingly no wish to break down the rules by which its proceedings were governed. He had been requested to present those petitions and to make those statements, all of which could be proved before a Select Committee, for which he would move, for the sake of the peace and tranquillity of the town on Sunday next. If the statements he had made were incorrect, the Home Secretary could refute them; but he was prepared to prove them. Having read some letters from parties describing the violence of the police, the hon. gentleman repeated that something must be done before Sunday next, if the Government wished the peace to be preserved. The people would be satisfied with a Committee of Inquiry, but such a Committee would not remain content if the matters were to be hushed up. The bill had been withdrawn; but after what had occurred in the House on Tuesday night, he was determined to go to Hyde park on Sunday next, unless inquiry were granted, in great numbers, and to go armed. If they had been armed last Sunday there would certainly have been loss of life. In conclusion, he asserted that either inquiry must be granted or the Park must be closed on Sunday.

Sir G. GREY complained of the sweeping allegations made against the police, and admitted the right of the public to go to the Parks, but certainly not to act in such a way as was calculated to alarm any class of her Majesty's subjects.

After a few words from Mr Roebuck, Lord Ebrington, and Mr. V. Scully, the motion for adjournment was withdrawn, and the subject dropped.

TENANTS' COMPENSATION (IRELAND) BILL.

The House resolved itself into a Committee upon this bill; and the 14th clause, which involved the question of compensation for retrospective improvement, was under discussion during the remainder of the night.

NEWSPAPERS UNDER THE NEW ACT.—The shops of the various newsvenders of the metropolis and the General Post-office presented curious scenes of confusion on the occasion of the first double delivery of the journals. We hear of the sacrifice of a vast number of the weekly papers at St. Martin's-le-Grand, at least they could be delivered only on conditions which rendered their disposal on the better fate. In thousands of instances the postal directions to fold the papers so as to show the stamp had been disregarded, and the postal charges of 1s. 3d. and 1s. 6d. per copy were made. In other cases the papers and supplements (unstamped) were found, at the last hour, to be above the bulk carried by the penny postage stamp. Many of the newsvenders declare that they can only "hope" that their subscribers will not be disappointed. The papers were not collected early almost all the week, upon the official waiters

JOHN LAMB, the well-known agricultural correspondent of the *Northern Whig*, in communicating observations made in his spring tour, states that about thirty-two years ago we had quite as late a spring as the recent one, and that the harvest was one of the most abundant he ever witnessed.

ROYAL THAMES YACHT-CLUB SCHOONER MATCH.

In the year 1853 the Royal Thames Yacht-club instituted an annual schooner match in the Thames, and the prize in that year was won by the *Rosalind*. In the year 1854 there were not sufficient vessels entered to make up a match. This year the 26th of June was fixed upon for the match, and the following vessels entered:—

Station.	Name.	Owner.	Time
1.	Dawn	T. Brodwood, Esq.	7
2.	Shark	W. Carling, Esq.	7
3.	Mayfly	G. P. Holden, Esq.	7
4.	Wildfire	Sir Percy Shelley	7

The course was from Blackwall, near Greenwich, round the Mouse Light, and back. Ten guns allowed for tonnage. The prize was a very handsome silver-gilt vase, value £100, made by Messrs. Garrard. The *Dawn* did not start. The morning of the match was rather gloomy, and there had been a fresh breeze, which, however, died off, and when the vessels started there was a very light breeze from the N.N.W., and one hour ebb. The vessels were stationed off Rosherville pier, the *Shark* being next to the Kent shore. The *Mayfly* made a very good start, and was the first to get off, followed by the *Shark*, the *Wildfire* some little distance astern. As soon, however, as the vessels got the sails fairly on them the *Shark* took the lead. At 1.45 the *Shark* passed the Nore, the breeze again freshened, and the jib topsails were taken in, the *Shark* being now about three-quarters of a mile ahead of the *Mayfly*, and the *Mayfly* about a mile ahead of the *Wildfire*. The vessels rounded the Mouse as follows:—

	H. M. S.		H. M. S.
Shark	2 24 15	Wildfire	2 40 20
Mayfly	2 34 15		

The leading vessel having thus run twenty-nine miles in two hours and a half. The wind at this time was very light, and of course made the time between the vessels greater than it would otherwise have been; the sun shone out brightly, and the sea was perfectly smooth. The wind continued variable both in strength and direction, and the vessels made occasional tacks towards the Essex shore, making, however, much more progress than appeared to the impatient spectators; and the flag off Rosherville was finally passed as follows:—

	H. M. S.		H. M. S.
Shark	5 43 0	Wildfire	7 8 30
Mayfly	5 43 30		

The distance, with tacks, being about sixty miles, and having been performed by the *Shark* in 6h. 49m. The owner of the *Shark* was immediately summoned on board the Club steamer, and the vase was presented to him by the Vice-Commodore, R. Green, Esq., who on this occasion officiated, the Commodore being unavoidably absent. The *Princess of Wales*—a fine large vessel, with a very attentive captain and civil crew was engaged for the members of the Club and their friends, who mustered to the number of about 250, ladies included. The band of the Royal Horse Guards (Blue) were on board the steamer, and on this occasion there was an ample supply of excellent provisions.

GRAND FETE AT RYDE.—INAUGURATION OF THE WATERWORKS.

(From our own Correspondent.)

THE Isle of Wight, for its salubrity appropriately styled the "British Madura," has of late years been brought more prominently into notice for its regattas, as well as from its having been selected as the frequent abode of our gracious Sovereign and the Royal family. The journey thither from the metropolis occupies but a trifle more than half a dozen hours; yet, within memory, it took as many days. The fashionable towns on its seaboard have each its peculiar class of visitors: those upon the northern side of the island—Cowes and Ryde—are selected by general visitors; while its southern coast has become the resort of the lavish and costly resident.

The crossing of the Solent from the Hampshire coast to Ryde in a steamer occupies about twenty minutes. Ryde, at the beginning of the present century, was composed of a few houses, whose few inhabitants gained their livelihood by agricultural and fishing pursuits, and frequently obtained a profitable market for their produce amongst the numerous shipping which frequented Spithead and the Motherbank; but early in the present century several villas were built, and the place became a fashionable resort.

In 1814 a company obtained an Act of Parliament to erect a pier, which laid the foundation of all the subsequent progress of the town; but, up to 1829, the streets were neither paved, drained, lighted, nor watched. In that year an Act of Parliament was obtained to effect those objects; but it was not, however, until 1838 that gas was introduced. In 1849 the cholera made fearful ravages amongst the poorer inhabitants. In 1851 another epidemic arose the sanitarians—which made great havoc among the children. Then arose a loud demand for the Public Health Act, but the opposition to it was obstinate and successful. The town was still without water. An amalgamation took place between the more moderate of both parties, who took steps in 1853, for a new Act, which received the royal assent in July, 1854; and in September a new Board was elected, who, in less than twelve months, have completed works for an efficient water supply, the inauguration of which took place on the 28th ult.—the 17th anniversary of her Majesty's coronation.

The day throughout the island was celebrated as a general holiday, which had the effect of concentrating at Ryde hundreds of persons who did not avail themselves of the number of excursion trips which were offered by steamers to Weymouth, Brighton, &c.

The inauguration ceremony commenced with a procession formed in front of the Town-hall and Market-place, when we they started at noon for Ashey-down, by the side of which were erected the reservoir and the engine-house for filling the same from the wells at Blackgang. The procession in the order we now describe, was drawn by grey gons, each containing the children of the various schools in the town. The waggons were dec with evergreens, and flags bearing various appropriate Scriptural mott and selections. There was likewise a profu e display of banners decorations, painted by Mr. A. Fowler, marine artist.

Then followed about thirty carriages containing the Commissioners of Ryde and other inhabitants. The cortège reach d Ashey Down, a distance of about three miles, about two o'clock. The school-children then halted and passed through the works; the engine was set in motion, and the water was pumped up into the reservoir; but, owing to some mishap

FETE AT RYDE, ISLE OF WIGHT.—INAUGURATION OF THE WATERWORKS.

with the jointings of the pipes, it was considered impracticable to turn the water on into the town, and the water playing from the fountain fronting the Town-hall was omitted. The workmen were then provided with an excellent dinner in a marquee adjacent to the engine-house. Mr. Benjamin Barrow presided; and after dinner appropriate toasts were drunk. The school children were then regaled with tea and cake on the Down; and during the afternoon the band performed a selection of music, and quadrille parties and country dances were enjoyed on the green, where there could not be less than five or six thousand persons. At half-past five the procession re-formed and returned in similar order to the Town-hall, where it dispersed. At seven p.m. the Commissioners and inhabitants, to the number of eighty, sat down to a banquet at the York Hotel; Mr. Barlow in the chair.

Messrs. Easton and Amos were the engineers of the works, and Messrs. Bennett and Holdesworth, the contractors, at the sum of £13,419; but, after compensating the owners of the old works, and other incidentals, the sum to be expended will be about £17,000. The money is borrowed for a term of forty years, at an interest of 5 per cent.

Our Artist's Illustration of this delightful Fête in commemoration of the establishment of a great public benefit, shows the gay scene at Ashe Down, with the magnificent panoramic view of the town of Ryde, Spithead, with the two line-of-battle ships, *Neptune* and *Royal George*, the towns of Portsmouth and Gosport, and Portsdownhill in the distance. The Engine-house is seen on the side or foot of the Down.

ROYAL THAMES YACHT-CLUB SCHOONER MATCH.—"THE SHARK" ROUNDING "THE MOUSE" LIGHT-SHIP.

LAUNCH OF A WAR-STEAMER AT LIMEHOUSE DOCKYARD.

LAUNCH OF THE WAR-STEAMER "VICTORIA."

ON Saturday last this fine vessel, the first ship-of-war built for an Australian colony, was launched at Limehouse Dockyard, in the presence of a large concourse of spectators. The event was one of no slight significance and interest; for the *Victoria* may be regarded as the foundation of a new naval power in the Southern Seas, British in its origin and its character, and indicative of that noble spirit of self-reliance which forms one of the noblest features of the national character.

The *Victoria* was ordered by the Government of the colony of Victoria, through Mr. Barnard, agent for the Crown Colonies, with the approbation of the Secretary of State, and will be paid for by a vote of the Legislative Assembly. She is a screw steamer, of 1850 tons, built of mahogany on the diagonal principle, by Messrs. Young, Son, and Magnay, under the superintendence of Commander Lockyer, R.N.—who has also arranged her fittings from drawings by Mr. Oliver Lang, of her Majesty's Dockyard, Pembroke, admitted to be one of the most skilful naval architects of the day. Her length between perpendiculars is 166 feet; breadth or beam, 27 feet 2 inches; and depth of hold, 16 feet. Her armament is to consist of one 32-pounder (56 cwt.) gun on a pivot, and two medium 32-pounder (25 cwt.) broadside guns; but, if necessary, she can carry two pivot and six broadside guns of the same calibre. She is to be rigged as a three-masted schooner, so as to be able to make a passage under sail alone. Berths are to be provided for 150 men, which may be increased to 200, on her lower and fore platform decks.

There will be cabins and a mess-room for eight officers, and a dispensary before the engine-room, on the lower deck. The galley will cook for 200 people, and a distilling apparatus will be fitted for the supply of water, in addition to tanks in the forehold, capable of containing 4000 gallons. On the fore platform deck will be sail-bins capable of stowing the whole of the sails, awnings, &c., and bins to hold a week's dry provisions. At the forepart of this deck are the gunners', carpenters', and boatswain's store-rooms; the bulkheads and sail-bins having bars of galvanised iron instead of solid wood work, to allow a free circulation of air. The cabin deck aloft will be divided into a ward-room and two other cabins, the side or sleeping cabins to make up fifteen beds. There will be a steward's pantry, bath-room, &c., the fittings to be of bird's-eye maple and mahogany, and so arranged as to ensure the greatest possible amount of ventilation. Under the cabin decks are to be a spirit-room, store-room for the ward-room, afterhold magazines, shell-room and store-room for the captain. The engines are to be nominally of 150-horse power, but capable of working up to 600-horse power, from the factory of Messrs. G. Rennie and Sons, and fitted with Maudslay's feathering-screw.

The services for which the *Victoria* will generally be available are those of a Government tender, to convey the Governor and other official authorities from port to port, transport troops or prisoners, assist merchant vessels in distress, and, indeed, any work that a Government steamer can be called upon to perform. Being completely equipped as a sloop of war, she can at any moment be put upon a war footing, and her armament will be supplied from the Royal Arsenal at Woolwich.

Amongst the company present at the launch were the Earl Talbot and Lady Constance Talbot, Mr. Ingham, M.P., Mr. Cayley, M.P., Mr. Baldock, M.P., and Mrs. Baldock, Mrs. and the Misses Monk, Admiral Sir

FETE IN BRADLEY WOODS, DEVON.—(SEE NEXT PAGE.)

Samuel Pym, Admiral Scott, Mr. Barnard (Agent General for the Crown Colonies), Mr. Forster (late M.P. for Berwick), Sir William Davison, Col. Matheson, Sir George and Lady Carroll, &c.

The ceremony of naming the vessel was performed by Lady Constance Talbot, who, with well-directed aim, flung the bottle, and its contents streamed over the bows; at the same moment the dog-shores were struck away, and the good ship *Victoria* glided gently and gracefully into the water. The helm was put to starboard, and answered with remarkable readiness and ease. She then swung round to the tide and was moored. The lines of the *Victoria* seem to the non-nautical eye perfect; her proportions beautiful; and, we have no doubt, when she is copper-ed, has her engines and screw fitted, and is fully armed and equipped, she will prove herself, what she is designed to be, in all respects a crack man-of-war.

After the launch a party of some 300 ladies and gentlemen were entertained at a cold collation on the premises of the builders, over which Mr. George Frederick Young presided.

Lord John Russell, as Minister for the Colonies, had been invited; but the noble Lord expressed his regret that he was unable to attend.

The entertainment was a splendid one, and provided by Mr. Bathoe, of the London Tavern; Mr. Higgs acting as toastmaster.

RURAL FETE IN BRADLEY WOODS, DEVON.

On Thursday and Friday (last week) the town of Newton Abbott was the scene of great excitement, from the great influx of visitors from all parts of the kingdom, to join in the Fête held in Bradley Woods (the property of the Rev. F. S. Wall), in aid of the funds of the Teignmouth and Dawlish Infirmary. The entertainment was projected by the mechanics of the engine-fitting department of the Newton Railway Station, in gratitude for the benefits they had derived from those institutions. The project was taken up with warmth by their worthy master, Mr. Gooch; and finally became patronised by the most distinguished names in the county. The preparations for the Fête were commenced on the previous Monday, when trees were planted through every street of the town; triumphal arches were erected; and a variety of tasteful arrangements made for the festivities.

On Thursday morning an excursion train arrived from Swindon, and their band, with appropriate banners, formed in procession, and marched through the town playing lively airs on the winding road to the "Warren" —a beautiful spot for such a purpose, of about twelve acres—completely surrounded by woods, and some of the most inviting scenery in Devon. The accompanying Sketch of the scene is from the Summer-house looking towards the river Teign, and shows the Fête in the distance.

It is gratifying to add that the Fête passed off as agreeably as could be anticipated, with a fair share to the funds of the institution. The Model department contained many excellent models: conspicuous among which were those of Mr. Bickell's oscillating marine engine; a beam-engine; a miniature engine (lever), with boiler, &c., under a glass-case; Miner Rae's portable engine; Bennet's engine, and Brunel's model of Windsor Castle. There was also a beautifully-finished model of Saltash-bridge published in the flower-room. The engines were kept in motion by a five-horse-power portable engine in the rear of the building. The management of this department was ably carried out by Mr. Bullwell.

Amongst the attractions were a Flower Show (admission free), archery, a quoit party, and excellent performances of instrumental and vocal music, by the 10th Hussars band, the brass band of Swindon, Torquay Choral Society, &c. In short, there were amusements for all tastes—from the last great marvels of science, the galvanic battery and electric telegraph, to the old-fashioned rustic sports, such as delighted our ancestors ages before intelligence was conveyed with the rapidity of thought. We should not omit to mention that to Mr. Meaden, the secretary, is especial praise due for his very efficient aid in getting up the Fête.

CALENDAR FOR THE WEEK

SUNDAY, July 8.—8th Sunday after Trinity
MONDAY, 9.—Fire Insurances Cease
TUESDAY, 10.—London Bridge burnt, 1212.
WEDNESDAY, 11.—Old St. Peter
THURSDAY, 12.—Erasmus died, 1536
FRIDAY, 13.—Parliament held at Nottingham, 1334.
SATURDAY, 14.—Bastille destroyed, 1789

Vice-Presidents—The Nobility and Gentry of the Midland Counties. F. F. LUDLAM, Esq., Chairman of the Committee.

HENRY RUSSELL has the pleasure to inform the Public that he will Perform ... of COLLARD and COLLARD'S magnificent Semi-grand PIANOS at his forthcoming and at all future ENTERTAINMENTS.

Next week will be ready, bound in cloth, gilt,
THE ILLUSTRATED LONDON NEWS,
VOL. XXVI.—from JANUARY to JUNE, 1855
Containing upwards of 600 SPLENDID ENGRAVINGS; including a large Number of scenes of the War, from Original Sketches, by the Artists of this Journal, at the seat of operations, as well as by Naval and Military Correspondents. Office, 198, Strand.

WE have great pleasure in publicly tendering our thanks to Messrs. Petter and Galpin, Printers, of Playhouse-yard, for their exertions in electrotyping the Engravings in the ILLUSTRATED LONDON NEWS, which enables us to supply the large extra demand for our Journal consequent on the Enlargement and Reduction of Price.

198, Strand, July 5, 1855.

*** The Engraved Title-page and Index to Vol. XXVI. of the ILLUSTRATED LONDON NEWS will be given with the Number for next Week. Two Sheets. Price Fivepence.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 7, 1855.

"FORTUNE played false to valour." Such, in General Pelissier's phrase, is the solution of the fatal problem of the 18th; and, upon an examination of the despatches sent home by himself and by the now-departed hero whose later hours were embittered by the recollections of that day, such solution may be accepted. This—Lord Raglan's last fight—was eminently characterised by his "antique chivalry."

From the despatch of the French General it is clear that a single misconception on the part of General Meyran, at the beginning of the affair, paved the way for the series of disasters which followed. That gallant leader had been ordered to await a certain signal from his chief—a star rocket. Only too eager for the onset, the eyes of the fiery soldier saw, in a shell which exploded near the Lancaster Battery (the site whence Pelissier watched the fray) the signal which he desired, and he refused to believe himself in mistake. He rushed to the attack, assailed at a disadvantage, and fell, amid numbers of his brave men—as did General Brunet, who supported him. The terrible reception which the French were encountering made it evident to Lord Raglan that a diversion was the only thing to save them, and instead of abiding in safety the issue of the affray—as, according to arrangements, it is clear that he might have done (for the storming the Redan, which is commanded by the Malakoff, would have been useless unless the latter were reduced)—he sent our columns upon the Redan in order to relieve the French. The slaughter was fearful—and, indeed, so desperate an attack could scarcely have produced any other result. Regarded as a single operation, on the part of the English army, the affair cannot but be considered as deplorable; but, if we take a nobler view of the field, and look at the armies of France and England as constituting one grand body, we may say that loss—ay, heavy loss—has been distributed among the ranks; but that the army did its duty, and its constituents and components valiantly supported each other, and the field was strewn with the corses of brothers-in-arms who had died in the united discharge of duty.

England, too, had her laurel, bloodstained and barren as it was, that day. The daring exploit of Major-General Eyre and his men, who stormed a suburb, and maintained themselves there for seventeen hours, unaided, until night enabled them to evacuate what, from failures elsewhere, had become a useless acquisition, will not be forgotten in the annals of the siege.

The English army mourns its leader, and the despatch of the French General appraises us that in the ranks of our allies the fullest sympathy is shown for our loss. And the sentiment which General Pelissier attributes to his own men, may, we are assured, be taken as that of the English forces, namely, that they have lost not one atom of courage or of hope, and that they are only eager for the day when they may make the enemy pay dearly for the carnage of the 18th of June. The changes in the command of our force are not calculated to diminish the confidence of our men, but the reverse. The fortunes of our arms will now be in a great measure entrusted to Indian Generals, of whom it is no light praise to say that they are worthy confederates of the African Generals of France. The name of Simpson is better known in Asia than in Europe; but we doubt not that many weeks will not have elapsed before the name of the gallant associate of Napier in the East will be a household word. Young blood is also coming up to the command, and we may trust that in a struggle which especially demands the fiery energy of youth a struggle in which we have to rout those who are almost unrivalled behind walls and ramparts, and who eschew the field—we may derive from the aggressive spirit of our younger soldiers the advantages which it were less reasonable to expect from the cautious tactics of veterans. We are certain that the best part of the army will exult in the elevation of the "Indians," and that certain prejudices, of which too much has been heard in other times, have long since vanished. England has always been proud of her Asiatic heroes, and rejoices to see them again in the van of battle.

That the Baltic fleet is not idle, may be gathered from the various communications constantly received, though of the exact value of its operations and even of their scene we wait to be more precisely informed. Some of the statements forwarded home are contradictory, but the bombardment and destruction of Nystadt are certified. The fishing for, and capture of, numbers of infernal machines has afforded occupation to our sailors, and the process of rendering these inventions harmless is carried on in wholesale fashion. While alluding to this subject, it may be observed that the Government has decided upon not risking the large sum of money requisite for carrying out Lord Dundonald's annihilating invention. The people have not learned to repose so much confidence in administrative wisdom as at once to give up their belief that the gallant veteran's idea is a practical one, and it will be an annihilating day for others than foes abroad should another nation adopt Lord Dundonald's plan with success.

A spirited summary of the Viennese negotiations, and a yet more spirited intimation to the Court of Austria, will be found in the speech with which the Emperor of the French opened the sitting of the Legislative Chambers on Monday last. The Emperor, abandoning the ordinary platitudes, and even the ordinary dignified hauteur, of speeches from the Throne, actually argues the case of the relative position of the Allies and the inactive Power. He, we are glad to say, indulges in none of that humiliating hesitation which was shown in our own Parliament as to the rightful position of France and England. He makes no question of the right of these countries to increase their demands upon Russia in proportion to the greatness of the struggle and the sacrifices already made. Sir James Graham will have new reason for speaking ill of France the next time he meets his constituents. This time he will do it decorously, and will call the Emperor by no uncivil names; but surely he will be lachrymose when apprising his supporters that we are allied with a Power which actually considers that the blood of thousands and the expenditure of millions enables us to ask more of those who caused that sacrifice than what we asked before firing a shot. Peelite ethics are sadly outraged in the Imperial address. But the Emperor proceeds to say that our propositions (free navigation of the Danube, a better constitution for the Principalities, guarantees for the Christian subjects of the Porte, and the limitation of the Russian fleet in the Euxine) may be called "magnanimous, from their disinterestedness," and few English readers but will agree with him. But, his Majesty adds, these propositions, approved in principle by Austria, by Prussia, and even by Russia, "evaporated" in the Conferences, and he observes, with caustic contempt, "*we still wait* for Austria to fulfil her engagements, which consisted in rendering our treaty of alliance offensive and defensive, if the negotiations failed."

Apparently believing, from the disbanding of Austrian troops, and from certain other reasons, traditional and of the present day, that the "young and spirited" Monarch of Austria is still likely to keep the Allies waiting, the Emperor asks France for 140,000 men and £30,000,000 in money. And as England is inviting her youth to the battle-field by increasing the pay of the soldier in presence of the enemy, and as there is as much war-money ready for the service as the Government can desire, it is not improbable that Austria may not only discover that the Allies can do without her, but that certain troublesome "nationalities" may, ere long, make her regret that she has, treacherously, tried to do without the Allies.

THE renewal last Sunday of the popular commotions in Hyde-park suggests a twofold inquiry—one with reference to the conduct of the police, and the other on the whole subject of what is called "Sabbath" legislation. Generally the police of the metropolis is a well-behaved and excellent body; but there are occasions—and this is one of them—in which injudicious orders given by their superiors lead to popular indignation on the one hand, and to the abuse of authority on the other. We gather, not only from the multitude of letters and communications which reach us, but from the statements before the police magistrate and the general concurrence of testimony, that the behaviour of the police on Sunday was violent in the extreme; that they goaded the public into opposition and ill-humour; and that, excited, perhaps, by the *esprit de corps*, as strong in policemen as it is in soldiers, they indiscriminately attacked every person, peaceable or not, who happened to come in their way, not always sparing the well-dressed and apparently respectable, but venting their fury in preference upon those whom they considered to belong to the "lower orders," and in numberless instances upon women and children. There were a great number of foreigners in the Park, drawn thither by curiosity, who were loud in their expression of wonder at the patience exhibited by the English multitude, and in the assertion of their opinion that similar outrages in any city of the Continent would have led to a sanguinary if not fatal collision, or a general insurrection of the people. Happily, such was not the case, but for this result the honour is due to the multitude, and by no means to the police; and we trust that a searching inquiry will be instituted by the Home-office into the conduct of every member of the force employed in the Park on Sunday last—from Mr. Commissioner Mayne, the prime cause of the evil, down to the lowest constable engaged in the task of breaking the peace, which it was his business to preserve. Had the Commissioner exhibited proper judgment or discretion, the display of feeling on the part of the crowd would have taken a good-humoured turn and the Sunday would have escaped the desecration of assault and battery, and the effusion of blood. The feeling created against the police is not confined to those whom the wealthy sometimes call "the populace," but extends to all ranks and classes of the people. Let us hope that a better feeling may be speedily restored, and that no circumstances may occur to fan the existing embers of discontent into a blaze, which may be dangerous, and is certain to be disagreeable.

With regard to the question of "Sabbath" legislation, it is satisfactory to see that Lord Robert Grosvenor has had the good sense to withdraw his obnoxious bill. It is a pity that his Lordship and his coadjutors did not long ago yield to reason and justice what they have yielded at the eleventh hour to the overwhelming torrent of popular displeasure; but there is too much cause for satisfaction in the abandonment of the measure to permit of dissatisfaction with the manner in which it has been got rid of. It appears, however, that the popular mind is not wholly appeased; and that, seeing the effect of a determined resistance, an effort will be made to obtain the repeal of the vexatious Sunday Beer Bill, which was smuggled through the House last Session. Such a bill never could have been carried if the press and the public had not been so engrossed by the war as to have little or no attention to bestow upon any other subject. The promoters of the Sabbatarian movement—quite as zealous in their way as the advocates of the Maine Liquor Law, or any other piece of democratic tyranny—watched their opportunity, and stole the people's Sunday liberty when the watch-dogs of the press were asleep, or otherwise occupied. The repeal of that measure would receive the hearty good feeling between the various classes of society which has lately been placed in jeopardy; though it would have been much better if the Act had never been passed. Let those who are still in favour of attempting to make people pious by Act of Parliament reflect upon the peculiar circumstances of this great metropolis;—a point which has never yet

been sufficiently taken into account. The restrictive legislation which might fall harmless or inoperative upon a small village or quiet country town, from the middle of which the green fields may be reached in five minutes, becomes oppressive when applied to the toiling people of such a mighty wilderness of bricks and mortar as London. The population of this great city and suburbs amounts to two millions and a half—a population greater than that of some of the kingdoms of Europe; not spread, as with them, over hundreds of thousands of square miles, but concentrated in one small spot. To the health and comfort of such a population air and exercise are as absolutely the necessaries of life as meat and drink. And if air and exercise be conceded—and who will deny them why not needful refreshment? We cannot legislate for London on the same footing as for Little Pedlington. The workers and toilers of the Little Pedlingtons of the provinces exist in totally different social circumstances. They can inhale fresh air any day and every day; they can sit at their doors on the Sunday without being deprived of it; not so the Londoner, who must travel to seek it, and can only find time and opportunity for such travel on one day of the week. But all legislation on the subject is worse than a mistake. It is a social crime which inflicts hardship and injury on unoffending millions; and, while it leaves liberty to the rich and powerful, presses with its whole weight upon the poor and the weak.

THE COURT.

Her Majesty received intelligence of the death of Field Marshal Lord Raglan, by telegraph, on Saturday last, about twelve o'clock. Shortly afterwards his Royal Highness Prince Albert drove to Great Stanhope-street, to leave an autograph letter of condolence from the Queen, and to make inquiries after Lady Raglan and the family. In the course of the afternoon Viscount Palmerston had an audience of the Queen.

On Tuesday his Majesty the King of the Belgians arrived at Buckingham Palace from Ostend, on a visit to the Queen. His Majesty was accompanied by the Princess Charlotte of Belgium and the Count de Flanders. In attendance on the King and the Princess were, Madame la Marquise d'Yve de Bavay, Madame de Bocve, Colonel de Meerbeke, Captain Burnell, and Sir Robert Carswell. The King had quitted Ostend at six o'clock in the morning, crossed to Dover, travelled by a special train on the South-Eastern Railway to London, and on arriving, soon after two o'clock p.m., at the Bricklayers' Arms station, was there met by his Royal Highness Prince Albert, who was on his way from the same terminus to Earlswood, near Redhill, to open the Asylum for Idiots. The King of the Belgians and the illustrious party accompanying his Majesty proceeded in four of the Queen's carriages from the station to Buckingham Palace, where they were received at the grand entrance by the Queen. In the evening her Majesty had a dinner party. The company included the King of the Belgians, the Count de Flanders, the Duchess of Kent, the Duke of Wellington, the Belgian Minister and Madame Van de Weyer, and the Marquis of Breadalbane.

On Wednesday the King of the Belgians, accompanied by the Princess Charlotte of Belgium and the Count de Flanders, paid visits to her Royal Highness the Duchess of Gloucester, her Royal Highness the Duchess of Kent, her Royal Highness the Duchess of Cambridge, and his Royal Highness the Duke of Cambridge, at their respective residences. His Majesty received visits at Buckingham Palace from the Countess de Neuilly, the Duke and Duchess de Nemours, the Duchess of Joinville, the Duke and Duchess d'Aumale, and the Princess de Salerno.

On Thursday her Majesty and Prince Albert, accompanied by their illustrious visitors, drove out in the Parks, in open landaus and four.

JUVENILE BALL AT GLOUCESTER-HOUSE.

Her Royal Highness the Duchess of Gloucester gave a juvenile ball on Friday evening at Gloucester-house. Her Majesty the Queen and her Royal Highness Prince Albert, with the youthful Princes and Princesses of the Royal family, were present at the *fête*, which was also attended by their Royal Highnesses the Duchess of Kent, the Duchess of Cambridge, the Hereditary Grand Duchess of Mecklenburg-Strelitz, the Princess Mary, and the Duke of Cambridge. The general invitations were extended to about eighty or leading members of the aristocracy with their youthful families. Her Royal Highness the Duchess of Gloucester received her visitors in the lower drawing-room, opening out of which was the ball-room, where a dais had been erected for her Majesty, with raised seats for the royal members of the Royal family. The Queen arrived at half-past nine o'clock. Her Majesty was accompanied by Prince Albert, and seven of the Royal children. The Prince of Wales and Princess Royal were not of the company. Her Majesty took her departure shortly before midnight, but it was after one o'clock before the party had separated.

His Highness the Prince Louis Lucien Bonaparte left town on Saturday last for Paris, to be present at the opening of the Senate on Monday

The nuptials of the Lady Catherine Howard, youngest daughter of the Earl and Countess of Wicklow, with the Hon. Arthur Petre, second son of Lord and Lady Petre, took place on Wednesday, at the Roman Catholic Chapel, Spanish-place, Manchester-square. The marriage of the Hon. Edward Stuart Wortley, eldest son of Lord Wharncliffe, and Lady Susan Lascelles, daughter of the Earl and Countess of Harewood, was solemnised on the same day, at St. George's Church, Hanover-square.

LORD RAGLAN. ORDER FROM THE HORSE GUARDS.

The following Order has been issued from the Horse Guards:—

Horse Guards, July 1, 1855.

The General Commanding in Chief has received her Majesty's most gracious commands to express to the Army the deep regret with which her Majesty has to deplore the loss of a most devoted and able officer, by the death of Field Marshal Lord Raglan, the Commander of the Forces in the Crimea.

Her Majesty has been pleased to command that her sentiments shall be conveyed to the Army, in order that the military career of so illustrious an officer shall be recorded, not only as an honorable testimony of her Majesty's sense of his eminent services, and the respect due to his memory, but as an example worthy of imitation by all ranks of her Army.

Selected by the Duke of Wellington to be his Military Secretary and Aide-de-Camp, he took part, nearly fifty years ago, in all the military achievements of our greatest Commander. From him Lord Raglan adopted, as the guiding principle of his life, a constant undeviating obedience to the call of duty.

During a long peace his life was most usefully employed in those unrewarded attentions to the interest and welfare of the Army, shown by the kindness, the impartiality, and justice with which he transacted all his duties.

When war broke out last year he was selected by his Sovereign to take the command of the Army proceeding to the East: he never hesitated, he obeyed the summons, although he had reached an age when an officer may be disposed to retire from active duties in the field

At the head of those troops whose arduous operations of the campaign, he resumed the early habits of his life: by his calmness in the hottest moments of battle, and by his quick perception in taking advantages of the ground, or the movements of the enemy, he won the confidence of his army, and performed great and brilliant services

In the midst of a winter's campaign, in a severe climate, and surrounded by difficulties, he never despaired.

The heroic army, whose fortitude amidst the severest privations is recognised by her Majesty as beyond all praise, have shown their attachment to their Commander by the deep regrets with which they now mourn his loss.

Her Majesty is confident that the talents and virtues which distinguished Lord Raglan throughout the whole of his valuable life will for ever endear his memory to the British Army.

By command of the Right Hon General Viscount Hardinge, Commanding in Chief.

G. A. WETHERALL, Adjutant-General.

The *Moniteur* of Thursday states that General Pelissier had addressed the following despatch to the Minister of War:

Crimea, July 3, 4 P.M.

The last duties have just been paid to Lord Raglan by the two armies with all the pomp which circumstances permitted.

LATEST INTELLIGENCE.

DESPATCHES FROM THE CRIMEA.

The following despatch has been received from General Simpson:—

"CRIMEA, July 4, 1855, 6.30 p.m.—Nothing of importance has occurred since my last. The French works on the right are going on well. The health of General Eyre is re-established."

The *Moniteur* of yesterday publishes the following despatch from Gen. Pelissier:—

"CRIMEA, July 4, 10.30 p.m.—Nothing new. The health of the army is improving.

General La Marmora telegraphs on the 30th of June that the cases of cholera were only twelve in the whole of his forces.

The *Fremdenblatt* of Vienna states, from the Crimea, that Prince Gortschakoff has sent for 24,000 men more, and that he has reinforced General Liprandi's corps with another division.

THE HANGO MASSACRE.

From a correspondence between General de Berg and Admiral Dundas, which appears in the *Journal de St. Petersbourg*, we learn that the Russian General justifies the cold-blooded atrocity of the Russian officer at Hango, on the alleged ground that the party sent by the *Cossack* displayed the pretended flag of truce to cover hostile purposes. General de Berg says:—

The hostile and by no means parliamentary character of this mission is moreover proved. 1. By the loaded arms seized. Three muskets show by their exploded caps that the crew of the boat made use of them in the struggle. 2. By the care observed in providing the cutter with 360 cartridges, and a chest full of incendiary articles, which is actually in our possession.

INSURRECTION IN CATALONIA.

MARSEILLES, Thursday, July 5.

The *Cid* brings news from Barcelona up to noon yesterday. Catalonia is in insurrection. Assassinations continue at Barcelona.

Zapatero, the Captain-General of the Province, has shut himself in the citadel, with the troops who remain faithful. The National Guards refused to march. Government has sent parties to mediate, who are received with cries of "Vive Espartero!"

The pretext for the insurrection is the question relating to salaries.

HOUSE OF LORDS. FRIDAY.

The Earl of DERBY moved the second reading of the Religious Worship Bill, which had come down from a Select Committee, to whom it was referred. The bill had been originally introduced by the Earl of Shaftesbury, and it then proposed to repeal the penal laws which prohibited the meeting of more than twenty persons in any private house for religious worship. Believing that serious evils might arise from passing the bill in that shape, he (the Earl of Derby) moved to have the whole subject referred to a Select Committee. The result was the present measure, which proposed to repeal the penal enactments in the case of any congregation assembled by a layman of the Church of England for religious worship, on condition that the permission of the clergyman of the district had been obtained for such religious meeting.

The Earl of SHAFTESBURY objected to the bill in its altered shape, and argued in favour of the measure as it originally stood.

The Archbishop of CANTERBURY urged the propriety of postponing legislation upon this subject until next Session

A discussion of considerable length followed, which ended by the withdrawal of the bill.

Several of the bills on the paper were advanced a stage.

HOUSE OF COMMONS.—FRIDAY.

NEW WRITS.

On the motion of Mr. HAYTER, a new writ was ordered for Cheltenham, in the room of the Hon. Craven Berkeley, deceased; and a new writ was ordered for Evesham, in the room of the Hon. Grenville Berkeley, who has accepted the Chiltern Hundreds.

VOLUNTEERS FOR THE CRIMEA.

Sir E. PERRY asked the President of the Board of Control whether accounts had been received at the India House that the Guzerat Irregular Horse, the Nizam's Irregular Cavalry, and some regiments of Bengal Irregular Cavalry, had volunteered for the Crimea; and whether he could inform the House what is the total amount of Irregular Cavalry that had so volunteered

Mr. V. SMITH said that such offer had been made, as well as offers from Infantry, but it had not yet been determined whether their services should be accepted.

THE CONDUCT OF THE POLICE.

In answer to Sir J. Shelley—

Sir G. GREY said he should be happy to order an inquiry into any cases of misconduct on the part of the police which might be brought before him, but it must not be understood that in such an inquiry it was to be assumed that the police had exceeded their duty. He had received a large number of letters from persons quite unknown to him, complaining of the conduct of the police, while others had stated that the police had acted with moderation.

Mr. T. DUNCOMBE thought that such an inquiry as that proposed by the Home Secretary would be a perfect mockery. He (Mr. Duncombe) suggested that a commission, consisting of members of that House should be appointed to enter on an investigation, and that the inquiry should be open to the public. If the right hon. gentleman would accede to this request, more would be heard of the matter. The right hon. gentleman proceeded to say that the people from the east end of London intending visiting Hyde park next Sunday, and that they would have with them the means of self-defence (Cries of "Oh, oh!")

Sir G. GREY said he had promised no specific form of inquiry, although it should be full, searching, and satisfactory. He was not at present prepared to say what would be the form of the inquiry, but he would inform the House of it, and would state the names of the gentlemen to whom the duty would be entrusted. He had only to add, that if the people from the east end of London, or elsewhere, went to Hyde-park next Sunday quietly to enjoy themselves, the police would protect them; but if they went there with weapons, and with a determination to commit a riot, they would find the police determined to discharge their duty for the protection of the public, whatever might be the charge made against them (Loud cheers).

Mr. FOX said, that when the proposed tribunal was constituted he could promise that a large number of highly respectable people would come forward and prove that the police acted with great and unprovoked fury on the last and preceding Sunday

Mr. R. SLANEY contended that the police were not the only persons who acted with unprovoked fury on the occasions referred to. The populace gave them a vast amount of provocation.

After some remarks from Mr. BOWYER in deprecation of the conduct of the police,

Mr. BENTINCK said that, if there was any serious demonstration next Sunday, he considered it would be in a great degree attributable to the statements of the hon. member for Finsbury

Mr. G. DUNDAS recommended a few six-pounders to tranquilise the mob next Sunday. He hoped the Home Secretary would take the most energetic measures for the prevention of the public peace against such *canaille* as appeared in the parks on the last two Sundays.

Mr. ROEBUCK complained that the suggestion of Mr. George Dundas to bring six-pounders against the people of London was unworthy of an English gentleman (Hear, hear). He also called the

Mr. DUNDAS said he only meant by what he had said that the Government should have the military in readiness. He regretted that he had been betrayed into expressions so improper.

Mr F. PEEL, in reply to Mr. Stafford, read some extracts from the report of Dr. Hall, in order to show that the statements of an army surgeon, published in the *Times* newspaper, were very superficial and regarded the medical arrangements in the hospitals in the Crimea. He thought as the *Times* professed to have the name of the writer that it would be advantageous to give it up so that a proper inquiry might be entered upon.

Mr. WATSON complained that no rewards had ever been conferred on the medical officers who perilled their lives in attendance upon the wounded in the hospitals in the East

On the order of the day for going into Committee of Supply

Colonel DUNNE moved an address for copies of all correspondence between the Secretary of State for the Home Department and certain magistrates of Oldham on the subject of a prosecution before the said magistrates of a man named Taylor for having on his premises unlicensed [illegible] from which neglect the death of an individual resulted. The gallant officer in order to show the importance of the subject, said that it appeared by the returns, that since the year 1845, the list of killed and wounded from untested machinery was no less than 12,000. Such a frightful amount of casualties demanded the immediate attention of Parliament.

Lord PALMERSTON said that, as far as he was concerned, he had no objection to the production of the correspondence; but, as an amendment to go into Committee of Supply, he must vote against it. He was not satisfied with the decision of the magistrates, but no imputation attached to them

Mr. J. [illegible] defended the decision of the magistrates.

After some discussion, Col DUNNE withdrew his motion on the understanding that the papers would be produced

THE VIENNA CONFERENCES.—LORD J. RUSSELL'S EXPLANATION.

Mr M. GIBSON asked for explanations from the Government relative to the opposition of her Majesty's Ministers to the views of their colleague, the late British Plenipotentiary at the Vienna Conferences, in reference to the plan proposed by Austria to be submitted to Russia for the purpose of putting "an end to Russian preponderance in the Black Sea," as stated in the circular addressed by Count Buol to the diplomatic agents at Austria, dated Vienna, May 25. It appeared to him that, assuming Count Buol's statement to be correct, Lord J. Russell, when he was calling upon the House to combine the war, must have known that proposals had been made likely to lead to a peaceful solution of the question at issue. If this were so, the House should be informed of the fact.

Lord J. RUSSELL said, he had never unravelled the difficulties of a contest with Russia, and was of opinion that the war could not terminate in a treaty between that Power and the Allies, but rather in a general treaty, in which all the Great Powers of Europe must take part, and give their security for maintaining the integrity of Turkey. In this view of the case he thought it of the highest importance to secure the co-operation of Austria, to which Government he attributed no bad faith whatever. He thought the proposition emanating from Count Buol combined with one by which there should be a counterpoise to any force which Russia might have in the Black Sea, did afford a basis for a treaty of peace. That proposition was, that a treaty should be entered into between the Powers France, England, and Austria, guaranteeing the integrity and independence of Turkey. He was not authorised to agree to this, but he told Count Buol that he would communicate them to his Government. Those propositions were deliberately considered by the British Government, which came to the conclusion that they did not offer a safe basis for a peace. The French Government came to the same conclusion—Austria still declaring that she thought the Third Point admitted of more than one solution, and that she was not, therefore, bound to go to war with Russia. He was of a different opinion, although Austria had declared that her proposition should be made an *ultimatum* to Russia. If he had left office on the decision of the Government he would be assuming as a Plenipotentiary a course of conduct which could not be justified by such a position, while on the other hand, as a Minister of the Crown, he felt it his duty not to embarrass a Government placed in the difficult circumstances which surrounded that of his noble friend. On the contrary, he felt that he ought to support his Government, and he was open to the censure of those who entertained a different opinion.

Mr. COBDEN said he had never heard a speech that filled him with more grief than that of the noble Lord; for he could not help thinking that he had not dealt with fairness or candour towards the country, nor with a proper spirit in not resigning. Such a course of proceeding on the part of the noble Lord was calculated to destroy all confidence in public men. He was of opinion that a change of Ministry would give the only chance of an honest party in the House and in the country.

Lord PALMERSTON defended the conduct of his noble colleague. It was a novel proposition indeed to say that a Minister should resign from a Government because he thought terms of peace might have been accepted when his colleagues were of a different opinion. The Government of France and that of England, each for reasons of their own, thought it not advisable to accept the propositions of Austria.

Mr. ROEBUCK denounced the conduct of Lord J. Russell, and charged him with being guilty of a dereliction of duty as a Minister of the Crown. He then proceeded to animadvert upon the conduct of the Government generally in the management of the war.

Lord C. HAMILTON and Mr. DISRAELI severally addressed the House in a similar tone of condemnation of the Government generally, and of Lord J. Russell in particular

Sir G. GREY replied, and defended the conduct of every member of the Government throughout the whole proceedings.

The subject then dropped.

The House then went into Committee of Supply, but the CHAIRMAN immediately reported progress

The orders of the day were then disposed of.

NOTES OF THE WEEK.

CHOLERA has swept off another victim, the noblest yet, from our band of heroes in the Crimea. Not in the battle-field, where with a calm indifference to danger, remarkable even among the daring men who surrounded him, he ever seemed to ignore the very idea of peril—not in his own English home, surrounded by the relatives who were wont to look up to him as among the noblest of even their line—but pressed upon by the consciousness of infinite responsibility, by the sense of recent failure, his last moments saddened by the memory of old companions so lately swept away in battle, by disease, within the walls of a Tartar homestead, with his staff officers and aide-de-camps striving to catch the last words of command from his closing lips, Lord Raglan has passed away. Always hopeful and high-spirited, even when things looked blackest, disease had hitherto fled from the brave old man, but the failure of the 18th seems to have wrought a change in his demeanour. The *Times* Special Correspondent tells us that one result of that day was that "Lord Raglan became less sanguine and more perturbed than he has been for some time past." These sickening fits of depression, a deceitful rally, which gave false hopes of his recovery, he sank beneath it. There is an end now of criticism on his qualities as a General, and to discussions as to how far he fell short of being a Marlborough or a Wellington. We remember but now only as one of the proud position, made himself universally loved; as one who, in the words used by Lord Granville in the House of Lords on Tuesday, "enjoyed not only an English but a European reputation as one of the bravest and gentlest—one of the most chivalrous, and one of the best men who ever sacrificed his life in his country's cause"

We heard a good deal last year of certain explosive machines, invented, it was said, by the celebrated Professor Jacobi, which had been sent over to Dover, and which were to be used to the confusion and destruction of Cronstadt and Sveaborg. The British mind, so "practical," is not prone to believe in scientific inventions for warlike purposes, more especially if the inventor is a mere *savant*—a professor—not a Lieutenant of Artillery or a Captain of Engineers; these latter were usually pooh-poohed in a very magnificent style. However, the existence of these subaqueous engines of destruction was proved to be a fact by one of our steamers, which had approached nearer than usual to the walls of Cronstadt on a reconnoitring expedition, running over and exploding two of them. No serious mischief was done, though the shock must have been pretty severe, as a good deal of crockery was broken, and cannon-shot were jerked out of their racks. Apparently these infernal machines were too small to have any serious effect on so solid a mass as the hull of a large ship; but if hereafter they are constructed, as they easily may be, three or four times larger, the ship that runs over one may not escape so easily as the *Merlin* did. They have certainly been used without skill, for the boats of the fleet which have been set to work at dredging for them have fished up upwards of seventy. One of these exploded on the quarter-deck of the *Rosamond*, in the very midst of a group of officers, including Admiral Seymour, who was commanding it. By a kind of [illegible] good luck no one was killed, and only one or two more or less scratch upon it. It is said that the cause of the explosion was that Admiral Seymour, perceiving a suspicious looking knob on one side of the machine, said, "I shouldn't wonder if that was the lock of it," tapping it at the same time just with his cane. So it was; but the lock was rather easier than that of a ship's musket, so the apparatus exploded, very nearly blowing the Admiral's head off. If true, this specimen of marine recklessness nearly equals that of Captain Lushington's sailors before Sebastopol, who would persist in jumping upon the ramparts of their batteries to watch where their shot went.

One might fancy that the glorious weather we have enjoyed for the last ten days would be destruction to the theatres. Certainly, if a man were compelled to shut himself up, confined and squeezed on a particularly uncomfortable seat, in an atmosphere redolent of gas and the breathing of a thousand or two perspiring Christians, during four hours of a bright, warm, summer evening, he would look upon it as a piece of tyranny which no enjoyment offered to his eyes or ears would compensate for. Being free to do as he likes, he thinks otherwise, pays his money, and crowds the Opera and most of the theatres. Covent Garden is well filled nightly; and, in spite of the drain of a most expensive company, even more at Lumley's, I believe, than that of last year, it is understood that the management is doing well. As for the cheap opera at Drury Lane, the house is crammed every night. It had need to be so, indeed, if it is to pay at all, considering the unprecedented lowness of the prices. Of course, with a shilling pit and a sixpenny gallery, there must be many things wanting to make this a first-rate Opera. That "can't be done at the money," but it is not too much to say that we never have had in England any musical entertainment nearly so good even at double the cost. Madame Gassier is the great hit of the company, and is, indeed, a most charming singer. Her *Rosina*, in the "Barbière," was almost perfection. At the Olympic the "School for Scandal" has been played on two benefit nights, to enable Mr. Wigan to show which he did most successfully—that which few of the present generation of playgoers have seen—namely, how the part of *Joseph Surface* ought to be played. The audiences at the Adelphi seem to forget (how on earth do they manage it?) that it is not in that not roomy theatre. Astley's is the most successful of the transformations. What may be called an "Allied Drama" (England and France in the days of chivalry, with its exciting list of *dramatis personæ*—first brigand, second and third [illegible] *Francis I.*, &c.) is a very deserved success. Generally, I like the play better than the scenes in the arena; but the exceeding gracefulness of a lady who calls herself Mdlle Caroline almost makes me alter my opinion. Her attitudes are really beautiful, and quite equal to those of the very best female equestrians who ever exhibited themselves in the Champs Elysées, at Franconi's or the Hippodrome.

THE BURNING OF KERTCH.—SKETCHED FROM THE DECK OF THE TRANSPORT "TRENT."—(SEE NEXT PAGE)

PART OF THE INTERIOR OF THE MAMELON.

THE INTERIOR OF THE MAMELON ON THE 9TH OF JUNE.

THE above Sketch of the interior of the Russian battery as it appeared on the day after the desperate battle in which it was taken by the French is from the pencil of an officer who visited the spot during the brief armistice which took place on that day. In the following letter he describes what he saw:—

In order that the thousands who see the ILLUSTRATED LONDON NEWS may be better able to form an idea of the struggle in which the army before Sebastopol is engaged, I send you a rough Sketch representing part of the interior of the Mamelon, stormed and taken by our gallant allies the French, on the evening of the 7th of June. I drew each figure and object as it really appeared on the morning of the 9th inst., at the moment a flag of truce was hoisted for the purpose of burying the dead, and before anything had been moved, or the crowd as is usual on these occasions assembled.

On the parapet I have tried to represent the body of a young sergeant of the 6th Regiment of the Line, shot through the head, and firmly retaining in death his grasp of a small tricolor flag with which he had encouraged and led on his comrades. In the centre the bodies of one Lieutenant and six privates of the 6th Regiment; on the right, holding on to the top of a gabion, a private of the 50th Regiment, shot in the act of scaling the parapet. In the foreground, a Zouave prostrate on the body of his fallen foe, two Chasseurs de Vincennes, three soldiers of the 7th Regiment, and five Russians, in a mass together, shot and bayoneted; a corporal of the 50th, with a "Croix d'Honneur" on his breast, close to which he had received his death wound. And on the left of the Sketch, a Chasseur Indigène, with two bayonet wounds in his breast, and two French soldiers crushed by rocks hurled down upon them by the enemy in his stubborn resistance; a dismounted and spiked Russian gun, Russian and French soldiers' caps, muskets, and bayonets, spades, pickaxes, round-shot, fragments of shell, and grape-shot.

THE BURNING OF KERTCH.

THE latest news from Kertch is that the town was completely destroyed by fire on the 14th ult. When the Allies first took possession of the place a number of magazines and other buildings belonging to the Russian Government were burned; but there was no intention to destroy the dwellings of the inhabitants, although many of these had been greatly injured by the soldiery. The following is a description of the place as it appeared a few days after the Russians had fled:—

As we approached the town long columns of grey smoke were visible rising from the corn-stores, and working parties could be made out on shore engaged in removing various articles which could be turned to the account of the Allies. The Austrian flag floated before one house, probably that of the Imperial Consul; but the more significant standards of France and England were waving at either end of the quay, and fluttered from numerous boats glancing over the water. Explosions now and then shook the air from distant parts of the town, where the Government buildings were in course of being levelled. The quays were guarded by a few sailors with drawn cutlasses, stationed here and there, and with difficulty holding their own against refractory merchantmen. In every direction, wherever the eye turned, up or down the streets, men could be seen hurrying away with bundles under their arms, with furniture on their backs, or staggering under the influence of drink and bedding down to the line of boats which were lying at the sea wall, laden to the thwarts with plunder. This kind of work is called "looting," from our Indian reminiscences. The fate of nearl every house or good condition was soon apparent. The windows were broken, the doors smashed open, and men went in and out like bees in a hive. All the smaller and more valuable articles had been removed, either by the Turks or by the Tartars, but big arm-chairs, pictures of the Saints with metallic glories round their heads, large feather beds, card-tables, and books in unknown tongues and type, seemed to possess a strange infatuation for Jack, and to move him as irresistibly as horseflesh. There were plenty of Tartars in the streets, dressed in black sheepskin cap or white turban, with handsome jackets, and wide breeches of dark silk or fine stuff, and gaudy sashes round their waists. These fellows are of the true Calmuck type—with bullet head, forehead villanously low; dark, piggish, roguish, twinkling, eyes; obtuse obstinate noses, straight lips, and globular chin. Unlike most people, they improve in looks as they grow old; for their beards, which only attain amplitude in age, then give a grizly dignity and patriarchal air to their faces. Groups of men, in long lank frock-coats, long waistcoats, trousers tucked into their boots, or falling down over slipshod feet, sat on the doorsteps, in sepoy and attire the very image of a congregation of seedy Pucsyites, if such a thing could be imagined. Most of these men wore caps instead of hats, their clothing was of sober snuffy hues, to match their faces, which were sombre, and dirty, and sallow. Their looks were dejected and miserable, and as an Englishman or a Frenchman came near they made haste to rise and salute his mightiness with uncovered head and obsequious noddings and gesticulations. These were the remnants of the Russian population; but there were among them Jews, who might have stepped on any stage amid rounds of applause, in garb and face and aspect so truly *Shylock*-like were they—cringing, wily, and spiteful, as though they had just been kicked across the Rialto; and there was also a sprinkling of Armenians and Greeks: they were all lean and unhappy alike, and very sorry specimens of Muscovite *bourgeoisie*. Tartar women, scantily covered, were washing clothes in the sea, like tamed Hecates—withered, angular, squalid, and ugly in face and form. The Russian fair, not much more tastily clad, might be seen flitting about with an air of awkward coquetry, mingled with apprehension and dislike of the intruders, their heads covered with shawls, and their bodies with bright Manchester patterns. The boys, like boys all over the world, were merry and mischievous. They hung out of the rigging of the vessels near, pelted the street dogs, "chevied" the cats and pigeons, and rioted in the gutted houses and amid the open storehouses in the highest possible spirits, or fed ravenously on dried fish and "goodies" of various kinds, which they picked up in old drawers and boxes in the houses torn open by the "looters." The houses were well supplied with poultry, nor were pigs, rabbits, cats, dogs, and other domestic animals, deficient. Each mansion was complete in itself, they were like those in the older streets of Bologne, and the interiors were furnished somewhat in the same fashion plenty of mirrors, and hard, inflexible, highly-varnished, unsubstantial furniture, no carpets, lots of windows (doubled, by-the-by, to keep out the cold) and doors, and long corridors; the windows and doors were, however, handsomely mounted with brasswork; and locks, bolts, and hinges, of great solidity, of the same metal, were exclusively used in the better rooms. The Russian stove, as a matter of course, was found in each apartment. Spacious vaults underneath the houses were often used as storehouses for corn, and the piles of empty and broken bottles marked the locality of the wine-cellar. Icehouses were attached to many residences, and their contents were very welcome to the ships. The Government officers and *employés* of all kinds seemed to have lived along the waterside, but from that line of houses several fine wide long streets strike off at right angles towards the country. The market-place is a large piece of ground of an oval shape, surrounded by a piazza and shops and magazines of an inferior class. Most of them were shut and fastened up, but butchers displayed some good English-looking beef, and the sounds of English revelry were very distinct from the interior of a wine-shop at the end of an arcade, where some sailors were drinking Russian champagne at 3s. a bottle and smoking cheap and nasty cigars of native manufacture.

The Sketch on page 8 represents the burning of the Government buildings, stores, &c., as seen from the deck of the *Trent*.

THE SIDON" STEAMER SHELLING KERTCH.

THE NEWSPAPERS OF RUSSIA.—I never know of more than six in St. Petersburg; three in Russian, two in German, and one in French. The Russian are the *Police Gazette*, filled with official announcements and trading advertisements; the *Invalide*, a naval and military journal, formerly edited by Baron Korff; and the *Northern Bee*, which enjoys a certain reputation for the violence with which it attacks whatever is offensive to the law of authority; its editor was Mr. Bulgarin. The French *Journal de St. Petersbourg* usually contains, besides the ordinary official statements of promotions, &c., a few meagre extracts from English, French, and German papers; it consists of a small sheet of four pages, not much larger than the *London Gazette*, with occasionally an extra half-sheet when circumstances permit. Of the two *German Zeitungs*, I know nothing further than that one is published under the auspices of the Imperial Academy of Sciences.—*Notes on a Nine Years' Residence in Russia.*

THE WAR IN THE CRIMEA.

(From our Artist and Special Correspondent.)

CONSTANTINOPLE, June 20, 1855.

On the sides of a pleasant town overlooking the Black Sea, at no great distance from the mouth of the Bosphorus, the Camp of the Turkish Contingent, under General Vivian's command, has been pitched. Rows of white and glistening tents extend in sharp and dazzling lines in the midst of a green landscape. Stray patches of barley grow scantily upon a somewhat parched and arid ground. A Turkish village, with its little minaret darting out of a grove of trees, nestles in a quiet nook; and pretty woods of oak afford shelter to the horses of officers and sutlers, after they have braved the noontide heat and the rays of a perpendicular sun.

The Camp of the Turkish Contingent is six miles distant from Buyukdere, and about fifteen miles distant from Constantinople. I reached the last-named capital without accident by the good ship *Thalor*, and found but little change in the outward aspect of the place. A few large buildings of a modern shape appear to me to have been erected during my three months' absence. I did not recollect, at least, the presence of a finished building of modern French aspect and mongrel architecture amongst the groves of the old Seraglio. The ridge walls of St. Sophia overlook this new edifice, and give it a dwarfish appearance. The minarets of Sultana Achmet, deprived of their come summit by the gale of the 14th November, shone melancholy by the side of the ornamented dome; the deep blue water of the Bosphorus rushed calmly, though rapidly, by, and innumerable caiques gracefully glide, as of old, upon the placid surface.

A change appeared to have been made in the Golden Horn, where, instead of confused masses of shipping lying in picturesque groups, and swinging in the changing eddies, long rows of vessels are anchored stem and stern, gaining security for themselves, and leaving room for new comers. The persevering efforts of Admiral Grey and Captain Powell are doubtless the cause of this change.

From the Golden Horn to Buyukdere, in a pair-oared caique is a journey which is performed by most of those who visit Constantinople. The caiquedjis, as usual, quarrel for an extra fare, as London cabmen do; but I landed at Buyukdere in safety. General Vivian's quarters there are beautifully situated in a palace overlooking Becos Bay. His presence is fenced round by the numerous protections usual amongst Eastern nations. There were double sentries everywhere, much clattering of flint-locks as I went in; and curiosity insatiable apparently, since it seems not yet to have been satisfied by our eighteen months' occupation.

We had been informed that the road to Camp was a bad one, though daily improving under the care and arduous labours of the engineers, but we were scarcely prepared for one so full of accidents as this was. We could see as we first entered it the painful efforts of a body of Turkish artillery to surmount the obvious difficulties which they had to meet. The tail of the little column had not entered very difficult ground as we passed by it, but the overloaded packhorses, toiling under a hot sun, seemed to give no promise of lively exertion. Here and there, indeed, parties of them sat down to smoke their chibouques under the shade of a projecting rock or shrub, covering their brown and weather-beaten faces with their pocket-handkerchiefs. As we proceeded further we saw a detachment of artillery at a dead stand. The six horses harnessed to a gun were panting and exhausted, the gun itself was kept from rolling down by large stones, and there were several more chances in favour of a retrograde movement than there were for a forward one. The officer of the detachment, a fat and mustachioed fellow, was removing with a handkerchief from his face the profuse perspiration caused by his exertions. He went round amongst his men, giving them some words of explanation, and, then suddenly setting up a shout which was joined in every key by the men around him, they frightened the wretched horses into a momentary and desperate state of activity, which expended itself after the gun had proceeded six yards. Our horses, unaccustomed to this noise, which we were also unprepared for, gave unmistakable signs of their alarm by starting off, and jumping over all manner of obstacles without stopping until the object of their terror had been left far behind them. As we advanced, more symptoms of the badness of the roads were visible, and an ammunition-waggon had evidently right of the road with its horses and drivers together. It did not appear that any one had been hurt, fortunately. The horses were quietly standing by, and the men, who had perhaps made an ineffectual attempt to improve their position, had given up all idea of removing, and sat quietly by the horses. This specimen of the toil and danger attending the movement of artillery to Camp proved to my satisfaction that, in a hilly country with bad roads, it is difficult to move artillery at a greater speed than three miles per diem

It was a beautiful vale along the sides of which the Turkish artillery was toiling. Long ridges jutted out into the hollows, and gave the scene a pleasing freshness by their verdure. Here a mound of blue and friable clay appeared to crop out a yellow and more tenacious soil, whilst, in places, hard and confused masses of red stone glistened in the sunshine and announced the presence of iron in large quantities. The little streams in the bottom had deposits like chalybeate springs, in the midst of which yellow streaks, announcing copper, were also visible. In truth, the country is neither more nor less than a grand mineral depôt. The Turks, however, are averse to conceding rights of mining to foreigners, and the result is, that their mineral treasures are unused. A little copper is extracted at Buyukdere, and that is all. From the summit of the hills the most noble view extended over the undulating ground overhanging the Bosphorus, whose winding course could be traced for miles, bearing on its limpid current the giant steamer of the West, the graceful caique of the East. On the other side the country opened out, and was dotted with the tents of the Contingent, who, to the number of about 4000, had already encamped on the vicinity of the Black Sea. A short ride took us to the Camp, which we were enabled to visit at leisure. Some of the officers had already installed themselves in a style of Indian splendour. Double tents, with flies to keep out the sun, the ground internally excavated, were not uncommon. Hens cackled round one of them, and, with a Maltese goat which grazed close by, gave promise, at least, of a tolerable breakfast. Little bins, labelled St. Julien, Chamberlin, Meursault, adorned one at least of the tents, and proved that, if camp life were tedious, leisure hours might be whiled away in the enjoyment of luxuries. With some exceptions, there was considerable confidence felt and expressed by the officers as to the *avenir* of the Turkish Contingent; and one sanguine Major was heard to say, with a boastful intonation not unknown in the Sister Isle, that he loved the Turks though much of them—and that he was confident, too, he could change even their religion, if he liked, in a week. Without joining in the sanguine hopes of the rollicking Major, it was evident that the men placed under the command of General Vivian were old soldiers, and that, if our Englishmen could but understand one word they said, the most perfect friendship and cordiality would exist between them. On parade, however, it was obvious that, at first, considerable obstacles must be got over. The interpreter could not give the British word of command its equivalent signification in Turkish; and, when the simple operation of "left shoulder forward" was to be performed, the result did not answer expectation, although vigorous endeavours had been made by a few shouts, much telegraphic motion of the arms, hands, and legs, to obtain the desired result. All these inconveniences may, however, be overcome, but it will require great care and not a little patience to obtain a satisfactory result. Much, no doubt, may be expected from regular pay, food, and clothing—attentions to which the Turkish soldiers are by no means accustomed. The siege of Silistria has shown how well the Ottoman will fight when led by British officers. These troops will fight when they are brought face to face with the enemy. But the real difficulty lies not there, but in bringing Turks to obedience of daily orders issued by men whom they have not hitherto been accustomed to reverence.

In the cool of the evening we returned from our journey to the Camp of the Contingent. The air was cool, and rippled the waters of the Bosphorus. Innumerable fireflies darted about the hedges; and it was by the light of these microscopic jack-o'-lanterns, and the glimmering of the stars, that we re-entered Buyukdere.

Since the affair of the 18th ult., of which an ample account will be found in another part of this week's publication, "nothing of importance," to use the Russian Commander's phrase, "has occurred before Sebastopol." The recent repulse does not appear to have had any effect on the spirits of the besiegers, who are said to be as "all full of confidence, and as certain as ever of the speedy fall of Sebastopol." The French troops were allowed a few days' rest after the repulse, but had not suspended their works. They were pushing forward their approaches to the Malakoff Tower, so as to be exposed as little as possible to the fire of the enemy when the grand assault takes place. A strong battery of 30 guns has been erected on the point of Kamiesch Bay, with a view to keep off the Russian men-of-war which inflicted so much loss on the 18th. An order of the day, issued by the French General, has changed the names of the White Works and Mamelon Vert: the latter being called the Brancione Redoubt, and the former the Lavarande Redoubt, from the names of the two brave Generals who were killed in them respectively.

The Russians on their side have erected a lunette, between the Central Bastion and the South Fort, and make attacks on the flank of the Allies nearly every night, by which proceeding operations in the trenches have become a service of danger. The Russian forces which have been concentrated in Nikolajeff, and the detachments which have been sent by way of Perekop to Simpheropol, and the high ground about Kamiesch and Mekenzie, have caused the Allies to refrain from any demonstration on the right flank of the Chernaya. An important movement has, however, taken place in the position of a portion of the Allied army. General Bosquet, who, on the orders of General Pelissier, had gone on the 16th, two days before the late attack, to take the command of the troops remaining on the left, received notice on the 20th to descend to the high ground, where he is once more charged with the important attacks on the right. Omer Pasha and the Sardinian army, who had advanced in the direction of Ain Fador, in going up the valley of the Tchoubou, to the north of the Chernaya, have fallen back, leaving a force to close and occupy Baidar, and General della Marmora will with his troops unite, by Tchorgoun, their left to the right of the French divisions encamped on the left bank of the Tchernaya, two leagues in advance of Balaclava.

The condition of the troops before Sebastopol is described as being exceedingly disastrous. According to the accounts of the prisoners who have arrived at Constantinople, there are at this moment 15,000 wounded in the place, and owing to their being so closely invested they cannot be sent away. Cholera is also making terrible ravages among them. The head physician in Sebastopol says, in a letter written from that city:—

Never in the annals of science have such ghastly wounds been seen as those which were caused by the thousands of 65lb. cannon-balls and 200lb. shells which were showered upon us in the bombardment, which commenced on the 9th of April. 300 amputations have taken place besides numerous other minor operations on the first day; and a large bath-room, in which ten surgeons were constantly employed in applying bandages, was filled with wounded four times in success on.

Letters from Eupatoria announce that it was expected the Russians intended to attack the lines if measures have been taken to repulse the enemy, and it is safe. It is rumoured that a corps of 30,000 men has arrived at Perekop to reinforce the Russian army. Since we occupy the Tchernaya it is not possible for tiny corps to open a way for themselves as far as Sebastopol, as they were in the habit of doing. Liprodi, no movement of his indicates his intention to assume the offensive. General Bosquet is closely observing, and prepared to resist, and perhaps to attack him should the occasion present itself.

There is nothing new from the Sea of Azoff. On the 18th ult. the English steamer *Ripon* arrived at Constantinople with 203 inhabitants of Kertch, including men, women, old persons, and children. This part of the population of Kertch have been quartered at the English Embassy. Hadji Pasha has also arrived at Constantinople. The expense of their subsistence is provisionally at the charge of the English Government.

A letter from Vienna of the 20th ult., in the *German Journal* of Frankfort, says:—

The last letters from the Crimea speak of the probability of an expedit on of the fleets against Odessa. An important squadron was, in fact, already preparing to quit the Allied fleets before Sebastopol, and troops amounting to 25,000 men had embarked in it. The besieging army had not, however, been inconvenienced by their departure, as it had received reinforcements. According to the statement of deserters, yesterday's attack by the Russians in the affair of the 18th were enormous, and the garrison contemplated a renewal of the attack with terror.

A report by General Pelissier, regarding the attack on the 18th, appears in the *Moniteur* of Wednesday. He states that the check was attributable to causes which were too long to be mentioned in a telegraphic despatch, and that the principal cause was want of combination in the attack. He is of opinion that, notwithstanding the great difficulties of the ground, the obstacles accumulated by the enemy, and the knowledge of our plans possessed by the Russians and their state of preparation to meet and resist them, had the attack been general and instantaneous along the whole of the line, and had there been "suddenness and *ensemble*" in the efforts of the troops, the object would have been attained. The following despatch from General Eyre gives some additional particulars relating to the melancholy affair:—

Camp before Sebastopol, June 18, 1855.

SIR,—I have the honour to report, for the information of Lieutenant-General Sir Richard England, K.C.B., commanding the division, that, agreeably to his instructions, I moved yesterday morning, between one and two o'clock a.m., with my brigade, consisting of the 9th, 18th, 28th, 38th, and 44th Regiments—total strength about 2000 bayonets—and proceeded down the ravine on our left, by the French Picket-house, for the purpose of attacking the enemy's ambuscades, and of making a demonstration on that side.

In attacking the first of these ambuscades we were anticipated by the French, who covertly took them on their left flank as we advanced in front, and made several prisoners. Beyond this the French had no instructions to co-operate with us. I, therefore, immediately pushed on an advanced guard, under Major Fielden, 44th Regiment, composed of marksmen from each regiment, supporting it on the right by the 44th and 38th Regiments, and on the left by the 18th Regiment, keeping at first the 9th and 28th Regiments in reserve.

The enemy, whose strength I could not estimate, occupied a strong position, their right rested on a mamelon, their left on a cemetery. These points were occupied by marksmen.

The intervening ground was intersected, and the road barricaded with stone walls, which our men were obliged to pull down, under fire, before they could advance.

In rear of this position, towards the fortress, the enemy occupied several houses, and there were bodies of the enemy in rear, in reserve, but of what strength I could not say. This position, under the fire of the guns of the fortress, was strong, and we could not expect to carry it and retain it without sustaining a considerable loss, and which, I regret to state, we have experienced both in officers and men; but it is gratifying to feel that they all most ably performed their duty on this occasion. The 18th Regiment pushed on, and occupied some houses immediately under the Garden-wall. [illegible]

The 44th occupied the houses on the right, from whence they kept up a fire on the enemy's embrasures. Lieutenant-Colonel Lowth moved on with his regiment (the 38th), and, after taking possession of some houses in front, endeavoured to turn the flank of a battery which annoyed us in front. The parties were afterwards withdrawn from time to time reinforced or relieved by the 9th Regiment, the 28th Regiment being drawn up in line in rear to support the whole.

Having driven the enemy from these points I continued to occupy them, with the view to ascertain the practicability of the attack on the right being successful, and until it was decided what portion of the ground should be retained for siege operations.

I cannot sufficiently express my sense of the conduct of the officers, non-commissioned officers, and men, on this occasion. They attacked the enemy, in the first instance, with the utmost gallantry, holding their ground until, in the evening, although exposed all day to a concentrated fire from the guns of the fortress, in addition to which I believe the enemy brought up some fieldguns and kept constantly firing shells. The losses occasioned were considerable: the total being 51 officers, 44 sergeants, and 487 rank and file killed or wounded.

At about five o'clock in the evening, after giving orders for the removal of the wounded to the rear, the gradual withdrawal of the parties from the front—the ground being too far in advance to be permanently occupied for siege operations—I gave over the command of the brigade to Lieut.-Colonel Adams, 28th Regiment, having received a wound in the head in the early part of the day, which prevented me latterly from attending properly to my duties. The enemy did not attempt to molest the troops on retiring. The conduct of all was so exemplary during this trying day, that I can scarcely with justice particularise individuals. I beg, however, to thank the officers commanding corps for the assistance they afforded me, viz., Lieut.-Colonel Horton, commanding 9th Regiment; Lieut.-Colonel Edwards, commanding the 18th Royal Irish; Lieut.-Colonel Adams, commanding the 28th Regiment; Colonel the Hon. A. Spencer, commanding the 44th Regiment, who was wounded; and to Lieut.-Colonel Stavely, who succeeded to the command of the regiment on Colonel Spencer being obliged to quit the field; Lieut.-Colonel Lowth, commanding the 38th Regiment, who was also wounded, and to Lieut.-Colonel Sparks, who succeeded him in the command of the regiment; and Major Fielden, 44th, commanding the advanced guard.

I received, also, the utmost assistance from my Brigade-Major, Captain Fausett, 44th Regiment; and also on this, as on many other occasions, from my Aide-de-Camp, Captain Roberts, 18th Regiment, who was also selected to Brevet-Major Stuart Wortley, Deputy Assistant Quartermaster-General, who kindly volunteered to act on my staff.

I beg, likewise, to report the judicious arrangements of the Medical Department on this occasion, and especially to thank Assistant-Surgeon John Gibbons, 44th Regiment, and Assistant-Surgeon Reeves, 38th Regiment, for their zealous and humane exertions in the field, while exposed to a most galling fire.

I have, &c., (Signed) WM. EYRE, Major-General

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM 15TH TO 17TH JUNE, 1855, INCLUSIVE

3d Battalion 1st Foot: Lance Corporal J. Connors. Private Michael Brennan. 18th: Private Francis Dignan. 2nd Battn. or Rifle Brigade: Privates William Cooper, William M'Quire, Charles Heritage. 41st Foot: Private Denis Keefe. 49th: Privates Joseph Burns, Thomas Donaghy.

NOMINAL RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES WOUNDED FROM THE 15TH TO THE 17TH JUNE, 1855, INCLUSIVE.

20th Foot.—Captain J. C. Vaughan, severely (since dead).

49th Foot: Sergeant Michael M'Kew, dangerously. Private Thomas Vyse, severely. 23rd, Private David Devine, severely. 28th, Sergeant C. B. Fuller, slightly. Private Joseph Cooney, severely; Joseph Keighley, severely. 30th: Private James Smith, slightly. Private Patrick Donnelly. 33rd: Privates Aaron Richards, John Keenon. 38th: Privates Daniel Hoban, severely; George Hall, slightly. 47th: Private William Bailey, slightly. 50th: Sergeant Henry Suppers and Misters. Lance-Corporals Stephen Daft, severely. Private William Small, dangerously. 2nd Battalion or Foot: Sergeant John Wilson Gurnin, severely. Privates John Head, Owen Melvin, severely. Daniel Lawler, Patrick Ryan, slightly. 3rd: Corporals Henry Sappers and Misters. Lance-Corporals Stephen Daft, severely. Private William Small, dangerously. 2nd Battalion or Foot: Sergeant John Wilson Gurnin, severely. Privates John Head, Owen Melvin, severely. Daniel Lawler, Patrick Ryan, slightly. 3rd: Corporals Henry Anthony Hawes, dangerously. 44th: Private Alexander Chambers, severely. 97th: Privates James Avery, severely. Thomas Anderson, slightly. 2nd: Private James Lawdson, slightly. 3rd Battalion Rifle Brigade: Corporal Charles Wickens, slightly. Private William Carter, severely. 2nd Battalion Rifle Brigade: Privates William Deasey, George Cable, Henry Heywood, severely; Septimus Hinds, slightly. Royal Artillery: Gunners Daniel Cleary, Alexander Loggie, severely. 3rd Foot: Privates Wilson Haynes, Charles Laxton, dangerously. 7th: Private Isaac Edwards, Samuel Greer, Thomas Boyland, slightly; Thomas Jones, severely.

SUPPLEMENTARY NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM 15TH TO 17TH JUNE, 1855, INCLUSIVE

17th Foot. Private George Turner. Royal Artillery: Gunner Robert Scott.

SUPPLEMENTARY NOMINAL RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES WOUNDED FROM 15TH TO 17TH JUNE, 1855, INCLUSIVE.

Royal Artillery: Captain C. G. Arbuthnot, slightly. Lieutenant, H. P. Tillard, slightly. 17th Foot: Corporal Ell Hemmings, slightly. Privates Patrick Kennedy, Thomas Walsh (since dead), severely. 18th: Colour-Sergeant Joseph Hamilton. Sergeants Edward Ashfield, slightly. Corporal Henry Steele. Bombardiers Thomas Moffat. Wm. Sweeney, Edward Aspinall, slightly. Bombardier Thomas Barnes, slightly. Gunners Thomas Holland, severely, Joseph Evans, Wm. Moriley, Wm. Sheppard, slightly; Francis Hill, Wm. Irwin, Daniel Ferguson, James M'Heath, Wm. Hubble, Robert Doggett, severely.

DEPARTMENT OF CASUALTIES ON JUNE 18, 1855.

SECOND DIVISION.—2 men killed; 1 officer, 20 men, wounded. Grand total, 33

THIRD DIVISION.—6 officers, 75 men, killed; 17 officers, 307 men, wounded. Grand total, 405 men missing.

FOURTH DIVISION 4 officers, 25 men, killed; 12 officers, 127 men, wounded; 37 men missing. Grand total, 205

LIGHT DIVISION 3 officers, 32 men, killed; 24 officers, 288 men, wounded, 2 officers, 37 men, missing. Grand total, [illegible]

ROYAL ARTILLERY.—2 men killed, 9 men wounded. Grand total, 10.

ROYAL ENGINEERS.—1 officer, 2 men, wounded. Grand total, 43

ROYAL ARTILLERY.—Royal Sappers and Miners.—6 officers, 9 men, killed, 3 officers 7 men, wounded, 3 men missing. Grand total, 28

CAVALRY.—1st Dragoons, 1 officer, 1 killed, 68 officers, 103 men, wounded officers, 130 men, missing. Grand total 1443

NOMINAL RETURN OF OFFICERS KILLED ON THE 18TH JUNE, 1855.

THIRD DIVISION.—18th Foot: Lieutenant J. W. Mountain. 38th: Lieut. and Adjt. G. S. Hughes. 44th: Captain Frederick Smith. 47th Foot: Captain Bowes Fenwick. 97th: Lieut. F. W. Goodlet.

FOURTH DIVISION STAFF.—Major-General the Hon. C. Campbell, Bart. 17th Foot: Captain J. L. Crofter. 57th Foot: Lieutenant-Colonel Thomas Shadforth: Lieutenant C. Ashwell. 23rd Foot: Lieut. T. W. Wm. Lieutenant and Adjutant J. S. Jones. 30th Foot: Lieut. Thomas Sparkes, slightly. 34th Foot: Captains John Shillito, John Hobhouse. F. Hart: Lieutenant H. D'Art.

LIGHT DIVISION, 2ND BRIGADE.—Captain E. F. Forman

ROYAL ENGINEERS.—Captain William Jones, Lieutenants James Murray, T. Evans.

NOMINAL RETURN OF OFFICERS WOUNDED ON 18TH OF JUNE, 1855.

SECOND DIVISION 41st Foot: Lieutenant-Colonel J. H. Spurgin, severely.

THIRD DIVISION.—Staff: Lieut.-Colonel [illegible] Assistant Quartermaster-General, severely. 8th Foot: Colonel H. C. Cobbe, severely. Lieutenant-Colonel [illegible] Major Douglas, slightly. 18th: Major J. Clarke Kennedy, slightly. Captains John Cornick, severely; [illegible] Adjutant, slightly. M. J. Haynes, dangerously. J. G. Wilkinson, severely. Lieutenants W. O. Bryen Taylor, slight. G. W. Keane, severely. Fairlie Fearnley, severely. Hon. Arthur Gresham, slightly. 28th: Captains H. H. C. Godley, severely; A. G. R. Macalpin, severely. J. D. Malcolm, severely. Lieutenant C. B. H. Leathes, severely. Ensigns [illegible] severely; Lakeard H. Daniel, severely. Lieutenants [illegible] Ensigns [illegible] Johnson, severely. Captain G. H. Norman, severely. 38th: Lieut.-Colonel C. H. Lowth, severely. Captains Rowes Fenwick (since dead), Hon. C. Agar, severely. Lieutenants [illegible] W. H. Mansfield, dangerously. F. W. Caulfield, mortally (since dead). Lieutenants J. Logan, severely; T. O. Haworth, severely.

FOURTH DIVISION.—28th Foot: Staff-Captain A. Snodgrass, severely. 90th: Lieutenant-Colonel F. C. Kenealy, slightly. Lieutenant J. F. O'Neill, slightly. Ensigns J. S. Heaney, slightly. Hart Lieutenant John G. Ensign, slightly. 57th: Captain and Brevet-Major A. R. Clarke, severely. Captains G. H. Normand, severely. F. F. Lee, severely; C. W. St. Clair, severely. Lieutenants C. Venables, severely. A. F. A. Sadler, severely.

FIRST BRIGADE RIFLE BRIGADE.—Lieutenant C. A. P. Bodleau, severely.

LIGHT DIVISION.—7th Foot: Major A. J. [illegible] severely. Captain [illegible] Lieutenant and Adjutant J. S. C. Hobson, dangerously, since dead. Lieutenants A. F. F. Jones, severely. Hon. R. Fitzclarence, dangerously. C. Mallan, severely. Louis C. Browne, slightly. G. H. Wallis, slightly. W. L. L. G. Wright, slightly. 23rd: Lieut.-Colonel D. Lysaght, severely. 33rd: Lieut.-Colonel Hon. D. Jocelyn, severely. G. F. Mundy, slightly. Captains J. E. T. Quale, dangerously; T. Wickham, severely; Lieutenant J. F. Rowes, severely. 34th: Artillery Captain W. J. Williams, slightly. Royal Engineers: Major and Brevet-Major H. Harman, severely. F. Peel, slightly. H. D. Ali, dangerously since dead. Lieutenants [illegible] severely. 88th: Captains [illegible] severely. [illegible] Lieutenant and Adjutant [illegible] severely. 2nd Battalion Rifle Brigade: Lieutenant-Colonel A. Woodford, severely. Captain [illegible] severely. Lieutenant [illegible] severely. Artillery:

THE BALTIC FLEET.

A telegraphic despatch from Berlin of the 4th inst. states that "the town of Nystadt, situated at the entrance of the Gulf of Bothnia, has been bombarded and destroyed." When this took place is not mentioned, but it must have been very recently. The naval force in the Baltic is now considerably strengthened, so that we may expect to hear of so work before long.

On the 27th ult. the squadron under Admiral Plumridge, consisting of line-of-battle ships, several gun-boats and mortar-vessels, was seen about half-way between Nargen Island and Dagsort, *en route* to join the Commander-in-Chief; and on the same day the *Tartar*, with two mortar-vessels, also passed up the Gulf.

On the 21st ult. the *Amphion*, 36, screw-frigate, Captain Key, while employed in reconnoitring the fortifications at Sveaborg, accidentally mistook the channel, and in consequence grounded. The tents were immediately despatched in all directions to sound, and, while so employed, one of the nearest forts opened a brisk fire upon the frigate. Four shots struck her, killing one man and wounding two others. Captain Key, however, with nothing disabled, returned the compliment with such energy and precision, that he succeeded in blowing up a large Russian powder magazine, and occasioned other serious damage to the fort.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, JULY [illegible]

Month and Day.	Corrected Reading of Barom. at 9 A.M.	Thermometer. Highest Reading.	Thermometer. Lowest Reading.	Mean Temperature of Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.
	Inches.	°	°	°	°			Inches.
June 29	30.015	80·2	52·3	66·0	+ 4·5	84	E.N.E.	0.00
" 30	29.746	75·0	57·5	64·7	+ 3·0	77	E. & S. & W.	0.00
July 1	[illegible]	77·0	52·0	62·4	+ 0·6	89	[illegible] W.	0.00
" 2	30.147	73·3	58·6	64·2	+ 2·3	91	[illegible] W.	0.00
" 3	30.147	76·5	57·8	65·2	+ 3·1	75	N.	0.00
" 4	[illegible]	75·2	50·4	64·9	+ 2·7	88	[illegible]	0.11
" 5	29.80	77·0	42·2	58·5	— 3·8	87	[illegible]	0.00

NOTE.—The [illegible] above the average and the sum below the average.

The reading of the barometer has varied but little during the week, the lowest reading being [illegible] in. on June 30th; and the Highest, 30.17 in., on July 2nd. The mean for the week at the height of eighty-two feet above the level of the sea, was 30.00 inches.

The *mean temperature of the week* was [illegible]°—being 1.9° above its average value.

The range of temperature during the week was 38°—being the difference between the highest reading, on June 28th, and the lowest, on July 5th.

The mean daily range of temperature during the week was 22.1°.

The weather has been fine and hot during the week. *Rain* fell to the depth of one-tenth of an inch only, and this was partial.

For the month of June the mean reading of the barometer at the level of the sea was 30.020 inches, and the range during the month 1.110 inches. The highest temperature of the air by day was 84·0° on the 6th, and the lowest by night was 36·8°; the range of temperature during the month was therefore 47.2°. The mean of all the highest readings by day was 69.8°, and of all the lowest by night was 47.8: the mean daily range of temperature during the month was therefore 21.7°. The mean temperature of the air for the month was 56·9°, being 2·9° *below* its average value. The mean temperature of the dew point was 52.3°. The mean degree of humidity was 80, (complete saturation being represented by 100). And the fall of rain during the month was 0.7 inch.

Lewisham, July 6, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—Within the week ending last Saturday the births of 1232 children were registered within the metropolitan districts; of whom 678 were boys, and 554 were girls. The number of deaths registered within the week was 1273: of whom 669 were males, and 604 females. In the twenty-sixth week of the ten preceding years the average number of deaths was 1025; this number increased in proportion to the corresponding population becomes 1125—a number less than died by 148—thus indicating a high mortality as still prevalent. The number of deaths from diarrhœa in the last four weeks were 16, 17, 26, and 31 respectively. This is a tendency to increase, though the numbers are still inconsiderable.

THE GROSVENOR RIOTS.—The mob congregated before Marlborough-street Court on Tuesday having exhibited indications of renewing attacks on the Police-court and police, Mr. Hardwick gave directions to the force of constables to be in attendance in the garden at the back of the premises—a precaution which in all probability saved the neighbourhood from precipitation of a renewed riot. Mr. Hardwick also directed that those who were unable to pay their fines were placed in the prison van, the gaoler (Welch) and his assistants were pelted with large stones, and would have been roughly handled but for the presence of mind of Welch in taking the prison van, at a later period of the evening, was not brought in front, as usual, but taken into the mews at the back, and the prisoners delivered into it. The mob were excluded from the mews by the police closing on, and were thus prevented from attempting a rescue, which it is believed was planned, and only defeated by the alteration in the arrangements. For which the mob were evidently not prepared. Thus disappointed, themselves baffled, rushed round to the front of the Court, and began to smash the windows. The police, who had not up to this time made their presence apparent, were formed into two bodies in the Court, and suddenly sallied out into the street by the two doors, and with strict injunctions not to use their truncheons. The sight of the police had a most instantaneous effect on the rioters, who dispersed in all directions, tumbling over each other, and blocking up some of the thoroughfares in their blind eagerness to get away. As soon as the police had retired to their old post, the mob returned, and committed various wanton acts of mischief, breaking more windows at the Police-court and in the adjacent houses. In the course of the afternoon information was brought to the Court that Lord R. Grosvenor's residence in Park-lane was besieged by a mob, and that additional police force had been sent for to protect the place.

THE HYDE-PARK PRISONERS.—A dense crowd of persons assembled before the Police-court, Marlborough-street, at an early hour last Monday morning, to learn the result of the complaints against those seventy persons taken into custody on Sunday, in Hyde-park, for various malfeasants, and general disorderly conduct. When Mr. Hardwick, the presiding magistrate, made his appearance in the street, for the purpose of entering upon the bench, the mob began some to cheer and some to hoot. Several persons cried out "Act with justice!" and one person flung a stone, which, however, missed the magistrate, and struck a person near him. Mr. Hardwick having entered the court was in the act of passing one of the windows, when a stone was flung from the street, which broke a pane of glass, but did no further damage. Mr. Hardwick, who bore these attacks with unruffled temper, intimated to the inspector that if the persons outside persevered in their disorderly conduct he would procure the assistance of the military. This had the effect to cause the street and avenues of the court to be cleared. A pause of three hours took place in consequence of the doubt which existed as to the Home-office allowing the charge to be heard in the court, the power being vested in the Home-office of removing charges to Bow-street, to be heard there. This power has been several times exercised with reference to cases arising within the jurisdiction of the court, and always with great inconvenience to all parties—prosecutors, witnesses, and prisoners. About two o'clock a serious conflict happened between the police and the continually-increasing mob. The newly-manufactured road offered facilities to the mob to revenge themselves on the police, and of this they availed themselves when the information was conveyed to them that the prisoners were still locked up. The police drew their truncheons upon their assailants, and drove them back with tremendous force into the narrow streets and courts in the neighbourhood of the court. The conflict was short, sharp, and decisive. The police were the victors; and after a short time succeeded in conveying several of their opponents to Vine-street station, to be added to the number with whom the magistrate had to deal. An additional body of police then made their appearance in front of the court, and began to clear away the mob that had assembled, while they were received with yells, groans, and other marks of disapprobation. The police freely used their truncheons, and at last drove the people back and after that almost none to remain in front of the court. Another long delay again took place, during which time communications passed between the magistrate and the police, while on the outside of the court the crowd again began to collect, but were again dispersed by the police. Throughout the whole of the second series of conflicts was kept up between the police and the crowd. After a good deal of discussion between Mr. Hardwick and Mr. Ballantine, who appeared on behalf of a number of the prisoners, it was arranged that they should go out on their own recognizances to appear next day. On Tuesday the cases were resumed. The offences were thus classified:—for being concerned in throwing stones; ten for assaults upon the police; five for being riotous and obstructing the police; three for attempting to pick pockets. The other prisoners were unconditionally discharged at a late hour on Tuesday night. Mr. Clarkson, on the part of the Government, intimated the withdrawal of the charges against persons charged simply with riot. The others were [illegible] with throwing stones at the police. A gentleman [illegible] was a sample of the whole. [illegible] sentenced him to the [illegible] shilling each, or in default [illegible] similar punishment. Some of the [illegible] against the prisoners, but pended the [illegible] excitement.

THE SILENT MEMBER.—(No. XXIV.)

THERE is a considerable increase in the number of Silent Members as the Session draws near to its close; and, indeed, the large majority of the House may be said to consist of members who by their silence give consent to almost any measure that may be proposed to them. It is this portion of the Parliamentary year that needs to be watched more than all the preceding part of the Session, for it is when their labours approach their termination that the two Houses proceed to legislate in haste, and afford grounds for that "repentance at leisure" which is seldom productive of much benefit. It was at the fag end of a Session that the obnoxious Beer Bill was passed into law, and till the fag end of the Session has been delayed the consideration of the propriety of repealing the measure. Everything that is now done must, of necessity, be done in a hurry, and may possibly, therefore, be done badly; though the time lost in talking at the commencement of the Session, and, indeed, almost up to the present moment, would have sufficed to give to the consideration of every legislative question the fullest deliberation that the subject could have required. The most wholesome reform that could possibly be effected in Parliament would be a curtailment of the length of the speeches, and this can only be effected by a determination on the part of the press to refrain from reporting the long harangues of a garrulous Legislature. Perhaps, however, a still more effective method of checking the evil would be to report the speeches literally as they are spoken, and the probability is that even the best of parliamentary talkers would be inclined to limit his remarks when he found himself responsible for every word he may have uttered.

Notwithstanding the determination of the Government to sacrifice a number of useful measures, for want of time to carry them, the House of Commons can still afford to throw an evening away; and, accordingly, on Tuesday last there was a "count-out," in consequence of the small attendance of members. The difficulty really is, to get a sufficient attendance to do any business at all; for, it being understood that there is no time for talking, and as talking is the chief object that some of our most active members of Parliament have in view, the chances are that many of the cleverest men will absent themselves from the House—while those who go to listen to them will also keep away from it. Thus it happens that most of the weightiest business of the Session is done in the thinnest Houses, and, indeed, there is often difficulty in keeping a House together for the passing of those measures which are either necessary, or which the Ministers are anxious to carry.

Perhaps no legislative proposal was ever abandoned amidst less regret or more satisfaction than attended the withdrawal of the Sunday Trading Bill. It is to be lamented, however, that the author of the measure did not attend to the voice of public opinion before it made itself heard in Hyde-park in the shape of some rather formidable murmurs from a very mixed multitude. The majority had no other object than to protest against the obnoxious bill; but the crowd contained some of those elements which are always at hand to take advantage of confusion, and endeavour to produce a collision between the people and the authorities. That the vast majority of the meeting had any tumultuous or illegal design is clearly untrue; but the pickpockets and other criminal classes were sufficiently represented to cause an infusion of the lawless element, which only wanted the opportunity to produce all the evils of a very dangerous riot. It is the fashion to abuse the police when they are engaged in an unpopular duty, and they have accordingly come in for some very severe censure, which, notwithstanding some individual cases of misconduct, the body, as a whole, does not appear to have merited. The worst part of the matter is that the Legislature has shown a readiness to yield to something very like intimidation after having declined to yield to reason and argument. It is, however, for the masses to show their own good sense by abstaining from any further demonstration, for it must be admitted that the rich man has as much right to take his sunday airing in the Park, and the wealthy or well-to-do tradesman ought to be as able to enjoy his ride in his brougham or one horse chaise, as the shopkeeper to go out on his cart, or the workman to take his walk with or without his wife and family. The people who were annoyed on Sunday last in Hyde-park were not the sort of people who wished to interfere with the Sunday arrangements of the poor; and, indeed, the sunday frequenters of the Parks, whatever class they belong to, are not the kind of persons who would place any limit on the reasonable enjoyments of the humbler classes of society. Any further attempt to hoot and annoy the promenaders in Hyde-park will amount to an act of tyranny on the part of those who maintain the right of every class to a liberty of action, which the recently-proposed Sunday Trading Bill would, it is supposed, have restricted. It is not fair to discourage the police by making general attacks on the force whenever it is engaged in a matter with which the people have no sympathy; and it would be a dangerous thing, indeed, if the police were to set itself up as a judge of the cause in support of which its services may be required. It is much better to hold those responsible by whom the orders are given, and visit with censure those only who have exceeded their duty which has been assigned to them. If any members of the police force have been guilty of the acts of violence laid to their charge, they will be individually liable to punishment for the offences they have committed; but it is neither wise nor just to foment a cry against the whole police force, which has outlived its early unpopularity, and had on the whole begun to gain the confidence of all classes of society.

It is in question which must afford a subject for legislation next year, and, indeed, it is hardly safe to defer so long the consideration of what is to be done with those criminals who, under the authority of "tickets of leave," are let loose to plunder the community. The evil alluded to is connected somewhat closely with the Sabbatarian movements of the present day, for tickets of leave are easily obtainable by those who are aptest in the exercise of religious cant, and who are, to a certain extent, the representatives of the Sabbatarian party among criminals. These persons, having experienced the facility with which they may escape punishment by the outward assumption of sanctimony, are unrestrained by any fear of the penal consequences of crime, for nothing is easier than religious hypocrisy, and they know that nothing is more effectual in obtaining indulgence and a commutation of punishment. Religious cant has become a portion of the stock in trade of rogues of every degree, from the principal partner in a bank down to the participator in a burglary. The danger now is, or soon will be, that we shall fall into the opposite extreme, and shall begin to treat with undue contempt those decent observances of outward forms which have been brought into discredit by the rascality of those who have assumed them for dishonest purposes

A good opportunity for a practical piece of Administrative Reform has occurred by the removal of Viscount Canning from the Post-office to the Governor-Generalship of India. His Lordship is far above the average of aristocratic place-holders, and he will make as good a Governor General as many that have preceded him; but there is little doubt that Mr. Rowland Hill, the Secretary of the Post-office, would make quite as good a Postmaster-General as the noble Lord who has just left, and a much better one if of the department then any one else that could be nominated to the appointment. If the Government should seriously desire to putting the right man in the right place, Mr. Rowland Hill will be the new Postmaster-General.

CANNON'S GUNS.—We have been assured that the telegraph has brought orders to send off to the Crimea some of the guns invented by our countryman, Cavalli, which carry with effect to a distance of 5000 yards. These guns, however, cannot be ready for embarkation before a fortnight or three weeks. It would be advisable in the meantime to shoot the guns for the Lords, were it only to demonstrate our superiority in that branch of the art of war.—*Times Paper.*

THE DEMONSTRATION IN HYDE-PARK.

SUNDAY, June the 24th, was a great day for the large family of the masses. It is not often that the Masses air themselves in Hyde park [illegible] any time, but hitherto it has had no attraction [illegible] which they can call their own. The Masses are chiefly denizens of [illegible] lane, Whitechapel, Lambeth, the East, [illegible] inhabiting the hot, airless courts, and fœtid alleys [illegible] sleeping, eating, and drinking generally in the [illegible] loathe—to smell, is to avoid. Now the masses [illegible] their means will not allow them to be so—but they are great strollers; and it has been their wont time out of mind to wander away on the sundry to Hampstead and Highgate, Wandsworth, Putney, Fulham, Hounslow, and other green and pleasant places around London: but since the [illegible] cheerful Beer Bill became the law of the land they have abandoned much of their Sunday rambling, because gaseous ginger beer and flaccid ditch-water are not calculated to make glad the heart of man after a walk of five or ten miles this sultry summer-time. So they keep to their doorways and windows in their courts, and smoke great quantities of tobacco, and talk bad politics, and reckon up how many of their friends and kindred have died of disease and wounds in the Crimea, and wonder who is to blame for nearly all the misery which they hear has befallen the gallant fellows they cheered on their way to the war some few months ago. And then some one inquires the meaning of this new Sunday Act that is to shut up the shaving-shop and the tobacconist, the tatur-shop, and the milkman's, and perhaps Aaron Moses the butcher's

"THE DEMONSTRATION" IN HYDE-PARK—DRAWN BY JOHN LEECH.—(SEE PRECEDING PAGE)

THE LATE MR. JOHN BLACK.—FROM A PAINTING BY WORTHINGTON.

WE briefly announced in our last Number, the death, in his seventy-second year, of the well-known John Black, the "father" of the London Press; and whose Portrait we this week present to our readers. Mr. Black was born in 1783, near Dunse, in Berwickshire. He was the son of a labouring cottier, resident four miles from that town. He lost his father in his infancy, and had the additional misfortune to lose his mother when he was only twelve years of age. But even before that early period he gave signs of his future ability. He was educated at the parochial school of Dunse, and had to walk four miles in, and four miles out, daily—a habit or necessity which made him a pedestrian for the remainder of his days

He was noted among his schoolfellows, and by the good people of Dunse, as a remarkably clever boy; and it was the dearest wish of his mother—and a characteristic trait of the Scottish maternal character—that the clever child should be educated for the Church. Every poor woman in Scotland who is blessed with a son more than usually proficient in his studies forms a devout wish "to see her bairn in the pulpit." But in Black's case the dream was not to be realised. How he fared between the ages of twelve and fourteen is not known; but at the latter period, according to his own statement, he was engaged as an errand-boy in a factor's office in his native town. Finding that sphere too limited for his energies or ambition, he went to Edinburgh in his 15th year, and succeeded, after many hard struggles

With self and with temptation strong,
And Pride that sought to lead him wrong,

in finding employment at a stationer's. He subsequently obtained admission to the offices of two, if not of three, Writers to the Signet, in Edinburgh. Here he made the best use of his time—taught himself the classics, and became an excellent Latin, and still better Greek scholar. He also devoted his attention to the modern languages, and learned German from an Austrian musician employed in the theatre, and Italian from another foreign musician—teaching them his English (such as it was) in return. He also acquired French, though he never spoke it with much purity.

He continued in Edinburgh in these various employments till twenty-seven years of age, when ambition prompted him to seek his fortune in London. He walked the whole distance, and arrived, not penniless, but, by his own account, with no more than three halfpence! He brought letters of introduction to Mr. Perry the proprietor and editor of the *Morning Chronicle*; one from the late Mr. Gibson, afterwards Sir Junes Gibson Craig. He was fortunate enough to please Mr. Perry, an admirable judge both of genius and of character, and was forthwith engaged on that journal—his employment being to translate the foreign journals, and to take his "turn" as a reporter in the gallery. Mr. Perry shortly before this time had lost the valuable services of Mr. Campbell, afterwards Attorney-General, and now the Lord Chief Justice of England, and of Mr. (afterwards Serjeant) Spankie. On Mr. Black's engagement, Mr. Charles Proby was managing conductor under Perry; and Mr. Lambert, the printer and publisher. Peter Pinnerty, some of the older Colliers and Dowlings, Mr. Coulson, and a majority of Scotch and Irish young men of talent and promise were Black's contemporary reporters before his promotion to the conduct of the paper. Black was considered to be a very rapid reporter; but Mr. Proby used to say that his principal merit consisted in the celerity with which he made his way from the House of Commons to the Strand, which he always did in company with a huge dog, his constant companion. Black worried the overseer by delaying to the last moment his "copy," and by loud radical comments on the subject-matter of debate in the reporters' room. His animal spirits were overflowing, and his love of "argumentation" when young excessive. He used to be called the "Professor of Logic" and the "Flying Scotchman."

Mr. Black was appointed principal editor of the *Morning Chronicle* about two years before Mr. Perry's death, which occurred in 1821. He held the office without interruption from that period until 1844, nearly one-third of a century. He was necessarily brought into social and political intercourse during that time with some of the principal men of his day. And it is but doing scanty justice to his memory to say that no one knew him who did not love him for the guilelessness of his disposition, and admire him, not only for the vast range of his learning, but for his sterling and fearless honesty of purpose; and his sincere, earnest, and successful advocacy of Liberal principles, at a time when to be, or appear to be Liberal, was to be accused of disaffection; and when the soldiers of the cause gained more hard blows than glory in its support.

Mr. Black was an editor of the old school, and lived at his workshop in the higher story of the then office, in Norfolk-street, Strand. He was twice married—first under circumstances of which little is known. His second wife, who died two or three years before him, was Miss Cromeck, sister of the artist of that name, residing in Newman-street, Oxford-

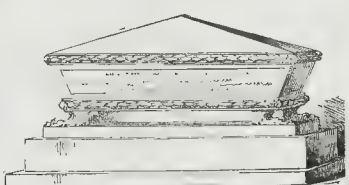
THE BALTIC FLEET.—"THE EXMOUTH," 91—FLAG OF REAR-ADMIRAL SEYMOUR.—(SEE PAGE 26.)

EMBARKATION OF TROOPS AT LIVERPOOL.

ON Friday last the 3rd Regiment of Lancashire Militia, which has been some time stationed at Preston—to which place and the neighbouring towns the principal portion of the men belong—embarked on board the *Lord Raglan* transport, at Liverpool. The regiment, which numbers about 800 men, is to proceed to Gibraltar, to garrison that place, in lieu of the regiment of the Line ordered for active service. The regiment is under the command of Colonel Wilson Patten, M.P., whose wife and family accompany him. The embarkation took place under the superintendence of Captain Bevis, the Admiralty Agent, and Colonels De Rinzy and Swann; a portion of the landing stage being reserved for the purpose. The Cunard steam-tenders *Jackall* and *Satellite*, and the barges *Monkey* and *Badger*, were engaged to take the troops from the stage to the *Lord Raglan*, which lay anchored in the stream. The Mayor (J. A. Tobin, Esq.), and Messrs. J. B. Lloyd, F. Bold, J. A. Picton, Parker, and other members of the municipal body, were present to witness the embarkation, which was conducted with the greatest order and precision, and amidst loud and hearty cheering—the bands of the Artillery, Militia, and the 3rd Lancashire playing "Cheer, Boys, Cheer," "Auld Laug Syne," "Partant pour la Syrie," &c. The Bishop of Sodor and Man, whose son is an officer in the regiment, was also present. The 3rd Lancashire are for the most part small men, but young and active; they are armed with the old fashioned musket and bayonet. Sixty-two soldiers' wives and [illegible] children accompany the regiment. On the previous evening Colonel Patten, and the officers of the 3rd Lancashire, were entertained to dinner at the Adelphi Hotel, by Edward Felder, Esq., and John Cooper, Esq., of Preston. A large number of gentlemen, well known in the county, were present.



MONUMENT TO CHARLES HENRY SYDNEY RAITT, 90TH LIGHT INFANTRY, AT MALTA.

MONUMENT TO LIEUTENANT RAITT.

THIS memorial has just been raised to Lieutenant Charles Raitt, 90th Regiment, son of Lieutenant-Colonel Raitt, late of the 80th Regiment. The young officer was on his way to join his regiment before Sebastopol, but was taken ill of fever at Malta, where he died; and his brother officers, Captains Vaughan and Tinling, have erected this monument to his memory. It must be highly consoling to his family, by whom his loss is severely felt, that one so young should be so honoured in death, but he merited such honour, for he was steady and truthful, and religious in the best sense. Lieutenant Raitt's family are distinguished in our military annals. Colonel George Raitt, Barrack-master at Bristol, served in Egypt and Spain. Major Raitt, of the 2nd, or Queen's, was present at the sieges of Ghusnee and Kelat, under Lord Keane; and his other cousin, Captain Bowler, who died on his passage to England, was in the campaign, under Lord Gough, in the Punjaub: all those officers received medals for their services.

The following is the inscription on the Monument:—

Sacred to the memory of Charles Henry Sydney Raitt, Lieutenant 90th Light Infantry, who died at Malta, 29th April, 1855, aged eighteen years. This monument is erected by his brother officers of the depôt at Malta as a token of their regard and esteem.

street, and when Buck temporarily lodged. Mrs. Black was herself a remarkable woman—something like *Mary Merrines* in person. The garret habits of the couple were a frequent source of amusement to their friend —— rooms, including the bed-room, were encumbered with books, both —— and on the floor the gleanings of nearly half a century: that it was difficult to walk through them. At one time the pair were obliged to econ into bed—the end the bedside being piled up with dusty volumes of divinity and politics, and defy entrance in any other way: for it —— one of the editor's —— that he would not have his books —— or dusted by —— hand but his own.

Mr. ——'s executors sold the *Morning Chronicle* in 1862 to the late Mr. Clement for £40,000. Mr. Black continuing its sole editor and exclusively providing the leading articles. Mr. Clement held the copyright and l—— to Sir John Easthope, Mr. Simon McGillivray, and Mr. James Duncan, in 1834, for £6,000: Mr. Black being continued as editor.

It is not correct that, up to the period when the *Chronicle* passed into the hands of Sir John Easthope and his co-proprietors, Mr. Black, single handed, wrote all the leaders. The fact is, that his value as an editor did not consist entirely in his varied knowledge and sound practical common sense, but, to a large degree, in his power of making friends. He had a very wide circle of political and literary friends, and personally knew every leading Liberal of his time. Every eminent man in the wide world of British and Irish politics sought his aid and he kept the secrets entrusted to him with scrupulous fidelity. Slower or loquacious on other matters, he never profession-ily betrayed his contributors. The late Duke of Sussex was an active purveyor for him, especially during the illness of George III. and the Regency. His other frequent writers were Sheridan, Adair, D. Chinnard, General Palmer, Mr. R. Dubois, the Rev. Mr. Colton, Lord Holland (very often), the late John Allen, Parson Jekyll, "Tommy Hill" (facetiously reported to have been older than the Monument, the Great Fire of 1666 having destroyed his baptismal register), Home Smith, and other writers now no more. To these especially, and as more eminent political writers, should be added the names of Jeremy Foublanque, James Mill, David Ricardo, C. P. Thomson (afterwards Lord Sydenham), Mr. McCulloch (one of his most steady and attached friends), and Mr. Senior. These gentlemen wrote chiefly on subjects of political economy. Mr. Chadwick, of course, provided Mr. Black with ample materia. on the Poor-laws. Mr. Francis Place, though a Charing cross tailor, supplied Mr. Black, as also did Mr. Hume, with his valuable material in the discussion of the Repeal question, the Union Commutation Laws, and the Export of Machinery, in 1824-5. Many members of the Upper House also favoured Mr. Black with contributions, especially the "Jockey of Norfolk"—called the first Protestant Duke—the late Lords Brougham, Lansdowne, Durham, and Essex. Among the deceased commoners we have omitted honourable mention of the late Charles Buller, who in 1830, then a student in Mr. Coulson's chambers, first used his pen for Black in lively and brief articles. The supposed ghost of James also found the Editor—as he found many others—ready, and for fully a quarter of a century after—to the Right Hon. Edward Ellice, the member for Coventry, —— —— —— —— —— —— —— —— —— respondent. —— —— —— —— —— —— —— —— ——

NATIONAL SPORTS.

RACING is generally an rather a "deadly lively" state in the month of July, and the present year is no exception to the rule. Goodwood may bring better things with it, but Fandango is scratched for the Cup, and Mr. Popham has announced that Will Daycell is not likely to try his lot in it under 8st. 11lb. It also seems very dubious whether Oulston, with such high St. Leger hopes before him, will throw down the gauntlet to Kettle, who only gives him 12lb. for his two years. Although he has the finest turf in the world at their door, Wild Dayrell's legs will always be a source of anxiety, as they are hardly suited to the gigantic top they have to support, and we doubt much whether there will ever be any 1000 guinea match between him and Oulston. Baronemo, who will represent the foreigner in the Goodwood Cup of this year, is said to be a most moderate-looking animal. Lord Anglesey has purchased the victorious Irish three-year-old, Sultan, for 1000 guineas; but he has, unfortunately, no St. Leger engagement. The Jockey Club have sustained a third loss within the last four months by the death of the Saint of Caledon. His Lordship was always a keen sportsman; but his racing was only on a limited scale, and he delighted, especially, in the blood of Simoom Wanota, which was one of his best horses, passed into Lord Clifden's hands; while Skylock, after being beat a head by Flatcatcher, for the Two Thousand Guinea Stakes, was sold to the "B. B." Company, who were then in their zenith, for 2000 guineas, and ran third to Surplice for the Derby. His Lordship (who was only forty-three) never won any of the three great events of the year; but Chieftiyer, Aaron Smith, Katty Darling, &c., all did him good service, under Wadlow's training, and Marlow and Crouch's riding

The race meetings of the week commence with Harrogate on Monday and Tuesday, while Lancaster, which has this year shrunk to a mere shadow, is also fixed for Monday, and promises (so we hear) a Queen's Plate struggle between Rataplan and Acrobat, Carlow stands for Tuesday, Mansfield for Wednesday and Thursday, Maidstone for Wednesday, Ipswich for Thursday and Friday, and Odiham for Friday. The great interest of the week is centred in Liverpool, which claims, as of yore, Wednesday, Thursday, and Friday. The Lancashire Oaks is the principal event on the first of these days, and March-onese (7 lb. extra) Blooming Heather, Dame Judith, and Ellermire, are amongst its forty. Early Morn, Filly, Artillery, Lady Filly, and Heir of Lynne, also figure in the Mersey Stakes, for which Dramatist is, we are told, not likely to start. On Thursday the Cup ought to be the great feature, but it is said that Mr. Topham has not handicapped the horses himself, and the result is that there are only seventeen acceptances, of which Cock Pheasant, Shoreham, and Bianca seem alone to be backed The Eglinton Biennial includes Rotherham, Corebus, Cock of the Noria, &c.; and Dervish is in the Derby Handicap. On Friday the Great Lancashire Produce Stakes has a very strong entry, including among others four of Lord Derby's, as well as Brother to Ormoco and two dark things of Admiral Harcourt, out of Hilerdale and her dam. Corebus looks as if the St. Leger on that day must be his, as Cavalier, Vandal, and Claret are not names of dread; Rotherham is pretty certain to keep his stable, and Dervish's tetrick will find less difficulty with Morgan la Faye and Paletôt in the 200 sovs. Produce Stakes. Dirk's trainer declared that he could not run down the hill at the Derby, and it will now be seen if he can run up. A sale will take place at Liverpool, on the morning of the Cup race, of several of the Marquis of Westminster's blood yearlings; and on Monday the Gratwicke yearlings, including an own Brother to Stiltingbourne, will be sold at Tattersall's. Tuesday next will also be a day of mark to nunnators, as the Derby, Oaks, and Doncaster St. Leger for 1857 all close on it

The yachting arrangements for the week commence with the Thames Yacht-club, which gives a prize on Monday for yachts under fifteen tons, to sail from Erith to Sea Reach and back. On Tuesday the Royal Mersey Yacht-club gives a £100 Challenge Cup, and the Richmond Amateur Regatta is fixed for Saturday.

Fishermen have of late found the weather too bright for trout-fishing, but considerable execution has been done among the pike. One Cumberland gentleman last week caught a pike of 32½ inches in length, and weighing 16lb., in Talkin Tarn, and on the next day caught four more pike at one haul with the "jack," equalling in aggregate weight their gigantic monarch.

The cricket matches are now at their height, and commence for the week on Monday at Lord's, where the Gentlemen of Kent and Surrey have to meet the Gentlemen of England. On Thursday the Marylebone Club, with two players, play their return match at Kennington Oval with the Surrey Club and County, who are also allowed two players. All England also play in the park of the Earl of Stamford on Monday, and at Melton Mowbray on Thursday, while the "United All England" have to meet twenty Coventry players and two given bowlers, at Coventry, on the former of these days.

NEWMARKET JULY MEETING.—TUESDAY.

Handicap Sweepstakes.—Beeska, 1. Testy, 2.
Sweepstakes of 10 sovs. each.—Maid of the Mill, 1. Perse, 2.
July Stakes.—Spudie, 1. Grape colt, 2.
Sweepstakes of 10 sovs. each.—Spudie, 1. Contentee, 2.
Handicap Plate.—Samaritan, 1. Legatee, 2.

WEDNESDAY.

Handicap Plate.—Stuntsway, 1. Contentee, 2.
Midsummer Stakes.—Paguator, 1. Wildair, 2.
Sweepstakes of 10 sovs. each.—Blast, 1. Pumpkin Maid, 2.
Town Plate.—Parts walked over

THURSDAY

£70 Handicap Plate.—Spitaway, 1. Georgy, 2.
Chesterfield Stakes.—Fyaway, 1. Fairy filly, 2
£50 Plate.—Stuntsway, 1. Perse, 2

CARLISLE RACES.—TUESDAY

Corby Castle Stakes.—Heir of Lynne, 1. Wellington, 2.
Tally-ho Stakes.—Tom Perkins, 1. Phœnix, 2.
Cumberland Plate.—Rataplan, 1. Courtenay, 2.
Prince of Wales Stakes.—Assyer, 1. Blarney, 2

WEDNESDAY.

Speculation Plate.—Florida, 1. Goodfellah, 2.
Stewards' Plate.—Holy Richardson, 1. Little Jack, 2.
Lottery Stakes.—Assyer, 1. Blarney, 2.
Travellers' Stakes.—Small Parcel, 1. Chisel, 2.
Queen's Plate.—Rataplan walked over

WORCESTER RACES.—THURSDAY

Trial Stakes.—Octavia, 1. Postulant, 2.
Two-Year-Old Stakes.—Stork, 1. Fisherman, 2
Worcestershire Stakes.—Dervish, 1. Cathedral, 2.
Selling Stakes.—Hothorpe, 1. Virtuous, 2
Witley Handicap.—Blossom, 1. Eclogist, 2.

FRIDAY

Railway Stakes.—Cockspeir, 1. Liberty, 2.
Mile field Stakes.—Vine, 1. Chere Petite, 2
Viking Stakes.—Maid of Calle, 1. Octavia, 2
Feathers Handicap.—Octavia, 1. Master Sinister, 2

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Prebendal Stall:* The Rev. H. Drury to Shipton, in the Cathedral of Salisbury. *Rectories:* The Rev. C. F. Hayden to Hemsdon, Northamptonshire. The Rev. J. Patteson to Christ Church, Spitalfields; the Rev. W. Ramsden to Sudbrook, near Lincoln; the Rev. W. Sharpe to Mureham-le-Fen, near Boston, Lincolnshire; the Rev. W. Whitelock to Hanim-on-the-Forest, Cumberland; the Rev. W. Williams to Llanbary, near Cowbridge. *Vicarages:* The Rev. J. Wilkinson to Birkhale, Northumberland. *Incumbencies:* The Rev. G. Lancaster to Grindleton, near Clitheroe; the Rev. L. J. Masters to St. Nicholas in Deeping Fen, Lincolnshire; the Rev. J. Moore to Rochester, near Uttoxeter; the Rev. J. R. Storry to St. Thomas's, Lambeth; the Rev. Dr. Sadler to St. Andrew's, Holborn, Wardven

THE NEW CHURCH OF ST. LUKE, Nutford-place, Regent's-park, was consecrated on Tuesday; when the peal of six bells, tenor, 8 cwt., key B (cast by Warner and Son's patent process), was opened during the early peal of bells in the parish. At half past one o'clock six members of the Cumberland Society rung the whole extent of Kent, Treble, Bob, Minor in a masterly style.

TESTIMONIAL.—The Rev. Irwin Lloyd, M.A., late Curate of St. Peter's-church, De Beauvoir-town, Islington, who has resigned his curacy, received on Thursday last a gratifying testimonial of respect from his school children, who presented him with a handsome silver tea service, the eighth testimonial received by him in the course of a six years ministry.

TESTIMONIAL TO THE REV. DR. CROLY.—On Friday (last week) there was a public boat of Dr. Croly, which has been executed by subscription of the members of St. Stephen's, Walbrook, and several private friends, presented to the rev. gentleman, at a dejeuner given by the Lord Mayor, at the Mansion-house, to nearly 200 guests. The boat (a characteristic likeness, by Holmes) was presented by the Lord Mayor. Dr. Croly acknowledged the gift in an eloquent address; and the company were addressed upon the occasion by Mr. R. M. Milnes, M.P., and other gentlemen.

PHOTOGRAPHY.—A new exhibition of photographs and sun-portraits of eminent individuals has been arranged at the gallery of Mr. Mayall, the eminent photographer, of Argyll-place, Regent-street. The collection contains specimens of every branch of photography, and each style of its application. Views, panoramas, fine-art pictures, stereoscopic objects, &c., show the capabilities of the process, while its more immediate value is displayed by a great number of portraits, many of which are of life-size. The latter are mostly upon paper, which exhibits a new treatment of the photographic art.

On Sunday the town of Kinsale was the scene of a rather serious riot between a number of men of the West and South Cork Regiments of Militia.

A LETTER from St. Petersburg mentions a curious whim of the present Czar. He has ordered that the Russian vessels which were destroyed to prevent their falling into the hands of the enemy, and to save, from memory, the Russian vessels which were destroyed for the purpose of obstructing the progress of the enemy.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The money purchases of Stock having increased, and the transactions for the Account having been larger than for some time past, the Consol-market has ruled very steady this week, and prices have had an upward tendency. The firmness may, however, in part, be attributed to the immense influx of gold, the distribution of the assets of the South Sea Company, and an official intimation that the new French Loan of £36,000,000 will, as we have already stated, be raised in small sums from the bulk of the people. This information sets aside all idea of any portion of the loan being taken in this country; yet we find that an active demand for gold has sprung up within the last few days, and it is possible that some large amounts will merely be forwarded to Paris Here, however, the supply of unemployed capital continues to increase to rather an inconvenient extent, and a large portion of it would, no doubt, be employed in the Consol-markets, were events in the Crimea of a more favourable nature.

The fourth of the month passed off well, and we learn that the number of protested bills was comparatively small. There has been no increase in the demand for money for commercial purposes; and the best bills, short-dated, are readily taken in Lombard-street at 3 per cent per annum.

We understand that Government is about to cancel the period fixed for the repayment of the loan granted for the West India Islands, and that the interest will be reduced from £4 to £3 5s. per annum

The imported gold since we last wrote have been little short of £300,000; and the exports of gold and silver have exceeded £700,000, the bulk of the shipments of silver being directed to India. The next packet will carry out nearly £200,000 in gold to Egypt and Turkey.

On Monday the Stock-markets are dull; but we anticipate, on Tuesday, rather more extensive, and the quotations ruled higher:—Bank Stock, 211½ to 211; the Three per Cents Reduced were 91¾ ⅞; New Three per Cents, 92¼ ⅜; and Consols for Account, 91 to 90¾. India Bonds realised 98s.; Exchequer Bills, 19s. to 20s. pm. The Continental markets are dull; but we anticipate, on Tuesday, rather more extensive, and the quotations ruled higher:—Bank Stock, 211½ to 211; the Three per Cents Reduced were 91¾ ⅞; Consols, for Acc., 91¼; and the New Three per Cents, 92¼ ⅜ to 92¼; Long Annuities, 1860, 9 1-16-16; Ditto, 1885, 16 to 16⅛. India Bonds—Exchequer Bills, 19s. to 20s. pm. A few transactions took place in Exchequer Bonds, 101 to 101. There was considerable firmness in the market on Wednesday:—Bank stock reached 212; the Three per Cents Reduced were 91¾ ⅞; the New Three per Cents, 92¼ ⅜; Long Annuities, 16 1-16; Consols for Account, 91¼; Exchequer Bills, 19s. to 20s. pm.; and India Bonds, 98s. to 100s. pm.

On Thursday the market was flat, and the quotations fluctuated:—The Three per Cents were done at 91¾ ⅞ to 91¾; the New Three per Cents, 92¼ ⅜; and the Three per Cents Reduced, 92¼; Bank Stock, 212½; Long Annuities, 1885, 16 15-16; Exchequer Bills, 22s. to 20s.; India Bonds, 98s. 99s. pm.

Most Foreign Bonds have been in moderate request, and we have very little change to notice in their quotations:—Brazilian Five per Cents have realised 100¾ to 100½; Mexican Three per Cents, 21½; Turkish Six per Cents, 89; Russian Imperial-and-Had per Cents, 89; Dutch Two-and-a-Half's, 63¾ ex div.; Dutch Four per Cents, 94; Peruvian Four-and-a-Half per Cents, 74; and Sardinian Five per Cents, 86¾.

All Joint-stock Bank Shares have been very firm and prices have had an upward tendency:—London Joints have marked 54½; Colonial, 193; English, Scottish, and Australian Chartered, 32½; London Chartered of Australia, 10½ ex div.; London Joint Stock, 34; National Provincial of England, 79 ex div.; Oriental, 23¾. Miscellaneous Securities have realised the following rates:—Canada Bonds, 120¾ ex div.; Crystal Palace, 3; Ditto, Preference, 2¾; East and West India Docks, 123; Commercial Docks, 122; General Steam, 3; Grand Junction, 104; Ditto, New, 3¼; Peninsular and Oriental Steam, 6¾; Netherlands Land, 1½; Peninsular and Oriental Steam, 62½; Ditto, New, 12½; South Australian Land, 26¾ ex div. Canal Shares have been almost nominal:—Coventry, 209; Derby, 24; Loughborough, 97½; Stafford and Worcester, 423; Stourbridge, 285. In Water-works and Insurance Companies there is more scarcely any business was been passing:—Hungerford-bridge Shares have realised, 6 12; Vauxhall, 21¾ ex div.; Wanrion, 1; Ditto Guarantees of £—.—

There has been a better feeling in the demand for most Railway Shares, and prices have risen on the week. The sales for the week amount to about £1,750,000. During the present year they have been £ 469,414, against £ 1,737,693 in 1854. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Caledonian, 61½; Eastern Counties, 12½; Great Southern and Western (Ireland), 101; Great Western, 67½; Lancashire and Yorkshire, 81½; London and Blackwall, 7¾; London and Brighton, 101; London and North-Western, 91½; London and South-Western, 88½; Manchester, Sheffield, and Lincolnshire, 26; Midland, 72½; Norfolk, 80½; North-Eastern Berwick, 74½; Ditto, G.N.E. Purchase, 98½; Ditto, York, 53½; North Staffordshire, 10½; Oxford, Worcester, and Wolverhampton, 20½; South-Eastern, 61¾; South Wales, 30; Vale of Neath, 26¾.

PREFERENCE SHARES.—Aberdeen, 105; Ditto, No. 2, 98¾; Eastern Counties, No. 2, 1; Ditto, New, 5 per Cent Stock, 4¾; Great Northern Five per Cent, 118¾; Great Western, Birmingham Stock, 75; London and Brighton, Five per Cent Stock, 119; Manchester, Sheffield, and Lincolnshire, New £10, 14; Midland Consolidated Stock, 140; North-British, Berwick Four per Cent, 95¾; Oxford, Worcester, and Wolverhampton, 107.

FOREIGN.—Antwerp and Rotterdam, 2¼; Eastern of France, 3⅜; Grand Trunk of Canada, A issue, 11⅜; Great Central of France, 14⅜; Great Luxembourg Shares, 4; Great Western of Canada Shares, 22 ex div.; Ditto, New, 10½, payable on 73, 103½; Paris and Lyons, 49¾. Paris and Rouen, 46¾; Royal Swedish, 1½; Semlin and Mo.—97.

Most Mining Shares have been to-really firm: Cobre Copper have realised 61½; Fortuna, 1½; United Mexican, 4; Llanharan, 3

Friday Evening

The fluctuations in all national Securities to-day have been trifling. The leading prices for the Three per Cents, ex div., have ranged 91¾ ⅞. The Three per Cents Reduced, 92¼ ⅜, and the New Three per Cents, 92¼ ⅜. Bank Stock, 211½; India Bonds, 98s. to 99s.; Exchequer Bills, 20s. prem.; Exchequer Bonds, 101. Foreign Bonds and Railway Shares have been flat.

THE MARKETS.

CORN EXCHANGE, Monday.—The recent arrivals of English wheat, coastwise and by inland carriage, have been very moderate. From foreign ports the show of samples was small. However, the demand for most kinds was but a sluggish state; but we have no change to report in the value of any description. The imports into London consist of 3300 quarters. Good sheep qualities sold in rather quantities, at full quotations. Less generally, but not quite, extreme prices. Feeding sorts remained former terms. The show of barley was very small, and a good clearance was effected, at extreme rates. We had a moderate inquiry for malt, at last week's quotations. The oat trade was firm, and prime heavy samples were the turn higher. Linseed, peas, and beans were firm.

Arrivals this Week. English—Wheat, 1620; barley, 9941 malt, 1030; oats, 10 flour, 1440; linseed, 40. Foreign—Wheat, 2240; oats, 12,400; flour, 2070 sacks.

Mark-lane Express and Agricultural Journal (Monday).—Wheat and Kent, red, 82s. to 70s.; ditto, white, 70s. to 84s.; Norfolk and Suffolk, red, 78s. to 82s.; ditto, white, 82s. to 86s.; Irish, 78s. to 82s.; foreign, 74s. to 84s.; malting, ditto, 82s. to 86s.; Lincoln and Norfolk malt, 68s. to 70s.; brown ditto, 62s. to 64s.; Kingston and Ware, 68s. to 74s.; Chevalier, 70s. to 72s.; Yorkshire and Lincolnshire feed oats, 23s. to 27s.; potato ditto, 27s. to 30s.; Irish, and Scotch, 24s. to 27s.; ditto, white, 27s. to 29s.; Irish beans, 32s. to 43s.; grey peas, 37s. to 40s.; maple, 40s. to 43s.; white, 42s. to 45s.; boilers, 42s. to 47s. per quarter. Town-made flour, 45s. to 70s.; Stockton and Yorkshire, 40s. to 50s. per 280 lbs.; American flour, 38s. to 44s. per barrel.

Seeds. There has been a moderate inquiry for linseed at full quotations. In other seeds, as well as cakes, very little is doing.

Linseed. Baltic, crushing, 42s. to 70s.; Mediterranean and Odessa, 40s. to 72s. per quarter; foreign, 24s. per quarter. Cakes, 6l. 10s. per ton. Rapeseed, English, 40s. to 50s.; foreign, 38s. to 45s. per quarter. Hempseed, 34s. to 35s. per quarter. Linseed cakes, English, 6l. to 6l. 10s.; foreign, 6l. 5s. to 6l. 10s. per ton; rapeseed, 10s. to 20s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 10d to 10½d; of household ditto, 8d. to 8½d. per four-pound loaf

Imported Weekly Averages for wheat, 75s. 11d.; barley, 34s. 3d.; oats, 28s. 8d.; rye, 47s. 6d.; beans, 45s. 6d.; peas, 43s. 8d.

English Gross Sold Last Week.—Wheat, 84,791; barley, 8893; oats, 11,734; rye, 126; beans, 1070; peas, 254 quarters.

Tea.—The demand for nearly all kinds of tea has fallen off, and, in some instances, we have a downward movement. Congou is a trifle dearer. Common, 10½d. to 11d.; fine, 11½d. to 12½d.; good, 13d. to 13½d.; fine, 14d. to 15d.; finest, 15½d. to 16d.; common Congou, 10½d. to 11d.; fine, 11½d. to 12½d.; good, 13d. to 13½d.; fine, 14d. to 15d.; finest, 15½d. to 16d.; prime Souchong, 14d. to 15d.; fine, 15½d. to 16d.; finest, 16½d. to 17d.; common Pekoe, 11½d. to 12

CAPTAIN COLLINSON'S RESEARCHES IN THE ARCTIC REGIONS.

ALTHOUGH the prior discovery of Prince of Wales Strait, by Captain M'Clure, in 1850, and that of Dr. Rae on Victoria Island, have deprived Captain Collinson's voyage in the *Enterprise* of much of its interest, yet that vessel penetrated farthest to the eastward; she approached nearest to the spot reached by the *Hecla* in 1819; she was successfully extricated from the ice; and one important consequence has been the exploration of the whole fishery through Behring Strait to the Mackenzie River, on the northern shores of the eastern continent. These results, together with the general details of the expedition, were communicated to the Geographical Society, at its last meeting for the season, on the 25th ult., when also a collection of geological specimens, brought by Captain Collinson from the Arctic regions, was exhibited on the table.

The *Enterprise* sailed from Plymouth on the 20th January, 1850; she reached Magellan Strait on the 10th of April, and met the *Gorgon* and *Investigator* at Fortescue Bay on the 17th. The vessels soon parted company, and never again met. The *Enterprise* was sixty-six days on the passage to the Sandwich Islands, and rounded Point Barrow on the 21st August, in a sea comparatively clear of ice; but on the next day the vessel was stopped by the pack, which proved to be impervious. Progress to the eastward being impracticable, Captain Collinson determined to attempt the opening northward, seen by Captain Kellett in the previous year, and eventually reached 73 deg 37 min. north latitude, when it became necessary to return to the south till the next season. On this voyage the title of the Pacific Ocean to its characteristic name was well demonstrated, for in sailing from 32 deg. S. lat. to 73 deg. N. lat., over a distance of 11,000 miles, there was no occasion to reef topsails.

Captain Collinson determined on wintering at Hong-Kong, leaving two officers at the Russian settlements of Michaelovski, in Norton Sound, to learn the Esquimaux language, and make inquiries among the natives. On the way to Hong-Kong the *Enterprise* touched at the Russian settlements of Sitka, where Captain Collinson obtained information about the course of the Youcon River, previously supposed to form part of the Colville, but now known to fall into Norton Sound.

The *Enterprise* proceeded from Hong-Kong on April 9, 1851; entered the ice at Cape Thadseus on June 1, reached Port Clarence on July 3, and sailed thence on the 10th, meeting with plenty of ice, but no obstruction as far as Wainwright Inlet, where the vessel was beset, and carried round Point Barrow in the same position, imminent danger of being wrecked. On the 31st she reached Tangier Point, and continued to proceed slowly along the coast against light easterly winds, with occasional rainy squalls from the S.W. The natives came on board twice with venison and geese, which they eagerly bartered. The sea, though shoal, abounds with fish, and sometimes barely wide enough for the ship; but she proceeded without detention to Point Manning, where her progress was threatened, but a passage was found, and the effect of the Mackenzie River speedily became evident, the ice in some places permitting the vessel to stand off fifty miles from the main, at which distance no soundings were obtained with 180 fathoms. Light winds and surface-currents detained the ship a week opposite Herschel Island. At length the Mackenzie was passed, and Cape Bathurst reached on August 26th, and Cape Parry on the same day. Land was soon seen to the northward, and, hauling towards it, the ship reached a strait, which was followed, when, on the 30th, traces of Captain M'Clure were discovered. The northern entrance of the strait was reached in 73 deg. 30 min. N. lat., and 114 deg. 35 min. W. long., only 55 miles distant from Parry's farthest on Melville Island; but unbroken ice barred the ship from further progress in that direction. Without any indication of the course followed by the *Investigator*, Captain Collinson pursued the same track to the western coast of Baring Land till he reached Point Kellett, where he found that Captain M'Clure had left Prince of Wales Strait only thirteen days before he entered it. Captain Collinson advanced to Point Maskell, but was then driven back, and finally passed his first winter at the south entrance of Prince of Wales Strait. A party of about forty Esquimaux were found hunting in the neighbourhood, and remained there till November, when they moved southward. The same party returned in the following May, the interval being probably spent by them in catching seals on the shore of Dolphin and Union Straits. During the winter a party from the *Enterprise* reached Cape Providence (Melville Island), only ten days after Capt. M'Clure left it, and saw his sleigh tracks; but other tracks appeared more recent, and the howling of dogs indicated the presence of Esquimaux, whom they were not prepared to meet; the party, therefore, turned back, being ill-provided with arms and ammunition. Captain Collinson got to sea again on August 5, and ascertained the Parry Islands to be an archipelago. He then proceeded through the Dolphin and Union Strait, and, reaching Cambridge Bay on September 26, was frozen in on the 30th. Here natives were met who had never seen white men. In the spring Captain Collinson started with the intention of rounding the eastern coast, but Sir James Ross in 1849, but the ice frustrated the endeavour within 160 miles of the object, at an island in 70 deg. 35 min. N., with no land visible northwards. On August 16, the ice disappeared, leaving Dease Strait free, and the route eastward through Peel Inlet appeared quite as feasible as the westward route; but, from some mismanagement at Woolwich, the coals proved to be eighteen tons short of the proper quantity, and there was, therefore, no alternative but to keep along a coast where driftwood could be found. On August 8 Point Barrow was reached, and on the 11th communication was once more reopened with the civilised world, after an interval of 1126 days.

A portrait of the Commander of the *Enterprise*, Captain Collinson, was engraved in the ILLUSTRATED LONDON NEWS, No. 742. We now engrave a few Illustrations of the Expedition.

First is a Sketch of the *Enterprise* in her winter quarters on the north coast of America in 1853-54. The ship is represented banked up with snow for the winter. The snow-houses on the right contain billiard-rooms, &c., for the accommodation of men in these dreary regions

Next is a group of Japanese dogs brought home by the *Enterprise*. They were presented to Admiral Sir J. Stirling by the Emperor of Japan upon his late visit to that island

The third Illustration portrays a group of the Esquimaux of Point Barrow a travelling party halting to rest; and showing the tails worn by the men and boys.

In the lower Illustration are represented the two different kinds of boats used by the Esquimaux in the neighbourhood of Behring Strait. The large boat (*oomiak*) is principally used for luggage and the capture of the whale; the smaller boat is used by the men for all the purposes of a light boat, for catching seals, birds, &c.

SIR JOHN BOWRING'S MISSION TO SIAM.—Sir John Bowring is said to have succeeded beyond all expectation in negotiating a treaty with the Siamese Government, which promises to open the resources of that rich country to the enterprising European trader. Sir John Bowring arrived at Bangkok on the 3rd of April. The Commission to determine the points of the treaty was signed on the 5th. The Commissioners held their first meeting on the 9th, and the treaty was formally signed on the 18th. Every endeavour was made by the King to induce Sir John to submit to the humiliating etiquette of the Siamese Court; but he insisted that he had come at the request of his Majesty, and knew of no other formalities than those observed when M. Montigny, the French Ambassador, was received. Sir John's determination gained the point, and both he and his suite entered the Royal presence with their shoes and swords, and sat on chairs at the durbar, the highest Siamese nobles being all the while prostrate on the ground.

ROBBERY IN THE PARIS EXHIBITION.—A robbery was committed on Saturday night in the gallery of the Palais de l'Industrie, in the English department. Messrs. W. Davis and Son are the sufferers, three cases having been broken open, and nineteen watches, of which sixteen are gold, stolen from it. The value of them is said to be about £500. The articles were all safe on Saturday night, at six o'clock, after the departure of the public, the French police, and our London detectives. The robbery was discovered at eight o'clock next morning, by one of the night guardians belonging to the administration, who immediately informed his superior officer. Either some one must have secreted himself in the Building, or the act was committed by persons employed during the night.

BRIGANDAGE IN SPAIN.—The stage coach, del Norte, which reached Aranda from Madrid, on the 26th March, was stopped at half-past six a.m., by a band of six men, at a short distance from Burgos. The bandits told the travellers to be without any apprehension, as they only intended to possess themselves of the horses, of which they took in need. Accordingly, after taking the six horses from the carriage, they rode off without committing any other outrage. Strict orders were given by them to the guard not to leave the spot before twelve o'clock, and to proceed to Burgos; the guard could not be forced if he did not comply with the injunction. Lord Howden, the English Ambassador was one of the passengers.—*Messager de Bayonne.*

BRIGANDAGE IN THE ROMAN STATES.—A letter from Bologna, in the *Piemonte* of Turin, of the 23rd ult., says that all the roads of the Romagna are infested with bands of robbers, and mentions the following fact to show the terror which they inspire:—Count Massari, a rich landed proprietor at Bologna, has several large estates in different parts of the country, under the administration of separate stewards, who have always considerable sums in hand. About a fortnight ago they all received threatening letters, bidding them, on pain of death, deposit specified sums in places pointed out. On the receipt of these letters all the stewards left their posts at once, and now refuse to return to them, and it appears no one is inclined to accept their places.

DESPATCHES FROM LORD RAGLAN.

War Department, July 2, 1855.

Lord Panmure has this day received a despatch and its enclosure, of which the following are copies, addressed to his Lordship by the late Field-Marshal Lord Raglan, G.C.B.:—

Before Sebastopol, June 19.

My Lord,—I informed your Lordship on the 16th that new batteries had been completed, and that, in consequence, the Allies would be enabled to resume the offensive against Sebastopol with the utmost vigour.

Accordingly, on the 17th, at daylight, a very heavy fire was opened from all the batteries on the English and French trenches, and maintained throughout the day; and the effect produced appeared so satisfactory, that it was determined that the French should attack the Malakoff works next morning, and that the English should assail the Redan as soon after as I might consider it desirable.

It was at first proposed that the artillery fire should be resumed on the morning of the 18th, and should be kept up for about two hours, for the purpose of destroying any works the enemy might have thrown up in the night, and of opening embrasures through the abattis that covered the Redan; but on the evening of the 17th it was intimated to me by General Pelissier that he had determined, upon further consideration, that the attack by his troops should take place at three o'clock the following morning.

The French, therefore, commenced their operations as day broke, and as their several columns came within range of the enemy's fire, they encountered the most serious opposition, both from musketry and the guns in the works, which had been silenced during the night, and were manned by them. I was induced at once to order our columns to move out of the trenches upon the Redan

It had been arranged that detachments from the Light, Second, and Fourth Divisions, which I placed for the occasion under the command of Lieut.-Gen. Sir G. Brown, should be formed into three columns; that the right one should attack the left face of the Redan between the flanking batteries; that the centre should advance upon the salient angle; and that the left should move upon the re-entering angle formed by the right face and flank of the work; the first and last preceding the centre column

The flank columns at once obeyed the signal to advance, preceded by covering parties of the Rifle Brigade, and by sailors carrying ladders, and the ever-carrying woolbags; but they had no sooner shown themselves beyond the trenches than they were assailed by a most murderous fire of grape and musketry. Those in advance were either killed or wounded, and the remainder found it impossible to reach the ditch. The centre column, consisting of the 34th, met a fire of grape, combined with musketry, from the enemy's works, which appeared to be fully manned; and the long list of killed and wounded in the Light and Fourth Divisions, and the seamen of the Naval Brigade, under Captain Peel, which I have already received, though not entirely, will show that a very large proportion of those that went forward fell. Major-General Sir John Campbell, who led the left attack, and Colonel Shadforth of the 57th, who commanded the centre party under his direction, were both killed, as was also Colonel Yea, of the Royal Fusiliers, who led the right column

I cannot say too much in praise of these officers. Major-General Sir J. Campbell had commanded the Fourth Division from the period of the battle of Inkerman, the arrival of Lieutenant-General Sir Richard Dacres having left me at liberty to avail myself of the present opportunity to inform your Lordship that Lieut.-General Pennefather, who was then labouring under illness, is now in so bad a state of health as to be under the necessity of withdrawing from the army. I shall deeply regret his departure, entertaining the highest opinion of him, and knowing his devotion to her Majesty's service.

I request to mention the following officers of the Royal Navy, who particularly distinguished themselves on the 18th:—Captain Peel, who commanded the whole of the sailors employed, and is severely wounded; Messrs Wood (severely wounded) and Daniel, who have been through the whole siege; Lieuts. Tymon and Dalyell, who are both severely wounded; and Mr. Parsons, mate, who is wounded; Lieutenants Cave and Kidd, both wounded, the latter mortally; and Mr. Kennedy, mate.

I enclose a list of casualties from the 18th to the 21st inst.

I have, &c.,
The Lord Panmure, &c. RAGLAN

DESPATCHES FROM ADMIRAL LYONS.

Admiralty, July 2

Despatches, of which the following are copies, have been received from Rear-Admiral Sir Edmund Lyons, K.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea

Royal Albert, off Sebastopol, June 19

SIR,—The enclosed copy of a letter from Captain Lushington, who commands the Naval Brigade before Sebastopol, has just reached me in time to be transmitted for the information of the Lords Commissioners of the Admiralty by this day's post.

Their Lordships will readily perceive that the gallantry which has distinguished the Naval Brigade throughout the war was never more distinguished than on the occasion of the attack on the Malakoff Tower and Redan; and on a future early occasion it will be my pleasing duty to bring under their Lordships' notice the conduct of those engaged during the late bombardment and attack.

I regret to find the name of Lieutenant Thomas O. Kidd, of the *Albion*, amongst the killed yesterday: he was a zealous and gallant young officer, and had served a long time with the Naval Brigade

Amongst the wounded is Captain Peel, of the *Leander*, whose chivalrous gallantry and cheerful readiness for every duty under his presence with the brigade invaluable, and I hope that Captain Lushington may not long be deprived of his services.

I am pleased to find amongst the wounded Lieut. William R. Urnston, of the *Queen*; Lieut. J. Cave, of the *Diamond*, Lieut. Osborne W. Dalyell, of the *Leander*, Mr. George Parsons, mate, of the *Dauntless*; and Mr. H. E. Wood, midshipman, of the *Queen*, Aide-de-Camp to Captain Peel.

I am, Sir, (Signed) EDMUND LYONS,
Rear-Admiral and Commander-in-Chief.

To the Secretary of the Admiralty, London

Camp, Naval Brigade, June 18.

SIR,—I have the honour to report that on Sunday, at three a.m., we opened fire as before on the different forts of Sebastopol, which was very soon returned, and with the utmost order and regularity in contact with the enemy's fire. Towards two p.m. the fire became very slack, and their batteries appeared much shaken.

The fire continued all day, and the Commander of the Forces having intimated to me his acceptance of my proposal to carry the ladders in case of an assault being made on the town and batteries, I told off four parties of sixty men each to accompany the four columns ordered for this service; and Captain Peel having volunteered his services on this occasion, I placed them under his command, and I beg to enclose a list of the officers under him. I regret to say that the assault, which took place at three a.m., was not successful; but our severe loss shows too plainly that the seamen and officers of the Naval Brigade did their duty nobly, and that the ladders were at their places in spite of the most murderous fire I have witnessed.

Captain Peel led one party in the most gallant style, and Lieutenant Cave led the other. The other two columns did not advance, and consequently the ladder parties, although exposed to a severe fire, as indeed was every one, did not suffer much.

Captain Peel was shot through the arm, but was enabled to continue his duty until the affair was over. I have to regret as well that Lieutenants Urmston, Cave, and Dalyell, Messrs. Parsons, mate; and Wood, midshipman, were all wounded.

Lieut. Kidd and nine seamen were killed, and forty-one seamen wounded, and a non-commissioned officer, three men, I trust, will be got in to-night after dark. The party under Lieut. Cave, with the loss of Lieut. Kidd and five seamen killed, Lieut. Cave and seven seamen wounded, equally performed the duty assigned. A heavy fire was kept up from our batteries with admirable precision, until the Commander-in-Chief ordered it to be slackened

I have also to report the bursting of one of the 95 cwt. 68-pounders, which caused the death of four men, and wounded three.

The enemy's line-of-battle ships did not fire, but the steamers did. I have the honour to return a list of casualties in the last two days, and to inform you our sick list is forty-nine, and all doing well.

Every officer and man engaged in this arduous service has done his duty most gallantly, and I only await your permission to recommend those whose conduct I have particularly noticed. I have &c.,

STEPHEN LUSHINGTON

A LIST OF OFFICERS ATTACHED TO SCALING-LADDER PARTIES ON THE 18TH JUNE, 1855.

Captain William Peel, in command, severely wounded; Mr. H. E. Wood, Midshipman, A.D.C., severely wounded; Mr. R. St. J. Daniels, Midshipman. No. 1 party, Lieut. Urmston, severely wounded; Lieut. Dalyell, severely wounded; Mr. Parsons, Mate, severely wounded. No. 2 party Lieut. Hardinge, Lieut. Thompson; Mr. Barrett, Acting Mate. No. 3 party: Lieut. Cave, severely wounded; Lieut. Kidd, killed; Mr. Kennedy, Mate. No. 4 party. Lieut. D'Arth, Lieut. Raby; Mr. Armstrong, Acting Mate.

Before Sebastopol, June 23.

My Lord,—I informed your Lordship in my despatch of the 19th instant, that I would make a more special report upon the movements of the Third Division, as soon as I should receive the reports of Lieutenant-General Sir R. England, and the Major-Generals commanding brigades under him

The 1st Brigade, under Major-General Barnard, proceeded down the Woronzow road, and was placed in position on the height of the ravine, ready to cooperate with the columns of attack on the right, whilst the 2nd Brigade, under Major-General Eyre, moved down the ravine which separates the left of the English from the right of the French advanced works, for the purpose of attacking the enemy's ambuscades, and making a demonstration at the head of the Dockyard Creek

This service was performed with the utmost gallantry, and, notwithstanding that they were exposed to a most galling fire, the troops maintained themselves in the position they had taken up during the day, and, at the evening withdrew unmolested, leaving a post at the Cemetery, which had been one of the objects of the attack in the morning. The action having from circumstances become a most serious one, I beg, as the most satisfactory way of making your Lordship acquainted with the particulars, to lay a copy of the Major-General's letter before your Lordship, and to solicit your attention to the names of those officers he particularly notices, and at the same time to his own distinguished conduct.

Your Lordship will see with concern that the loss sustained by this brigade is very considerable, and that Major-General Eyre is himself wounded; but I have every reason to hope that the injury he has received is not very severe, and will not incapacitate him from the discharge of his duty with the same energy and devotion as he has already applied himself to its performance during the protracted operations before Sebastopol

Lieutenant-General Sir G. Brown, to whose able assistance I referred in my former despatch, has specially brought to my notice the distinguished conduct of Colonel Yea, who was unfortunately killed, and pays a just tribute to the great merits of this deeply lamented officer; of Lieutenant-Colonel Lysons, of the 33rd, Lieutenant-Colonel Johnstone, of the 34th, and of the Queen Guard, of the 34th—all of whom are wounded; of Major General Codrington, who commanded the Light Division; of Captain Brackett, of the Rifle Brigade, who has lost a leg; and of Captain Forman, of the Rifle Brigade, who fell upon the occasion; and Major-General Bentinck continues the able manner in which the Light Division; of Captain Brackett, of the Rifle Brigade, who has lost a leg; and of Captain Forman, of the Rifle Brigade, who fell upon the occasion; and Major-General Bentinck continues the able manner in which the 4th Division; of Captain Travers, of the 7th Foot; Major Macdonell, of the Rifle Brigade; Lieutenant Knox, of the Rifle Brigade, who is wounded; and Lieutenant Thomson, of the 33rd

Lieutenant-General Sir R. England speaks highly of Colonel Cobbe, of the 4th Regiment, who commanded in the trenches of the left attack, and is severely wounded; and Lieutenant-General Bentinck eulogises the conduct of Colonel Lord de Vesci, of the 21st Foot, who assumed the command of the left column after the death of Major-General Sir J. Campbell; of Lieutenant-Colonel Warre, who succeeded to the command of the 57th Regiment, on the death of Colonel Shadworth; of Lieut.-Colonel Cole, commanding 17th; and of Captain Archer (who was killed), Gordon, McKinstry, and O'Connor, and Lieut. Thompson, of the 17th Regiment; and Lieutenant Shadwell Clerke, of the 21st Regiment; and Colour-Sergeant Colcliffe and Sergeant Pratt, of the 17th; and Captain the Hon. J. Stuart, and Lieutenants Bolles... (who is severely wounded) and Saunders, of the Rifle Brigade

Major-General R. Jones reports most favourably of the services of the following officers of Engineers:—Lieut.-Colonel Gordon, Lieut.-Colonel Chapman, Lieut.-Colonel Tylden, Lieutenant Donnelly, Lieutenant Fisher; and he deeply laments the loss of Captain Jesse, Lieutenant Graves, and Lieutenant Murray, who fell upon the occasion.

I must express my obligations to Lieut.-General Sir R. England, Lieut.-General Bentinck, Lieut.-General Bentinck, and Major-General Codrington, for the able manner in which they conducted their duties; and I avail myself of the present opportunity to inform your Lordship that Lieut.-General Pennefather, who was then labouring under illness, is now in so bad a state of health as to be under the necessity of withdrawing from the army. I shall deeply regret his departure, entertaining the highest opinion of him, and knowing his devotion to her Majesty's service.

I request to mention the following officers of the Royal Navy, who particularly distinguished themselves on the 18th:—Captain Peel, who commanded the whole of the sailors employed, and is severely wounded; Messrs Wood (severely wounded) and Daniel, who have been through the whole siege; Lieuts. Tymon and Dalyell, who are both severely wounded; and Mr. Parsons, mate, who is wounded; Lieutenants Cave and Kidd, both wounded, the latter mortally; and Mr. Kennedy, mate.

I enclose a list of casualties from the 18th to the 21st inst.

I have, &c.,
The Lord Panmure, &c. RAGLAN

War Department, July 4.

Lord Panmure has this day received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.

Before Sebastopol, June 19.

My Lord,—I informed your Lordship on the 16th that new batteries had been completed, and that, in consequence, the Allies would be enabled to resume the offensive against Sebastopol with the utmost vigour.

Accordingly, on the 17th, at daylight, a very heavy fire was opened from all the batteries on the English and French trenches, and maintained throughout the day; and the effect produced appeared so satisfactory, that it was determined that the French should attack the Malakoff works next morning, and that the English should assail the Redan as soon after as I might consider it desirable.

It was at first proposed that the artillery fire should be resumed on the morning of the 18th, and should be kept up for about two hours, for the purpose of destroying any works the enemy might have thrown up in the night, and of opening embrasures through the abattis that covered the Redan; but on the evening of the 17th it was intimated to me by General Pelissier that he had determined, upon further consideration, that the attack by his troops should take place at three o'clock the following morning.

The French, therefore, commenced their operations as day broke, and as their several columns came within range of the enemy's fire, they encountered the most serious opposition, both from musketry and the guns in the works, which had been silenced during the night, and were manned by them. I was induced at once to order our columns to move out of the trenches upon the Redan

It had been arranged that detachments from the Light, Second, and Fourth Divisions, which I placed for the occasion under the command of Lieut.-Gen. Sir G. Brown, should be formed into three columns; that the right one should attack the left face of the Redan between the flanking batteries; that the centre should advance upon the salient angle; and that the left should move upon the re-entering angle formed by the right face and flank of the work; the first and last preceding the centre column

The flank columns at once obeyed the signal to advance, preceded by covering parties of the Rifle Brigade, and by sailors carrying ladders, and the ever-carrying woolbags; but they had no sooner shown themselves beyond the trenches than they were assailed by a most murderous fire of grape and musketry. Those in advance were either killed or wounded, and the remainder found it impossible to reach the ditch. The centre column, consisting of the 34th, met a fire of grape, combined with musketry, from the enemy's works, which appeared to be fully manned; and the long list of killed and wounded in the Light and Fourth Divisions, and the seamen of the Naval Brigade, under Captain Peel, which I have already received, though not entirely, will show that a very large proportion of those that went forward fell. Major-General Sir John Campbell, who led the left attack, and Colonel Shadforth of the 57th, who commanded the centre party under his direction, were both killed, as was also Colonel Yea, of the Royal Fusiliers, who led the right column

I cannot say too much in praise of these officers. Major-General Sir J. Campbell had commanded the Fourth Division from the period of the battle of Inkerman, the arrival of Lieutenant-General Sir Richard Dacres having left me at liberty to avail myself of the present opportunity to inform your Lordship that Lieut.-General Pennefather, who was then labouring under illness, is now in so bad a state of health as to be under the necessity of withdrawing from the army. I shall deeply regret his departure, entertaining the highest opinion of him, and knowing his devotion to her Majesty's service.

I request to mention the following officers of the Royal Navy, who particularly distinguished themselves on the 18th:—Captain Peel, who commanded the whole of the sailors employed, and is severely wounded; Messrs Wood (severely wounded) and Daniel, who have been through the whole siege; Lieuts. Tymon and Dalyell, who are both severely wounded; and Mr. Parsons, mate, who is wounded; Lieutenants Cave and Kidd, both wounded, the latter mortally; and Mr. Kennedy, mate.

I enclose a list of casualties from the 18th to the 21st inst.

I have, &c.,
The Lord Panmure, &c. RAGLAN

DESPATCHES FROM ADMIRAL LYONS.

Admiralty, July 2

Despatches, of which the following are copies, have been received from Rear-Admiral Sir Edmund Lyons, K.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea

Royal Albert, off Sebastopol, June 19

SIR,—The enclosed copy of a letter from Captain Lushington, who commands the Naval Brigade before Sebastopol, has just reached me in time to be transmitted for the information of the Lords Commissioners of the Admiralty by this day's post.

Their Lordships will readily perceive that the gallantry which has distinguished the Naval Brigade throughout the war was never more distinguished than on the occasion of the attack on the Malakoff Tower and Redan; and on a future early occasion it will be my pleasing duty to bring under their Lordships' notice the conduct of those engaged during the late bombardment and attack.

I regret to find the name of Lieutenant Thomas O. Kidd, of the *Albion*, amongst the killed yesterday: he was a zealous and gallant young officer, and had served a long time with the Naval Brigade

Amongst the wounded is Captain Peel, of the *Leander*, whose chivalrous gallantry and cheerful readiness for every duty under his presence with the brigade invaluable, and I hope that Captain Lushington may not long be deprived of his services.

I am pleased to find amongst the wounded Lieut. William R. Urnston, of the *Queen*; Lieut. J. Cave, of the *Diamond*, Lieut. Osborne W. Dalyell, of the *Leander*, Mr. George Parsons, mate, of the *Dauntless*; and Mr. H. E. Wood, midshipman, of the *Queen*, Aide-de-Camp to Captain Peel.

I am, Sir, (Signed) EDMUND LYONS,
Rear-Admiral and Commander-in-Chief.

To the Secretary of the Admiralty, London

Camp, Naval Brigade, June 18.

SIR,—I have the honour to report that on Sunday, at three a.m., we opened fire as before on the different forts of Sebastopol, which was very soon returned, and with the utmost order and regularity in contact with the enemy's fire. Towards two p.m. the fire became very slack, and their batteries appeared much shaken.

The fire continued all day, and the Commander of the Forces having intimated to me his acceptance of my proposal to carry the ladders in case of an assault being made on the town and batteries, I told off four parties of sixty men each to accompany the four columns ordered for this service; and Captain Peel having volunteered his services on this occasion, I placed them under his command, and I beg to enclose a list of the officers under him. I regret to say that the assault, which took place at three a.m., was not successful; but our severe loss shows too plainly that the seamen and officers of the Naval Brigade did their duty nobly, and that the ladders were at their places in spite of the most murderous fire I have witnessed.

Captain Peel led one party in the most gallant style, and Lieutenant Cave led the other. The other two columns did not advance, and consequently the ladder parties, although exposed to a severe fire, as indeed was every one, did not suffer much.

Captain Peel was shot through the arm, but was enabled to continue his duty until the affair was over. I have to regret as well that Lieutenants Urmston, Cave, and Dalyell, Messrs. Parsons, mate; and Wood, midshipman, were all wounded.

Lieut. Kidd and nine seamen were killed, and forty-one seamen wounded, and a non-commissioned officer, three men, I trust, will be got in to-night after dark. The party under Lieut. Cave, with the loss of Lieut. Kidd and five seamen killed, Lieut. Cave and seven seamen wounded, equally performed the duty assigned. A heavy fire was kept up from our batteries with admirable precision, until the Commander-in-Chief ordered it to be slackened

I have also to report the bursting of one of the 95 cwt. 68-pounders, which caused the death of four men, and wounded three.

The enemy's line-of-battle ships did not fire, but the steamers did. I have the honour to return a list of casualties in the last two days, and to inform you our sick list is forty-nine, and all doing well.

Every officer and man engaged in this arduous service has done his duty most gallantly, and I only await your permission to recommend those whose conduct I have particularly noticed. I have &c.,

STEPHEN LUSHINGTON

A LIST OF OFFICERS ATTACHED TO SCALING-LADDER PARTIES ON THE 18TH JUNE, 1855.

Captain William Peel, in command, severely wounded; Mr. H. E. Wood, Midshipman, A.D.C., severely wounded; Mr. R. St. J. Daniels, Midshipman. No. 1 party, Lieut. Urmston, severely wounded; Lieut. Dalyell, severely wounded; Mr. Parsons, Mate, severely wounded. No. 2 party Lieut. Hardinge, Lieut. Thompson; Mr. Barrett, Acting Mate. No. 3 party: Lieut. Cave, severely wounded; Lieut. Kidd, killed; Mr. Kennedy, Mate. No. 4 party. Lieut. D'Arth, Lieut. Raby; Mr. Armstrong, Acting Mate.

Before Sebastopol, June 23.

My Lord,—I informed your Lordship in my despatch of the 19th instant, that I would make a more special report upon the movements of the Third Division, as soon as I should receive the reports of Lieutenant-General Sir R. England, and the Major-Generals commanding brigades under him

The 1st Brigade, under Major-General Barnard, proceeded down the Woronzow road, and was placed in position on the height of the ravine, ready to cooperate with the columns of attack on the right, whilst the 2nd Brigade, under Major-General Eyre, moved down the ravine which separates the left of the English from the right of the French advanced works, for the purpose of attacking the enemy's ambuscades, and making a demonstration at the head of the Dockyard Creek

This service was performed with the utmost gallantry, and, notwithstanding that they were exposed to a most galling fire, the troops maintained themselves in the position they had taken up during the day, and, at the evening withdrew unmolested, leaving a post at the Cemetery, which had been one of the objects of the attack in the morning. The action having from circumstances become a most serious one, I beg, as the most satisfactory way of making your Lordship acquainted with the particulars, to lay a copy of the Major-General's letter before your Lordship, and to solicit your attention to the names of those officers he particularly notices, and at the same time to his own distinguished conduct.

Your Lordship will see with concern that the loss sustained by this brigade is very considerable, and that Major-General Eyre is himself wounded; but I have every reason to hope that the injury he has received is not very severe, and will not incapacitate him from the discharge of his duty with the same energy and devotion as he has already applied himself to its performance during the protracted operations before Sebastopol

Lieutenant-General Sir G. Brown, to whose able assistance I referred in my former despatch, has specially brought to my notice the distinguished conduct of Colonel Yea, who was unfortunately killed, and pays a just tribute to the great merits of this deeply lamented officer; of Lieutenant-Colonel Lysons, of the 33rd, Lieutenant-Colonel Johnstone, of the 34th, and of the Queen Guard, of the 34th—all of whom are wounded; of Major General Codrington, who commanded the Light Division; of Captain Brackett, of the Rifle Brigade, who has lost a leg; and of Captain Forman, of the Rifle Brigade, who fell upon the occasion; and Major-General Bentinck continues the able manner in which the 4th Division; of Captain Travers, of the 7th Foot; Major Macdonell, of the Rifle Brigade; Lieutenant Knox, of the Rifle Brigade, who is wounded; and Lieutenant Thomson, of the 33rd

Lieutenant-General Sir R. England speaks highly of Colonel Cobbe, of the 4th Regiment, who commanded in the trenches of the left attack, and is severely wounded; and Lieutenant-General Bentinck eulogises the conduct of Colonel Lord de Vesci, of the 21st Foot, who assumed the command of the left column after the death of Major-General Sir J. Campbell; of Lieutenant-Colonel Warre, who succeeded to the command of the 57th Regiment, on the death of Colonel Shadworth; of Lieut.-Colonel Cole, commanding 17th; and of Captain Archer (who was killed), Gordon, McKinstry, and O'Connor, and Lieut. Thompson, of the 17th Regiment; and Lieutenant Shadwell Clerke, of the 21st Regiment; and Colour-Sergeant Colcliffe and Sergeant Pratt, of the 17th; and Captain the Hon. J. Stuart, and Lieutenants Bolles... (who is severely wounded) and Saunders, of the Rifle Brigade

Major-General R. Jones reports most favourably of the services of the following officers of Engineers:—Lieut.-Colonel Gordon, Lieut.-Colonel Chapman, Lieut.-Colonel Tylden, Lieutenant Donnelly, Lieutenant Fisher; and he deeply laments the loss of Captain Jesse, Lieutenant Graves, and Lieutenant Murray, who fell upon the occasion.

I must express my obligations to Lieut.-General Sir R. England, Lieut.-General Bentinck, Lieut.-General Bentinck, and Major-General Codrington, for the able manner in which they conducted their duties; and I avail myself of the present opportunity to inform your Lordship that Lieut.-General Pennefather, who was then labouring under illness, is now in so bad a state of health as to be under the necessity of withdrawing from the army. I shall deeply regret his departure, entertaining the highest opinion of him, and knowing his devotion to her Majesty's service.

I request to mention the following officers of the Royal Navy, who particularly distinguished themselves on the 18th:—Captain Peel, who commanded the whole of the sailors employed, and is severely wounded; Messrs Wood (severely wounded) and Daniel, who have been through the whole siege; Lieuts. Tymon and Dalyell, who are both severely wounded; and Mr. Parsons, mate, who is wounded; Lieutenants Cave and Kidd, both wounded, the latter mortally; and Mr. Kennedy, mate.

I enclose a list of casualties from the 18th to the 21st inst.

I have, &c.,
The Lord Panmure, &c. RAGLAN

NIGHTLY ATTACK ON THE SEA DEFENCES OF SEBASTOPOL.

Royal Albert, off Sebastopol, June 19.

SIR,—On our return from Kertch, on the 16th inst., Vice-Admiral Brust and I were informed by the Commanders of the land forces that they intended to reopen the fire of the batteries on the following morning, and on the 18th inst. to make further approaches towards Sebastopol and endeavour to obtain possession of the enemy's positions of the Malakoff and Redan; and their Excellencies also informed us that they had ascertained that the nightly fire of our steamers had produced considerable effect.

On hearing this, my colleague and I at once determined to repeat the operation on the two intervening nights; and, accordingly, on the 18th instant, the paddle-steamers and sloops named in the margin,* accompanied by several French steamers, discharged a heavy fire on the town and sea defences, whilst the *Danube* (Lieut. R. P. Cator) and the launches of the *Royal Albert*, under the command of Lieutenants George W. Watson, and Edmund Wilmot, poured in a shower of rockets, and happily without any casualty.

During the night of the 17th inst., the *Princess Royal*, and the steam-frigates and sloops named in the second marginal note,† and accompanied by a division of French steamers and the launches as before, renewed the firing; and on this occasion I am sorry to observe there was some loss, the *Princess Royal* having had one man killed and two wounded; the *Sidon* two men killed and eleven wounded; and Captain Lyons, of the *Miranda*, was so severely wounded in the leg by a shell, that I have been obliged to send him to Therapia Hospital.

These Lordships will readily believe that a strong desire prevailed throughout the fleet to go under fire; but as only one ship of the line could do so with advantage, I thought it right that it should be the *Princess Royal*, commanded by Lord Clarence Paget, who, having planned the course of the night's work, and his ability, was naturally the best acquainted with it.

Returns of the casualties are herewith transmitted.

I am, &c.,

EDMUND LYONS.

Rear-Admiral and Commander in-Chief.

RETURN OF KILLED AND WOUNDED ON BOARD HER MAJESTY'S SHIP "PRINCESS ROYAL," ON THE 18TH JUNE, 1855.

James Courtis, 2nd class ordinary, aged 27, killed. Thomas Davis, 2nd class ordinary, aged 21, wounded severely, [illegible] Thomas Sutch, 2nd class ordinary, aged 21, Royal Marine Artillery, aged 27, wound slightly contused. Alfred C. Hillell, gunner, Royal Marine Artillery, aged 30, wounded severely, lacerated wound of left hand

(Signed) A. C. MACLEOD, Surgeon.
C. PAGET, Captain.

LIST OF KILLED AND WOUNDED ON BOARD HER MAJESTY'S SHIP "SIDON," ON THE NIGHT OF THE 17TH JUNE, WHEN ENGAGED WITH THE SEA DEFENCES OF SEBASTOPOL.

Killed.—William Toddicell, saiIor's mate.

Wounded.—William Bayley, boy, 1st class, severely; thigh amputated (since death); Richard Hicks, boy, 1st class, severely; Miles Haler, A.B., severely; Daniel Jones, private R.M., severely; William Kalynack, A.B., slightly; John Parker, stoker, slightly; James Lennox, Scalawah's mate, slightly; James M'Allen, stoker, slightly; John Bay [illegible] Thomas Garnett, boy, 1st class, slightly; Western Beaman, capt. in foretop, severely; Smith, private R.M., slightly.

(Signed) W. R. DALTON, Surgeon.
GEORGE GOLDSMITH, Captain.

RETURN OF WOUNDED ON BOARD HER MAJESTY'S SHIP "MIRANDA," DURING THE NIGHT ATTACK UPON THE FORTS OF SEBASTOPOL, JUNE 18, 1855.

Edmund M. Lyons, aged 25, Captain, very severely wounded by a piece of shell in calf of left leg, which is much lacerated.

(Signed) JOHN A. CORBETT, M.D., Surgeon.
JOHN F. C. MACKENZIE, Sen. Lieut., Com. Officer.

DESPATCHES FROM ADMIRAL DUNDAS.

Admiralty, July 3, 1855.

Despatches, of which the following are copies, have been received from Rear-Admiral the Hon. R. S. Dundas, Commander-in-Chief of her Majesty's ships and vessels on the Baltic station.

PROCEEDINGS OF ADMIRAL SEYMOUR IN NARVA BAY.

Duke of Wellington, at anchor, Tolbuchin Lighthouse, W.S.W. five miles, June 21

SIR,—In my letter of the 18th instant, No. 196, I reported, for the information of the Lords Commissioners of the Admiralty, that I had directed Rear-Admiral Seymour to proceed with her Majesty's ships *Exmouth* and *Blenheim*, and with the gun-boats *Pincher* and *Snap*, to examine the coast in the Bay of Narva: and I have now the honour to transmit the enclosed letter which I received from the Rear-Admiral, reporting his proceedings

I have much pleasure in expressing my satisfaction at the spirited and judicious manner in which he took occasion to occupy the attention of the troops, which were strongly posted in the neighbourhood, and my sense of the zealous efforts of the officers and men under his orders, particularly those in the two gun-boats, which appear to have been well handled under a smart fire from the enemy's batteries.

I have, &c., (Signed) R. S. DUNDAS.
Rear-Admiral and Commander-in-Chief.

To the Secretary of the Admiralty

REPORT OF PROCEEDINGS AT NARVA.

Her Majesty's ship *Exmouth*, off Seskar, June 19, 1855.

SIR,—In obedience to your directions of the 14th instant, I quitted Seskar anchorage at 8 a.m. on Saturday, the 16th, anchoring at 7 p.m. under East Tyters Island, off a village situate on its S.S.E. extremity, with a view of obtaining information respecting the River Narva; but only succeeded in learning that a considerable body of troops were about Narva and its vicinity.

Quitting East Tyters, on the evening of Sunday, the 17th, Narva Lighthouse was made out yesterday, at 2 30 a.m., with the broad extent of sandy beach that borders the bay.

On nearing the entrance of the river, which is narrow, and has a bar on which the breaking shoal water was visible, a considerable number of troops, including a party of cavalry, were seen in active movement, and a large caisson or conveyance of timber was hoisted out and sunk in the entrance of the river, and became the means of communication with either side: a few wood vessels and river craft only were visible inside the river, the banks of which are of sand, thickly timbered, and well adapted for defence by troops. An earth battery of twelve guns flat on the east side of the river's entrance, and one of ten guns near the lighthouse, with another in its rear, seen from the masthead, apparently to command the river; and two other guns were placed in position on the right extremity of the lighthouse battery.

An opportunity was afforded to try the practical efficiency of the gun-boats, *Pincher* and *Snap*, under the immediate charge of Captain Hall, of the *Blenheim*. who, with good judgment, added one of his man-deck 68-pounders to the armament of the former, and until this and equally weather interfered, their practice was good, and their constant change of position rendered them difficult objects to hit, though the fort guns were well served, rang hot shot, which frequently passed near and over them.

On the weather clearing the gun-boats opened fire, and the *Blenheim* and *Exmouth* likewise took an opportunity of a couple of hours' practice, covering the gun-boats with good effect, which were ably manœuvred by Lieutenant C. A. C. De Crespigny, in command of the *Snap*, and Lieutenant Stewart, in command of the *Pincher*, in the former of which I had placed Lieutenant Travers, R.M., with ten gunners of the Royal Marine Artillery of the '*Exmouth*, who did good service. Mr Harper, assistant-surgeon of this ship, was likewise on board the *Snap*, labouring unmastered for that service.

As it was evident from the first that no serious attempt could be made on the enemy's position, and as a large expenditure of ammunition would have been useless, I considered that enough had now been done to occupy the attention of the troops in the neighbourhood, and no advantage appearing to offer itself for a longer continuance in Narva Bay, the signal was made to discontinue firing, and I proceeded, in compliance with your orders, to rejoin your flag

I enclose a return of a casualty which, I regret to learn, occurred to Captain Searle, R.M., of the *Bernheim*, the effects of which, I trust, will not prove serious.

I have, &c., (Signed) M. SEYMOUR, Rear-Admiral.

Rear-Admiral the Hon R. S. Dundas, C.B

RETURN OF WOUNDED AT THE ATTACK ON THE FORTS AT THE ENTRANCE OF THE RIVER NARVA

H.M.S. *Blenheim*, June 18th, 1855.—Royal Marines: Captain William R. Searle, contusion left side of chest from splinter.

(Signed) ROBERT POTTINGER, Surgeon.
Approved, WM. H. HALL.

* Tribune, Captain Hon. J. R. Drummond; Highflyer, Captain John Moore; Terrible Captain J. M'Leverty; Miranda, Captain E. M. Lyons; Niger, Commander H. W. Rice Arrow, Lieutenant W. K. Jolliffe; Viper, Lieutenant H. W. Combe; Snake, Lieutenant H. F. M'Killop; Weser, Lieutenant J. E. Commerell

† Sidon, Captain G. Goldsmith; Highflyer, Captain John Moore; Miranda, Captain E. M Lyons; Viper, Lieutenant H. W. Combe; Snake, Lieutenant H. J. N Killop

GOSSIP FROM ST. PETERSBURG.—The tone of recent advices from St. Petersburg is not favourable to the prospect of early peace. This alteration is believed to be attributable to a secret understanding with Austria, which has given Russia more confidence in contending with the Western Powers, and in the possible success of her constant intrigues to break up their alliance. The recent announcement from Russia that the Synod had addressed the Emperor in favour of peace is said to have been merely a stratagem to cover the more aggressive views which had just then received a new stimulus from the covert estimation of active sympathy from Austria and Prussia—that sympathy being, it is alleged, in course of exercise at this moment by the transmission through German territory of large supplies of [illegible] war.—*Times City Article.*

WAR OBITUARY.

AGAR (Captain the Hon. Charles Welbore Herbert), of the 44th, who fell in the assault of the 18th June, was the youngest son of the present Earl of Normanton, by the Lady Diana, his wife, daughter of George Augustus, eleventh Earl of Pembroke. He was, consequently, sixth in lineal descent from John Churchill, first Duke of Marlborough, the tenth Earl of Pembroke's wife having been daughter of Charles, third Duke. Captain Agar was born 12th Nov., 1824.

ALT (Lieutenant Henry Daniel) closed his brief military career of one year in the assault of the 18th.

ASHWIN (Lieutenant James Collis), of the 57th, entered the Army 11th March, 1853, and obtained his Lieutenancy 19th August, 1854. He was killed on the 18th June.

BENNETT (Lieutenant Valentine), of the 33rd, killed on the 18th, was third son of the late Valentine Bennett, Esq., of Thomastown, in the King's County, J.P. and D.L., by Elizabeth Helen, his wife, daughter of the late George Ryan, Esq., of Inch, county Tipperary. The gallant officer is deeply lamented: he was brave and enterprising, and so anxious for active service that, some time ago, he applied, when invalided, to be returned from the hospital to his regiment, in front of Sebastopol, before his medical attendants deemed him capable of leaving.

CAMPBELL (Major-General Sir John), Bart., fell in the fierce action of the 18th of June. The gallant officer was son and heir of the late eminently distinguished soldier, Sir Archibald Campbell, Bart., G.C.B., Commander-in-Chief of the British forces in the first Burmese war; and served as Aide-de-Camp to his father throughout that campaign. In 1840 he became Lieutenant-Colonel of the 38th Foot, in 1854 went out with his regiment to the Crimea, and shortly after was appointed to the command of a brigade and made Major-General. Just previously to his death he had given up the command of the Fourth Division on the arrival of General Bentinck. Sir John was born April 14, 1807, and married, July 21, 1841, Helen-Margaret, only child of the late Colonel John Crow, H.E.I.C.S., by whom he leaves several children; the eldest son being now Sir Archibald Ava Campbell, third Baronet, born January 1, 1844. The family from which Sir John Campbell descended was a branch of the great house of Argyll, springing more immediately from that of Breadalbane.

CAULFIELD (Captain Francis William Thomas), of the 44th, was eldest son of Lieutenant-Colonel John Caulfield, of Bloomfield, co. Westmeath, High Sheriff of Roscommon, 1838, and grandson of Lieutenant-Colonel William Caulfield, of Benown, whose father, the Venerable Archdeacon John Caulfield, was great-grandson of William, fifth Lord Charlemont. Captain Caulfield was born in 1826; entered the Army 17th Jan., 1845; was made Lieutenant 19th April, 1849; and obtained his company 20th Dec., 1854. Of his four youngest brothers, three are in the East India Company's military service.

DAVIES (Lieutenant Owen Gwyn Saunders), of the 33th, one of the gallant officers slain on the 18th, was second son of David Arthur Saunders Davies, Esq., of Penrhos, M.P. for Carmarthenshire, by Elizabeth Maria, his wife, only daughter of Colonel Owen Philipps, of Williamston, co. Pembroke. He was born 14th May, 1834, and had been in the Army since Dec., 1851.

DAWSON (Captain George Frederick), R.E., who fell in the trenches before Sebastopol, June 7th, was grandson of John, first Earl of Portarlington, and last surviving son of the late Hon. Lionel Dawson and the Lady Elizabeth, his wife, eldest daughter of the seventh Earl of Westmeath. His elder brother, Henry William Dawson, was killed, December 22, 1849, on board H.M.S. *Orion*, by the accidental discharge of a gun. Captain Dawson was born June 1st, 1827; and married, in August last, Lilla, youngest daughter of John James King, Esq., of Coates House, Sussex.

ESTCOURT, (Major-General James Bucknall), Adjutant-General of the Forces in the Crimea, died of cholera, before Sebastopol, on the 23rd ult. He was the second son of the late Thomas Grimston Bucknall Estcourt, Esq., D.C.L., of Estcourt, county Gloucester, by Eleanor, his wife, daughter of James Sutton, Esq., of New-park, in Wiltshire; and was born July 12th, 1802. From [illegible] to June, 1837, he served in the expedition to the river Euphrates, and for his exertions on that occasion was promoted to the Brevet rank of Lieut.-Colonel. Last year he went out with the Staff of Lord Raglan, and participated in the glory and danger of Alma, Balaclava, and Inkerman.

HOBSON (Lieutenant and Adjutant), of the 7th Fusiliers, joined from the 30th Foot little more than a year since, and was wounded at the Alma. His death occurred on the 18th, in the attack on the Redan. He was son of the late Aldermen Hobson, of Waterford, and brother of W. Hobson, Esq., of the Customs, Limerick.

LYONS (Captain Edmund Mowbray), R.N., died, after a short but glorious career, of a wound received in a night attack before Sebastopol, on the 17th ult. The most promising officer, the second son of the gallant Naval Commander-in-Chief in the Black Sea, Sir Edmund Lyons, Bart., G.C.B., entered the Royal Naval College in 1839, passed his examination in 1838, and obtained his first commission in 1841. He subsequently served on the Mediterranean Station in the *Hogue*, the *Rodney*, the *Queen*, the *Argo*, the *Tyne*, and the *Syren*. Last year he had the great credit for the operations in the White Sea, and very recently added much to his fame by his exploits in the Sea of Azoff. Captain Lyons was in his 36th year. His sister is married to the Earl of Arundel and Surrey.

MEURANT (Lieutenant John William), of the 18th, fell on the 18th. He had been nearly four years in the Army, having joined 22nd Aug., 1851.

SEADFORTH (Lieutenant Colonel Thomas), of the 57th Regiment, obtained his Ensigncy April 1825, and became Lieutenant-Colonel in November 1854, in succession to Colone. Goldie. Lord Raglan thought very highly of Colonel Shadforth, and more than once complimented him as well on the efficiency of his regiment, as upon the great anxiety he constantly manifested in providing for the comforts of his men. He fell in the struggle of the 18th.

SEYFFER (Captain John), of the 34th, who fell on the 18th, had been nearly fourteen years in the Army, his first Commission bearing date 13th October, 1841. He was second son of the Rev. George Shuffner, Prebendary of Chichester, by Elizabeth, his wife, eldest daughter of the late Rev. Charles Johnson, of Winslow, and grandson of George Shiffner, Esq., who was created a Baronet 16th December, 1818.

WEBB (Lieut. Edward Henry), of the 88th Regt., fell in the attack upon the Quarries before Sebastopol, on the 6th ult. He was second son of Richard Webb, Esq., of Donnington Hall, co. Hereford, by Frances, his wife, third daughter of John George Hammersley, Esq., Prebendary of Durham.

YEA (Colonel Lacy-Walter-Giles), of the 7th Regt., entered the Army in 1[illegible] and commanded, as Lieutenant-Colonel, the Royal Fusiliers throughout the Crimean campaign. It will not be forgotten how terribly his corps suffered at the Alma. He was made Colonel in December, and had lately been commanding the First Brigade of the Light Division. Colonel Yea was born 4th May, 1808, the eldest son of Sir William Walter Yea, Bart., of Pyrland Hall, co. Somerset, by Anne-Heckstetter, his wife, youngest daughter of David Robert Michel, Esq., of Dewlish. Colonel Yea fell in the attack on the 18th.

THE NEW DANISH CONSTITUTION. The King takes the oath to respect the constitution. Ministers are responsible. The budget to be laid before the Diet, and voted in the normal manner. Alterations in the budget may be made every two years. The King appoints the President. The Assembly has not the right of initiative. The Assembly is convoked every second year, and cannot be dissolved more than twice during that period. Differences between the General Diet of the kingdom and the provincial representative bodies to be settled by the King and his Privy Council of State. The General Diet is composed in accordance with the Royal ordinance of the 28th of July, with the addition of thirty members, of whom seventeen are to be elected as the representatives of the kingdom of Denmark (Denmark Proper), eight for the Duchy of Schleswig, and five for Holstein. Every member must be at least twenty-five years of age, and be in possession of property of at least 1200 dollars annual income, or paying taxes to the amount of 200 dollars yearly. The General Diet has no competency to discuss or alter the existing relations of the Duchy of Holstein to the Germanic Confederation, and all votes of money with regard to these relations are to be settled each time in a special manner.—*Letter from Copenhagen.*

MANCHESTER PRODUCTIONS AT THE FRENCH EXHIBITION.—For some weeks past the Manchester productions have been frequently visited, with great interest, by some of the principal French and Belgian manufacturers, and by members of the juries. Of these latter, one who is himself a manufacturer of white calicoes, admitted in my hearing, to your representative, that, had you an entry into France for some of them, with a duty of 30 per cent at the prices quoted on the goods exhibited (he referred at the time to some plain white drills, imitation linen), such goods would be able to support even so heavy a duty. These and the other drills (though some of the principal manufacturers, I understand, refused to contribute their goods), as well as the fustians and velvets, have attracted great attention among practical men; and the finishes of the various cloths, especially of the plain calicoes, have been much remarked and admired; the French makers being unable apparently to get beyond one finish, of a hard and what would be in the English market a very unacceptable sort. Indeed, I have noticed some of the French manufacturers bring round their finishers, and go with them into the matter in the minutest way, evidently trying to pick up the art. In this, and in many other practical details, our Exhibition will, no doubt teach them many things, and awaken them as to the necessity of progress; which, however, in such over-protected industries, is not very likely to cure of itself. I may mention that the jury for the cotton industries, though only just constituted and in the first part of its examinations and researches, has already decided that a gold medal of the first class should be awarded to Manchester for the excellence and cheapness of its products. You will be pleased also to know that it is a Manchester spinner who has been named president of that jury—your well-known and highly-respected townsman Mr. Bazley.—*Paris Correspondent of the Manchester Guardian.*

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Duke of Newcastle has sailed for the Crimea.

A recent bill enables the Chancellor and Council of the Duchy of Lancaster to sell and purchase land on behalf of the Queen and her heirs in right of the Duchy of Lancaster

The official journal of Berlin announces that the King of Prussia was slightly indisposed on the 26th ult., and obliged to take to his bed for a few hours, but that he was able to get up in the evening.

The *Presse* of Vienna mentions a rumour to the effect that Lord Westmoreland is likely not to return to Vienna, and that the Honourable Mr Elliot, a near relative by marriage of Lord John Russell, is to succeed him

The Prussian Conservative Association of Koenigsberg has been dissolved, in consequence of Prince Frederick William having expressed his astonishment at such an association remaining in existence under present circumstances.

A letter from Copenhagen of the 24th ult. states that the health of the King continues to be satisfactory, although he is still confined to his bed, and suffers from pain in the shoulder and hip.

Sir James Graham is at Netherby. The Right Hon. Baronet's health is not good. It is said that he will not again appear in the House of Commons this Session.

A writer in the *Dublin Evening Mail* states that the adventurous lady alluded to by the special correspondent of the *Times* as having paid a visit to the Mameluke Tower was the wife of Lord George Paget.

The diligence in which Lord Howden was proceeding to Paris was stopped for six hours by the Carlists, near Burgos.

Diplomatic relations with Sardinia are about to be completed by the Porte, in consideration of the assistance which King Victor Emanuel has given to the cause of Turkey and her allies

It is said that Rear-Admiral Berkeley, C.B., is about to vacate his seat at the Admiralty Board.

The Duchess of Wurtemberg, eldest sister of Prince Metternich, and widow of Field-Marshal the Duke of Wurtemberg, has just died at Hietzing, near Vienna, at the age of eighty-four.

Lord Elcho, M.P., having been appointed a juror in the Fine Arts Department of the Paris Universal Exhibition, and his presence in that capacity required at Paris, has paired off for the remainder of the Session.

The *Memorial des Pyrénées* states that the Countess de Montijo the mother of the Empress, is shortly expected at the Eaux-Bonnes

Lieut.-General James Ferguson, for some time past in command of the troops at Malta, will succeed Sir Robert Gardiner as Governor and Commander-in-Chief of Gibraltar.

The Hanoverian Court are making preparations to go in a few weeks to Norderney, on the coast, for the purpose of sea-bathing

Clark Mills has given such satisfaction in an equestrian statue of Jackson, recently erected in front of the White-house, Washington, that he has been ordered by Congress to make a similar work of Washington for 50,000 dollars.

The Count of Flanders has met with an enthusiastic reception at Ghent. The *Indépendance Belge* contrives to occupy very nearly a page with a report of his proceedings. A visit to the Zoological Gardens, and the race-course, and a banquet given by the city, are the chief features of the narrative.

The *Ost-Deutsche-Post* announces that M. de Prokesh-Osten is to return immediately to his post of President of the Germanic Diet.

Alderman Rose has declined to fill the office of Sheriff, to which he was elected on Monday last; therefore a fresh election will be necessary.

M. Moleurs, the Dutch Minister Plenipotentiary, died on the 25th ult., at St. Petersburg, of cholera.

The Berlin sculptor, Heidel, has just completed four colossal statues of Galileo, Cartesius, Ottai von Guerite, and Newton, for the Mineralogical Museum.

Messrs. Mayer and Flatau, of Brussels and Leipzig, advertise a brochure in octavo, price 2 francs 50 centimes—"The Party of Peace in the English Parliament: speeches delivered to the House of Commons by Messrs Gladstone, Cobden, Bright, Sidney Herbert, and Sir James Graham."

The Rev. Alexander Ronald Grant, M.A., Fellow and Assistant Tutor of Trinity College, Cambridge, has been appointed one of her Majesty's Assistant Inspectors of Schools.

A colossal statue of Berzelius, the chemist, has just been cast and exhibited at the famous foundry in Munich.

At the last meeting of the Society for the Propagation of the Gospel, Mr. Hankey stated that the returns under the Income-tax Act of the profits derived from business alone in the City amount to £13,000,000 a year, equal to more than half of the entire revenue of the Emperor of Russia.

M. Roger has accepted a short engagement at the Paris Opera, to sing the principal part in the opera of H.R.H. the Prince of Saxe-Coburg-Gotha, to be brought out on the visit of her Majesty Queen Victoria and Prince Albert in August.

Mdlle. Rachel, having removed the embargo lately laid upon her movements, intends, it is said, to go to America with her whole family, on a large theatrical speculation. On her way from Paris she is to act for a few nights in London, under the auspices of Mr. Mitchell.

Government has agreed to give a further sum of £10,000 towards the completion of the Art Galleries on the Mound in Edinburgh, upon the understanding that the Board of Trustees shall also give an additional sum to finish the building and approaches. The amount already expended is £40,000, of which £26,000 was received from Government

It appears that the "din of war" does not prevent musical affairs from prospering at Constantinople, although Turkish opinions do not quite agree with those entertained west of the Bosphorus. The last novelty is a cantata by Nedjib Bey, the Sultan's composer, which is described as enjoying in Stamboul a popularity it could hardly hope for anywhere else.

Two supplementary credits, one of 100,000*l.*, the other of 140,000*l.*, are granted to the French Minister of State for completing the subvention of the Opera.

The Norwich Chamber of Commerce, School of Art, Literary Institution, and Museum, are to be accommodated with rooms in the New Free Library now building, and which is to be extended accordingly

The cholera having broken out at Warsaw, the Governor has issued a proclamation permitting smoking in the streets, which was hitherto prohibited.

The *Milan Gazette* publishes a pastoral letter of the Archbishop of Milan against the new ecclesiastical law just promulgated in the canton of Ticino.

On Saturday morning a violent thunderstorm burst over Dublin. For several minutes lightning flashed and rain fell in torrents. Three deaths from the lightning have been reported to the police.

Oldham is to have a new Lyceum—a handsome building in the Italian style, to be erected at a cost of £5000. A large gathering of people took place to witness the ceremony of laying the foundation last week. Of the sum named as necessary for the payment of costs, more than £3000 is already in hand.

A Grand National Archery Meeting is to be held at Shrewsbury on the 2nd and 3rd of August next

There are in the metropolis, north of the Thames, 36 turnpikes and 79 side bars. The debt on three districts is £21,236 16s. 9d.

The electric telegraph between Odessa and St. Petersburg was opened on the 19th June.

A company of players, who will make their first appearance on July 8, are engaged at the Palais Royal, to perform in the Provençale *patois*.

The declared value of the exports from the twelve principal ports of the United Kingdom last year was £98,866,072. From the port of London the value was £22,330,272; and from Liverpool, £46,719,177.

The *Parma Gazette* of the 23rd ult. contains a decree interdicting gambling-houses under severe penalties

The chorus at the Opéra Comique, Paris, includes a man who has seen active fighting in the Crimea.

The local journals of Scinde continue to agitate the question of the establishment of a direct line of steam communication between the port of Kurrachee (one of the termini of the Scinde Railway) and Suez or Aden.

It is said that the Bank of England have in contemplation the opening of a branch establishment in the West-end.

The harvest is going on with such rapidity in the department of Vaucluse that in a very few days not an ear of corn will be left standing. All the farmers agree in saying that the crop will be as abundant one; the ears are heavy, and will yield more than last year.

"OLD SCHOOLFELLOWS." PAINTED BY A. RANKLEY.—EXHIBITION OF THE ROYAL ACADEMY

"OUTPOST MONTENEGRO."—BY CARL HAAG.—EXHIBITION OF THE OLD SOCIETY OF PAINTERS IN WATER-COLOURS.

"OLD SCHOOLFELLOWS."

BY A. RANKELEY. FROM THE ROYAL ACADEMY EXHIBITION.

In the North Room of the Royal Academy—in the room primarily set apart for architectural drawings—is a well told and carefully-finished picture, in oil colours, by Mr. A. Rankeley, entitled "Old Schoolfellows," with this motto from the Book of Proverbs:—"A friend loveth at all times, and a brother is born for adversity."

The scene is a sick-chamber, and the incident is the effect which the visit of a brother in health has on the frame of a brother—a great sufferer—and on that ministering angel, a sister, who stands a moved spectator at the meeting. It is from every-day life, but it is not told by Mr. Rankeley in an every-day manner. He is true to nature, and true to the acquirements of his art.

Mr. Rankeley is not a prolific painter. He seldom sends more than one picture to the Royal Academy Exhibition, but that is sure to be a work of art which painter and critic will alike desire to see. This year he has not been used well by the Hanging Committee. The effect of his single contribution is seriously hurt by the water-colour drawings which surround it.

Mr. Rankeley's subjects are generally of a serious kind. Thus, in 1849, he exhibited "Innocence and Guilt;" in 1850, "A Sunday school" and "Contentment;" in 1851, "The Pharisee and Publican;" in 1852, "Eugene Aram;" in 1853, "Dr. Watts Visiting Some of his Little Friends;" and, in 1854, "Home Revisited." His "Old Schoolfellows," of the present Exhibition, belongs to this thoughtful and solemn series.

THE SCULPTURE AT THE ROYAL ACADEMY.

In the room in which the Royal Academy is from year to year still obliged to exhibit the skill of the sculptors of this country we find one hundred and forty-eight works of art of almost every variety of excellence and

MODEL OF ARMED SCIENCE.—BY J. BELL.—EXHIBITION OF THE ROYAL ACADEMY.

subject—portrait statues larger than life alone excepted. We will not say, that the Exhibition, as a whole is very creditable to our English school of Sculpture; but we may safely state that it contains examples that will fully sustain the reputation of the school. We have nothing, it is true, like the mourning "Achilles" of Bankes; the "John Howard" of the elder Bacon; the "St. Michael" of Flaxman; the bust of "Dr. Johnson," by Nollekins; the "James Watt," "John Rennie" the "Sir Walter Scott," or the "Sleeping Children" of Chantrey; the "Eve" of Bally; or the "Mrs. Warren" of the elder Westmacott.

As we look round the room, there is much on which the eye may rest and remain pleased. Of that very pleasing "Group of Children," by Mr. Munro (deservedly placed in the centre of the apartment) we have already given an Engraving. Of its supporters, the most meritorious are Mr. Marshall's three contributions, "The Mother's Prayer," "Ariel," and "Ajax Praying for Light." "The Mother's Prayer" we have engraved in our present Number. It is a touching and well-balanced group—something between Flaxman and Chantrey.

Mr. Baily has in all three works, but one alone recals his earlier successes. This is entitled "Adam Consoling Eve after the Evil Dream." With many beauties, and much skill in its general treatment, it too often reminds us of Mr. Baily's other works, and more particularly of Academy studies, scarcely suggestive of Adam and Eve.

Of the elder Westmacott there is no example. The younger one contributes "A Sketch for an Enriched Salver in Gold and Ivory," of which the groups of children, with the foliage, are ingeniously tortured into letters; with two busts, of average excellence; and "A Study" (1547). Why is this really able artist so afraid of his own strength?

The admirers of Mr. M'Dowell have reason to regret that the Exhibition contains only one example of his art—a bust, in marble, of the late Lord Beaumont. It is, however, a well-caught likeness, and a piece of delicate execution with the chisel.

The same complaint may be made by the admirers of Mr. Foley who might look with safety, it was thought, for something more than a Bust (1409) and a Model for a Statuette (1425).

Mr. Weekes has been only one degree more industrious than Mr. Foley. He has two marble busts in his usual style, and a "Marble Statue (pos-

"THE QUEEN OF THE WATERS TUNING HER HARP TO CELEBRATE THE ALLIANCE OF THE WESTERN POWERS." (SCULPTURE.) BY J. GEEFS.—EXHIBITION OF THE ROYAL ACADEMY.

humous) of the Infant Son of George Beaufoy, Esq.," prettily conceived and delicately chiselled

Mr. Bell, to whom the citizens of London have entrusted the Guildhall monument to the Duke of Wellington, exhibits a small sketch of the model, together with a figure of "Armed Science," a commission from Colonel Adair for the Mess-room at Woolwich. There is promise about the Wellington and in the "Armed Science" (engraved in our present paper), a repose and strength appropriate to the subject.

We are glad to see from Mr. Theed's model of a bust that the long-talked-about monument to Sir James Mackintosh is really in hand, and in good hands.

The present war has already had an influence on Art; and Mr. Geefs has sought to embody "The Queen of the Waters Tuning her Harp to Celebrate the Alliance of the Western Powers." This we have engraved. An allegory is always in want of some explanatory assistance; and, though Mr. Geefs has told his story as well as allegory, perhaps, will enable him to tell it, we fear that the Queen of the Waters may, without any ingenuity or unfairness, be considered as a lady of more times than one. As a piece of delicate modelling there is much to admire in Mr. Geefs' figure. There is great ease in the composition.

The busts are of the same degree of merit that has characterised every Exhibition since the death of Chantrey, in 1841. A few are of more than ordinary excellence. There is a good head of Faraday; and one still better of Mr. M'Culloch, the author of the "Commercial Dictionary;" Mr. Munro contributes a thoughtful likeness of Mr. Gladstone, on, perhaps, too large a scale of treatment. There are not many busts in marble, and the few in that material are not particularly remarkable for their delicacy of chiselling: without exquisite carving, a bust is only half complete.

"OUTPOST MONTENEGRO."

BY CARL HAAG, FROM THE OLD WATER-COLOUR SOCIETY.

Two men, whose names when pronounced are very much alike—Haghe and Haag—are among the most distinguished contributors to our two Water-Colour Societies. Louis Haghe confines the exhibition of his pictorial labours to Pall-mall West, as Carl Haag confines his contributions to the Gallery in Pall-mall East. Louis Haghe delights in interiors, in which it is difficult to tell which most to admire the still life and the upholstery, or the human beings that give animation and story to whatever he attempts to carry out. Carl Haag deals more closely with human beings

"THE MOTHER'S PRAYER." (SCULPTURE.)—BY W. C. MARSHALL, R.A.—EXHIBITION OF THE ROYAL ACADEMY.

and would appear to leave to others the praise of excelling in those leading accessories in which Mr. Louis Haghe is so great a master. With all who comprehend art both men are deservedly favourites.

It is with Carl Haag alone that we have this week to deal. He has not been idle, contributing in all thirteen highly-finished drawings to the old Exhibition in Pall-mall East. His scenes are not in England, and, except in one instance—his large picture of the Prince of Wales and Prince Alfred Returning to Balmoral from a Day's Salmon-spearing—he has sought his subjects in countries that give a pleasing variety to the Exhibition in which they are seen. The Montenegrins have supplied five characteristic drawings—viz. (20) "On Guard—Montenegro;" (39) "Out-post—Montenegro;" (240) "A Peasant Girl—Montenegro;" (290) "A Montenegrin Lady;" (293) "A Montenegrin Princess." One of these ("The Out post") we have engraved in our present paper. It is something more than a costume drawing. It has the impress of a race; and as a piece of colour is marvellous

Not less excellent are Mr. Haag's subjects not purely Montenegrin. Thus we have the "Head of an Armenian" (199); and (330) the "Head of a Turk"—both satisfactory in their general treatment. As good, and in the same way, are his "Venetian Lady" (76); and his "Dalmatian Peasant" (85). He is equally at home in the Highlands, among the Macgregors and Macdonalds as he is in Montenegro with the Montenegrins; or in Dalmatia, among the Morlacks.

MUSIC.

THE performance of "Don Pasquale" at the ROYAL ITALIAN OPERA on Thursday (last week) excited great interest, from the circumstance that the four characters were sustained by the unrivalled quartet for whom the opera was originally written, and by whom it was performed at the Théâtre Italien, and afterwards at Her Majesty's Theatre—namely, Grisi, Mario, Tamburini, and Lablache. These great artists are now reunited at Covent Garden. The performance of Donizetti's pretty opera was as lively and delightful as ever. Grisi never acted or sang more beautifully or with greater animation; Mario was the youthful lover in perfection; Tamburini covered the defects of his voice by his consummate skill as an artist, and acted with the gaiety and gentlemanly ease which have always characterised him in genteel comedy; while Lablache absolutely revelled in his rich and exuberant humour. The crowded audience expressed their satisfaction by roars of laughter and thunders of applause.

Mdlle. Ney, who was unable to obtain an extension of her leave of absence from Dresden, made her farewell appearance in the "Trovatore" on Friday. There was an immense house, and the fair prima donna's reception was warmer than ever. She is engaged, we understand, for the whole of next season

The rehearsals of the "Etoile du Nord" go on with great activity under the superintendence of the illustrious composer, who expresses himself highly satisfied with the performers. The opera, it is expected, will be produced next week.

THE scheme of low prices at the DRURY LANE OPERA appears to be working much better than we at first expected. We were led to conclude that rates of admission on a scale even lower than what had been usual at our minor theatres could never suffice to meet the expenditure of a great musical establishment, even supposing the house to be crowded every night. Of all theatres an opera-house must be the most expensive. The terms demanded and obtained by eminent foreign singers—and the taste of the general public will not now-a-days be satisfied with mediocrity—have risen to a great height; and it is necessary, moreover, to have a complete and efficient orchestra, a large and well-trained chorus, and a whole host of supernumeraries, to give effect to scenic tableaux and spectacles. We could only anticipate, therefore, an entertainment corresponding in quality to the very humble price paid for it. But we have been agreeably disappointed. Mr. Smith's calculations must have been sound, for his profits have enabled him not merely to keep his entertainments up to their original mark, but to rise above it. His present vocal company is stronger than it ever has been before; and his orchestra, chorus, and all the various accessories of the stage, are not unworthy of a great metropolitan theatre. Another thing on which we have been agreeably disposed is the character of the audience. We looked for the noisy rabble of a suburban theatre—forgetting that a noisy rabble is not now to be met with, even in a suburban theatre—but in the far north, the far south, and the far east, the playgoing public are as well able to appreciate and enjoy the music of Shakspeare and the great dramatists as the denizens of Oxford street and the Strand; and perhaps even better, if we may judge from the rapt attention and fresh enthusiasm manifested by those distant lovers of the drama

The performance of "La Donna del Lago," at Drury Lane is greatly in advance of Mr. Smith's previous efforts. Its effect does not rest upon the brightness of one or two stars shining amid the surrounding obscurity, but upon the consistency and satisfactory character of the whole representation. We have seen this splendid opera in great theatres, here and elsewhere, and have seldom derived from it greater pleasure. The cast is excellent; some of the parts being admirably, and the others respectably, performed. The prima donna, Lucy Escott, is a charming *Elena*. She is a young American lady, who has gathered laurels in Italy, and well deserves to wear them. She is handsome and graceful; is gifted by nature with a lovely soprano voice, which has been highly cultivated by the appliances of Italian art; and, as an actress, has energy and feeling. She has been received with enthusiasm, and has apparently a brilliant career before her. We have never seen *Malcolm Graeme* so satisfactorily personated as by Miss Huddart. With her tall, well-developed figure and graceful Highland attire, she looks the youthful lover admirably, and her rich contralto voice seems made for the music of the part. Signor Flavio, an excellent tenor, is *King James*; Signor Armandi, a still better, is *Roderic Dhu*; and Mr. Hamilton Braham, as *Douglas*, acts and sings with energy and effect. The concerted and choral music is well executed; and the scenery and spectacle are rich and beautiful. If Mr. Smith but this still remains to be seen—is able, generously, to provide such entertainments, and on such terms, the result will produce no small changes in theatrical management

HENRY RUSSELL, the celebrated vocalist and composer, is about to exhibit a new panorama of his travels through the United States and Canada. The panorama, painted by Mr. Chambers, will be introduced to the public about the middle of August. In the course of the entertainment Mr. Russell will introduce several new compositions in addition to many of those songs which have earned for him a world-wide reputation.

THE THEATRES, &c.

HAYMARKET.—Mr. Buckstone's benefit has given occasion for the revival of Mrs Centlivre's "Busy Body," reduced to three acts, in which Mr. Buckstone performs the part of *Marplot* with admirable unction, and Miss Reynolds looks that of *Miranda* most charmingly. We have also the Spanish dancers again, who prove as attractive as ever, though they have ceased to be wonders. We have outlived surprise, but we can still admire the grace that has survived the marvel. A new piece of merely personal interest, called "Mr. Buckstone's Adventures with a Polish Princess," is simply intended for a trifle. This imaginary voyage had its birth in a managerial dream, or whim. The conductor visits Moscow and Petersburg, and is entrapped into a marriage with a Polish lady, in order to save her estates from the grasp of a Russian baron. He nearly gets shot in an attempt at flight, but is saved by suddenly awaking and finding himself luckily in the presence of an applauding audience. The little drama was amusing, and decidedly successful.

On Wednesday, as announced, the "Author's Night" took place for the benefit of Mr. Saunders. There was a fair, though not overflowing house. The storm scene, however, was not introduced; so far our expectations were disappointed. Probably so important an addition could not be ventured for one evening The applause was frequent; and the ovations of the first night were repeated.

The next star at this theatre will be Miss Edith Heraud, who is announced to make her first appearance here in a new and original five-act play on Monday fortnight.

MISS REYNOLDS has announced for her benefit, on Wednesday next, Sheridan Knowles's very popular play of "Love;" and the farces of "As Like as Two Peas" and "Only a Halfpenny;" with the Spanish Dancers in a new ballet; performances which can scarcely fail to prove attractive.

Mr. Addison Dodge, the "New England Vocalist," is about to lecture through Massachusetts in opposition to Abolitionism! Mr Dodge has been south several times, and has satisfied that the slaves are better off there than the lower classes of his own State, and that ignorance is the foundation on which Abolitionism is based

THE REVENUE.—FINANCIAL REFORM.

THE usually quarterly and annual returns of the Revenue were published on the 1st inst., and as we now watch every such return with great interest, and even anxiety, to ascertain the effects of the war on the national resources, the proof which they supply that these are not merely unimpaired, but are increasing, is dwelt on with gratitude and exultation. Last year, to the end of June, the revenue amounted to £54,470,806; this year, to the same period, it has amounted to £62,212,394—a net increase of £7,741,588. But our readers are aware that in 1854 the taxes on malt, on income, &c., were increased; and that on April 21, in the present year, the taxes on sugar, coffee, tea, spirits, and income were further increased, and some portion of the increase in the quarter, as well as the increase in the year, ought to come into the present accounts. It is, however, well known to all conversant with our system of finance, that the taxes on malt and spirits, and on income, are not collected from the day, and some of them not for many months after, they are imposed. Thus we can only know accurately, the real gain or loss of the Revenue when we are in formed exactly how much the new taxes yield, and on this point we are not yet informed, either as to the taxes imposed in the year, or in the portion of the quarter which has elapsed since April 21st. We believe, however, that the increase on the year, though large, hardly comes up to the expectations of the Chancellor of the Exchequer.

The net increase on the quarter is £1,005,575, and the total revenue for the quarter is £16,079,662. It is impossible to say, however, how much of the new taxes imposed in April have been collected, and we should only deceive our readers were we to institute a minute comparison of the gain. A rough calculation shows that, as the Chancellor expected to gain £5,300,000 in the year by taxes imposed in April, and as little more than a sixth part of the year has since elapsed, that the increase in the quarter should be about £900,000, whereas it is upwards of £1,000,000, giving us reason to conclude that a considerable portion of the taxes really due in the previous quarter had only been collected in the present quarter. The later the period, however, in which the increase takes place the more satisfactory it is, and we can but congratulate the public on a large increase in the revenue in the summer quarter of 1855 over the summer quarter of 1854—more than commensurate to the increased taxation.

There are two circumstances to be noticed which serve to explain the less productiveness of the Revenue than may have been calculated on, and justify a better opinion of the increasing resources of the country than the returns superficially examined imply; and both are connected with the Customs. The increase in this branch of the revenue in the year is £968,426, which arises from an increase in the consumption of nearly all the articles subject to Customs duty, except corn and flour. There has been no decrease in the consumption of these, but when grown at home they are subject to no duty; and, in consequence of the excellent harvest last year, upwards of 1,600,000 quarters more home-grown wheat have been sold in our markets since last October than was sold in the same period last year. In the year ending with June, 1855, the quantity of grain and flour, as grain, imported, was upwards of 4,000,000 quarters less than in the year ending with June, 1854. Now, as every quarter imported is subjected to 1s. duty, the consequence was that the Customs revenue in the year was diminished £200,000 by our own agricultural prosperity. The farmers got a slightly increased price for their produce; and, when prices are naturally very high, it becomes worthy of consideration whether the 1s. duty, imposed only for a statistical purpose, should not be abolished. The falling off in this branch of the Customs revenue was coincident with an increase of national wealth; and, accordingly, most of the other Customs duties levied on articles such as cocoa, coffee, sugar, tea, with which none of our own produce comes into competition, have much increased. Thus in the year 1854, ended with December, there were taken into consumption 560,000 lb. of cocoa, nearly 500,000 lb. of cocoa, 750,000 cwt. of sugar, 3,100,000 lb. of tea, 200,000 loads of timber, and nearly 800,000 lb. more tobacco, than in the year ending December, 1853. The increase then going on has in most articles continued this year. Thus, to the end of May, the date of our latest official returns, the consumption of cocoa had increased 45,000 lb.; of sugar, 278,000 cwt.; of tallow, 80,000 cwt.; of tea, 370,000 lb. In some other articles there is a decline, but not sufficient to counterbalance the increase. At the same time, the total increase of the Customs revenue in the quarter is scarcely adequate to the increase made by the Chancellor of the Exchequer in the Customs duties in April. The *Daily News* has explained this by stating that in the month of April, just before the new duties came into operation, 640,000 cwt. of sugar more than the average were entered for consumption, and escaped the new duties; while in May, and probably the same fact held good in June upwards of 300,000 qrs. less were entered than the monthly average. The inference is that some persons either sagaciously guessed that there would be an increase in the duty on sugar, or were improperly informed of it, and they managed to intercept upwards of £90,000, which ought fairly to have gone to the Customs' revenue of the quarter. Both from what ought to have been paid on the quarter now ended, but was, as it were smuggled away from it, and from the decline in the Customs revenue in consequence of the prosperity of the agricultural interest, there arises a conviction that the resources of the country, in the second year of the war are increasing.

We must, at the same time, request our readers to recollect that all the resources of the country spring from the industry of the people, and that it is the especial duty of statesmen to employ them with the utmost care, and husband them with the greatest frugality. The finances of a State are its blood. Money is not only "the sinews of war," it is the great fountain of power, the source of vigour and energy, and as it is properly employed, so will the State be well-ordered and flourishing. We no more say that the finances of a State are all in all, than that the blood is all the life of man, and the nerves, and brain, and muscles, and bones nothing; but that the body may be in health, the blood must be continually renewed, and continually oxygenated, and must be equally diffused to every part. A deficiency of arterial blood is disease, and congestion is death. A family is not actually fed, and clothed, and lodged, and educated by its income being duly and equitably apportioned according to its means to each of its several wants, but unless this be primarily done, necessary work never can be successfully accomplished. This being done, the family will be on the whole well-ordered, ready to meet all the common exigencies of life, and all its duties may be fairly performed. It is so with a State. Its revenue is not all in all; but, just in proportion as this is equitably collected, and justly distributed, all the duties of the State may be, and without it they cannot be, properly performed. In the Decalogue respect for property is inculcated as the next important duty to respect for life. First, "Thou shalt not murder;" and next, "Thou shalt not steal." At present there is amongst us a great want of respect for property, much of which may undoubtedly be traced to the carelessness and disregard of the property of the people—amounting to downright dishonesty—which pervades all the financial departments of the State. Taxes are unfairly and wastefully collected, and equally wastefully expended. They come light, and they go light; though what is often sport to men in office is death to the people. We require to have the sacredness belonging to property diffused through the national finances; not merely that those who receive for services shall have a vested right in their rewards, but that those who pay taxes shall have their vested right in their property respected. In levying taxes the State forgets that it trespasses on property and is only justified by overwhelming necessity. We believe, accordingly, that a financial reform must be the basis of all other reforms, and are glad, therefore, to learn that it is in contemplation to form a Financial Reform Association in the metropolis, which shall have for its great object to promote the judicious use and the careful husbandry of the national finances, not to stint the public service, but to make it efficient and provide it liberally, and at the same time to lighten the burdens on industry.

NAVAL AND MILITARY INTELLIGENCE.

THE Union Screw Collier Company's steam-ship *Norman*, left Southampton on Monday, for the Crimea, having on board 55 horses and 40 men of the 5th Dragoon Guards. Independently of the ordinary ship's stores, the *Norman* takes out 300 small casks of sugar, and 100 ditto of rice.

AN order has been received from Government to have the steam transports *Conduc* and *Indiana* in readiness by Saturday (to-day), to take on board horses and troops. These fine vessels are now lying in the Southampton docks undergoing a complete overhauling.

THE French mortar-vessels have commenced the route to the Baltic. The steam despatch boat *Colibri* and the mortar vessel *La Tromba* have left Cherbourg to join the northern fleet.

ORDERS have been forwarded to India for the embarkation of the 14th Light Dragoons, quartered at Jubtee, Bombay Presidency, for Suez, from whence the regiment will proceed overland to Alexandria.

NEW MILITIA BARRACKS AT BRIGHTON.—The innkeepers of Brighton having, through a deputation, complained of the inconvenience to which they have been subject by the long continuance of the system of billeting, the Government have determined to build a barracks for the regiment, capable of accommodating 1000 men. Several sites in the neighbourhood of Brighton have been inspected, but it is stated that the one which appeared, from locality and price, to be the best adapted for the purpose, is situated on Ditchling hill, about two miles from Brighton.

ANGLO-ROYAL VISIT TO CHATHAM.—Intimation has been forwarded to Colonel Eden, the Commandant of the Garrison, of her Majesty's intended visit to Chatham, for the special purpose of distributing the Crimean medals. It is not yet determined where such an interesting ceremony will take place, but it supposed either on the Lines or in the spacious gardens of Fort Pitt.

ARRIVAL OF INVALIDS. On Monday 35 invalids, who came home in the *Indiana*, arrived at the Strood station of the South-Eastern Railway, under the charge of Dr. Palatiano. A party from the Garrison were in attendance. This vessel took home invalids, 6 of whom were left at Portsmouth, being too ill to proceed. Of the 35 who arrived, 6 came from Egypt, 3 from Scutari, and 26 from Malta. Of the 35 men, 11 were sent into hospital on their arrival, and proceeded to St. Mary's Barracks. Dr. Palatiano is the first foreign medical man who has arrived in charge of invalids. About 100 more Indian invalids arrived in the afternoon at Gravesend.

THE newly-launched screw steam-transport *Transit* was handed over by Mr. Mare to the Government on Saturday last. Being in commission, she hoisted her pennant and shipped some of her crew, and hauled from the East India Docks into the river with a view of proceeding direct to Chatham. Captain Johnson, R.N., and late of the *Driver*, is commissioned to the *Transit*. Mr. Watts, surveyor of the Admiralty, and other naval gentlemen, on the part of the Government, held an inspection of the ship, and expressed themselves highly gratified at the excellent arrangements of everything connected with this splendid vessel; indeed so perfect has everything been in the *Transit* for the accommodation and conveyance of troops that the Government Inspector declared that there never was a transport better adapted for the purpose. Stalls for 100 horses have been fitted up between decks. Her pumps are capable of discharging two tons each of water per minute. Her condensing apparatus will be enabled to distil 200 gallons of salt water into fresh in every hour. Her hospital, cots, and provisions, &c., are also fitted up on the most improved plan. Never has there been a ship better ventilated

THE BRITISH FOREIGN LEGION.—On Sunday last the newly-raised men for this legion were inspected by their Commander, the Baron Stutterheim, accompanied by the Brigadiers Kinloch and Wooldridge, at their Encampment at shornelife. About 900 men were paraded, two-thirds of them the rifle corps of the Legion. They appeared in excellent order, and looked the sort of stuff of which good soldiers are made. The word of command was given in German. The Baron and staff rode slowly down the front and back again up the rear lines, minutely looking at every man. In the ranks of this legion are many men of superior education, who have held the position of officers in the Austrian and Prussian armies. They are in the ranks at present, but many have been made "under officers," and will no doubt get commissions if they distinguish themselves. In one of the smart sergeants may be recognised the Captain of a rifle corps in the service of Kossuth in Hungary an war, and has been of late years a teacher of languages. Another private enlisted in the legion after a short sojourn at that aristocratic and even Royally-honoured establishment, Birmingham's Ship Hotel, where he occupied the apartments once tenanted by the Emperor of France, and like a gentleman, as he undoubtedly was and is, paid his bill out of a well-filled purse before proceeding in a carriage to the Camp at Shornelife.

DEPARTURE OF GUARDS FOR THE CRIMEA.—On Monday afternoon a large detachment of the Coldstream Guards arrived at the London-bridge railway-station, from Croydon. The men were all in heavy marching order. They proceeded from the railway-station to St. James's Park, where they were minutely inspected by the Adjutant-General of the forces. They all wore the improved accoutrements, cross-belts with frog for bayonet sheath, and pouch for percussion caps; their kits were also of the modified weight. The men are all smart, active fellows, principally volunteers from different militia regiments. Having been put through several evolutions, they were marched off to the South-Western Railway, where a train was in readiness to carry the men on to Aldershot, whence they proceed to the East. 200 of the Grenadier Guards, 250 of the Scots Fusiliers, and 250 of the Coldstream Guards are under orders to embark for the Crimea during the present month Twenty more wounded, returned from the service companies of the Grenadier Guards in the Crimea, several without arms and legs, were yesterday inspected by the Commander-in-Chief and the Adjutant General, at the Horse Guards, previous to receiving compensation and pensions adequate to their injuries.

MR. EDMOND O'FLAHERTY.—The cause of Richardson *v.* Gregory was tried at the Court of Queen's Bench, Dublin, on Friday and Saturday last, and created great interest. The action was brought upon two bills of exchange for £500 and £300—the first purporting to be drawn by the defendant upon Lord Dunkellin, and accepted by Lord Dunkellin; and the second purporting to be drawn by the defendant and accepted by Mr Edmond O'Flaherty, formerly a Member of Parliament, and an Irish Commissioner of Income-tax. Both these bills, with checks, had been received by the plaintiff in discharge of sums due from Mr Edmond O'Flaherty, who has left the country. The defence was that the signatures of Mr. Gregory and Lord Dunkellin were forgeries. On Saturday the jury returned a verdict that both the defendants and Lord Dunkellin's name were forgeries on each of the bills

CHESS.

Our Notices to Chess Correspondents will be resumed next week.

PROBLEM No. 594.
By Mr. H. TURTON.

White, playing first, mates in five moves.

MEETING OF THE NORTHERN AND MIDLAND COUNTIES CHESS ASSOCIATION AT LEAMINGTON

(From our Correspondent)

THE town of Leamington, one of the most beautiful and agreeable places of fashionable retirement of which we can boast, has just been awakened from the dreamy trance of its summer repose, and has caught from an unwonted cause a few days of fervid and intense, although noiseless excitement. This interval of festivity, occurring at what is termed the dull season of this brilliant Spa, is quite unlike the gaieties which year after year, during certain months, it closes on almost a portion of its distinctive character The occasion to which we refer tells a story, and leaves some trace and remembrance behind. It was what in one sense might be called "a sporting event," but the sport is the quietest, the most intellectual, and the most disciplining of all sports; and after we have stated what actually took place, we shall avail ourselves of the opportunity to offer a few remarks on the inherent capabilities of the pursuit which assembled so many remarkable and able men at the shortest notice in an English country town, and show, or we are much mistaken, that the beautiful and refined amusement which assembled them may be made to subserve (at least an ancillary degree) a great and important purpose towards which the experiment of applying it has never yet been attempted on a large scale or with adequate combination.

The meeting in question was the annual assembly of the Northern and Midland Chess Association, and it was held this year under the presidency of Lord Lyttelton. But the increasing interest which this "silent sister" is inspiring was shown in the fact that on this occasion visitors eminent for their knowledge of Chess and their skill and genius in actual play, came from all parts of the United Kingdom—some even from the Continent—to attend the festival of this agreeable association. The public hall of Leamington was engaged for the assembly. more than three hundred tickets of admission were sold and this conveys but an inadequate idea of the numbers present; for, while many had an official right to attend, hospitality multiplied its own welcome guests. Many ladies honoured the festive conclave with their presence, and the chief hotels were thronged with visitors

Mr Staunton, and with him many players whose names are well known in its *Pages*, represented the amateurs of the three kingdoms:—and Messrs de Riviere, of France; Lowenthal and Falkbeer, of Austria: Horwitz, of Prussia, and Signor Tassilari, of Italy, were among the most interesting of the foreign representatives

There was play, of course, and we shall probably find space for some of the chief games A number of matches were arranged, few of which, however, could be decided in so short a time; but play was not the most interesting characteristic of the meeting. During the brief interval, bright and in so great a crowd, with many of the players fatigued by travelling and excited by their ulterior engagements, good Chess conflicts were not to be expected as the main objects. It was rather a Chess celebration than a Chess battle-ground; an opportunity of making personal acquaintance, or of renewing it; the fixing of future combats, and the interchange of remarks and of views, respecting the present state and possible amelioration of the laws and customs of the game. These more general purposes, which it is not practicable to advance except by means of meetings such as that of Leamington, and which cannot be decided by any isolated player, however eminent, furnished the most valuable business of the week. Mr. Staunton has long meditated how certain universally-felt anomalies and defects which it is a pity to leave unremedied in the usages and rules of a game otherwise so perfect (and even now incomparable) might be removed; and on Friday (June 29) Lord Lyttelton called on the Rev. J. B. Smith to read Mr. Staunton's Digest of the Treatises written on the Laws of Chess by Messrs. Von Heydebrand, Von Jenisch, and Staunton. All three—and it would be hard to find in any art a more authoritative triumvirate—are agreed in making certain important recommendations. To these suggestions Mr. Staunton adds one of his own, which speaks for itself the adoption of *a universal nomenclature and notation*. Such discussions as these, which excited the keen interest of those present, show the utility of bringing together as often as possible the largest number possible of eminent players

Among the adepts present on this occasion, not only were the three kingdoms, as we have said, with France and Germany and Italy represented, but it was curious to note how the various more intellectual callings and classes assisted by proxy. The Universities were prominent. The Church of England stood in formidable strength. Lord Lyttelton's Vice-President at the class-banquet was Dr. Kennedy, the Head Master of Shrewsbury School. The Navy and Army were present in the persons of Admiral Bigland, Colonel Gilman, and other veterans of distinction.

We cannot pretend to enter here into the thousand details of the week's occurrences; but this we may say, that, as a social celebration in connection with the most scientific of all recreations, few more successful meetings could have been desired by the most devoted of amateurs

Of the two chief matches—that in which Messrs Staunton, Wyvill, and Captain Kennedy, consulted against MM. Lowenthal, Falkbeer, and De Riviere, and that in which the best players of Oxford confronted the leading men of Manchester neither was decided

Of the other consultation matches, two only were finished. In one of these the Club of Leamington defeated that of Birmingham and Edgbaston, and Nottingham was victorious over Kidderminster. In the last contest an occurrence happened which incidentally illustrates the necessity for enlarging and improving the Rules of Chess. The Kidderminster players made a move which was announced in writing by the gentleman who acted as their secretary as a different move. Thus it stood on the Kidderminster chess-board as it was made, and on their adversaries' as it was erroneously represented. Which was to stand—the actual move made, or the wrong report of it? The players of Kidderminster contended for the move made, their opponents for that announced. The decision of the difference involved the issue of the game. We might pause here and ask, were there but this one anomaly, or open question, left in the regulations effecting not the least interesting form of Chess encounter, would it not abundantly justify Mr. Staunton's persevering efforts to induce some "ecumenical" revision of the Chess code? In the instance before us, no distinct law being applicable, the question was referred to the arbitration of three members of the meeting. They decided that the move must hold as reported to the adversaries of those who had the responsibility of making it. We ourselves think otherwise, but whether the decision be correct or incorrect, it is sure at least to provoke discussion. Instead of elevating it, and, therefore, permanently, even in this suspended aspect an additional argument for new decisions on the true principles of Chess—we do not say for new principles. Our own protest against the particular decision of the Committee is itself a proof of our position. That decision was, of course, binding on those who appealed to it—beyond that court it is of no force. In opposition to it, Mr. Staunton asked, suppose the wrong move had been made, and the report instead of the move had been right, what would have followed then, especially if some subsequent steps had been taken before the discovery was perceived? He was asked in turn, would he have allowed such a mistake to pass without evil consequence to those who committed it? and he replied that he would not, that he would propose a fine as a penalty, but not such a penalty as would nullify the contest in progress. We think this sound and rational. It appears to us that where the question is whether a move, or the announcement of it, should hold, the move deserves preference, especially where, as in this case, the board on which it is made is open to the inspection of the by-standers, for, in the first place, the move is part of the game, but the announcement of it is not; in the second place, the only value of the report of a move consists in its conformity with the move, and if you destroy this conformity you annihilate the report. The purpose of the announcement is to let the opponents know the move made. A wrong announcement does not let them know this, therefore it should be punished, but to insist that it shall supersede the true move is to defeat the very and the only purpose for which announcements are intended at all; it is to say that the shadow can exist without the substance, that if it had been announced that we had not repulsed the Russians at Inkermann, then that announcement would be worthy of being held as a defeat, instead of being treated as a punishable or censurable mistake. The parallel we know is not exact, but it is more exact than a parallel between a game by correspondence and a consultation game, in which all the players are in the same room, and in which the only reason for writing the move is to avoid the noise of calling them out.

We shall not, however, argue the point here; we refer to it as a mere illustration of the inconveniences which Mr Staunton wants to remedy

Some others were mentioned by Lord Lyttelton, in his able and thoughtful speech at the banquet; and we shall conclude with a few reflections suggested by the views which he Lordship and some of the other speakers—naval, military, and clerical—unfolded with respect to the social influence of the game of Chess.

An individual, it will be granted, may be known by his amusements, as well as by his work, and between the first and the second there is, besides, a much more important connexion than is generally supposed. If you ascertained that every spare moment at Mr. So-and-So's command was spent in drinking, this would furnish some indication of his general constitution of mind, and even of his probable efficiency in any specific undertaking of a sustained order. If a whole nation, for example, existed in which every manly sport was held in abhorrence—in which none wrestled, none hunted, none would row a boat, or throw the bar—in which no jockey could be found who would mount any more formidable courser than a donkey in which the generality of the men would shudder at the sight of a rifle or a foil you might, without temerity (no matter how wealthy or how renowned the nation had hitherto been) pronounce what fate was reserved for them in the first serious international disagreement which they might fail to avoid. On the other hand, if all their tastes were low and besotted, though still sturdy and bold, their progress in freedom and enlightenment, in the application of science to the pursuits of industry, and the accumulation of wealth in the difficult arts by which peace is illumined and war impanoplied—in fine, their whole civil condition at home as a community, no less than their influence abroad as a member of the comity of empires, would be very easy to conjecture. We might enlarge indefinitely on this suggestive theme, and history is at hand to shew the double lesson in the case of famous individuals and of famous nations, that in their recreations, the tastes which marked the period antecedent to their rise were very different from those which heralded their decline and fall. It is not our present business to write a general essay on the subject, and we shall, therefore, be satisfied to state simply what we might very fully demonstrate (but what practically, we think, requires no further proof), that the amusements of a people both serve to shew their character and tend to form it: indicate it as it is, and affect it as it will be. Were it given to any individuals of the community to imbue the rest with whatever tastes they pleased in everything relating to pastime, nothing could well exceed the stupendous responsibility which would devolve upon such individuals. As that people played we say, so would they work. Were all their diversions light, the rest would infallibly come right too. Indeed, in this respect, the time of diversion is even more important on the long run, than the time of labour: for if all be well when left to yourself, there is little danger for you under the goad of duty and of necessity. Tastes are made when a person is consulting his own disposition; and they are often so made that when he has to consult his business they must be unmade or controlled, and what is thus true of a man's tastes is equally true of his capabilities. Every one seeks to chase himself in his choice of amusements. It depends on the manner in which he does here please himself whether he shall or shall not incur the penalty of covering him in almost everything else. We break away from the temptation of this subject to dwell on the recreations of a purely practical nature the truth of which we are quite certain will not be contested

In the first place, Chess (though it was justly recommended by Franklin as a powerful educational agency, and as allowed by all who know it to merit that remarkable designation) does not itself require any special education to enable a person either to play it or to enjoy it. It might, for all that its intrinsic character contains, be eminently and thoroughly a people's game, if the people, as such, only knew it. To the probable results we will make in a moment a rapid passing allusion. Meantime we lay stress on the fact stated, viz., that the learned and the unlearned might fairly meet each other over the Chess-board. If, historically speaking, it has in a far greater degree been the game of the learned (and generally, indeed, the game of the few), that is a fact into the causes of which it might be interesting to inquire; but which, we apprehend, leaves what we say of the game, in its intrinsic character, wholly unimpugned. In truth, where the nature of the game drives any person away, it never is because he is unlearned, though a frequently because he is stupid and unlearned does not mean stupid—there have been many learned persons who have been stupid enough, and there are thousands of the unlearned who are full of ability. We are aware of the existence of other moral sources of possible prejudice against Chess; but they affect all classes alike, and we need not recapitulate them. Sufficient to say that, while learning and the want of it respectively make class characteristics, cleverness and dullness do not; and that no peculiar degree of learning or of scholarship is more requisite to play or to enjoy Chess than to play any other game, whether elegant or rude. It is certain naturalities which are necessary; and these Chess of itself will exercise and strengthen. If a person's position or lot has precluded him, during a part of his life, from other exercise for them, and has refused him a more real field, that is no reason for excluding him from this. On the contrary, to be denied the usual and regular means of improving those particular powers which it is well known that the game heavenly fosters and invigorates, is to need it much, to need it in very different and far greater degree. To all it is an advantage—to him an advantage not to be otherwise supplied. But, happily, it is exceedingly accessible

In the second place, although there are many recreations whose votaries are more numerous than those of Chess, there is not one (and this point which will not be contradicted)—there is, we say, not one whose habitual cultivators are seen to become such "fanatics" for their own favourite game. They generally register the remembrance of their first introduction to it as an epoch in their lives, wonder how they "got on" without it, talk of it and think of it as pure *treasure-trove*; and, in short, seldom escape moving the sunshine and provoking the good-humoured banter of their friends, by their boundless and enthusiastic, yet settled and sustained, devotion to this enchanting pastime. Everybody does not love Chess—but everybody who knows it does; almost each player indulging regularly and periodically in a rave about it. Of no other game that we can recite or that ever existed is this equally true? You will find certain persons as fond of other amusements as any Chess-player, perhaps, is fond of Chess, but you will not find any amusement with which its adepts as *a body* are so notoriously and so deeply absorbed. There is no limit to the conceivable whims of individuals, and, accordingly, individuals are constantly observed to evince all manner of eccentric transports for strange crotchets and amazing caprices, with which nobody else, even after investigating them, can bring themselves to sympathise. Now, the cause of the game of Chess is exactly and literally the contrary; the charm of it proceeds not only from the oddly constituted brain of some "mover" who can nowhere find a "second," but makes itself felt round all the diversities of human tastes. The mystery it is uninteresting because to many it is unknown, but none knows it who does not allow its wonderfully engrossing tendency. Among those who positively dislike any other games which could be mentioned, are always a portion of those who have studied them. Chess alone can reckon with general and practical exactitude the number of its admirers by the simple process of reckoning the number of its students. These last can in no other contrivance for the diversion of mankind, be so safely accounted as all enthusiasts It seems, therefore, a natural and legitimate inference, that to make the game widely popular it needs only but to make it widely known; that the million would take in it the delight which the few have ever taken, provided only you once brought it to the acquaintance of the million

Now it so happens that the very class for whom Sunday beer bills are intended, for whom all sorts of legislative and even social machinery are put in action, possess far less leisure than any other class, and most limit their recreations to a much narrower range of the twenty-four hours.

There is one great want amid the many advantages of Chess that, like reading and listening to lectures, it includes no bodily exertion. Passing that by, we may boldly say among sedentary recreations, none is comparable to it for a moment; and as it is a rather time-exacting game, of once any large portion of the gin-drinking, bar-haunting class proceeds a grade or two beyond the mere elementary knowledge, a step or two beyond the moves, their limited hours of amusement would slip away unnoticed, and the whole margin of their leisure would be stolen from debauchery, redeemed by a sort of salutary cheat, from vice and demoralisation.

To all, the game is more of an amusement than some books, to that class it would be more so than almost any. Besides, the attention is more riveted. Chess will do, and has been known to do, what even physical intoxication cannot effect, it makes the player unconscious of acute bodily pain. We have not space at present to pursue our object; we will, therefore, merely add that it is a cheap game, that it is a sober game, that it is the least gambling and yet the most absorbing of games, that it is domestic and peregrinate alike, that it can be played alone, that it can be played with a friend ten thousand miles away, and yet allow the players to cultivate their homes, that it is a bond which no distance can sever, and yet a peaceful and sedentary attraction to one's own circle

*** In our next we propose to give one or two of the best games played, and to present a notice of the banquet which terminated this most interesting and successful assemblage

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE Duke of Northumberland has bought the Camuccini collection of pictures for £18,000. This is the largest sum given in England by a single individual for a single collection since Charles the First bought the gallery of the Duke of Mantua, and the Duke of Buckingham imitated his master's example by purchasing the noble collection formed by Sir Peter Paul Rubens. The Camuccini collection is a well-known gallery. It has been formed over a long series of years, with great opportunities and rare good taste.

Once more Mr. Ruskin. He is a critic a third time, in a supplement to a third edition of his Notes on what he is pleased to call some of the Principal Pictures Exhibited in the Rooms of the Royal Academy. He has discovered a promising genius in Miss J. M. Boyce, replies to our contemporary the *Globe*, has another fling at David Roberts, insults newspaper critics on art, has a glowing and overdone eulogium on Mr. Leslie's 'Rape of the Lock" in last year's Academy, and winds up with an expression of wonder at Mr. Leslie's extreme rashness in attempting a work of criticism on historical or sacred painting. Mr. Leslie will no doubt wonder in the same degree at Mr. Ruskin's extreme rashness in his sixpenny pamphlet of Notes on Some of the Principal Pictures.

Antiquaries and authors—nay, all who are in any way interested in the preservation and consultation of the records (the first in the world, in point of importance)—are crying out against the present mismanagement of the Public Record Office. What are the circumstances? Until the last three years our records were consigned to gloomy apartments over gunpowder-magazines—to a damp chapter-house—a rat-frequented riding-school—the below-water vaults of Somerset-house—a tenement of Chancery-lane, surrounded by low buildings very often on fire—crazy cellars in Downing-street, and badly-tiled garrets about the Abbey and purlieus of Westminster. When this, after some ten years of agitation, was made known to Government, a vote of Parliament was obtained, and, under the careful eye of Mr. Pemetherne, the present Record Repository of Chancery-lane was begun. There was a hope that in the new repository the records of this great kingdom would be securely lodged and readily accessible; and that, by consulting them, future Hallams and Macaulays would correct and enlarge our knowledge of the history of England, and of the manners and customs of our forefathers. But this expectation has been set aside. The Keeper of the Records informs us that the present building is "wholly inadequate" to contain all the records under his charge. But why is this, Sir John Romilly? let us ask. What are Public Records? and what have you been about? Will our readers believe that the War-office and the Treasury have prevailed on Sir John Romilly to fill and choke up his new building with one hundred and fifty tons, filling one hundred and thirteen van-loads of militia accounts and vouchers relating—not to the Wars of the Roses or the Civil War (when our printed materials were either none or very scant)—but to a period when George III. was King, and our fathers served in the Middlesex Light Horse or the Surrey Heavy Dragoons. Sir John Romilly has actually filled his shelves with three thousand nine hundred and thirty volumes of Army Pay Lists, of which the most antique dates no further back than the year 1798! He is also about to accept a mass of papers relating to Friendly Societies, and other useless materials, fit only for the mill or the butterman. As he cannot destroy, he must keep. Is it for such papers as these, let us ask, that our Pipe Rolls and Close Rolls, our Fœdera and Chamber Papers, must still remain in their insecure and almost inaccessible repositories? Is it for such rubbish that we have erected a building at an expense already of something like £50,000?

The leading art-attraction of the week has been an exhibition at Christie and Manson's of one hundred and forty sketches from the facile and faithful pencil of Mr. John F. Lewis. When the sale was first announced, we were led to believe that the collection was one in which Mr. Lewis might have a pecuniary interest. This, however, from the slight, the too slight, character of the bulk of the drawings, is evidently not the case. "A Child at Sorrento" (admirable for expression) and "A Girl in a Mantilla" are among the leading attractions of the collection.

The French Government has just set us a good example. The Emperor and M. Taschereau have printed and published the first volume of the books in the Imperial Library relating to France and the French. We wish Lord Palmerston and Mr. Panizzi could be induced to print and publish a similar volume of books in the British Museum relating to England and the English. There are shortcomings, and of course errors, in M. Taschereau's first volume; but it is still a national work, and of universal importance. M. Taschereau has too much good sense to go in quest of unattainable perfection, or to defer a work of immense utility because he feels he can not complete it to his own satisfaction. Mr. Panizzi has rather too fine a sense of the absolute necessities of a working catalogue of books.

Two men at one time intimately connected with newspaper literature have within the last ten days been taken from among us—John Black and James Silk Buckingham. Mr. Black was for very many years the editor of the *Morning Chronicle*, and Mr Buckingham was the originator and first editor of the *Athenæum*. There was little in common between them. Mr. Black was a ripe scholar, a well-read man, and nothing of an adventurer; Mr. Buckingham was indifferently read, and was, we fear, something of an adventurer. Few who have been connected with the London press but can readily recall John Black his good-humoured smile, his pleasant stories, and his constant attendant, a large Northumberland dog called Cato, which he used to lug along from book-stall to book-stall, or run with to and from Blackheath and London at all hours of the night Mr. Buckingham was busy with his autobiography at the time of his death; unfortunately, Mr. Black has not left his. Black had much to tell both from books and men. He was the intimate friend of Bentham and Mill, of Stothard and Allan Cunningham, of Perry, and of many who still survive to think of him with tenderness. Cobbett called him Dr. Black, and delighted to speak of him as a Scotch philosopher. He was a great talker, and talked well.

The monument to Samuel Phillips of the *Times* has been entrusted to Mr. Digby Wyatt, who, with the fine feeling of a true artist for a true author, is working at it only as a labour of love. It is to be erected over his grave in Sydenham churchyard.

Lord Stanhope has selected a most admirable and appropriate subject for his last Prize Essay at Oxford in English History: it is that of the (character of Lord Clarendon—first as a statesman, and secondly as an historian.

A letter from Acapulco confirms the discovery of gold in that district, and states that the first party left for the mines on the 13th May

A Mahometan sailor was drowned by falling from a ship at Greenwich the other night. His brother seamen lighted a fire on the wharf for the purpose of performing the funeral rites, after the Indian custom, by burning the body; but this was prevented, and it was interred in the cemetery

PLAN OF THE POSITION OF THE ALLIED FLEETS BEFORE CRONSTADT.

RECONNOITRING OFF CRONSTADT.—THE INFERNAL MACHINES.

LAST Saturday week the Admirals and Masters of the Fleet, in the *Merlin* and *Dragon*—the two vessels represented in the Engraving in pages 24-25—proceeded to reconnoitre to the north-eastward of Cronstadt. They approached so near the block-ships that a gun boat at anchor between two of them fired two shots at the *Merlin*, which fell about 150 yards from her. The Russians are evidently aware that this is their weakest point, and, as it can only be strengthened by shipping, it presents the most favourable point for attack. The *Vulture*, *Pelter*, and *Snap* were ordered o prepare to render immediate assistance if required. The enemy tried the range of their guns four or five times, when, finding it was not sufficiently extensive, they ceased firing and allowed the English steamers to proceed with their work without further interference. At 7.30 p.m. the *Merlin* and *Dragon* returned to their former anchorage.

In part of our last week's impression we mentioned that 46 infernal machines had been taken up by our vessels. The particulars of the capture are given in recent letters from the Baltic. It appears that these instruments of destruction are placed in pairs, connected together by a rope (in the centre of which a float is attached), at a distance below the surface of the water varying from nine to twelve feet. Their apex points downwards, and they are moored by means of large stones at the bottom of the sea. Through holes bored in the centre of the stones a stout rope passes, which is firmly secured to a ring screwed into the apex of the machines. On the 21st ult., about noon, each vessel commenced sweeping for the infernal machines, and before night gathered in a capital harvest of them. The way in which the sweeping is done is this:—Two boats take between them a long rope, which is sunk to the depth of ten or twelve feet by means of weights, and held suspended at that depth by lines attached to small casks, which float on the surface at intervals of forty or fifty yards; the boats then separate as far as the rope will allow, and pull in parallel lines until one of the casks stops behind, which tells them, as a float tells the angler, that they have caught something; the two boats then approach each other, keeping the rope taut, then haul it in carefully, and up comes the machine. The *Exmouth* found the first, the *Nile* the second; and then the catching became so numerous that, in some instances, two at a time were hauled up. They were at first supposed to be only the buoys to the machine; but, unfortunately, Admiral Seymour proved them to be the machine itself in a most unpleasant manner. He was examining one on the poop of the *Exmouth*, and, incautiously tapping a little bit of iron which projected from its side, saying, "this must be the way they are exploded," when bang! the thing went off, and everybody round was scattered on the deck. Admiral Seymour was so injured in the eyes that for some time it was thought he would lose the sight of both, but he soon recovered and no fear is entertained now of either. Lieut. Lewis, R.M., was severely wounded in the knee-joint, and badly burnt in the hands and arms; the signalman, who washolding the machine in his hands, was severely burnt down the front of the body and legs; and Mr. Petrs, Flag-Lieutenant, had his whiskers burnt off and his face singed, and every one near was more or less burnt. It was a wonderful escape for them all. Each machine consists of a cone of galvanised iron, sixteen inches in diameter at the base and twenty inches from base to apex: it is divided into three chambers, the one near the base being largest and containing air causes it to float with the base uppermost. In the centre of this chamber is another, which holds a tube with a fuse in it, and an apparatus for firing it. This consists of two little iron rods, which move in guides, and are kept projected over the side of the base by springs, which press them outwards. When anything pushes either of these rods inwards it strikes against a lever, which moves like a pendulum, in the fuse tube, and the lower end of the lever breaks or bends a small leaden tube, containing a combustible compound, which is set on fire by coming in contact with some sulphuric acid held in a capillary tube, which is broken at the same time, and so fires the fuse, which communicates with the powder contained in the chamber at the apex of the cone, and which holds about 9 lb or 10 lb. At the extreme apex is a brass ring, to which is attached a rope and some pieces of granite, which moors them about nine or ten feet below the surface, so that the only vessels they could hurt, the gun boats, float quietly over them; and now we know what they are, they have been disarmed of all their dread. But they prove dangerous playthings: the Commander-in-Chief was examining one of the fuse-tubes that was supposed to be spent, for it was full of mud and water, when he accidentally touched the lever, and it exploded in his hands, scattering the mud into the faces of all present, and literally throwing dirt into their eyes, but doing no hurt.

The accompanying Views are from the Sketches by Mr. Carmichael, referred to in the letter from the ILLUSTRATED LONDON NEWS of June 23.

THE REPULSE OF THE 18TH OF JUNE.

BAD ARRANGEMENTS.

The original plan of attack contemplated a joint English and French assault of the Malakoff, which, as commanding the Redan and forming the grand key to the whole network of redoubts and batteries in front of the place, would, if taken, have at once rendered the former untenable, and place the whole town and harbour at the mercy of the captors. For reasons, however, which nobody can understand, this very sensible and apparently most practicable design was abandoned, and the plan was changed into one of a simultaneous attack of the two great works—the Malakoff being undertaken by the French and the Redan by ourselves. The first manifest disadvantage of this arrangement was the spreading of our forces over a field of difficulties nearly double in extent, and enabling the enemy to bring a vast number of guns into play against us, which in the former case could not have injured a man. To vastly enhance the chances of failure involved in this plan to ourselves, our whole attacking force, including supports and everybody else, was limited to some 4000 men; whilst the French, with a much juster appreciation of the difficulty that fell to their share, told off 25,000. Of our handful, again, a large proportion consisted of raw recruits, recently arrived to fill up the gaps in the regiments selected for the service—regiments which, with one or two exceptions, have borne the whole brunt of our trench fighting, and suffered accordingly.

Then another deviation from the original plan of attack was made by General Pelissier, to which both military sense and common sense agree in attributing no small share of both the French and our own failure. Though the bombardment had been kept up vigorously the whole of Sunday, night necessarily compelled a slackening of the Allied fire, and during this respite there was reason to expect that the Russians would employ themselves in making good the injuries done to their batteries during the day. It was therefore arranged that at daybreak on Monday a terrific fire of shot and shell should be poured into the Redan and Malakoff, to render as many of their guns as possible incapable of mischief. An hour or so, however, before the combined forces marched from the camp the French Commander-in-Chief rode over to our own head-quarters and declared that he could not wait for this preliminary assault of artillery, as he would have so many men in his trenches before the Malakoff that there would be no cover for them; and, consequently, they (and we) must attack at daybreak, at all hazards, and take the chance of finding the enemy's guns in the most favourable condition in which our bombardment and their owners' subsequent idleness might have left them. Of course Lord Raglan complied, though forty-nine out of fifty of the subalterns in his Camp would have foretold the consequences to be expected; and, accordingly, soon after the first streaks of sunlight broke over the horizon, the doomed thousands rushed to defeat and death.

THE ATTACK ON THE MALAKOFF.

The French plan of assault appears to have consisted in assailing the work on both flanks and the front simultaneously, and with overwhelming numbers—twenty-five thousand men are said to have been actually engaged. In just retribution for the disregard of their General to the good to be expected from a short morning's bombardment, they found the redoubt swarming with defenders, and guns bristling from every embrasure. The French army of attack was divided into three divisions, headed respectively by General Meyran, General Brunet, and General d'Autemarre, and the intention was to commence operations at three o'clock; but, in stead of waiting for the attack, the Russians, at a quarter before three, opened fire on General Meyran's division, placed on the side of the Careening Bay, and decimated it before the two other divisions could recover from their surprise; so that by the time General Pelissier was on the ground, which was not till three o'clock, his combinations were irretrievably deranged. So sudden and complete was the destruction dealt on General Meyran's division—the General himself being wounded—that the Russians were able to turn their whole attention on General Bronet, whose division was taken in flank and crippled, and the General killed, by the time the Third Division came up, to be likewise decimated. Thus it was the Russians took the French by surprise, and were, as a consequence, to overcome the manœuvre which has ever been the aim of great captains, that of beating the enemy in detail. This is the French account of the affair, and from which it becomes clear that even if the English had succeeded in entering the Redan they could not have enabled the French to achieve the main object of the day—that of taking the Malakoff Tower.

THE ENGLISH ATTACK ON THE REDAN

The manner of our attack was as follows: The senior brigades of the Light Division, Second Division, Third Division, and Fourth Division were to furnish each one column of 1750 men, to whom were joined 60 sailors, and these columns were to be employed against the Redan and the Cemetery and batteries on our left of the Redan, close to the neck of the Dockyard Creek. The second brigades of these divisions were to be in reserve, and the Guards Brigade and Highland Brigade were moved up and kept in reserve also for any duty that might occur. The attacking party of the Second Division was the only exception to the above rule, as it was formed of broken brigades. Sir George Brown had the direction of the assault. The 1750 men in each instance were formed of 400 men for the assaulting **column**, a working party of 400 men to cover them in case of a lodgment and to reverse the work, 800 men as a support, and 100 riflemen or sharpshooters preceding the head of the assaulting column to keep down the fire of the batteries and of the enemy's Cossacks, and 50 men carrying woolpacks to bridge over the ditches. To these were added 60 sailors, bearing scaling-ladders. The Light Division column was to attack the right of the Redan at the re-entering angle; the Second Division column was to attack the apex of the Redan as soon as the Light Division and Fourth Division had carried the work at the flanks; the Third Division was to assault the Cemetery and the Barrack Batteries; the Fourth Division column was to assail the left flank of the Redan at the re-entering angle. The Second Division were only to attack the apex after the Light Division and Fourth Division had gained the flanks, and effected a junction along the base of the works, when they were to prevent the consequences of forcing a strong body of the enemy from the flanks into the angle of the Redan. The attacking column of the Light Division was furnished by the 7th Fusiliers, 23rd Welsh, the 33rd (Duke of Wellington's) Regiment, and 34th Regiment. The storming party was led by Colonel Yea, of the 7th. The 19th, 77th, and 88th Regiments, or the Second Brigade, were in reserve, under Colonel Shirley. Soon after twelve o'clock they moved down from camp and took ground in the trenches under the direction of Major Halliwell, the Deputy Assistant Quartermaster-General of the Division. The Second Division was on their left, the Fourth Division on the left of the Second Division, and the Third Division on the extreme left. The movement was simultaneous, and the troops moved off together till they came into the trenches, from which they were to issue forth to attack the dark wall of earth serrated with embrasures before them

As the 34th Regiment advanced, the supports, by some means or another, got mixed together with them, and some confusion arose in consequence. On crossing the trench our men, instead of coming upon the open in a firm body, were broken into twos and threes. This arose from the want of a temporary step above the berme, which would have enabled the troops to cross the parapet with regularity: instead of which they had to scramble over it as well as they could; and as the top of the trench is of unequal height and form, their line was quite broken. The moment they came out from the trench the enemy began to direct on their whole front a deliberate and well-aimed *mitraille*, which increased the want of order and unsteadiness caused by the mode of their advance. Poor Colonel Yea saw the consequences too clearly. Having in vain tried to obviate the evil caused by the broken formation and confusion of his men, who were falling fast around him, he exclaimed, "This will never do! Where's the bugler to call them back?" But, alas! at that critical moment no bugler was to be found. The gallant old soldier, by voice and gesture, tried to form and compose his men, but the thunder of the enemy's guns close at hand and the gloom of early dawn frustrated his efforts; and as he rushed along the troubled mass of troops which were herding together under the rush of grape, and endeavoured to get them into order for a rush at the batteries, which was better than standing still, or retreating in a panic, a charge of the deadly missile passed, and the noble soldier fell dead in advance of his men, struck at once in head and stomach by grape-shot. At the 34th, Captain Shiffner and Captain Robinson were killed close by their leader, and in a few moments Captain Gwilt, Captain Jordan, Captain Warry, Lieutenant Peel, Lieutenant Ait, Lieutenant Clayton, and Lieutenant Harman, of the same regiment, fell more or less wounded to the ground. Altogether the division lost upwards of 320 men killed and wounded, and it suffered severely as it retired from the futile attack. The signal for our assault was to be given by the discharge of two service-rockets, which were to have been fired when the French got into the Malakoff, and the latter were to have hoisted a flag as a signal of their success

It is certain that the French did for a short time establish themselves in the Malakoff, but they were soon expelled with loss, and several persons say that they saw a large triangular blue and black flag waving from the Malakoff all during the fight. The moment the rockets were fired the Light Division rushed out of cover; and in a quarter of an hour this infantry Balaclava was over, so far as any chance of success was concerned. The Second Division, seeing that the flank attacks failed, wisely kept under cover, and suffered but a trifling loss. Had they foolishly advanced, we should have to deplore greater and more useless slaughter. The 41st under Lieut.-Colonel Lyman, were to form the assaulting party. Captain Hawkeyers, of the 50th Regiment, commanded the working party. The 2nd Battalion Royals was to follow the 41st, and, with the 55th, was to form a supporting party, while the 49th and 47th were in reserve, and the 62nd were to furnish men for carrying woolpacks and ladders. They were marched off, and took ground, guided by Captain Lyard, and were formed in the old advanced parallel, next to the Quarry, and remained there till the attack failed. The Fourth Division were guided down by their active Quartermaster-General, Colonel Wyndham, and took ground in the trench to the left, but it would seem as if they attacked a little too near the apex of the Redan. Poor Sir John Campbell seems to have displayed a courage amounting to rashness. He sent away Captain Hume and Captain Snodgrass, his Aide de Camp, just before he rushed out of the trench, as if anxious to bring them into the danger he meditated, and fell in the act of cheering on his men. The 57th, out of 400 men, had more than a third killed and wounded, and it became evident that the contest on the left was as hopeless as the fight on the right, and in fifteen minutes all was over.

CAPTURE OF THE CEMETERY.

The brigade under Major-General Eyre, which was destined to occupy the Cemetery and to carry the Barrack Batteries, consisted of the 9th Regiment, 18th Regiment, 28th Regiment, 38th Regiment, and 44th Regiment. Four volunteers from each company were selected to form an advanced party, under Major Fielden, of the 44th Regiment, to feel the way and cover the advance. The 18th Royal Irish followed as the storming regiment. The brigade was turned out at twelve o'clock, and proceeded to march down the road on the left of the Greenhill Battery to the Cemetery, and halted under cover while the necessary dispositions were being made for the attack. General Eyre, addressing the 18th, said, "I hope, my men, that this morning you will do something that will make every cabin in Ireland ring again!" The reply was a loud cheer, which instantly drew on the men a shower of grape. The skirmishers advanced just as the general attack began, and, with some French on their left, rushed at the Cemetery, which was very feebly defended. They got possession of the place after a slight resistance, with small loss, and took some prisoners; but the moment the enemy retreated their batteries opened a heavy fire on the place from the left of the Redan and from the Barrack Battery. Four companies of the 18th at once rushed on out of the Cemetery towards the town, and actually succeeded in getting possession of the suburb. Captain Hayes was gallantly leading on his company when he was shot through the knee. Captain Esmonde followed; and the men, once established, prepared to defend the houses they occupied. As they drove the Russians out they were pelted with large stones by the latter on their way up to the battery, which quite overhangs the suburb. The Russians could not depress their guns sufficiently to fire down on our men, but they directed a severe flanking fire on them from an angle of the Redan works. There was nothing for it but to keep up a vigorous fire from the houses, and to delude the enemy into the belief that the occupiers were more numerous than they were. Meantime the Russians did their utmost to blow down the houses and fired grape incessantly; but the soldiers kept close, though they lost men occasionally, and they were most materially aided by the fire of the regiments in the Cemetery behind them, which was directed at the Russian embrasures; so that the enemy could not get out to fire down on the houses below. Some of the houses were comfortably furnished. One of them was as well fitted up as most English mansions, the rooms full of fine furniture, a piano in the drawing-room, and articles of luxury not deficient. Our men unfortunately found that the cellars were not empty, and that there was abundance of fine Muscat wine from the south coast of the Crimea, and of the stronger wines, perfumed with roses and mixed with fruits, which are grown in the interior, in the better sort of houses. Some of the officers when they went away carried off articles of clothing and papers, in proof of their entrance into the place, and some others took away pigeons and guinea-pigs, which were tame in the houses. The troops entered the place about four o'clock in the morning, and could not leave it till nine o'clock in the evening. The Russians blew up many of the houses, and set fire to others, and when our men retired the flames were spreading along the street. The 18th Regiment lost 250 men. In the middle of the day Captain Esmonde wrote to General Eyre to say that he required support, that the men were short of ammunition, and that the rifles were clogged. The rifles, which were of the Enfield pattern, had only been served to the regiment the day before, and again it was found that these admirable weapons are open to the gravest defect which has been so frequently mentioned, and that they are liable to become useless after firing twenty rounds. A sergeant volunteered to creep back with this letter, but, when he reached the place where the General ought to have been, he found that the latter had been obliged to withdraw owing to his wound, and he therefore delivered the document to Colonel Edwardes. As there was no possibility of getting support down to the troops, Colonel Edwardes crept down along with the sergeant and got into the houses to see how matters were going on. The officer in command, on learning the state of the case, ordered the men to keep up the hottest fire they could, and meanwhile they picked up the rifles and ammunition of the killed and wounded, and were by that means enabled to continue their fusillade. The 9th Regiment succeeded in effecting a lodgment in the houses in two or three different places, and the 38th supported it as well as the 18th. A sergeant and a handful of men actually got possession of the little Wasp battery, in which there were only twelve or four teen Russian artillerymen. They fled at the approach of our men, but when the latter turned round they discovered they were quite unsupported, and the Russians, seeing that the poor fellows were left alone, came down on them and drove them out of the battery. An officer and half-a-dozen men of the same regiment got up close to a part of the Flagstaff Battery, and under shelter of the parapet held their ground until they were by themselves, and, as it was futile to attempt holding their ground, they retreated. About fifteen French soldiers on their left aided them, but as they were likewise unsupported they had to retire. Only twenty-two men took up one of the houses on the Redan pit-battery next door, they found in it about a dozen Russians, whom they slew. Meantime, while these portion of the 18th and 28th were in the houses, the detachments of the same regiments and the 38th kept up a heavy fire from the Cemetery on the Russians in the battery and on the sharpshooters, all the time being exposed to a tremendous shower of bullets, grape, round shot, and shell. The loss of the brigade, under such circumstances, could not but be extremely severe. One party of 25, detached from the battery, was exposed to a destructive fire in houses, the upper portion of which crumbled into pieces or fell in under fire, and it was only by keeping in the lower story, which was vaulted and well built, that they were enabled to hold their own. The other parts of it, far advanced from our batteries, were almost unprotected, and were under a constant *mitraille* and bombardment from guns which our batteries had failed to touch.

THE NAVAL BRIGADE.

The detachments from the hard working and little-noticed Naval Brigade consisted of four parties of 40 men each, one for each column, but only two of them went into action, the other two being kept in reserve; they were told off to carry scaling-ladders and wool-bags, and to place them for our storming parties. It is not to be wondered at if they suffered severely. On that eventful day 14 men were killed and 47 men were wounded. Two men were killed, and several others were wounded, by the bursting of one of our 68-pounders in the left attack. Among the latter was Major Stuart Wortley, who was injured by the explosion. As soon as the two storming columns got out of the parallel the sailors suffered severely. When the men reached, overwhelmed by fatigue and by the enemy's battery, several officers and men were left behind wounded, and endured fearful agonies for hours, without a cup of water or a cheering voice to comfort them. Lieutenant Ermiston lay for five hours under the abattis of the Redan, and was reported dead; but he watched his opportunity, and got away with only a contusion of the knee. Mr. Kennedy, senior mate of the *London*, and of the Naval Brigade, was also left behind close to the abattis; and, after several hours of painful discontent, he rolled himself over and over like a barrel down the declivity, and managed to get into the trench. Lieutenant Kidd came in all safe, and was receiving the congratulations of a brother officer, when he saw a wounded soldier lying out in the open. He at once exclaimed, "We must go and save him!" and leaped over the parapet in order to do so. He had scarcely gone a yard when he was shot through the breast, and died in an hour after. Only three officers came out of action untouched. Lieutenant Dalyell, of the *Leander*, was struck in the left arm by a grapeshot, and underwent amputation. Lieutenant Cave and Mr. Wood, midshipman, were also wounded. Captain Peel, who commanded the detachment, was shot through the arm.

BURIAL OF THE DEAD.

Next morning there was hardly a gun fired on either side; and about twelve o'clock the English hoisted a flag to request the necessary truce for the burial of their dead. A delay of some minutes having occurred before an answer was given, the wisdom of an officer in command on our side ordered the flag to be pulled down. Five minutes after, several Russian officers mounted the parapet and waved their caps, as if inviting us to renew the request; but Captain —— refused, alleging that he must "wait for further orders;" and this, though many of our poor wounded fellows were lying within sight, writhing in pain and thirst under a broiling sun. "Further orders" were waited for, and no truce was again asked till four o'clock, when it was at once granted, and when our dead and wounded, the latter in a most painful state, were brought in. The Russians threw out an advanced line of sentries to keep off persons of rank from the Redan, and a similar precaution having been taken on our side the neutral space was thus narrowed greatly. During this proceeding a number of Russian officers mingled amongst our party, and as several of them spoke English fluently a good deal was said. Their "pumping" inclination, however, was so marked as in most cases to defeat itself; though one of our officers was guilty of the indiscretion of showing a very natural interest in their wounded and inquiring how many had been killed. Nobody broken Czarries a remark was procured his instant order to the rear. General Airey. It was by one of these [illegible] that the inquiry was made. Englishman wheth [illegible] drunk or not during the recent assault."

The Russians having helped our men to gather in the dead, the whole sad duty was soon performed, and the truce brought to an end.

Sir John Campbell was interred on Cathcart's-hill, his favourite resort, where every one was sure of a kind word and a cheerful saying from the gallant Brigadier. "It was but the very evening before his death," says a correspondent, "that I saw him standing within a few feet of his own grave. He had come to the ground in order to attend the funeral of Captain Vaughan, an officer of his own regiment (the 38th), who died of wounds received two days previously in the trenches, and he jauntingly invited one who was talking to him to come and lunch with him next day at the Club-house of Sebastopol."

PARTNERSHIP AND LIMITED LIABILITY.

THE Government Bills relating to these subjects have been read twice, and are now in Committee, where certain modifications will be introduced; but the main principle on which both measures are founded appears to be safe. Private partnerships are now regulated by common law, and partnerships in joint-stock companies by statute. The legal test of a partnership is the receipt and division of profits, and the act of one partner binds all the others, whether active or dormant, known or unknown; thus, if a bankruptcy ensues, a creditor may seize the whole property of a person of whose existence he was ignorant, and, of course, on whose responsibility he never calculated. In cases of simple partnership, Mr. Bouverie proposes that when persons lend money to others engaged in business on condition of receiving a sum varying, according to the amount of profits, either in lieu of, or in addition to, any interest on account of such loan, the lenders shall not be deemed partners with the persons borrowing such money. This is a wise and just provision, albeit some prejudiced and unreflecting parties consider it may weaken the security of creditors; but that is a false view of the subject; for, as M. Say, the celebrated French economist, has well observed, "a sum advanced *en commandite*, always known to the creditors, is an addition to the value of the funds furnished by the unde taker. If the *commandite* partner was a simple lender, he would diminish the security of the creditors by sharing with them the assets of the concern." This ought to be decisive of the whole question. If A and B are the undertakers, and in that capacity responsible to their last shilling and last acre, and C is a *commanditaire* lending to A and B £10,000, those £10,000 are liable, in addition to the capital of A and B, to which extent the security of the creditors is strengthened. Every one has the option of trading or refusing to trade with a partnership founded on Limited Liability; and he who elects to do so of his own free will can have no right to turn round on C, should bankruptcy ensue, and complain that his *whole* fortune is not liable, since he knew, before opening an account, that C had only pledged his credit to the fixed sum of £10,000.

Mr. Bouverie's argument, drawn from the repeal of the Usury Laws, does not appear to us very felicitous, or even pertinent. The problem of Limited Liability rests on a separate and independent basis, and ought not to be mixed up with the rate of interest. Moreover, the Vice-President of the Board of Trade appears to us to have adopted the prevalent error on usury: which error asks, "Why may not a man obtain as much profit from legal-tender money as from any other commodity in the market?" The reason why he ought not is, because legal-tender money is the very opposite of every other commodity in the market: its quantity is regulated by Act of Parliament; and when it is most needed it is rendered most scarce. But the supply of commodities is exclusively determined by the law of supply and demand; and when they are scarce, or apprehension is entertained of their becoming so, no legislative enactment prevents their multiplication; which is not true of legal tender. Hence, no parallel sought to be established between money and commodities is false.

In private partnerships consisting of few members all may see each other, and consult with each other, daily; but this is not the case with partnerships in joint stock companies wherein the shareholders are very numerous. These are governed by a deed of settlement: the directors must hold a certain amount of shares, and to them the management is committed, the great body of the shareholders having no voice in the management of affairs, except at periodical meetings. In fact, these institutions are managed through delegation and the representative system, combined with the principle of association; while in private partnership the bond of union is personal contact and mutual confidence. Mr. Bouverie proposes to exempt insurance companies and banks from the benefit of Limited Liability. On this point Mr. Cardwell differed, "seeing that the former were the only companies to which it was a matter of perfect indifference whether the bill passed or not." Such, indeed, is the nature of insurance companies, that they can enter into a separate written agreement with each of their customers, and apply to all of them, if they please, the principle of Limited Liability. Therefore, to exclude them from the provisions of the proposed bill is a sheer waste of legislative caution. In this view Mr. Cardwell argued that, for the sake of "harmony in legislation," insurance companies ought not to be excluded. In reference to banks, he recommended that the case of those institutions should be postponed till next Session. Banks are not under the control of the Board of Trade, but under the control of the Treasury; so that, in strictness, they do not come within Mr. Bouverie's department. By next year Parliament will have had some experience of the practical working of the new system, and at present it may be prudent to content ourselves with establishing the principle of Limited Liability. Moreover, some course must be taken in 1856 in reference to the Charter of the Bank of England; and then perhaps the most fitting opportunity will be afforded for considering the position of all our banking institutions.

They who oppose all progress, denouncing it as innovation in a bad and dangerous sense, may here be reminded that Limited Liability has existed in this country since the 13th and 8th of William IV. Among other undertakings, railways, docks, and canals, have enjoyed this privilege, and, had it not been conceded, some of our most useful and gigantic works would never have existed. Under the Act just referred to, and the 1st Victoria—the Letters Patent Act—the Board of Trade may grant or refuse Limited Liability, which Mr. Bouverie justly denounced as an "odious power," exposing those who exercise that authority to the charge of favouritism. He put the case most forcibly in these words: "He might also state that this matter rested with those who conducted the private business of both Houses; for if the Chairman of Ways and Means in the one, and the Chairman of Committees in the other, were to agree that the rule should be so that every company which came for a private bill should be granted Limited Liability, then the House of Commons would find that this great change would be effected without its having a voice in the matter."

From this it is plain that the House of Commons has already surrendered its right of legislation on questions of partnership, and delegated it to individuals; and that House cannot now, with any decency or consistency, resist the proposed measures, unless it abolishes the Acts of William and Victoria already cited. Nor must it be forgotten that under what is called the "cash-book system" the principle of Limited Liability has long existed in full force in the mines of Devonshire and Cornwall; and the courts of common law have decided that the directors of mining districts in those counties have not the power of binding the shareholders by the engagements which were made for the company.

It may be asked, and fairly asked, what guarantee will be given by the partners *en commandite* that their capital shall not be suddenly withdrawn? Under the existing law, members of joint stock companies who retire are responsible for three years after their retirement. Mr. Cardwell has suggested the following securities under the new system:—"In the first place, the name of the firm should indicate that it is a limited liability company. In the second place, a published list at the [illegible] and in the *Gazette* should show the quantum of [illegible] thirdly, when a company failed to meet its engagements, every person should be liable to the amount for which he was entered; and, lastly, every person should be liable for a limited period after he had parted with his shares."

This appears to us very reasonable; but we cannot approve of Mr. Bouverie's maximum of a capital of £20,000, a subscription contract signed to the extent of £15,000, and 20 per cent on that last amount. 3000 being paid up, before the partnership can be called into legal existence; since such restrictions do of themselves create a monopoly, and vest the privileges sought for exclusively in the hands of the rich. This would defeat the whole *morale* of the operation, which desires to call into play, fairly and without exception, the great principle of association among all classes who desire to avail themselves of its exercise. Socialism has sought to break down property by confiscation. Association, a healthy form of Conservatism, seeks, by the union of small or moderate means, to emancipate labour from the omnipotence of capital; it desires not to destroy what others possess, but to elevate labour to its legitimate position. If the opulent may combine their millions, on what honest ground can it be contended that the humble may not combine their ten or five pounds in an undertaking which they deem mutually beneficial? We believe that this privilege would powerfully encourage prudential habits; that the working classes, having a new future to look to, would cherish the virtues of economy, when they knew that, after a few years of self-restraint, they might rise from the precarious condition of daily toil, and class themselves in the rank of small capitalists. The recklessness imputed to them greatly arises from the want of hope, for they see no opening through which they may be elevated in the social scale. Limited liability will create that opening and realize that hope; and they will become prudent, and save out of their earnings, when they are assured that without risk they may share in the benefits of associated enterprise.

When the bills have passed through Committee we may return to the subject, and consider the amendments that are introduced.

THE SPIT OF ARABAT.—The spits or banks which formed such important natural defences of the position are now in our hands, or are, at least, rendered useless to the enemy, and are converted into an ingredient of our strength. As long as we have a gun-boat no Russian will dare to march on them over the arid roads. The point or bank of Tchetchia, opposite Yenikale, is one of the many extraordinary spits of land which abound in this part of the world, and which are, as far as I know, without example in any other country. Of all these, the Spit of Arabat, which is a bank but a few feet above the level of the sea and is in some places only a furlong in breadth, is the most remarkable. It is nearly seventy miles in length, and its average width is less than half a mile from sea to sea. The bank of Tchetchia (or Sarpovala Rosa), which runs for nearly eight miles in a south-westerly direction from Cape Kamanesoi past Yenikale, closes up the Bay of Kertch on the west; and the Gulf of Taman, on the east, is a type of these formations, and is sufficiently interesting to deserve a visit. It only differs from Arabat in size, and in the absence of the fresh water wells, which are to be found at long intervals on the great road from Arabat to Genitchi. It is so low that it is barely six feet above the level of the sea into which it runs. A bank of sand on both sides of the spit, [illegible] four feet in height, marks the boundary of the beach. The latter, which is [illegible] of shingle, shells, and fine sand, is only a few yards broad, and is terminated by the sand and rank grass and rushes of the spit, which rise up a foot or two above the beach. In the interior, or on the body of the bank, there are numerous lagoons—narrow strips of water much salter than that of the adjacent sea. Some of these are only a few yards in length and a few feet in breadth, others extend for a quarter of a mile, and are about 100 yards broad. They are all covered also by thick high grass and rushes. The bottom, which is found at a depth of a few feet—often at two or three inches—consists of hard sand, covered with slimy green vegetable matter. The water abounds in small flounders and fish, and, in autumn, when they are in wild commotion at an approaching tempest. Every lagoon is covered with mallards and ducks, in pairs, and the fringes of the spit is the resort of pelicans and cormorants innumerable. The silence, the dreary solitude of the scene, is beyond description. Even the birds, unlike as they are at this season, appear to be preternaturally quiet and voiceless. Multitudes of odd, crustaceous-looking polypes plants spring up through the reeds, and large-coloured lizards, with orange breasts and black wings, are to be seen over their nests below them.—*Letter from Kertch*

A RUSSIAN BATTERY ON THE SEA OF AZOFF.—The first day I went over we landed on the beach close to the battery which the Russians blazed on us from the spit at the Fern station. It consists of a quadrangular work of sand-bags, constructed in a very durable manner, and evidently [illegible] In the centre of the square there was a [illegible] a barrack for the garrison. The walls only were left standing. Even the bricks, quite as they are at this season, appear to be preternaturally quiet and voiceless. Multitudes of odd, crustaceous-looking polypes plants spring up through the reeds, and large-coloured lizards, with orange breasts and black wings, are to be seen over their nests below them.—*Letter from Kertch*

ENGINEER'S CAMP SCENE IN LOWER CANADA.

In the progress of the great railway works in Canada the characteristics of the scenery of the country, as well as the manners and customs of its people, furnish many interesting subjects for the sketch-books of our engineers; and to a suggestive advantage of this class we are indebted for the two accompanying Sketches, taken by Mr. James Cane, C.E. The first he describes as a Camp Scene in Lower Canada, representing his party on the North Shore Railway. The precise locality is the town of Three Rivers (*Trois Rivières*), situated on the north-west side of the river St. Maurice, at its confluence with the St. Lawrence. Thirty years ago this township had but 2453 inhabitants: it consisted originally of ill-built wooden houses; but the town has a good natural wharf. The position of this place, in a fertile portion of the country, about midway between the cities of Quebec and Montreal, is important; and these advantages are now about to be fully developed by the vast benefits of railway communication. To this place the Indians formerly came in canoes, bringing their furs until they were intercepted at Montreal by the North-West Company. Thirty years since the town had several pot and pearl ash manufactories, its breweries, and an iron foundry, some iron mines being situated in the neighbourhood. The camp scene, which our Correspondent has sketched, presents a not unfamiliar [illegible] of scenery and incident here are the tents of the railway engineers, those powerful pioneers of civilisation; here, however, they are partly filling up their leisure with an aboriginal pursuit of the country,—spearing fish by torchlight,—which is one of the most popular of the active sports of the Canadians.

Accompanying is a Portrait Sketch of an

IROQUOIS CHIEF.

interesting to state that the chief staple of Lake Superior is native copper. For ages before the appearance of Europeans in America, the metal was supplied hence to the Indian nations far and near. The tumuli of the Mississippi contains the identical copper of this lake. Traces of ancient mining are abundant in Keweenan, Ontonagon, and Isle Royale; and here have been found deep pits (a ladder in one), rubbish, stone mauls, hammers, and wedges, and chisels of hardened copper. In a native excavation near the river Ontonagon, with trees five hundred years old growing over it, lately lay a mass of pure copper, eighty one tons in weight, partly fused, and resting on skids of black oak. It was in the assertion of the natural rights of his tribe, and the claim to this vast mineral wealth, that the Iroquois Chief had an interview with the Governor-General of the Canadas, shortly before his Lordship resigned his high office.

IROQUOIS CHIEF.

The Iroquois, or Mohawks, are an Indian tribe of North America, formerly known also under the name of Mengwe, or Six Nations, inhabiting the country between the present town of Montreal and Lake Ontario. This once powerful and numerous tribe gradually diminished as the European settlements in their country increased, and at present the number of individuals composing it probably does not exceed a few hundreds. They inhabit two villages not far from the southern bank of the river St. Lawrence; one of which, St. Regis, is situated where the boundary-line between Canada and the United States strikes the river St. Lawrence, so that one-half of the village is within the British territory, and the other half belongs to the State of New York. The Iroquois have quite changed their manner of life; they derive their subsistence from the produce of their fields, in which they cultivate rye, Indian corn, potatoes, and peas; they also rear poultry and hogs. They fish and hunt, but this is no longer considered their principal employment. Their language (which they still speak) differs considerably from that of the Crees, who inhabit the country further west, but does not seem to differ from that of the Wyandots, Nadowesses, and Asseneepoytack, and hence the language of all these tribes is called Iroquois. The Chief, whose portrait we engrave, wears the aboriginal costume of his tribe—rendered somewhat familiar to us several years since by Mr Catlin's "Indian Gallery" of ethnographical illustration.

Our Correspondent, writing from Quebec, dated June 16, says, "We expect to break ground on the North-Shore Railway in a few weeks."

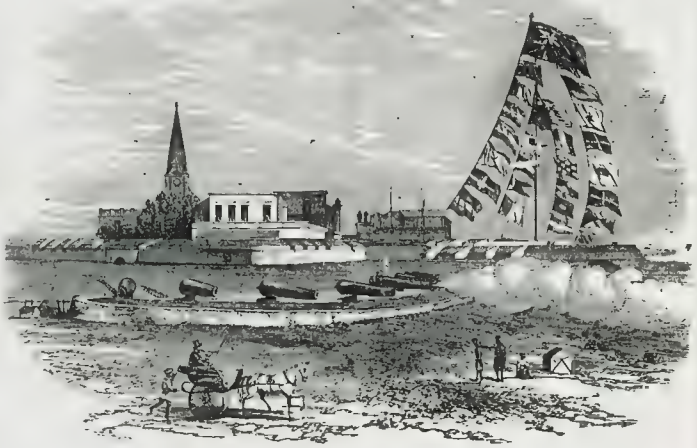
OPENING OF THE MADRAS EXHIBITION.

OFTEN as the flag-staff of Fort St. George at Madras has displayed its gay colours to the breeze, it has never been upon a more interesting occasion than the opening of the Madras Exhibition, in February last, with all the formalities previously announced. A royal salute was fired at sunrise, the decoration of the Fort flagstaff with the colours of various nations, including (we suppose) all the bunting available, and numerous other holiday indications, told the good folk of Madras that an auspicious day had dawned on them -that Labour was sent to rest for a few hours, while Recreation took his place. Before the hour at which the arrival of the Right Honourable the Governor and assisting authorities was expected a large number of ladies and gentlemen, including several of the native community, had assembled in the banqueting-room. The bands at the Presidency were in attendance, and "God Save the Queen" was played when his Lordship entered the Hall. When the procession had reached the platform at its upper end, the 100th Psalm was sung, and the venerable the Archdeacon then offered up an appropriate prayer. This was succeeded by the singing of the National Anthem, and Lord Harris then declared the Exhibition opened—when loud cheers were given by the assembly. Another Royal salute was immediately fired at the fort. On this announcement the formalities of the occasion terminated, and the assembled company proceeded to perambulate the room and make closer inspection of the costly and interesting products of art and nature gathered together for the information of those who viewed them, and the far higher object of showing how great and varied are the capabilities of India to minister to the wants of the Western world, whether as regards the supply of useful or of ornamental articles—in both of which branches the specimens were alike remarkable for excellence and abundance. The *tout ensemble* of the body of the hall was extremely rich and pleasing. Handsome carpets hung from the galleries which surround it; and a lofty structure in the centre, the supporting pillars of which were clothed with draperies of worked lace and muslin, held up a magnificent array of cashmere shawls and other products of the native looms, drooping in heavy folds calculated to display their fabrics to the best advantage. Around were arranged cases exhibiting in brilliant abundance the beautiful jewellery and precious stones of the country—the latter both set and unset; and curious and valuable collections of arms were arranged in appropriate groupings on the walls and pillars. Beneath the feet of those present lay some of the finest specimens of the carpet-weaving of the Presidency. There were also embroidered muslins, gorgeously woven, and inwrought fabrics glittering with gold; splendid articles of native attire; the imitations of European female apparel; specimens of metallic workmanship, and a hundred other noticeable things.

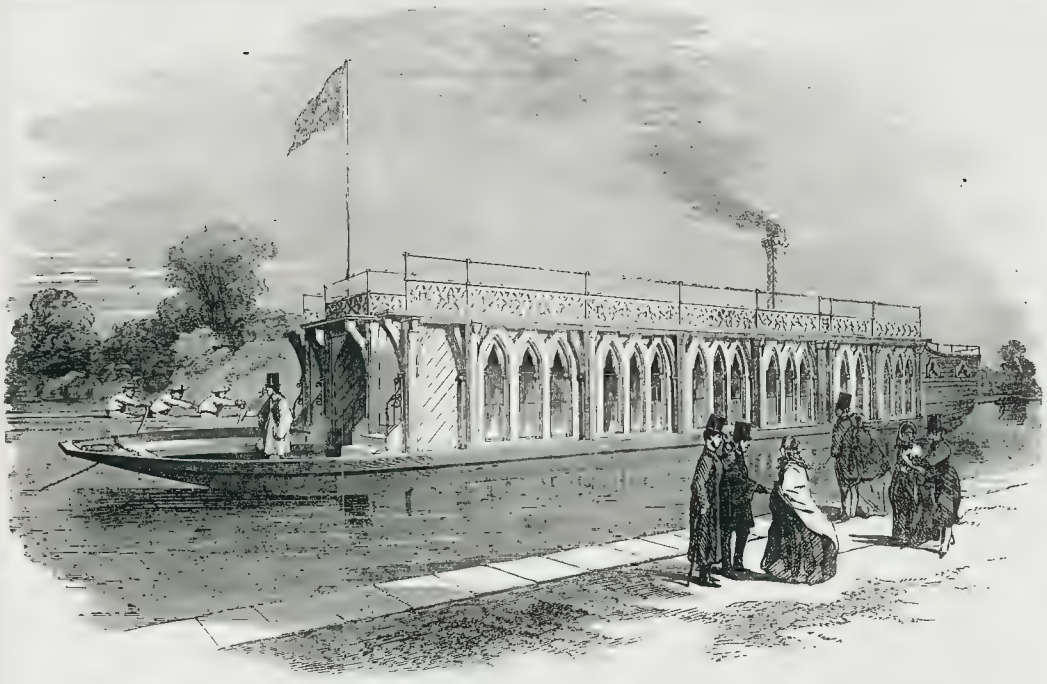
A section of the Exhibition exemplifies the wide scope of the Madras tariff. It occupied one side of the banqueting-room to the westward of the dividing pillars in that direction, contained a varied, rich, and valuable assortment of the productions of the Presidency, both natural and artificial.

"Taking the Exhibition as a whole," says the *Madras Spectator*, "we may safely say that it has answered all rational expectations, touching the nature and extent of the collection which those who projected it sought to make, and we hope that it will also advance the purposes of solid utility which led them to entertain the design of drawing it together."

The accompanying Sketch is taken from the promenade on the south beach: a part of the Fort is seen above the ramparts. The first building to the left is a portion of the office of the military Auditor-General: above the trees appears the steeple of St. Mary's Church, the oldest Protestant Church in the Madras Presidency. The next building is the residence of the Rev. A. H. Alcock, the minister of Fort St. George; the building above this is the Surgeons' Quarters; between which and the residence of the Deputy Postmaster General, Mr. Morphett, the Madras Lighthouse is seen in the distance. In the foreground is a dooley (a palankeen for the sick); and one is nearly every morning seen on the South Beach, having conveyed thither some pale-faced convalescent soldier, who is sent out by the doctor for a little sea breeze.



OPENING OF THE MADRAS EXHIBITION.—FORT GEORGE.



NEW BARGE OF THE OXFORD UNIVERSITY BOAT-CLUB.—(SEE NEXT PAGE)

NOOKS AND CORNERS OF OLD ENGLAND.

EAST DEREHAM CHURCH, THE BURIAL-PLACE OF THE POET, COWPER.

THE pleasantly-situated town of East Dereham, in the Mitford hundred, is one of the most interesting localities of Norfolk, richly stored as is that county with historical and archæological associations. Here was anciently a nunnery founded in the eighth century, by St. Withburga, daughter of Anna, one of the kings of East Anglia; and within the walls was buried the pious founder. The nunnery was destroyed by the Danes, and the conventual church became parochial; within the edifice a spring

EAST DEREHAM. THE CHURCH AND "CLOCKER TOWER."

said to have arisen, and to have passed through the tomb of St. Withburga; and covered with a Norman arch, it now exists in the churchyard; medicinal virtues were formerly ascribed to it. There is another spring called St. Withburga's Well.

The Church is a large cruciform building, of considerable antiquity; it has a nave, with side aisles, two transepts, and a choir, with a tower rising from the intersection of the nave and transepts. This tower, not being considered strong enough to bear the bells, a large tower was erected in the reign of Henry VII. in the churchyard, and was called the "New Clocker." The Church has columns of various forms, a singular porch, and a rich and handsome font put up in the sixteenth century; and in the Chapel of St. Edmund is a chest of curious workmanship, brought from the ruins of Buckenham Castle, and supposed to be 400 years old. Here is a very sweet-toned organ, mentioned by Dr. Burney in his "History of Music:" it was built by Schmidt in 1687, and enlarged in 1827.

East Dereham was the Rectory of the sanguinary Edmund Bonner, afterwards Bishop of London. But the Church possesses interest of a far purer character as the burial-place of Cowper, "the most popular poet of his generation, and the best of English letter-writers"; and whose poems contain "a number of pictures of domestic comfort and social refinement which can hardly be forgotten but with the language itself." Such is the opinion of Hazlitt, and we do not consider it too high an estimate of the claims of Cowper to our respect. The unhappy poet, it will be recollected, in his last affliction with madness, was removed from his friend Hayley's, at Eartham, in Sussex, once more, with Mrs. Unwin, to Weston. Their removal to a new scene, however, became necessary; and, under the care of the Rev. Dr. John Johnson, Cowper's cousin, they were conveyed to the village of North Tuddenham, in Norfolk, where they were received by his family. Southey relates that when Cowper was leaving Weston he had a presentiment that he should never return; and on a panel of the window-shutter in his bed-room, unknown to any person at the time, he wrote these lines:—

Farewell, dear scenes, or ever closed to me;
Oh, for what sorrows must I now exchange ye

In October, 1795, Cowper and Mrs. Unwin were removed to Dunham Lodge, in an airy situation in the neighbourhood of Swaffham; and next year Dr. Johnson took them to his own house in East Dereham, where Mrs. Unwin was released from her sufferings on the 17th of December, 1796. Towards the close of 1799 Dr. Johnson removed to a more commodious house in the same town; and in a few months, April 25, 1800, Cowper expired—in his last few hours subsiding into an appearance of tranquillity. His remains rest in the north transept, where is a monument to his memory, bearing the following lines by Cowper's friend Hayley:—

Ye who with warmth the public triumph fee
Of talents dignified by sacred zeal,
Here, to Devotion's bard devoutly just,
Pay your fond tribute due to Cowper's dust:
England, exulting in his spotless fame,
Ranks with her dearest sons his favourite name

Sense, piety, wit, suffice not all to raise
So clear a title to affection's praise:
His highest honours to the heart belong;
His virtues formed the magic of his song.

In the church are also tablets to Mrs. Unwin and to Miss Perowne—Cowper's "best and dearest friends."

East Dereham, of which the Illustration (from an original sketch) shows a street view, has been much improved: the houses are mostly well built and the market-place, which is convenient, contains a good assembly room, built about a century since.

"HELPING HANDS" AT THE ADELPHI THEATRE.

As we have already remarked, the heroine and hero of Mr. Tom Taylor's last new play are *Phœbe* (Mrs. Keeley), and *William Rufus* (Mr. Keeley). Our Artist has selected these two personages for illustration. The situation is that of mutual recognition—the first since their separation. Both are now in a condition of honesty, and have commenced a new course of life likely to lead to a prosperous issue. Our picture, however, can but indicate the position—it cannot explain its moral spirit. This demands the

SCENE FROM THE NEW DRAMA OF "HELPING HANDS," AT THE ADELPHI THEATRE.

dramatist's dialogue. Mr. Taylor's is peculiar. He is no writer of light conversational, punning *repartee*, but indulges in rhetorical demonstration. His characters talk logically. There is much that is evidently scholastic in Mr. Taylor's composition. There is, accordingly, considerable weight in his scenes, and the mind of the audience is set thinking; but somehow Mr. Taylor's logic serves him instead of wit, and the philosophical syllogism will often extort as hearty a laugh as the most exoteric jest. There is an abundance of natural sentiment, however, at the bottom of all this brain work, and Mr. Taylor constantly calls in the heart in support of the head. This is particularly the case with *Tilda*, whose benevolence is sometimes too much for her honesty; but there is a sense of justice even in her wrong-doing which preserves her respectability. As to *Rufus*, he is the very type of a shrewd, worldly-minded youth, whose knowledge of the wrong serves to keep him in the right. He well knows the distinction between them, and is likely to keep out of harm's way, and on occasion to overreach the dupe, paying him in his own coin, and taking the change out of him, with the high feeling of a retributive avenger. Cunning delineations of this kind are all in Mr. Taylor's best manner; and these two characters will doubtless not as "the salt" of this especial drama, and preserve the more substantial portions of it from decay. In them is the real living principle; the rest, it must be acknowledged, is somewhat too artificial for independent existence.

THE NEW BARGE OF THE OXFORD UNIVERSITY BOAT-CLUB.

THE frequenters of that most delightful walk known as Christ Church meadow, at Oxford, will have lately noticed an ornamental addition to the group of boats which here enliven the shore of the Isis.

This Boat has been built for the University Boat-club. It contains a club-room for the meeting of members, a committee-room, where the arrangement of all matters connected with boat racing on the river is conducted, besides a dressing room, closets, &c.

The Boat, which is used in winter as well as in summer, is heated by means of an open fireplace, having a tubular boiler at the back, where steam is generated, and, by means of pipes, carried off to heat the more distant part of the Boat.

The interior of the Boat is finished in accordance with the character of its exterior, and the structural development is everywhere exhibited even the moulded frames of the panels of the roof being the actual joists which support the deck. The posts and beams are also made prominent objects.

A seat runs round the top of the Boat, supported by an iron parapet of Gothic design; and the approaches to the roof are enclosed for the convenience of ladies who, at the annual procession, honour the members of the club with their presence.

The Boat was designed by Mr. Edward G. Bruton, architect, of Oxford, and is not only conveniently arranged, but is a successful attempt to introduce some novelty in the design of such works. The builders were Mr. John Castle, of Oxford, and Messrs. Dowling, of Pangbourne.

In the Commemoration Week (June 26-30), in the grand processional display on the Isis, the new University Barge formed the centre of attraction to a very large number of persons

LANCASHIRE ENGINEERS AND THE WAR.

Manchester is well known as the head-quarters of what is called "the Peace Party,"—or body of people who, we believe, had very much to do in bringing about the present war, by deceiving the Russian Government as to the opinions of the people of England, and inducing the Emperor Nicholas to believe that his contemplated aggression upon the possessions of "the sick man" might be made with impunity, so far as opposition from England was concerned. What we believe, however, a real "peace party" in Manchester and the neighbourhood—a number of men who are doing their best to bring about a peace, by furnishing the Government with an abundant supply of those weapons and appliances which are necessary to enable it to bring the war to a successful termination. That the ordinary mechanical inventions of the country, as exemplified in its manufactories, its railroads, and other public works, have, during the last forty years, far outrun the improvements in weapons and in military engineering is abundantly obvious. Though English mechanists are unquestionably the first in the world, we have been indebted to foreigners for almost every improvement in our fire-arms; and no English military engineer has constructed or planned any military appliance comparing with the gigantic engines and other prodigies of engineering science developed in the construction of our railways. In all these things the foreigners, who are our patterns and exemplars in military practice, are our inferiors in the nation, we are addicted to the arts of peace, and little disposed to trouble ourselves about military affairs.

Recently, however, it seems to have occurred to the Russian Government that the practical skill and extraordinary productive power of the men who have done so much for the manufactures of the country, by the ingenious and economical application of machinery unknown abroad in them, might be turned to some account in the fabrication of the weapons and appliances of war. Men whose establishments and powers of arrangement and combination enable them to fill a large cotton factory with machinery, of the best construction in every respect, in the course of a few weeks, would be able, if it were made worth their while to undertake the work, to furnish in abundance the fire-arms and other weapons of which the English Government has had so much difficulty in procuring the necessary supplies, whilst the skilful and scientific mechanists who have done wonders in the fabrication of engineering and mechanical tools, are the very men to devise improvements, whether in the form of weapons, or in their more accurate and ready construction; on all which the ordinary gunmakers and manufacturers of arms at Birmingham have utterly failed.

Apparently influenced by these considerations the Government have lately been giving extensive contracts to different machine making and engineering firms in South Lancashire, who are now largely engaged in the execution. We have on a former occasion referred to the extensive orders given to Mr. Francis Preston, of Ardwick, whose machinery and implements, designed for the humble purpose of making spindles and jennies for cotton spinners, were readily adapted to the manufacture of bayonets, and of musket and pistol ramrods, of better quality, and in a more expeditious manner, than they could be furnished by any of the Birmingham manufacturers; and Mr. Preston, we believe, is still furnishing these articles largely to the Government.

It is well known that the manufacture of fire-arms, of all descriptions, has long been in a very unsatisfactory state in this country, arising mainly to the disinclination of the Birmingham manufacturers to avail themselves of any of those mechanical inventions so largely resorted to by the manufacturers of the United States. Hence it happens that when the Birmingham gunsmiths are performing nearly all their work by the hands of skilled and expensive workmen, Colonel Colt's revolving pistols and rifles are made at his establishment in Connecticut with great perfection, almost entirely by self-acting machines, attended by women and boys. The Government, aware of this great difference, have resolved to extend their establishment at Enfield, so as to be able to turn out 100,000 Minié rifles per annum, and have entrusted the fitting up of the engines and millwright work to Messrs. Fairbairn and Sons, of Manchester, which, as is already generally known, they have contracted Mr. Joseph Whitworth to make (in conjunction, we believe, with Mr Westley Richards, the eminent London gunsmith) a series of very elaborate experiments on the best form and most efficient means of construction of military rifles. These experiments are now proceeding in a very satisfactory manner, in the building which has been erected for that purpose in Rushholme; and we have no doubt that some very important improvements in the construction of this most important weapon will result from them.

In addition to these things, Messrs. Sharp, Stewart, and Co., of the Atlas Works, have contracted to make some mortars of large size. Messrs. Platt, Brothers, and Co., of Oldham, after having completed some machinery for the more perfect manufacture of Lancaster shells, are now engaged as are also, we believe, Messrs Benjamin Hick and Son, of Bolton—in the casting of shot and shells. Messrs. William Higgin and Son, of Salford, are also engaged in casting shells, and particularly Shrapnel shells of a new and improved construction. Of the plans of Mr Nasmyth, of Patricroft, for constructing wrought-iron guns of enormous calibre and power, the public have already heard a good deal: and we believe that Mr. Nasmyth is now proceeding in his novel undertaking, though, very properly, but little is allowed to transpire as to his progress.

Altogether, therefore, it will be seen that Manchester and its neighbourhood are contributing largely to the means and appliances for carrying on war with effect: and we trust that their contributions will have a full share in conquering that peace which we are much more likely to obtain from our own success in arms than from the moderation of the Russian Government.—*Manchester Guardian.*

THE HANGO MASSACRE.—The Edinburgh *Express* has published letters which Miss Easton, of that city, has received from her brother, Dr. Easton, one of the officers of the *Cossack* made prisoners by the Russians at Hango. These letters, which are dated Helsingfors, June 12 and 13, state that Lieutenant Genesée and Mr. Sullivan were well. The four wounded men belonging to the *Cossack* had been removed from Ekenas to Helsingfors. Dr. Easton says that he is well and kindly treated, and gives some details of his occupations and amusements in confinement; but he says nothing whatever of the circumstances attending the capture of himself and his fellow-prisoners.

RUSSIA ON THE BLACK SEA AND THE SEA OF AZOFF.*

IT is astonishing how little was thought of the Black Sea, and how much less of the Sea of Azoff, politically and commercially, until the events of the war began to bring us in actual contact with their shores. Their importance now begins to be appreciated; and the terrible and costly contest now going on would not be altogether resultless if it only led to the opening up of the commercial relations of which these distant coasts are susceptible. The volume before us comes opportunely at the present moment, supplying an abundance of authentic information on the subject, which hitherto has been wanting. It is partly the result of the author's personal observation in the years 1844 and 1846, and partly a well-digested compilation of the materials left, by approved authorities, on the resources of Russia generally, but in the Crimea and Black Sea especially—viz., Clarke, Dubois de Montpereux, Haxthausen, Tegoborski, M. and Mdme. Hommaire de Kell, &c., all in their several departments. It is, therefore, the only complete and satisfactory account of the Crimea and its waters which has yet appeared; and many of the statements contained in it are of great importance in a strategic point of view. In our notice of it we shall sacrifice considerations of literary style, which is attractive and nervous, to that of utility; his admirable account of the general bearings and detailed features of the Crimea and the Steppes of Southern Russia, and the historical associations connected with them, though affording ample materials for extract, we shall pass over, and concentrate our attention upon points somewhat dryer in themselves, but of more immediate practical import.

Sebastopol first commands our attention—that iron-girt charnel-house which seems destined to swallow up hecatombs of Europe's bravest sons. In 1783, when the Treaty of Constantinople was signed, the Russians found no buildings around the magnificent bay of Sebastopol, except the little village of Aktiar, at the extremity of the bay of Inkerman. All has been done since—all those works, all those projects—which may one day change the whole aspect and policy of European States. Mr. Seymour informs us that the old name of Aktiar had long a struggle with the new fanciful name of Sebastopol; so much so, that in the Russian Post map of so late a date as 1828 the former only appears. The first works were those of the basin and docks: for this was originally, having no enemies to fear—exciting no jealousies amid surrounding nations—fortifications, except on the side of the sea, were considered an unnecessary precaution. Nevertheless, as time went on the scheme became matured. In 1829, Sebastopol had not the smallest defence on the land side against a *coup de main*. The town, in all its circumference, was completely open, and there was not even a gate or the smallest rampart. Shortly afterwards, however—namely, "after the discussion—occasioned by the capture of the *Vixen* in 1837, when war was supposed imminent between Russia and England"—the Cabinet of St. Petersburg grew frightened at the possibility of our making a descent upon these coasts, and defences were ordered to be commenced on the land side of Sebastopol. All the time these works were constructing the Western Powers were asleep, or were ignorant, or pretended to be ignorant, of the purpose for which they were intended. Upon this point there is now no disguise. Mr. Seymour quotes a passage from the work of M. Haxthausen, compiled under the patronage of the Russian Government, and published in 1852, which tells us very plainly the object in view:—

> The object of the fleet (says Mr. Haxthausen) is to secure the dominion of Russia in the Black Sea, and this is still further assured by the construction at Sebastopol—at the present moment—of a fortified port of war, which, according to the accounts of competent persons, will not be equal in the world. When Europe shall have a moment of feebleness—and we may fairly expect this to come to pass after what we have seen to happen in 1848—and when she shall think the time arrived for conquests, then the establishment of Sebastopol will allow the Power to take the offensive against Constantinople with equal energy and safety, by making use of her fleet, either to disembark her troops behind the lines of mountains and rivers which perpendicularly on the western shore of the Black Sea cut at a right angle the line of approach on Constantinople, or to operate, by the agency of a grand army, on the Danube—supposing it wherever there are ports along the Euxine. It is impossible that the Turkish fleet, either present or future, could stop this result, for, whatever may be done to improve it, it can never equal the Russian. Up to the battle of Navarino the case was very different, for till that event some confidence might still be placed by the Porte in the Greek sailor.

And this plain unvarnished statement M. Haxthausen follows up with a justification of the aggressive views of Russia; and some sarcastic remarks upon the low, feeble policy (*mesquine, traessière* are amongst the epithets used) of England and France in pretending to intercpose to prevent them.

The importance of the recent operations of the Allies in the Sea of Azoff, which fully justify the despatches we have attempted to appreciate, is clearly established by the following statement alone, which, if it will be recollected, was written six months ago:—

> The military stores and provisions for Sebastopol come from the interior of Great Russia and Siberia, down the Volga and Don to Rostof, on the Sea of Azoff, whence to peace they were shipped, and passed through the Straits of Kertch, the whole way to the Crimea, under the guns of the fleet in the Black Sea. Since the war began, they have come, as usual, down the Don and across the Sea of Azoff; but, instead of passing through the Straits of Kertch, they have been landed at Taganrog, on the west coast of Crimea, within the Sea of Azoff, and thence were carried across Crimea, about 100 miles, to Sebastopo., during the whole time of the siege, till the Sea of Azoff froze in November last. Cape Kuzantip was fortified by the Russians last summer, and wharves erected near it for the landing of the goods, and a regular transport service arranged across the peninsula of Crimea.

It was by this means that supplies were continually poured into Sebastopol up to last November; after which period, the sea being frozen over, they were "probably carried across the ice to some point on the northern shore of the Azoff, and thence by land over the Isthmus of Perekop." It is to be regretted that the last named place was not taken long ago, as it would have given the complete command of the Strait of Yenitchi and the tongue of Arabat. The Straits of Kertch were undefended up to May last—at that very period when the Allied fleets were idling away their time in the Bosphorus, a glorious prize was within their reach if proper energy had been displayed. But the Russians are too fast for us; they are always a day in advance. Large provisions of rye flour for the troops of Sebastopol were accordingly sent by the Government at Rostof, near the mouth of the Don; and Mr. Seymour states:—

> These provisions were lying ready for shipment, with the military stores, at Rostof in last May, and yet we made not the slightest efforts to intercept these supplies, which have been regularly poured into Sebastopol since that time, and without which the siege could not have been carried on. Merchants in England have informed me that the very lead which has formed the bullets that have killed our brave soldiers has been imported into Russia since the beginning of the siege, in consequence of there being no blockade in the Black Sea and the Azoff; and large reinforcements which have been sent from the Caucasus to Sebastopol could also have been cut off.

Taganrog, of which our fleets have recently given such good account, is a place, the local importance of which can hardly be overrated. Voroslovsk, writing in his "Dictionnaire Géographique et Historique de l'Empire Russe," 1823, says:—"The port of Taganrog is an absolute necessity for the Russians, independent of all commercial considerations, because this is the only means of procuring the masts, iron, and all stores which come down the Don and Volga from Russia and Siberia for Kherson, Nicolaief, Odessa, and Sebastopol. A coal of good quality is also exported from here, which comes from the sources of the Kryncka and Severny Donetse, at a distance of about eighty miles." It appears, however, that no masts are now shipped from this place.

Fifty miles east of Taganrog, situated on the right bank of the Don, is Rostof, formerly a small fishing village; but now a rising commercial town—the key to all the trade of the Sea of Azoff and the south-eastern parts of the Russian Empire, and the capital of a district, with a population of 12,000 inhabitants. The present importance and future prospects of this place—and, indeed, of the Sea of Azoff generally—may be gathered from the following passage:—

> Rostof enjoys no special privileges, and is flourishing state is entirely due to its convenient site, and to the large amount of foreign capital of which it is the centre, which has drawn to it the produce of the interior of the empire, and made it one of the most important commercial towns. As Odessa is the outlet for the produce of the southern Polish provinces, and from this circumstance derives its importance, so Rostof is one of the principal *débouchés* for the agricultural produce of Great Russia, and consequently likely to become a place still more flourishing than it is at present. Great Russia, as the governments around Moscow are called, is the most thickly peopled and most productive part of the Russian empire, containing an industrious and active population, and the principal seats of agriculture and manufacture. It formerly sent its produce almost entirely to the Baltic for exportation, but of late years there has been a tendency in growers to avail themselves of the great arteries of the Don and Volga, and shipments from the Azoff and the other ports of Southern Russia have consequently much increased.

The trade of the Sea of Azoff is chiefly in the export of raw produce—grain, tallow, iron, wool, and military stores. In 1850 the exports exceeded £1,350,000, whilst the imports were only £200,000. The exports have nearly trebled since the year 1850, whilst the imports have remained nearly stationary. The import trade is greatly impeded by the high tariff of customs and vexatious quarantine regulations—Russia's usual mode of retaliation; but, when the time comes for peace negotiations, the Governments of the Western Powers will surely not omit the occasion to insist upon a more liberal and enlightened policy, which will be of equal advantage to Russian interests and to those of Europe at large.

The main drawback to the commerce of the Sea of Azoff and the Don consists in the difficulties of navigation, occasioned by the shallowness of the water; and this is every day increasing. Between the years 1706 and 1808 the depth of the sea diminished three feet; and since the latter date it has again diminished three feet, making six feet in one hundred and twenty-seven years. Its greatest depth at present is forty-six feet between the Straits of Kertch, where the passage is narrow; it soon diminishes to twenty-six feet, and in the greater part of the roadstead of Taganrog there are but eight or ten feet water. The depth increases, however, southwards as far as what is called the Greek Bank, where most of the vessels finish taking in their cargoes. The diminution of depth is caused by the accumulation of deposit from the waters of the Don, accelerated by the destruction of large quantities of ballast from ships lying in the roadstead of Taganrog. This mischievous practice is strictly forbidden by the Government; and the draught of every vessel is measured at Kertch and again at Taganrog, to see that there is no alteration in the lading. A fee, however, to the tax-free yet wary pilots, is the only remedy; however, southwards as far as and

THE ILLUSTRATED LONDON NEWS

No. 752.—VOL. XXVII.] SATURDAY, JULY 14, 1855. [TWO SHEETS, FIVEPENCE. STAMPED, (POST FREE,) 6d.

LORD JOHN RUSSELL.

We regret to announce the political demise of the Right Honourable Lord John Russell. This melancholy event occurred on Friday, the 6th inst., when his Lordship, in an ever-memorable and unhappy speech committed the act which will deprive the Government of his presence, and his country of the satisfaction of having among its Ministers a man so illustrious for great public services. Lord John broke up the Aberdeen Administration because some, if not all, of his colleagues were not carrying on the war with sufficient energy. His present colleagues, if true to themselves, and to prevent a catastrophe similar to that which befell Lord Aberdeen's Government, must deprive themselves of Lord John Russell for the same reason, and with the same weapon. His continuance in office would damage their characters, impair their usefulness, and be a scandal to the country both at home and abroad; perhaps no scandal in Germany, Austria, or Russia, but a great scandal everywhere else, especially among the brave-hearted and generous people, who are fighting by our side in the gory battle-fields of the Crimea. Though his Lordship's secession from the Ministry has not, at the time we write, been announced in a formal manner to the country, and although Sir Edward Bulwer Lytton's very proper motion has not been discussed, we cannot bring ourselves to believe that many days will elapse before the Secretaryship of the Colonies will be declared vacant. The representation of London will not necessarily be vacated so soon—but at the next election it is as certain as anything can be which has not happened, that Lord John Russell will not have the honour of a seat for the metropolis. If the veteran will still lag superfluous on the stage, a small rat-hole, or family borough, left undisturbed by his own Reform Bill, will be the only abiding-place for his Parliamentary senility.

There was a time when no man's public character stood higher in the estimation of his countrymen. The name of Lord John Russell was, as his rival, Mr. Disraeli admitted, "one of the most precious possessions of the House of Commons." No man but Lord John Russell could have deprived the House or the country of a property so highly to be prized. But his Lordship himself has done this deed, and he belongs no more to the present or the future. He ranks among the men of a past age; and History will not be niggard in the admission and record of his many claims to public gratitude. The steady friend of Reform—the enlightened and persistent advocate of Education—the doughty champion of Civil and Religious Liberty—all these he was, and much more, until in an evil hour, and at the instigation of his own vanity, and perhaps of the jaunty malevolence of the comic gentleman, to whom Mr. Dickens has given a new passport to immortality, he consented to become a diplomatist. Upon that rock he split; and the frothy and shallow waves of Vienna are washing over the ruins of a noble ship, which, had it not ventured into such perilous places, so utterly unsuited for it, might yet have defied many a storm, and borne the banner of England to new triumphs in the Parliamentary strife.

We cannot but think, however, that Lord Palmerston is rightly served. He brought upon himself the disgrace which has befallen his Cabinet. Lord John's deplorable failure was caused by Lord Palmerston. The engineer is hoist with his own petard. It was considered, in the slang of the day, to be a very "clever dodge" in the Premier to induce Lord John Russell to go Vienna at a time when his presence in London threatened to be inconvenient, if not dangerous. But the dodge was too clever, and defeated itself. The respite from difficulty was but temporary The negotiator—a man not fit to negotiate;—the sport of the wily, subtle, word-splitting special pleaders of the Vienna Conferences—was fatally entrapped as soon as he opened his mouth at the round-table of Count Buol. It was his special business to look after the honour of his own country; but when he began to prattle of the honour of Russia as of a thing that was to be tenderly dealt with, his opponents saw their advantage, and made the most of it Lord John Russell never recovered from the effects of that stupendous blunder. The defilement of it has stuck to him ever since, and rendered him as a diplomatist the laughing-stock of Europe. It was not, however, until he broke silence in Parliament, and divulged his entire acquiescence in the illusory proposals, under cover of which Austria has slunk from the fulfilment of her solemn engagements, that the eyes of his countrymen and their Allies were opened to behold the full consequences of his imbecility. There is surely something in the atmosphere of Vienna which is fatal to common sense and honesty. M. Drouyn de Lhuys, who caught the contagion of Viennese diplomacy at the same time as Lord John Russell—but whether from Count Buol or Prince Gortschakoff, we cannot tell—was promptly ousted from office by his Imperial master but Lord John escaped for a time the befitting punishment. But, though, under a Constitutional and Parliamentary system the disgrace of an incompetent or misguided Minister is not so sudden as under a despotism or an autocracy, the day of

"ORION" [illegible]

reckoning is certain to come at last. Disgrace has tardily fallen upon Lord John Russell, and will speedily involve his colleagues also, if they do not make particular haste to free themselves from the peril of such companionship.

The questions which the country asks are twofold: will Lord John Russell voluntarily resign office? or will Lord Palmerston compel him to do so? For Lord John Russell's sake, and in grateful remembrance of his past services, it is to be hoped that he will spare himself and his colleagues the pain of a dismissal. Could we imagine as within the bounds of possibility that neither of these events should occur, and that the Ministry should attempt to continue in office, with Lord John Russell as their colleague, it would become the business of Parliament and of the country to put an end to the scandal, and entrust the Government to other hands. How can the war be prosecuted with the vigour necessary to secure an honourable and a durable peace—how can our brave soldiers show their bravery as they wish to do—how can the people have confidence in public men—how can our allies respect us—and how shall our foes fear, as they should be taught to fear us—if we have in the Ministry a high functionary—a once illustrious statesman who is of opinion that we refused to negotiate on a basis that was satisfactory, and that, consequently, the blood we are now shedding in the Crimea is wilfully and wrongfully spilt? It is bad enough to have cravens in council. To have traitors in council is infinitely worse; and traitors those are whatever their name and station—who proclaim to the world that Russia made or accepted sincere and satisfactory overtures for peace, and that England and France rejected them without reason, and made war without justice. Russians and Austrians do and will say so, and take Lord John Russell as their witness; but that such things should be read and debated in the Crimea is a scandal from which there is but one means of purification. If Lord John Russell will not serve his country in this emergency by withdrawing from its councils, Lord Palmerston must find the remedy, or suffer for his wilful participation in the flagrant offence. Lord John Russell has the same liberty to change his opinions that is enjoyed by the humblest of his countrymen; but he has not, and ought not to have, the liberty of sitting in council as a War Minister when he condemns the war and paralyzes the arms of those who are conducting it. He owes his country an atonement. His retirement into private life will be sufficient for the purpose. But perhaps he would like Lord Palmerston to retire with him? On that point it will be for Lord Palmerston to speak.

THE BALTIC FLEET.

In the despatches from Rear-Admiral Dundas, which we give in our other sheet this week, account is given of the destruction of a fort at Rotsenholm, on the Aland Islands, a large block of Government buildings at the back of the island of Rotsher, consisting of barracks fit to contain about 3000 men, stables, storehouses, and hospital. The same despatches give some details relative to the destruction of a number of Government vessels laden with granite

From letters received by the last Baltic mail we learn that the *Amphion*, while on a cruise near Sweaborg, had noticed that considerable trade was being carried on between that port and the east coast. This she endeavoured to stop by going in between the Island of Piniaari and the main; and, while in a position to stop this traffic, she suddenly got into shoal water, and, immediately touched ground. A boat was lowered out in order to sound, in which way she should cast out of danger, when the enemy opened fire upon her from one of the forts, and from three gunboats and two sloops. Steamers which came out of the harbour. She, however, returned fire with such effect that she kept the vessels in the bay, sawed her boat, and blew up a magazine in the battery. She was, however, struck in several parts of her hull and rigging, and also lost one man killed and [illegible] wounded.

On the 19th ult. a boat was observed to come out from Cronstadt with a flag of truce to the *Royal George*. She came as close as possible to the Riskank Battery, and first went to the reserve squadron; but her journey there was only a blind, to enable her to come round the west end of the island instead of coming through the northern channel, which would have been much nearer, but would have shown us the passage through the piles which run across it. She was a very small but beautiful steamer, with enormous paddles. She had on board a Captain in the Russian navy, Aide-de-Camp to the Minister of Marine. He was the bearer of a despatch to the Commander-in-Chief, relating to the disastrous affair at Hango-head, for which they throw the whole blame upon us. He wished to see the Commander in Chief in person, but Admiral Dundas refused to receive any one below the rank of an Admiral; so, having delivered his despatch to Lieut. the Hon. Augustus Hobart, he made his way back to Cronstadt.

On the 11th inst., at an early hour in the morning, the *James Watt* signalled that about 2000 regular troops were marching to the westward along the road from St. Petersburg to Wiborg. They were accompanied by four pieces of artillery. The *James Watt* and *Snap* gun-boat opened fire upon them with shell, and must have done great execution among them. During the day the mortar batteries at Cronstadt and the earth works also at the northern shore were being exercised.

The annexed scene engraved upon the preceding page is from a Sketch by Mr [illegible], and has much of the characteristic vigour of the stirring [illegible].

BOMBARDMENT OF KRASNAJA GORKA

HAMBURG, Wednesday.—A despatch from St Petersburg, of the 6th inst., says that the British ships bombarded Krasnaja Gorka, on the forenoon of the 3rd inst., for five hours. They destroyed the telegraph station and barracks.

MR. HARGREAVES AND THE DISCOVERY OF GOLD IN AUSTRALIA.—It may be recollected that the Legislative Council of Victoria moved and adopted an address to the Governor of that Colony on the 15th of October last, praying that his Excellency would place the sum of ten thousand pounds on the estimates as a grant to Mr. E. H. Hargreave, the discoverer of the auriferous wealth of Australia. The Legislative Council of New South Wales followed a similar step in Mr Hargreaves's case in 1853. We heard nothing more of the transaction, and supposed the Executive Council had been acquiesced in by the Governor; but we learn from the advices and newspapers from Melbourne, received by the *James Watt*, that, in the supplementary amended estimate for 1854, the sum of £5000 is proposed as a gratuity to Mr. Hargreaves. In the same paper it is announced that the Council voted £20,000 to the Patriotic Fund. We certainly think that the spirit of generosity and patriotism would have come with a much better grace had Mr. Hargreaves been first cared for. Doubtless, one of the thirty-one members who carried the address against six will move an amendment, when the £5000 is proposed, that the original sum of £10,000 be awarded to Mr. Hargreaves. England has benefitted to an immense extent by the discovery of Australia, and Australia, we hope, will not be behindhand in what she should do for Mr. Hargreaves—a man who might have made his own private fortune without reference to his country, but who preferred to be patriotic rather than wealthy.

INSPECTION OF WOUNDED SOLDIERS.—On Monday afternoon the Queen inspected the wounded and disabled Guards, recently arrived in this country from the Crimea. The men were mustered in the garden of the Palace, and at three o'clock her Majesty, accompanied by Prince Albert, the King of the Belgians, the Prussian Princes Prince Albert, and the elder children of the Royal family, commenced the inspection. There were present 47 Grenadiers, 28 Coldstreams, and 25 Scots Fusiliers. Colonel Wood and Dr. Brown, Colonel the Hon. St George Upton and Dr. Munro, and Colonel Moncrieff and Dr. Richardson, the commanding officers and surgeon-majors of the three regiments, attended the Queen while her Majesty personally inspected every soldier, inquiring about their different wounds, and receiving the medical report of the state of the cases. The inspection being ended, the Guards were conducted into the Riding-house, where a plentiful dinner was served to them.

THE PECUNIARY EMBARRASSMENT AND effects of Sir John Dean Paul are to be brought to [illegible] summer on the 23rd inst., in consequence of the failure of the bank of which he was a partner.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

IT seems probable that, during the absence of the Empress, the Emperor will visit the Camp at Boulogne. All the officers who were absent from the Camp du Nord have received orders to return to their post. The Camp de Satory is, it appears, to be re established

The arrival and continuance (with the exception of a slight thunderstorm and some showers in the beginning of the week) of fine weather has given the utmost animation to the metropolis, not only among the pleasure-seekers, but to the commercial interests, which were seriously affected by the continuance of the wintry climate which reigned till the end of June. The alarm entertained for the safety of the grain crops has almost entirely given place to hopes of more than usual abundance, though the fate of the vines seems to be unhappily decided in most of the provinces, the mischief being too far advanced to be remedied by any weather, however favourable

The Exposition Universelle is at length pronounced to be complete The fears experienced that the size of the main building would prove insufficient for the products it was to contain seem to have been exaggerated, as there yet remain several empty stalls in the building, which, as the whole is pronounced complete, must necessarily remain vacant. An Imperial decision, suggested by the Prince Napoleon, orders that 1300 men of the garrison of Paris shall, each day, be permitted to visit the Exhibition gratis

Close to the Palais is being established a *chalet*, containing a complete collection of the beasts and birds of Switzerland, stuffed and classed with the utmost care, and arranged in such a way as to represent their habits and modes of life in their native country. This museum has been collected with much labour and expense by M. Challande—a military man, who has already exhibited it with the utmost success in various European capitals

In consequence of the increased price of lodgings, it is reported that a project is being entertained of carrying the limits of Paris as far as the fortifications, and exempting from fresh taxes the whole of the ground and buildings between them and the *barrières* for the space of ten years.

Madame Emilie de Girardin have in the hands of Madame Rose Chéri a comedy entitled "Une Femme qui déteste son Mari." The plot is founded on an incident under the Reign of Terror, in which Madame de Lanjuinais, to save her husband, whom she adored, pretended to wish to divorce him, to marry the Republican officer on whom his safety depended. At the period of her death this celebrated writer was engaged on a most important production, a comedy in verse, "Les Ridicules Pernicieux." The work was tolerably advanced, and great expectations were entertained of its success, expectations doomed to be thus sadly defeated by the event so little generally anticipated.

Mdlle. Rachel, excited, it would seem, to emulation by the successes of Mdme Ristori, and the reappearance of the somewhile Queen of French tragedy, Mdlle. Georges, has set about giving six pairing representations during the fortnight that precedes her departure from France. As may be supposed, these are crowded to excess by a public anxious to see what is *supposed* to be the last of "La Grande;" and places can hardly be had for love or money. For ourselves, having seen her many times, and expecting to have the occasion, if it so pleases us, to see her many times again though we have no intention of going to America for the purpose—we prefer saving our money and escaping the crowd till her next series of last appearances.

A new Belgian tenor, Wicart, of whom great things are said, takes the principal rôle in the *reprise* of the "Juive" at the Grand Opera. Mdlle. Elmire, Belgian also, is are very long to *débuter* there, and Mdme Laborde and M. Belval are to appear in the "Huguenots." Alboni is engaged for three months, and Roger is about to create the principal part in the "Santa Chiara," the new opera of the Prince of Saxe-Coburg. It is reported that there will be no Italian Opera the ensuing winter. It appears that M. Ragani has lost by the two last seasons; and though the Emperor, who takes a strong personal interest in him, as an old soldier of the Emperor, proposes to indemnify him for a part of his expenses, he fears again to enter on the undertaking, unless the theatre can be placed on the footing of the Imperial theatres, which are accorded gratis to the *entrepreneurs*. This, it appears, is against rules, and hence its closing. There is, at this moment, at the Opéra Comique chorist who certainly deserves well of his country. He has, in the army and navy, nine sons fighting in the Crimea.

PORTRAIT OF THE LATE LORD RAGLAN.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

DOCTORS' COMMONS, July 11 1855.

SIR,—In your impression of the 30th ult. there appeared facsimile engravings from portraits of the late Lord Raglan and of Admiral Sir Edmund Lyons, which, by the courtesy of my clients, Messrs. E. Gambart and Co., of Berners-street, you were enabled to present to your readers; and my clients received with the greatest pleasure the handsome acknowledgment of their kindness which you at the same time expressed.

The sketches from which your artist made his engravings were taken by Mr. Armitage, the well-known painter of the Battle of Meanee, now in the Royal Collection, from a full-length portrait recently in the Crimea by Count Roglas and Sir Edmund Lyons. He has for some time past been engaged upon a picture, which he has been commissioned by my clients to paint for them, illustrative of the present momentous siege, and in that picture the portraits above mentioned, together with other of distinguished Commanders of the Allied Forces, also taken from actual sittings on the spot, are intended to be introduced. I need scarcely say that the high reputation of Mr. Armitage, added to the circumstance of his having proceeded to the Crimea for the sole object of obtaining authentic sketches for my clients, will ensure to them a picture which, when exhibited, or otherwise presented to public notice, will not only be highly popular and interesting, but will, they trust, repay them for the great pains and expense which they have already incurred towards its production

It will readily be understood how jealously the rights of my clients in a forthcoming picture like the should be guarded. Certainly to no other newspaper than yours would these sketches have been lent, and for that reason, that, together with the satisfaction which results from your liberal and candid conduction, the frank and handsome way in which you always acknowledge the sources of such contributions preserves the rights of your contributors, and is, therefore, gratifying to them, while its most honourable to you

You will, then, feel with Messrs. Gambart equally mortified and indignant when I inform you that in the fifth number of a new weekly illustrated paper, published on the 7th inst., there appeared a portrait of Lord Raglan, which seems every indication of having been coloursably copied from your impression of the preceding week. There is no other source whence it could have been obtained, for it will not be pretended that, after his departure for the Crimea, Lord Raglan ever sat to any other artist than Mr. Armitage; and I am not aware, nor do I believe, that there exists any portrait of the illustrious General painted at a period sufficiently recent to represent him during that last scene of his life with which henceforth his name and reputation must closely be identified.

The twopenny paper in question contains not one word or acknowledgment of the source of their engraving, and, in spite of some pains which they must seems to have taken to conceal his imitation of yours, I believe that I shall be able to establish it as a piracy of Messrs. Gambart's copyright, and so fix the offending parties with the consequences

In the meantime may I ask you to give insertion to this letter, in order that Messrs. Gambart and Co may not lose their just reputation with the public; and that their picture may not, when it appears, be lessened in its interest by the violation of one of its leading features of authenticity and worth? With every apology for the length of this letter,

I am, Sir, your most obedient servant, W. J BARRETT.

THE Lord Mayor and Lady Mayoress entertained on Saturday evening, in the Egyptian-hall, Mansion-house, a distinguished party to meet the President and members of the Royal Academy.

THE SIEGE OF SEBASTOPOL.

A despatch from General Simpson, stating that the English batteries would open fire on the Redan last Tuesday, has been followed by one from General Pelissier, dated Tuesday, 10th of July, two p.m., in which he says:

The firing has been very brisk during the whole of the day between the English and the great Redan. This evening that work is very silent; consequently our allies will be able to advance their works.

A despatch from General Simpson, dated Crimea, July 11, 4.45 p.m., says —

Our fire yesterday had good effect on the Redan. Cholera is decreasing, and the health of the army is satisfactory.

The suspension of operations since the last assault appears to have been owing to the derangement of the railway; but as that impediment to action has been removed, and as General Simpson makes allusion to the weight of artillery which he will bring into play, we hope that our superiority in this powerful arm may be effectually exerted, and that the blood of our troops may be economised through the agency of our guns. It is satisfactory to observe that in this respect the progress of the allies is steady and decided. We may not, indeed, be able to annihilate the vast earthworks of the enemy with as much certainty as if they were constructions of masonry; but, by the aid of heavy shells pitched vertically into their redoubts, we can so search their defences that no troops can live in them. The works of the opposing armies are now pushed close to each other, the range is known to an inch, and, under such circumstances, the ascendancy in artillery must be nearly equivalent to the ascendancy altogether. It is plain that the Russians see their danger, and that they are exerting all their ingenuity to avert it. In the Mamelon, which is a good specimen of the works to be encountered, there were found funnel-shaped pits, into which shells might roll and burst, together with bomb-proof excavations, into which the men could retire. Although, however, the enemy will no doubt avail themselves of all such expedients with the skill which they have hitherto displayed, the means of attack, under present conditions, must exceed those of defence. The Allies have advanced closer and closer to the works of the place, their artillery has opened on them on successive occasions with greater and greater power, and the Russians, who at first asserted something like an equality in this respect, and long maintained the contest, are now fain to withdraw their guns under our fire, and to confess or pretend themselves silenced. It is scarcely possible, indeed, that the resources of Sebastopol, however vast they may have been, should not be exhausted by exertions so prodigious and so protracted; and, while the Allies are constantly receiving accessions of strength, and improving their communications in all directions, the Russians are becoming more effectually isolated day after day.

NEW FRENCH WORKS.

Our allies have greatly added to the extent of the trenches on the right of the Mamelon. There is now a perfect labyrinth of covered ways and approaches on this side. They have carried them forward considerably in advance of the old Russian approach which was made to connect the Karabelnaia redoubt on the one side with the Selenchinsk redoubt on the other side of the Careening Bay ravine. This approach was carried nearly in a straight line down the Mamelon hill, across the comparatively flat ground between it and the Careening Bay ravine, across the ravine itself, and up the steep ascent to the redoubt on Mount Sapoune. The French have established another parallel beyond this, so far as regards the ground on the west side of the ravine, and have thus gained a considerable advance on that side towards the Careening Port and the great redoubt. In the most forward part of this advanced parallel a powerful battery, spoken of as the Marine Battery, has been constructed. The guns of this work control, in a great degree, the position formerly occupied by the vessels near Careening Bay, and would, in all probability, prevent a recurrence of the fire which the ships were previously able to direct against our allies in their movements on the right flank of the Mamelon Vert, and which told with fatal effect as their columns advanced on that side in the attack against the Malakoff works

Our allies have also been very actively employed in the works on the east side of the Careening ravine. Large working parties are nightly engaged in changing the aspect of the batteries, and adding to the armament in the redoubt nearest the ravine, which, when in the possession of the enemy, we have called the Selenchinsk redoubt. In the daytime the troops contrive to strengthen the parapets thrown up at night. In the second redoubt, that a little further to the east and more in advance, working parties are also employed. The Russians called this the Volhynia Redoubt; the English have named it the work on Mount Sapoune. The cliff on which the parapets are formed, and in contradistinction to the former, or "La Redoubte Blanche," which appears conspicuously white from the débris of the limestone rock of which its face chiefly consists. It is said that two monster 21-inch mortars have arrived for our allies, each requiring a fabulous amount of powder to project a shell so enormously heavy that it has to be lifted into the gun by a mechanical contrivance, and that those mortars are to be brought up to Mount Sapoune, and to be used against the works in front of the redoubt. No guns have been placed in the small 5-gun battery placed across the ridge near the extremity of the spur over the Careening Port On the projecting point of cliff, almost immediately opposite, on the north side of the ravine, just where the Russians called the Cossack Bay of Inkerman commences, is one of the enemy's batteries, which has been greatly strengthened of late. The battery is in a line with the cliff, and close to its verge. This work now mounts twelve guns of heavy calibre. Their line of fire is directed against the works on Mount Sapoune. The cliff on which the 12-gun battery is placed has considerably the advantage in elevation over the extreme spur to the east of Careening Port, the nearest point under its fire: and the 5-gun work, though it could be employed by the Russians, is not available, therefore, for French and Careening. It is, however, occupied by a small body of sharpshooters. A frequent fire is kept up by the guns of the 12 gun battery before named against the French working parties in the Mount Sapoune redoubts.

In a despatch dated Sunday, July 8, 3 p.m., General Pelissier says —I have nothing new to announce to you to-day. The works on the batteries at Careenage bay are being pushed forward in spite of a very brisk fire from the enemy. Every one exerts himself with all his energy.

THE REMAINS OF THE RUSSIAN BLACK SEA FLEET.

The large advanced battery in our right attack, destined to act against the shipping, has made great progress; and a second battery, within the same depth, has been commenced in another part of the works.

The Russian line-of-battle ships and other vessels are still moored in that part of the roadstead which is enclosed between a line drawn nearly northwest from the west side of the South Harbour, and another imaginary line commencing half way between Fort Paul and Careening Bay, and finishing on the opposite side, in Hollsudin Bay. The limit on the west side of the south Harbour is not an imaginary one, however; it is formed by a line of sunken vessels, or whatever may be the nature of the obstruction, stretching from before Fort Nicholas towards Severnaia. The ships would have to force through this obstruction to get into Artillery Bay. The two three-deckers and the two-decakers are still moored broadside on to the Karabelnaia, and resist a threatening menace against the Redan and Malakoff works. The vessels of less pretension are chiefly congregated on the north side of the roadstead.

A letter from Odessa of the 26th, in the *Frendem Blatt* of Vienna, says:—General Chrulef, who is charged with the defence of the Karantaias, has removed the best guns from the North Fort and from the batteries of the Great and Little Redan, and also those of the Malakoff Tower, which, with the Beaten No. 2, forms a crown-work, called Fort Mornlof. These guns are replaced in the Northern forts by guns which have recently arrived: for out of 2300 guns with which Sebastopol was armed at first there only remain 1400 fit for service

AMERICA.

The mail steam-ship *Atlantic*, which left New York on the 27th ult., arrived at Liverpool on Sunday last. The work for the next Presidential election has seriously commenced between the three parties who were anxious for the succession. The champion of the American party is George Law, of New York; the Seward Coalition party, W. H. Seward, of New York; the Democratic party, Henry A. Wise, of Virginia

The Know Nothings of Baltimore, Washington, and Easton, Pa., had held large and enthusiastic meetings, and had adopted the Philadelphia platform. Notice had been given in the lower branch of the New Hampshire Legislature of an intention to introduce a Personal Liberty Bill. The *Herald* promises it will be identical with the one at present nullifying the Fugitive Slave Law passed by the Legislature of Massachusetts at its last session. The vote of all the counties on the Prohibitory Liquor Law of Illinois had been received, and showed a majority against the law of 14,000 votes. At an anti Maine Law meeting at Albany, there had been a fair attendance of delegates from various parts of the States. Resolutions appointing a State Central Committee, and directing it to make a thorough canvass of the State, with power to call a Convention, if circumstances should justify such a course, were adopted.

MRS. BRUSSELS, HOUSEKEEPER IN LONDON, TO MRS. JUKES, STILL-ROOM MAID IN THE COUNTRY.

JULY 8, 1855.

DEAR JUKES,—O my gracious, the fright we have had!
I'd not the least notion the world was so bad;
You may see by this scrawl how my nerves have been shaken,
For our man-cook declares we've but just saved our bacon.
John Thomas, first footman, too, owns, with a shiver,
That his calves, like two jellies, are all of a quiver.
There's been a *Hi-mute*—who he is I don't know,
But he's managed to kick up a [illegible] row.
You have seen in the papers I sent you last Monday,
The unwash'd resolved to be shaved on a Sunday.
And our butler declares it is just as he feared,
They've taken the whole House of Lords by the beard.
They've triumph'd! Imagine my feelings, dear Jukes,
Who never lived anywhere [illegible] Dukes.
And to-day such a scene! You are lucky, that's all,
That your rheumatic kept you at home at the Hill.
But just as I'd sat down to tea in the Museum
(My lady's own maid), our Jo[illegible]n;
His face was so white that I [illegible]
I thought he had powder'd his [illegible] hair
"They're coming!" he cried. "Who's coming?" says I.
"The vile *kennel*," says he, "for I saw them close by.
They're all rags and jags, and a [illegible]
Aristocracy's doom'd, and it's all up with us."
O, had you beheld, Jukes, that terrified look;
Those models of calves, as in terror they shook;
The pomatum dissolve, and his hair, sv'ry lock,
Like a clothes-brush grow stiff, you'd have swoon'd with the shock!

The *kennel* did come, and Jo[illegible]
You can't fancy a ragpicker, d[illegible]
Smash! crash! went our [illegible]
Not a house was untouched [illegible]
O Jukes! whilst I write for my order I [illegible]
To repel the invaders not one;
There are stalwart forms—from the pantries [illegible]
No "uniform" shows to encounter the rout;
Not one lusty voice calls out "[illegible]"
But the rabble are left to do just as they please.
O Jukes! but my feelings o'erpower my pen
O Jukes! Why on earth wasn't you and I men?
If a army of amazins was, they should see
What a dashing white sergeant they'd make of C. B.

THE CASE OF STRAHAN, PAUL, AND BATES

The defendant[illegible] Bow street on Wednesday, Mr Bodkin stated that, notwithstanding the fact that all diligence had been used since the last examination in carrying out the business on the part of the prosecution, he was sorry to say that he could not carry the case a great deal further at present, chiefly in consequence of its [illegible]ment made by Mr. Strahan, together into [illegible] and that the securities deposited by Sir J. P[illegible]de of Overand and Gurney were not the property of D[illegible]xecutor in this case. It consequently had [illegible]ed into the hands of the prosecutor's solicitors, and that the production [illegible] was necessary to consult Mr. Bell, the [illegible] would be considered it becoming in him, although a public servant, to [illegible] the furtherance of public justice—to refuse [illegible] bankruptcy in his possession. Mr. Bell's [illegible] their disapproval of this co[illegible] assistance; and for this purpose [illegible] Exchange-buildings. The document produced [illegible] said by me for Strahan and Co. (£20[illegible] dated Feb. 2, 1850. Could not say for whom [illegible] purchased by Strahan and Co. Also produced a book [illegible] Dutch Stock (30,000 florins), dated February 27, 1854, which were also bought by direction of the house of Strahan and Co. The books in which the memoranda were originally entered relating to these purchases had been all returned to the bank. On reference to his books he found that on the 20th of June last there were £20,000 Dutch Bonds purchased for Strahan and Co. and in July, 1854, another purchase of £10,600 Dutch Stock, also for Strahan and Co. In March last, or thereabouts, some securities [illegible] were brought by way of loan, but he had not brought his books relating to these negotiations, the subpœna having made no reference to that subject. The paper handed to him now by the counsel for the prosecution was prepared in witness's office, and might enable him to speak as to the date of some of their negotiations. The first is dated 16th May, 1854, and relates to Dutch Stock of £5000 value, upon which 2½ per cent was allowed [illegible]

Mr. Ballantine here objected to the examination of the witness in this inquiry, as Mr. [illegible] seemed to have mistaken the functions of a Criminal Court. He used this Court, not for the purpose of prosecuting a particular charge against his client, but with the view of finding out whether there was really any charge at all. The definite question before the magistrate was, whether they had improperly handled the securities of Dr. Griffith? His learned friend had admitted that he had now no information upon this point, and he was actually trying to get some out of the witness as they came up.

Mr. Bodkin hoped his friend would bear in mind that the difficulty had been caused by his own client, who had misled the prosecution. What was he to do?

Mr. Ballantine protested against the assertion that either of his clients had made false statements in reference to their unfortunate affairs. The additional obloquy was most unjustly sought to be cast upon them further to prejudice their case.

Mr. Jardine said the course pursued by Mr. Bodkin must be adopted under the circumstances. Firstly, to ask what securities were placed with the witness, and then afterwards to ascertain if they were Dr. Griffith's.

Mr Ballantine [illegible] of evidence should be adhered to, this being a criminal charge [illegible]

Mr. Jardine suggested the propriety of the case being again remanded at once. No doubt the witness would give the prosecutor all the assistance elsewhere that might be necessary.

Mr G. Barnard, stock broker, of 69, Lombard street, stated that he had several deposits of stock at the beginning of last year from Strahan and Co., but no Danish or Dutch. His books were entirely accessible to the solicitor for the prosecution.

Mr Bodkin said he were [illegible] detain him Mr. Humphries, the solicitor for the prosecution, would see him.

Mr. Ballantine said he did not propose, on the part of Sir John Dean Paul and Mr. Strahan, to offer any opposition to a full inquiry. The defendants were charged with [illegible] disposing of certain securities; and to prove the case had been made out against them, for the securities in the hands of Overend, Gurney, and Co. did not turn out to be the same ones as Dr. Griffith deposited. Under these circumstances, therefore, he trusted that the magistrate would not think he was asking too much when he applied that the two defendants for whom he appeared might be admitted to bail. An investigation of such a length as this was likely to be, and, with so very little against the persons under charge, ought to be carried on with those parties at liberty. Investigations of this kind were found to be carried on according to certain principles, and to keep the case [illegible] any longer would be a violation of those principles.

Mr. Parry made a still [illegible] on behalf of Mr. Bates, his client; but Mr. Jardine [illegible] no announcement time consumed in the inquiry at present, and therefore he should not entertain the question of bail—at least on the present examination.

The prisoners were then remanded for another week.

EMIGRATION FROM LIVERPOOL. The total number of emigrants who have sailed hence for all foreign ports during the three months ended June 30 was 45,880, against 54,398 in the corresponding quarter of 1854. The decrease is not confined to any particular branch of the emigration trade.

AGRICULTURAL STATISTICS.

THE value of agricultural statistics has only received of late years its due appreciation from the Government of this country. In 1836 Mr. Porter expressed his regret that, while we were rich in the possession of facts connected with many branches of social economy, we were almost wholly uninformed with regard to the productions of the soil. "The knowledge we have on that most important subject," he observes, "the quantity of land in cultivation within the kingdom, is entirely due to the industry of an individual whose estimates have never been either confirmed or questioned. What proportion of the cultivated land is applied to the production of any one article of food it has never been attempted to ascertain. We know every rood that is employed for the cultivation of hops, because of the direct financial interest which the Government has in ascertaining the fact: but it does not appear to be sufficiently understood how the national interest can be concerned in any kind of knowledge that does not yield money to the Exchequer."

The United States have long been free from this reproach. They collect annually complete returns of their agricultural productions, and return the number of bushels of wheat, rye, Indian corn, barley, buckwheat, peas, beans, and potatoes; nor does the enumeration stop with those articles. There is an equally faithful record of pounds of rice, tobacco, wool, flax, and maple sugar, and an exact register of bales of cotton.

The French Board of Agriculture is almost equally diligent in recording the annual results of rural industry; and a similar system is adopted in Belgium, Prussia, and Lombardy. Even Russia has shown a laudable spirit of inquiry in this direction, as is manifested in the work of Koregarten, and the more recent publication of Tengoborski. Dilatory, however, as England has been in the collection of agricultural statistics, it is only an act of bare justice to the memory of the late Sir John Sinclair to state that, towards the close of last century, he instituted some most useful researches into the rural economy of Scotland, in which he was assisted by the clergy, who prepared the account of their respective parishes—the record of which was known under the name of the "Statistical Account of Scotland." It is worthy of remark, because many English farmers refuse to give any information, from some vague fear of injuring themselves, that in every parish in Scotland great improvements have been effected, and no damage whatever has resulted from what has been ignorantly denounced as an "inquisitorial system."

During the late administration of the Earl of Aberdeen it was decided that a register of agricultural statistics should be annually prepared, and the execution of the task was entrusted, in 1853, to the Poor-law Board, whose first Report is now before us. In a letter addressed to Viscount Courtenay by the office of "Committee of Privy Council of Trade," it is said their Lordships "feel assured, from the experiments already made that there is no department of the State so well calculated to bring this further important experiment to a successful issue as the Poor-law Board;" and their Lordships add that they "presume, on the present occasion, the agency of the Boards of Guardians, and their officers would be again employed, under the superintendence of the Poor-law Inspectors." This confident hope has been disappointed, for, though some valuable information has been obtained, the general results are unsatisfactory. The returns embraced in the Report extend over nine districts comprising twelve counties; and seven of the nine inspectors avow that the machinery employed is objectionable, on various grounds. Before we enter on details it is right to observe that, on the very face of the Report, a glaringly false statement is emblazoned, nor can we imagine why it was perpetrated, unless, indeed, deception is one of the inflexible rules of red tape. On the cover are these words:—"Presented to both Houses of Parliament by command of her Majesty, 11th August, 1854." The fact is that the earliest of these Reports is dated in January, 1855—that for Berkshire, on the 20th March; that for Salop and Denbigh, on the 30th March; and that for Worcestershire and Brecknockshire, on the 27th April.

The failure in this experiment consists in its being very imperfect—many farmers refusing to give any returns, for which the obvious and only remedy is compulsion. Mr. Hawley, the Inspector for Hampshire and Wiltshire, has stated, under the following heads, the causes of hostility:—1. The inquisitorial nature of the proceedings for obtaining returns; 2. The impossibility of carrying out a measure of such importance with any prospect of success under the voluntary system; 3. Unfitness of the machinery of Boards of Guardians for conducting the proceedings: their interference with the ordinary business of the boards; 4. The ill-feeling created in the minds of the ratepayers against the guardians and their officers; 5. Distraction of the relieving officers, in the capacity of enumerators, from their general duties, and particularly those which have reference to the relief of the poor; 6. Inadequacy of the remuneration made to the officers for their services. The whole machinery is thus condemned. Economy does not consist in giving little money for much labour, for, in such a view, the work must be done by incompetent functionaries, whose services are dear at any price; but a wise economy looks to the end sought to be accomplished rather than to the remuneration awarded, and that end is accuracy and copiousness combined. Now what did the Poor-law Board consider as a fitting compensation? Just ten shillings for one hundred schedules to the classifiers, and forty shillings for one hundred schedules to the enumerators!

The gross total of the statute acres in the districts comprised in this Report is 7,743,856; the quantity under tillage and fallow is 2,581,312 acres; under grass, 3,196,996 acres. In the aggregate of acres in houses, gardens, roads, fences, waste, woodland plantation, and in holdings of less than two acres, is 2,006,442. The total number of schedules issued was 118,237 of which 93,117 were filled up by occupiers, 17,042 by the enumerators; and of 8128 no information was received. There is also a return of live stock, distinguishing different animals in separate columns, which we omit, preferring to give an approximative enumeration of the whole throughout England and Wales. It appears from the last Census that there are in England and Wales 37,324,615 acres. The subjoined estimate is based on the ascertained returns obtained from the twelve counties comprised in the Report, in an ordinary rule of proportion, or, as the 7,743,860 acres examined bear a relation to the 37,324,615 acres which include the whole area:—

	Acres.
Wheat	3,307,346
Barley	3,967,776
Oats	1,323,732
Rye	73,731
Beans and peas	696,128
Vetches	215,551
Turnips	2,267,200
Mangold	177,263
Carrot	12,638
Potatoes	192,287
Flax	10,166
Hops	18,976
Osiers	1,079
Other crops, such as cabbages, &c. ...	97,354
Bare fallow	895,989
Total under tillage	12,447,776
UNDER GRASS.	
Artificial grasses...	2,230,666
Permanent pasture	8,374,946
Irrigated meadows	1,292,329
Sheepwalks	2,224,962
Total under grass	15,312,203
Houses, gardens, roads ...	976,197
Waste	736,658
Wood and plantation	1,597,563
Commons	1,937,164
Holdings of less than two acres ...	459,447
Not accounted for	3,314,198
Total area	9,569,936 37,324,915

LIVE STOCK.

Horses	1,060,841
Colts	287,479
Milch cows	1,476,703
Calves	707,192
Other cattle, including working oxen ...	1,320,270
Tups	214,106
Ewes	7,229,815
Lambs	6,987,382
Other sheep	4,180,055
Swine	2,383,724

We have already stated that this aggregate estimate is only approximative to correctness, for it assumes that the fertility of the soil all over England and Wales is of the same average quality as that of the twelve counties that have been tested. Perfect accuracy can only be obtained after careful survey of each county separately. However, what is here stated gives a rough view of the importance of agricultural statistics, the object of which is to show, from year to year, the amount of food on which the country may depend from its own resources, irrespective of foreign supplies. This knowledge, circulated through the newspapers, will always prevent panics propagated by speculators in the markets: and when a real deficit appears in years of failing crops, timely notice will be given of danger, so that evil may be averted by foresight. Our merchants and manufacturers are always vigilant in ascertaining the state of the cotton crop in the United States, and the system here recommended will make us equally watchful in regard to the produce of vegetable and animal food. Lord Stanley, President of the Board of Trade, is preparing measures which, we hope, may be wiser than those of the Poor-law Board, and they may be expected to be brought into operation at an early period of the ensuing year.

There is some information in the Report relating to Ireland which is too interesting to be omitted, as illustrative of the utility of agricultural statistics. In that country the total value of stock, in 1849, was 25 millions sterling; in 1850, 26 millions; in 1851, 27 millions, in 1852, 29 millions; and in 1853, 31 millions. The returns for 1853 show the increase over 1852 to be—of the total increase of horses, 14,687; of cattle, 248,242; of sheep, 328,713; of pigs, 72,287; of goats, 17,738; and of poultry, 484,194. These returns are collected by the Irish Constabulary. These are the statements which silence demagogues and preserve order, and demonstrate the conservative character of knowledge, which silly rulers have so long desired to suppress.

DESTRUCTION OF RUSSIAN STORES AT TAGANROG.

THE fate of an army and the [illegible]ntenance of a struggle like that which is going on [illegible] Sebastopol [illegible] but imperfectly known or comprehended by the [illegible] of the Russian nation; but the destruction of the Imperial magazines at such [illegible]s as Taganrog, Berdiansk, and Marioupol will be known to every trader who [illegible] the fairs of Nishni Novogorod: it will spread the terror of [illegible] British navy beyond the confines of Europe, and it will show the [illegible] of Russia that, even in the inland waters of the sea of Azoff, the Imperial Government has not the means of saving its own property from destruction. It is evident, from the scanty array of troops on the [illegible]s, and the total want of adequate defence, that the available resources of the empire have been thrown upon the northern and western frontiers; for, while the shores of the Baltic are bristling with troops and fortifications, the towns on the Sea of Azoff were deliberately left to their fate. The attack on Taganrog was made by the gun-boats and boats of the squadron, for the roads are so shallow that ships even of moderate draught cannot approach within several miles of the shore. The town [illegible] preliminary, overlooking the coast of the Sea of Azoff to the mouth of the Don, and crowned by a citadel on the heights.

The following letter from a private Correspondent on board the *Strombolt* gives an interesting account of the affair:—

At Taganrog the garrison were summoned to surrender up all Government stores, and the town would be spared, but they refused. The gun-boats (Line-of-battle ship's launches), English and French, formed line, and the signal to advance was made from the *Recruit*. They began to near the shore, when this vessel opened fire on the Government store-houses to the left. After a few rounds was seen to issue from the different windows. She then directed her fire on the town to the left. The *Danube* fired rockets in quick succession, and succeeded in firing nine buildings, and did much execution. Among the English launches were several rocket-boats; these, also, kept up a sharp fire, and it was not long before no less than five had broken out. Captain Coles, of the *Stromboli*, commanded the boat expedition. This officer succeeded in making a raft for a 32-pounder. It took up its position between the French and English boats, and seventy-eight rounds were fired from it, and yet it remained as strong as ever. There was an ingenious contrivance for carrying a heavy gun in boat practice here, which fully succeeded. A number of hammocks were placed at the bottom of the boats, making a nice soft bed. A gun-tackle and gun was placed with great attention. A number of rounds were fired from this boat. The Russians took up their position in the church over the store-houses, and kept up a sharp fire of musketry, to which our riflemen (Marine Artillery and blue-jackets) replied briskly. One Russian displayed great courage, shewing himself each time when about to fire, and taking deliberate aim amid a shower of Minié balls and larger shot. Every one tried to hit him, but he appeared regularly after loading, and disappeared after firing. There were but one Marine Artillerym wounded in the jaw, but no other accident occurred. We burnt some ships near the mouth of the Don, and took two Greek vessels we found here down with us. The scene at night was glorious on one side Taganrog in flames—on the other, ships burning, their masts falling with a crash, sending thousands of sparks into the air.

Taganrog appears a beautiful place, and contains about 20,000 inhabitants, I believe. These we saw leaving in large bodies when we arrived. They say that there were no less than a thousand troops here, but I do not believe it.

The Illustration engraved upon the next page is from a Sketch by Lieutenant F. A. Foster, of the Royal Marine Artillery.

THE RUSSIAN FLEET AT CRONSTADT.

THE Allied fleet now extends from the London Shoals to the Tolbuckin Light, hence far along the northern shore to the town of Cronstadt, and still the cry is "they come"—liner and block ship, screw frigate and paddle, gun boat and mortar-vessel: and now or never is the time that something must be attempted. Not that we are likely to go in and attack the forts, whatever might have been done last year. The difficulties are now very great, if not insurmountable. A range of submarine pilling runs in one unbroken line from Lisi Ness to a point where the town is out of range. From this same Lisi Ness to the Man-of-War Harbour a large portion of the Russian fleet lies moored. It consists of several line-of-battle ships, frigates, and corvettes; these are backed by a goodly number of gun boats, and, singular to say, twenty of them are propelled by steam power. It is said the locomotives were taken off the railway for this purpose; but the factory at Cronstadt, under the direction of an Englishman named Baird, is fast making many more.

On the northern shore the most elaborate earthworks, now green with the vegetation of spring, protect it from any light attack in that direction; these have been constructed since last year. In the regular channel above Risbank their best ships are lying ready for sea, with their ensigns and jacks blended with the flags of Cronstadt and Risbank. These, one by one, are so placed as to command the channel. On a fine day the whole is not a bad panorama. On either side of you stretches the dark yellow waters from the Neva, the shores now verdant with spring and the stately pine, and dotted with many beautiful villas as far as the eye can reach. In the distance the magnificent dome of St. Isaac's, and the gilded spires of the churches of St. Petersburg, may be seen clear against the faint blue sky, with the white sails of the Russian men-of-war boats gliding across them at intervals. Altogether the scene is a singular one. Here is an immense force, with the naval resources of three nations, in close proximity; and still so equally has the game been played that neither side has fired a shot.

But the forts are the most magnificent objects in the picture. There they stand, the very personification of solidity, with portholes and guns frowning tier above tier; and so well are they kept in repair, in defiance of the frosts, that they look from this distance as if fresh from the builders' hands. The neatness in fortification appears to be quite a rage with them. Everything is arranged to catch the eye. But there must be a great deal for the Russians both at Cronstadt and Sebastopol, and they have taken every advantage of what she has given them as a foundation for works of defence.

The French steam-corvette *Aigle*, having in tow two sailing mortar-vessels, arrived at Kiel on the 6th inst., where the steam-corvettes *Tonnere* and *Pelican*, four mortar-vessels, and two gun-boats were lying at anchor. All those vessels were taking in six weeks' provisions and coal, and would soon be ready to join Rear-Admiral Penaud's squadron in the Baltic. Several other French war-vessels and gun boats were expected at Kiel, on their way to Cronstadt.

The Illustration engraved upon the next page is from a Sketch taken by Mr. Carmichael, from the paddle-box of H.M. steam-vessel the *Merlin*.

BOMBARDMENT OF TAGANROG.—(SEE PRECEDING PAGE.)

THE RUSSIAN NAVY AT CRONSTADT.—SKETCHED FROM THE PADDLE-BOX OF H.M.S. "MERLIN."—(SEE PRECEDING PAGE.)

THE TCHERNAYA IN THE CRIMEA. (SEE NEXT PAGE.)

THE TCHERNAYA VALLEY.

OUR Artist, in one of his recent excursions from Baltaclava, sketched the accompanying View of the Tchernaya (Black River), at the point where it is fordable, and where a temporary wooden bridge has lately been thrown across the stream. It is guarded by a picket of Bersagliori (Sardinian sharpeshooters), and a picket of French Dragoons; a sentry is seen on horseback, wearing a white cover over his helmet. On both sides of the river are soldiers bathing, washing, &c.; horsemen fording the river; artillery waggons on the opposite side.

The vegetation of the country is of extreme picturesqueness and beauty. Mr Scott, in his recently published volume, describes the trees covered with bunches of that parasitic plant, mistletoe. "Lofty mountains guarded as delicious a valley as ever sparkling stream ran murmuring through, to form the bathing-place of Naiades. A thousand cool and luxurious retreats under the shade of impenetrable foliage were there, and varied plants and sweet-scented flowers."

CALENDAR FOR THE WEEK

SUNDAY, July 15.—6th Sunday after Trinity
MONDAY, 16.—Sir Joshua Reynolds born, 1723.
TUESDAY, 17.—Dr. Watts born, 1674
WEDNESDAY, 18.—Petrarch died, 1374. Hampden killed, 1643
THURSDAY, 19.—
FRIDAY, 20.—St. Margaret.
SATURDAY, 21.—Union of England and Scotland, 1706

TIMES OF HIGH WATER AT LONDON-BRIDGE,

FOR THE WEEK ENDING JULY 21, 1855.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday.	Saturday

Next week will be ready, bound in cloth, gilt,

THE ILLUSTRATED LONDON NEWS,

VOL. XXVI.—from JANUARY to JUNE, 1855—

Containing upwards of 600 SPLENDID ENGRAVINGS; including a large Number of Scenes of the War, from Original Sketches, by the Artists of this Journal, at the seat of operations, as well as by Naval and Military Correspondents.—Office, 198, Strand.

Covers for binding the Volumes are likewise ready.

*** For a List of Engravings in this Volume, see the back of the Title-page in the present sheet.

THE ILLUSTRATED LONDON NEWS

Publishes a Stamped Edition. The stamp must be folded outside; and this will frank the paper throughout the United Kingdom for fifteen days. Should any difficulty be found in procuring the stamped edition, it will be forwarded on application direct from the Office.

The Unstamped Edition cannot be forwarded by post except on the terms of the Treasury Minute for the Conveyance of Books and Printed Matter.

Both Editions contain Two Large Sheets every week. Unstamped, Fivepence; Stamped, Sixpence. Arrangements are in progress to stamp the ILLUSTRATED LONDON NEWS for the future invariably on the top of the front page.

TO ADVERTISERS.—All Advertisements must be sent direct to the Office, 198, Strand. No connection with any person or persons as Agents.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 14, 1855.

We have received the list of the fallen heroes of the Crimea in the late attacks on the Malakoff and the Redan; and any moment may bring tidings that their deaths are being signally avenged. General Simpson's last announcement was, that on the 10th inst. (last Tuesday) he intended to open a heavy fire on the Redan. The businesslike, determined, phraseology of the intimation has been noticed with a certain grim satisfaction. Our cool Scotch General is going about his work with that deliberate earnestness which is the best omen of success. The electric telegraph has since informed us that he has kept his word, and silenced the Russian batteries.

The melancholy list has by this time made its way to the humble households of the rank and file engaged on the day of "Raglan's last fight." The number of deaths, though happily much smaller than was at first supposed, is large enough to cause many a widely-extended circle of sorrow; and the long roll-call of those who could answer to their names, though from the bed of anguish, will have carried grief to thousands. Unhappily, too, the significant word "severely" occurs with sad frequency in this record; and, although God forbid it should be a hopeless word (even with all the disadvantages to which the British soldier is still subjected in the hour of his suffering), it is impossible but that a large proportion of the wounded cases should terminate unfavourably. The register of "Casualties" which was published on Tuesday probably began to do its work of affliction just as the English batteries were commencing the work of vengeance, but few of the bereaved among us, to use Campbell's words,

In Glory's fires can dry their tears.

The language of our Sovereign's message to the Army—the expression of grief that the struggle of the 18th had not been successful; and the assurance that the Queen felt the most entire confidence in her troops—nobly contrasts with the bombastic falsehoods of the address of Prince Gortschakoff, who describes that attack as one made by enemies driven to despair—who would soon be utterly crushed by those who had sworn to render up to their Emperor "our Sebastopol" intact. Perhaps already Queen Victoria's confidence has been more than vindicated; but, be that as it may, the issue cannot be long delayed; and "our Sebastopol"—in other words, the plunder which Russia has held for something under a century—will shortly be in the hands of the "despairing" enemy.

A despatch stated to have been received from General Pelissier, announcing a tremendous sortie by the Russians, and an attack upon the Mamelon Vert, followed by the repulse of the assailants with great slaughter, and but little loss on the part of the Allies, was promulgated in Paris early in the week, but, being unaccompanied with any confirmation, or by any official intimation from our own War-office to a similar effect, it did not receive much acceptation. A curious explanation, evidently in its present state incomplete, has been given, and we are told of a misconception, by General Pelissier, of a movement by the enemy; but even if this were probable in the case of a veteran commander, he would scarcely risk an account, by anticipation, of the result of the affair. That the Allies have been harassed from time to time by every operation, real or pretended, by which the besieged could delay the fatal preparations for the final assault is, however, nearly certain; and it is by no means unlikely that the French have had to undergo a series of alarms and to provide against demonstrations of menace which any inaction on their part would at once have changed into actual onslaught.

There is one consideration connected with the death of the late Commander-in-Chief in the Crimea to which less attention has been given than may be desirable. It must not be forgotten that the army of England before Sebastopol is a small one, while that of France is, both actually and comparatively, large. *Ceteris paribus*, this fact would naturally entitle the French General to assume a position of leadership, which, however rational in itself, might not be so flattering to the feelings of his allies, as more apparent equality of directing power. While Lord Raglan lived, his rank, his reputation as a soldier, and as the friend of the Great Duke, and, still more, his admirable tact preserved that equality, or, at all events, appeared to do so; added to which, he had to deal with two colleagues who would not be inclined unduly to assert their independence. Marshal St. Arnaud, as gallant a soldier as ever lived, was well aware that his fortunate antecedents scarcely entitled him to represent France in a grand war; and General Canrobert is a man of somewhat of Lord Raglan's own character, and with him the departed nobleman could have no serious difference. But General Pelissier is not only a man of solid military reputation, but is also possessed of an energetic, perhaps dictatorial, spirit. While he assumes the command of the great French army, there succeeds to the head of the small English force a General whose skill and gallantry are known but to a small number of his countrymen, though at this moment they may have been suddenly and brilliantly illustrated—a man, in fact, who has to make a European reputation, and has no accidental advantages as stepping-stones to it. These facts being duly considered, it will, or should, occasion no surprise if, for the purposes of the present campaign, France should assume the virtual leadership; nor, should this be the case, ought the predominance of the military nation to excite the jealousy of a non-military people. The immense stake which France has invested in the game of war gives her a right to dictate much of the play; and, although in the small but glorious army of England she has brought an invaluable increase to the common stock, it can scarcely be an unwise policy in her to unite cordially in *le grand jeu*. At the same time, of course, her own interests are too solemn to permit the slightest advance blindfold, or the slightest undue acquiescence in the plans of her ally; and therefore, from what we can learn of the character of the brave and wise man who has succeeded to Lord Raglan's command, we have reason to believe, as well as to hope, that he will combine the most complete independence, and right of private judgment, with a well-judged policy of co-operation. This is no light matter, because, almost omnipotent as England is upon the ocean, her Army is by no means in so formidable a position; and any real difference or breach between the Generals might lead to consequences upon which it is not now necessary to dilate, inasmuch as there is not the least reason to apprehend their occurring.

There is one counteracting influence which, though it does not affect the possible assertion of leadership by France, materially affects the position of her General—and that is to be found in the circumstance that the Emperor of the French exercises no unfelt authority over the military operations in the Crimea. We give no ear to the *cavards* manufactured in the *salons* of discontented Parisians, as to any impatience having been manifested in the Crimea at the continuous superintendence of the Tuileries, because to suppose that the Emperor had given cause for such feelings would be to deny him his justly-earned character for real and practical wisdom. But that his counsels are transmitted, and that they sometimes take a more stringent form than that of mere counsel, there is no doubt; and it is also far from improbable that the Emperor, weighing the relations of which we have spoken, may have desired that the interposition of his own superior authority should deprive his General's acts of any peremptory character, and thus effectually remove, from the present crisis at least, any perturbing element. For the moment, we may say, in conclusion, all is hopeful, and before these lines meet the reader's eye, he may be able to sum up the position of affairs in a yet more satisfactory phrase.

THERE was a time when it was the privilege and pleasure of Englishmen to assemble in public and freely express their opinions on the state of the Government and the nation. The practice was in the highest degree wholesome. It strengthened the principle of liberty, and encouraged the growth of a manly and independent spirit in all classes. The interest felt by the people in all that related to the action of the Government prevented the public mind from lapsing into that unhappy stagnation which is the sure precursor of national decay and degradation. But lately this practice has been discontinued. For the last ten years there has not been held in London a great public meeting that can by any stretch of courtesy be termed a free one. The Anti-Corn-law League set the example of excluding from their monster assemblages all who were not provided with tickets; being no doubt driven to adopt this course to save themselves from the unreasonable interruptions systematically caused by a wrong-headed section of the working classes, which pertinaciously refused to accept of cheap bread unless the boon were accompanied by what they called the "points" of the "People's Charter." The Administrative Reform Association has adopted the same principle, without the same necessity; and the consequence is that no one can speak at its meetings who is not pledged to agree in all particulars with the objects sought by the Association, and who has not purchased the right to a ticket of admission by an annual guinea or a still larger sum. The consequences are that the speakers at such meetings discourse *ex cathedrâ*, as much as a clergyman in his pulpit, and run as little risk as he does of eliciting a reply. This is a state of things which is by no means conducive to the growth of a healthy public sentiment. It was not in th is manner that the civil and religious liberties of Englishmen were won and preserved; and it is not in this manner that the salutary control of public opinion can be exercised. Statesmen and legislators have it in their power to do much mischief, if the light of public opinion is withheld from their proceedings. The press is not a sufficient guardian of the national safety. It does its duty manfully; but it is not able, if unsupported by the people, publicly and freely assembled, to keep the Government, and above all the Parliament, to the straight line of patriotism and honesty. The oral is better than the written or printed word, and more potent in reaching the hearts and intellects of the great bulk of the people. It must have struck political observers that there has recently been an amount of apathy in the public mind on all great national questions, never before seen in this country, and which has told with most pernicious effect upon the character and proceedings of Parliament. Of late times, and especially since the repeal of the Corn Laws, the popular branch of the Legislature, if it has ever aroused the public from this apathy, has done so only to excite the far more dangerous sentiment of dissatisfaction. Its parties, or, more properly speaking, its rotten remnants of the parties which were broken up by the famous secession of the late Sir Robert Peel from the cause which he had so long maintained, and from the men with whom he had so long acted, have carried on mean squabbles from day to day, and from session to session, till public confidence in public men has been widely shaken. When the people look around them for a man fit to lead them at this epoch or for a body of men capable of expressing their sentiments, and of organising the national opinion, so as to bear with healthy stimulus upon the whole current of our legislation—they look in vain. At last, however, a movement has been made, which, if it have no other immediate result, will at least restore the old English practice of open public assemblages, where any man who has anything to say may freely say it, subject to no other control or interference than that by which all public assemblages must be regulated, if order and decorum are to be observed. The meeting of the "State Reform Association," which was held on Wednesday evening in Freemasons' Hall, and on the ulterior objects of which we are not sufficiently informed to pass any opinion, has the merit of setting a good example. We trust that, from the discussions which it has inaugurated, something like a sound public opinion will be formed and directed. The country requires men at this moment. The old leaders are effete. Lord John Russell has committed political *felo-de-se*. Lord Palmerston inspires but faint confidence. Messrs. Cobden and Bright are in the direct antagonism with the public sentiment, and call those the populace whom they were formerly proud to appeal to as the people. Mr. Disraeli is the servant, though he aspires to be the leader, of a faction; and there is not a man among the representatives of the nation in Parliament who as yet has given proofs of capacity, combined with patriotism and courage, sufficiently tried and proved, to be able to assume a high position at the head of public opinion. Some of the talented gentlemen we have named have held, and might have continued to hold, such a position, if they had been true to right principles. This position they have either forfeited or can never acquire. We believe, however, that new men will ultimately be forthcoming; and that the next Parliament will have a very different complexion from the present. The popular heart is sound, as it ever has been, and if all classes come honestly and bravely forward to express themselves, Englishmen will soon cease to have cause to blush for the mismanagement of the national affairs, or reason to fear the betrayal, by incompetent statesmen, of the national interests, either at home or abroad.

THERE are two motions before the House of Commons the object of both of which is to convey a censure upon, or vote a want of confidence in, the Government. The one has its origin on the Liberal, the other on the Conservative, side of the House. The elder, in point of date, is due to Mr. Roebuck, and would condemn not only the present but the late Government, for the abuses disclosed before the Sebastopol Committee. The younger, but more important, of the two has been placed on the paper by Sir Edward Bulwer Lytton, and directly censures the Government for participation in the sentiments of Lord John Russell—as avowed in his too notorious and melancholy speech on the Austro-Russian propositions for an illusory, and therefore dishonourable, peace. Mr. Roebuck's motion sinks into insignificance compared with that of Sir Bulwer Lytton. The mismanagement in the Crimea, disgraceful as it was, has been to a large extent remedied; but nothing can remedy the evil inflicted on the Cabinet and the country by the speech of Lord John Russell, except his retirement from the Ministry.

Lord Palmerston may, perhaps, find means to avert a Parliamentary censure; but if he do he will be fortunate and clever indeed, if he attain that object without the sacrifice of his blundering colleague. An attempt is to be made to screen Lord John Russell by the publication of further correspondence relative to the Conference at Vienna, tending to prove that M. Drouyn de Lhuys, who, like his Lordship, was bamboozled, bewildered, tricked, and made a dupe of by the adroit Count Buol and other Austrian influences, did not for that cause lose the favour of his Imperial master, but fell from power on account of a difference on another question. But all this is nothing to the point. Lord John Russell's conduct is to be judged of by his recent speech; and by that speech he shows himself utterly unfit to be the member of a Ministry pledged to carry on the war with energy and vigour, and whose bounden duty it is to spare no exertion to secure a victory. Lord John Russell must resign. There is no alternative, except at the dismissal from office of the whole Administration.

REMAINS OF LORD RAGLAN.—Lord Raglan's remains will probably arrive in England in about a week from this time; and will be accompanied by the whole of his personal staff, Colonels Steele, Lord Burghersh, and Poulett Somerset, Major Kingscote, the Hon. S. Calthorpe, and Lieutenant-Colonel Prince Edward of Saxe-Weimar. The ship conveying his remains will go to Bristol, and thence the body will be conveyed to the family burial-place, near Badminton

CONDUCT OF THE POLICE IN HYDE-PARK.—The Commission for inquiring into the conduct of the police in reference to the late disturbances in Hyde-park will probably be composed of the Right Hon. James Stuart Wortley, Q.C., Recorder of London; Mr. R. B. Armstrong, Q.C., Recorder of Manchester; and Mr. Gilbert Henderson, Recorder of Liverpool.—*Globe.*

IMPERIAL PARLIAMENT.

(Continued from page 35.)

HOUSE OF LORDS.—THURSDAY.

Lord LYNDHURST withdrew for the present his motion the Oath of Abjuration Bill, which stood for a second reading on Tuesday.

The Burleyhey College Hamlet Inclosure, Parliamentary Improvement Acts Regulation Bill were severally read a third time and passed.

The following bills passed through Committee, viz., the Dwellings for Labouring Classes Bill, the Edinburgh Lands Bill, the Victoria Government Bill, the Waste Lands (Australia) Act Repeal Bill, the New South Wales Government Bill, the Places of Religious Worship Registration Bill, and the Youthful Offenders (No. 2) Bill.

Several other bills were advanced a stage.

HOUSE OF COMMONS.—THURSDAY.

At the early sitting of the House the Nuisances Removal Amendment Bill was committed in Committee, and its clauses were agreed to. Some progress was also made in the Metropolitan Buildings Bill, which was likewise considered in Committee.

Sir G. GREY, in reply to Sir F. Thesiger, said it was not the intention of the Government to proceed further that Session with the Roman Catholic Charities Bill.

Mr. F. PEEL, in reply to Mr. Milnes, said that he had no knowledge except that which he acquired from the public papers of the treatment experienced by the late Mr. Stowe, who was sent by the proprietors of the *Times* to distribute the funds with which he had been entrusted for the relief of the wounded soldiers in the hospitals at Scutari.

SIR E. BULWER LYTTON'S MOTION AGAINST THE GOVERNMENT.

Lord PALMERSTON, pursuant to the promise he made in the late Conference at Vienna, that the Government should lay before the House of Commons at the right hon. Baronet being brought forward, the papers connected with the subject, moved that the House should go into Committee on the Diplomatic Correspondence with Vienna relative to the Conferences.

Mr. DISRAELI did not think that the explanation given by the noble Lord in the slightest degree changed his position in reference to the extraordinary revelation made by him on Friday night. The statement of the noble Lord had created the utmost uneasiness throughout the country; and he thought, under the circumstances, it was the duty of the noble Lord at the head of the Government, to afford the very earliest opportunity for the consideration of the honourable Baronet's motion, which involved the question whether, under the circumstances, that House was prepared to continue their confidence in a Government, which it appeared upon the most important question of the day, were divided in their opinions as to the necessity of continuing the war.

Lord PALMERSTON said that the right hon. Gentleman had really made "Much Ado about Nothing." As he had before stated, he was ready to give the hon. Baronet Monday, or any other day next week, for the bringing on of his motion.

Sir E. BULWER LYTTON said he was not surprised at the noble Lord (the right hon. friend had made "Much Ado about Nothing," for in point of chronological order the "Much Ado about Nothing" came immediately after "The Comedy of Errors" (immense laughter, in which Lord Palmerston himself joined). He accepted the noble Lord's offer, and would bring on his motion on Monday in a substantive form, and not as an amendment to going into Committee of Supply.

Mr. ROEBUCK consented, under such circumstances, to postpone his motion until that of the hon. Baronet was disposed of.

EDUCATION (SCOTLAND) BILL.

On the order of the day for the third reading of this bill,

Sir J. FERGUSON moved that it be read a third time that day three months.

Upon a division, the third reading was carried by a majority of 105 to 102.

Several divisions took place upon clauses proposed to be added to the bill. On the motion that the bill do pass some discussion ensued, and upon a division the bill was carried through its last stage by a majority of 130 to 105.

The House then went into Committee upon the Tenants' Improvement Compensation (Ireland) Bill.

Mr. MAGUIRE moved he heard a rumour that Lord Palmerston was waited upon by a number of Irish members, who induced him under pressure to promise to restore the fourteenth clause (the retrospective clause) of the bill. He wished to know if it were true.

Lord PALMERSTON said some Irish members had waited upon him on the subject on the previous day, and he told them that he had already supported the fourteenth clause, and, if its restoration to the bill should be moved he would support the motion.

Mr. S. FITZGERALD asked whether the Irish members had not complained of the absence of seven members of the Government from the division on the clause, and whether he had not said that on any future division the clause should be supported by the whole force of the Government?

Lord PALMERSTON said that such a complaint had been made, and he had said he hoped that hereafter he should have no reason to regret their absence.

Mr. Serjeant SHEE disclaimed having been a party to such a deputation.

Mr. DISRAELI said that the noble Lord ought to have told the menacing deputation that waited upon him that they would learn the sentiments of the Government in the House of Commons.

Lord PALMERSTON denied that he had received a menacing deputation.

Mr. WHITESIDE looked upon the whole occurrence as a serious blow to constitutional government. It was easy to see that the Irish members would have intimated that unless the noble Lord restored the clause they would vote against the Government on the motion of Sir E. L. Bulwer Lytton.

Sir G. GREY said that the Irish members had only done that which was a family compact of Scotch members.

The conversation was continued for a considerable time, and became incoherent as it advanced. The result was, that the Chairman reported progress, and asked leave to sit again.

Several bills upon the paper were advanced a stage.

HOUSE OF LORDS.—FRIDAY.

The following bills were read a third time and passed—viz., The School Grants Security; Victoria Government; Waste Lands (Australia) Acts Repeal, New South Wales Government; and Places of Religious Worship Registration Bills.

The Bills of Exchange and Promissory Notes Bill was read a second time.

The following bills passed through committee—viz., Dwelling-houses (Scotland); Endowed Schools (Ireland); Gold Wedding-rings; Commons Inclosure (No. 2); and Encumbered Estates (Ireland) Act Continuance Bills.

HOUSE OF COMMONS.—FRIDAY.

LONDON WRIT.

Mr. WAKLEY moved that LORD. Hotham be discharged from public attendance on the Select Committee, and that Mr. E. Egerton be added.

Mr. BOUVERIE stated that he concurred with the application of Baron Rolfe to be heard by counsel; at the same time he thought that the other Judge should be also heard by counsel. If had been asked, who was the other Judge? It was merely the duty of the House to see that no one should take part in the deliberations who was not entitled to a seat; and as in the other House the law officers were directed to attend when Government business were under question, so he thought the House should, in this case, put itself and its privileges. It was because only one side was to be heard by counsel that he desired to be relieved from further attendance on the Committee.

Mr. T. DUNCOMBE stated that there were already seven lawyers on the Committee, and he did not see that there was any addition to that number required. Surely seven lawyers were quite sufficient out of eleven members (Laughter). He thought the Committee would sustain a great loss if the noble Lord were allowed to retire.

Lord HOTHAM, after some explanations, consented to serve on the Committee, and the motion was withdrawn.

Mr. ALCOCK asked the Secretary of State for the Home Department, whether, inasmuch as it was improbable that the Committee on the Beer Act would be able to report during this Session, it was his intention to introduce a bill in order to modify the restrictions of the Beer Act of last Session?

Sir G. GREY said that it was not his intention to interrupt the Committee now sitting upon the subject, and he could not say, what would be done until they submitted their report.

FINANCE.

In answer to a question from Sir H. Willoughby, the CHANCELLOR of the EXCHEQUER stated that it would be necessary to submit supplemental estimates for several branches of expenditure; and it would be his duty to state in what manner the money was to be raised.

Mr. DISRAELI said he understood the Chancellor of the Exchequer to say, when replying to the hon. Baronet, the member for Evesham (Sir H. Willoughby), that the public expenditure was so considerable that there was a probability of large supplemental estimates being laid upon the table, and that the House should go into a Committee of Ways and Means. Now in reference to what the House should do in that Committee of Ways and Means, he wished to make this inquiry, whether when the Government contracted for the last Loan they engaged to raise no further sum of money during the present year in that manner?

The CHANCELLOR of the EXCHEQUER said it was quite true, when the last Loan was contracted, that her Majesty's Government did enter into an engagement that they would not raise anything by way of loan until the whole of the instalments of the sixteen millions were paid up, and he did not wish to convey to the House that Government desired to contract any loan for the service of the country, at all events before the end of next December, in the manner in which that Loan was contracted.

Lacy Regium and Lord Ragian's Annuities Bill was read a third time and passed.

TENANTS' IMPROVEMENTS COMPENSATION (IRELAND) BILL.

The House went into Committee on this bill.

Upon clause fifteen—which entitled the tenant to remain in possession, even after eviction, until his claim for compensation for improvements was settled—Mr. S. FITZGERALD moved that the clause be struck out, on the ground of its establishing a new principle altogether opposed to the interests of the landlord.

Lord PALMERSTON supported the clause.

On a division the clause was rejected by a majority of 84 to 83.

The clause was accordingly expunged.

After a discussion upon several other clauses of the bill, which occupied the Committee for the remainder of the night, the chairman reported progress, and obtained leave to sit again.

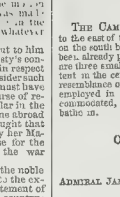
Several bills upon the paper were advanced a stage.

THE CAMP OF SATORY.—The Camp will be established this year to the east of the road which leads from Versailles to Dreux. It is skirted on the south by a small wood. From 500 to 600 tents fronting the north have been already pitched, and are occupied by the 51st Regiment of the Line. There are three small clumps of trees in that part of the plain, and the Colonel has his tent in the centre one, which has been converted by his men into the miniature resemblance of an English park. Engineers quartered at Versailles are daily employed in tracing out the Camp, where the soldiers will be comfortably accommodated, and will have the piece of water (Les Suisses) close at hand to bathe in.

OBITUARY OF EMINENT PERSONS.

THE MARQUIS OF THOMOND.

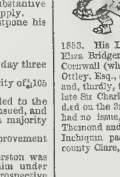
ADMIRAL JAMES O'BRYEN, third Marquis of Thomond, Earl and Baron of Inchiquin, in the Peerage of Ireland, G.C.H., was the second son of the Hon. Edward O'Bryen, by his wife Miss Mary Carnac, and succeeded, the 21st May, 1846, in his Irish honours, his brother William, the second Marquis, who had been created an English Peer, as Baron Tadcaster, but which title, as he died without male issue, is expired with him. James, the third Marquis, the subject of this notice, obtained high credit as a naval officer. He commanded the *Emerald* at the capture of St. Lucia and Scenam; he was made a G.C.H. in 1831, and became Admiral of the Red in



1853. His Lordship was three married: first, the 25th November, 1800, to Eliza Bridgeman, second daughter of James Wiliyams, Esq., of Carnanton, Cornwall (which lady died in 1802); secondly, to Jane, daughter of Thomas Ottley, Esq., and relict of Valentine Horsford, Esq. (which lady died in 1843); and, thirdly, the 5th January, 1847, to Anne (who survives him), sister of the late Sir Charles Flint, and widow of Rear-Admiral Fane. The noble Marquis died on the 2nd inst., at his mansion in the Regent's Park; and he became Admiral of the Red in had no issue, and leaves no immediate male descendant, the Marquisate of Thomond and the Earldom of Inchiquin become extinct, while the Barony of Inchiquin passes to the present Sir Lucius O'Brien, Bart., of Dromoland, Clare, the head and representative of a collateral branch of the family county.

SIR MICHAEL DILLON BELLEW, BART.

SIR MICHAEL DILLON BELLEW, Bart., of Mount Bellew, in the county of Galway, whose death has occurred at Greenville Lodge, Rathmines, Dublin, was the son of Christopher Bellew, Esq., by his wife, Olivia Emily, only daughter of Antony Nugent, styled Viscount Delvin, and was born the 25th Sept., 1796; he was created a Baronet the 15th August, 1838. He married, in 1816, Helena Maria, eldest daughter of Thomas Dillon, Esq., of Dublin, by whom he leaves nine three sons and six daughters; of the latter, three are married—viz., Mrs. Monro, Mrs. Cosmo Gordon, of Fyvie Castle, and the Hon. Mrs. Grant. Sir Robert, who inherited the Baronetcy at his father's death in 1831, and whose demise occurred at Fergus-house, Banffshire, on the 6th inst., is succeeded by his eldest son, now Sir George Semuel Abercromby, the sixth Baronet, who is married to Agnes-Georgina, second daughter of the present Lord Kilmaine, and has issue.



SIR ROBERT ABERCROMBY, BART.

SIR ROBERT ALLEN CROMBY, fifth Baronet of Birkenbog or Forglen, in the county of Banff, F.R.S.E., Chief of the clan of Abercrombie, was the only son of Sir George, the fourth Baronet, by his wife, Jane, eldest daughter of Alexander, seventh Lord Banff, and was born the 4th February, 1784. He married, the 22nd October, 1816, Eazabeth Stephenson, only child of the late Samuel Douglas, Esq., of Netherlaw, by whom he leaves three sons and six daughters; of the latter, three are married—viz., Mrs. Monro, Mrs. Cosmo Gordon, of Fyvie Castle, and the Hon. Mrs. Grant. Sir Robert, who inherited the Baronetcy at his father's death in 1831, and whose demise occurred at Fergus-house, Banffshire, on the 6th inst., is succeeded by his eldest son, now Sir George Semuel Abercromby, the sixth Baronet, who is married to Agnes-Georgina, second daughter of the present Lord Kilmaine, and has issue.

SIR J. A. OMMANNEY, K.C.B.

SIR JOHN ACKWORTH OMMANNEY, K.C.B., Rear-Admiral of the Red, was the eldest son of the late Rear-Admiral Cornthwaite Ommanney, and brother to the late Sir Francis Molyneux Ommanney. He entered the Royal Navy in 1793, and, after some years' hard service, was, in 1799, appointed supernumerary Lieutenant of the *Isis*, the vessel in which Lord Macartney went to China. He assisted, in 1795, as Captain of the *Charlotte*, in Lord Bridport's action. He was subsequently at the Helder, and there captured a French burger of sixteen guns. Ommanney commanded the *Alcaste* at the battle of Navarino. He was made a K.C.B. in 1836, and became an Admiral of the Blue in 1849. He was since advanced to be Admiral of the White, and, four days before his death, on the demise of the Marquis of Thomond, he was promoted to be Admiral of the Red. He was also a Knight of St. Louis, of the third class of St. Vladimir, and of the Redeemer of Greece.

Sir John Ommanney married, in 1803, Miss Ayling, daughter of Richard Ayling, Esq., of Shoham, Sussex. The gallant Admiral died on the 8th inst., at the age of eighty-two, at his seat, Warblington-house, Havant, Hants.

REAR-ADMIRAL JOHN HARPER, C.B.

REAR-ADMIRAL JOHN HARPER died on the 3rd inst., at his residence, near Guildford, Surrey, at the advanced age of eighty-three. The gallant Admiral was a distinguished member of his profession, and passed the great portion of a long life in his country's service. He entered the Royal Navy when young, and was a Midshipman of the *Boyne* at the capture of Martinique, in 1794. Soon after, as Lieutenant of the *Arrogant*, a private ship of ten guns from the Carronade, in a boat of that sloop. He acted on shore at the reduction of Guadaloupe; he was Lieutenant of the *Defence* in Lord Hotham's action; and he participated in the glory of the Nile. Harper, when senior of the *Otter* sloop, captured with two of the *Stork* boats a lugger privateer. In the *Excellent* he assisted at the defence of Rosas, in 1807; and at the destruction of a convoy at Dominica, in 1809. In the Adriatic he commanded the *Saracen*, and captured the islands of Zufano, Mezzo, St. George, and Stagno. He was also most active and useful at the taking of Cattaro. Ragusa, and on various other occasions. Rear-Admiral Harper became a C.B. in 1815.

SIR WILLIAM EDWARD PARRY, D.C.L.

THIS distinguished seaman, whose name stands so high in the annals of naval science and research, was son of the late Dr. Caleb Hillier Parry, a physician of Bath, and was born in 1790. He was educated at the Bath Grammar-school; and, entering the naval service, was, as midshipman of the *Vanguard*, present at the engagement with the Danish gun-boats in 1809. In 1814 he was Lieutenant of the *Hecate*, and he served in the boats at the capture of three American privateers, and at the destruction of the naval stores at Pettigage Point. Parry commenced his reputation as an explorer, when, being Lieutenant-Commander of the *Alexander*, he accompanied Captain (now Sir James) Ross, in 1818, in an expedition to the Arctic regions. In 1819 he commanded another expedition, which crossed the meridian 110 deg. West from Greenwich, and reached 112 deg. West in lat. 74 deg. 44 min. N. lat.; and he returned in 1820. In the same year, 1820, he fitted out a second expedition, consisting of the *Hecla* and *Fury*, which sailed in 1821, and came back in 1822. He was at the head of a third expedition in 1824-5; and in 1826 of a land expedition, which reached 32 deg. 45 min. N. lat. For these labours in the Polar regions, Parry was Knighted in 1829. He had previously received the freedom of the city of Bath, and had obtained £1000 from the Government as part of the reward offered for penetrating the meridian 110 deg. West longitude, within the Arctic circle. He also got, in 1823, the freedom of the city of Winchester. He filled the office of Hydrographer to the Admiralty from 1823 to 1829, and was for some time Commissioner for the management of the Australian Agricultural Company's affairs. He had also discharged the responsible duties of Comptroller of Steam-Machinery and Packet Service at the Admiralty. He became a Rear-Admiral in 1852, and was appointed Lieutenant-Governor of Greenwich Hospital in 1853. Sir William was a D.C.L., a fellow of the Royal Society, and (among other similar honours) an honorary member of the Imperial Academy of Sciences at St. Petersburg. The gallant Admiral married first, in October, 1826, the Hon. Isabella Stanley, fourth daughter of John Thomas, late Lord Stanley of Aderley, and sister of Edward John, present Lord Stanley, and President of the Board of Trade, which lady died the 13th May, 1850. He married, secondly, in 1841, Mrs. Hoare, daughter of the Rev. Robert Hankinson, and relict of Samuel Hoare, Esq. Sir William Edward Parry died at Ems, on the 7th inst.

PHILIP PUSEY, ESQ.

PHILIP PUSEY, Esq., of Pusey, Farringdon, Berks, died at the residence of his brother, the Rev. Dr. Pusey, at Christchurch, Oxford, on the 16th instant. Mr. Pusey was the eldest son of the Hon. Philip Bouverie, who was fourth son of William, first Earl of Radnor, and who assumed the now famous surname of Pusey, the manor of Pusey being settled on him as nephew of the proprietor Mr. Allen Pusey's wife.

Mr. Pusey, the subject of this notice, was born June 25th, 1799; and married, October 4th, 1822, the Lady Emily Frances Theresa Herbert, second daughter of Henry George, second Earl of Carnarvon, by whom he has had issue a son and two daughters. Mr. Pusey succeeded to the family estates on the death of his father in 1828; and he entered Parliament in 1830 as member for Chippenham; in 1831 he represented Cashel. He was elected M.P. for the county of Berks in 1835, and retained his seat until the general election in 1852, when he retired. Mr. Pusey took a leading part in matters connected with agriculture, and was the President of the Royal Agricultural Society of England last year, but, owing to indisposition, was unable to preside at the meeting at Lincoln—the Earl of Chichester officiating in his absence. He edited the Journal of this society, and was one of its chief contributors. He was equally forward as a practical agriculturist, and gave every encouragement to implements and manures. He was a great advocate for combining practice with science. The celebrated Dr. Edward Pusey, canon of Christchurch, and Regius Professor of Hebrew in the University of Oxford, is Mr. Philip Pusey's next brother.

WILLS, PERSONALTY, AND CHARITABLE BEQUESTS.—The will of the Right Hon. Thomas Henry Liddell, Baron Ravensworth, was proved under £50,000 personalty. The Venerable Robert Young Knays, Archdeacon of Bombay, £35,000 personalty in England. Henry Lamson, Reigate and London, warehouseman, £30,000. James Henry Shaw, copper-merchant, London, £20,000. Abraham Wellin, of Gloucester, wine-merchant, £10,000. Mrs Elizabeth Aithea Heberden, of St. Sidwell, Exeter, £45,000; and has bequeathed £5000, in charities, as under:—Propagation of the Gospel, £1000; Employing additional Curates, £1000; Government Home Office Institutions, £1000; Colonial Bishops, £1000, Infant Orphan Asylum, £500; Exeter Dispensary, £100; Exeter Penitentiary, £100; Assisting Curates at Exeter, £100; Blind School, Exeter, £100; St. Sidwell and St. James' Schools, £50 each. Mr. Henry Wood, of Clifton, Bristol, has, by a codicil, left £100 to the Church Pastoral Aid Society; £100 to the Church Missionary Society; £100 to the British and Foreign Society; and £100 to the Tunbridge Wells Infirmary. The Rev. Thomas Sanderson, Vicar of Little Addington, has bequeathed £110 to the General Infirmary, Northampton, and £110 to the poor of Little Addington.

THE COURT.

The Court left town for her Majesty's marine residence at Osborne on Tuesday last, accompanied by the King of the Belgians, the Queen of the Belgians, and the Princess Charlotte of Belgium. It is understood that her Majesty will remain at Osborne until the second week in August, when, according to present arrangements, the Queen and Prince Albert will proceed to Paris to pay a visit to their Imperial Majesties the Emperor and Empress of the French.

The chief incidents of Court life during the past week may be thus narrated briefly:—On Friday se'nnight Prince Albert, accompanied by the Count de Flandres, paid a visit to the Camp at Aldershott. Their Royal Highnesses left town early, and returned to Buckingham Palace at two p.m. In the course of the day the Countess de Persigny, wife of the French Ambassador of France, was presented to the Queen by the Countess of Clarendon.

On Saturday the Queen held an investiture of the Most Honourable Order of the Bath, at Buckingham Palace. Her Majesty wore her mantle, as Sovereign of the Order, of crimson satin lined with white, with the gold and enamelled collar of the Order. Field Marshal His Royal Highness the Prince Albert wore his mantle, as Great Master of the Bath, with the collar and star of the Order. The Knights Grand Cross appeared in their crimson satin mantles, having the star of the Order embroidered on the left breast. After the investiture the Queen and Prince Albert went to the Crystal Palace, at Sydenham, accompanied by the King of the Belgians, the Princess Royal, and Count of Flanders, and the Princess Charlotte of Belgium. The Royal party quitted Buckingham Palace at ten minutes past six o'clock, and were joined at the Crystal Palace by the Duchess of Kent. Her Majesty and the King of the Belgians and the Royal circle dined in the Crystal Palace, and returned to town at a quarter before eleven o'clock.

On Sunday her Majesty and his Royal Highness the Prince, with the Prince of Wales, the Princess Royal, the Princess Alice, the ladies and gentlemen of the Court, and the domestic household, attended Divine Service in the private chapel of Buckingham Palace. The Hon. and Very Rev. the Dean of Windsor officiated.

On Monday the Queen inspected one hundred wounded and disabled Guards recently arrived in the country from the Crimea. On the same day their Highnesses Prince Gholam Mahomed and Prince Feroze Shah, the son and grandson of Tippoo Sultaun, were presented to the Queen, at an audience, by the Right Hon. R. Vernon Smith, President of the Board of Control, and took leave of her Majesty, on their return to India.

On Tuesday her Majesty and his Royal Highness Prince Albert, accompanied by the King of the Belgians, left Buckingham Palace at twelve for Osborne, Isle of Wight. Their Royal Highnesses the Prince of Wales, Prince Alfred, and the Count de Flandres accompanied the Queen and the King. A detachment of light cavalry formed the escort from Buckingham Palace to the private station of the South Western Railway at Nine Elms, where a special train was in readiness, which conveyed her Majesty and the Royal party to Farnborough, from whence the Queen, the Prince, and the King proceeded to Aldershott, and reviewed the troops at present in camp there. After the review her Majesty and the Royal circle partook of luncheon, and, returning to Farnborough, proceeded onwards, via Gosport, to the Isle of Wight. The young Princes and Prince ss of the Royal family (with the exception of Prince Leopold, who is detained in town by a slight accident) proceeded to Osborne at an early hour the same morning. The Princess Charlotte of Belgium accompanied their Royal Highnesses.

On Wednesday the Queen and the Prince, with their illustrious relatives, took driving and walking exercise on the grounds of Osborne.

Her Royal Highness the Duchess of Kent leaves town to-day (Saturday), on a visit to her Majesty, at Osborne, Isle of Wight.

The Earl of Westmoreland, British Minister at Vienna, has arrived in London, accompanied by his son, the Hon. Julian Fane. The noble Earl had an audience of her Majesty on Monday.

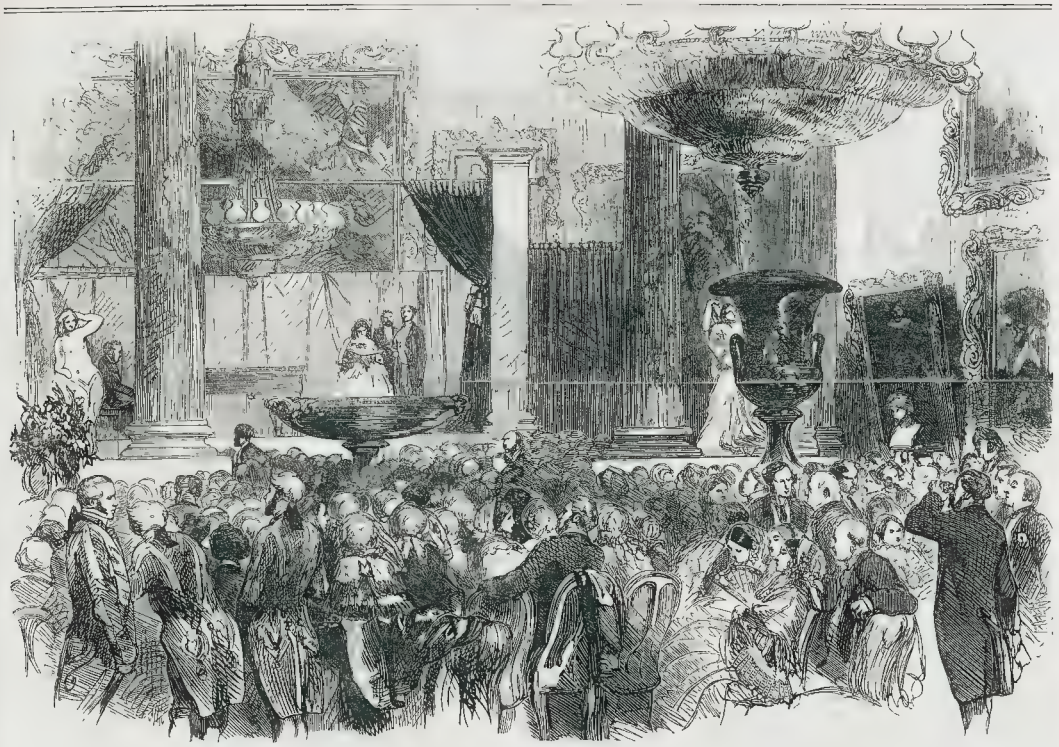
The Earl of Derby has left town for Knowsley, where he will entertain a large party of friends during the Liverpool races.

The Earl of Sefton continues in a very precarious condition, and but slight hopes are entertained of his recovery.

SUNDAY MORNING IN THE BALTIC FLEET.

THE characteristic Picture engraved upon the next page, from one of Mr. Carmichael's able sketches, is a truly-impressive scene; in its solemnity contrasting with the ordinary every-day life on board ship. It represents the Sunday morning Divine service on board the *Cæsar*, screw steamship, Captain John Robb, in the Baltic Fleet. The chaplain is reading a portion of the service; the majority of those around are attentive listeners; and the orderly and quiet decorum of the scene can scarcely fail to impress the beholder with the paramount importance of the observance, and its holier influence upon the lives and habits of the crew.

FUNERAL SERVICE BEFORE BURIAL ON BOARD "THE QUEEN" IN THE BALTIC FLEET.—FROM A SKETCH BY J. W. CARMICHAEL.



FETE AT GROSVENOR-HOUSE, ON MONDAY, IN AID OF THE FUNDS OF "THE HOSPITAL FOR WOMEN," IN SOHO-SQUARE. (SEE NEXT PAGE.)

ROYAL HARWICH YACHT-CLUB REGATTA.

WEDNESDAY, the 4th inst., was the day fixed for this Regatta to take place this year. The morning rose cloudy and lowering, with a gentle air from the N. by W.; but in the course of the day it became a little more northerly and freshened considerably: the day turned out most charming, with bright sun-shine, and there was, in fact, nothing left to wish for. The fact that the *Phantom*, *Thought*, *Amazon*, *Marina*, and *Water Lily* were to contend, would have been sufficient of itself to give the Regatta an unusual degree of interest; but besides this a new yacht, the *Chance*, the property of T. Bartlett, Esq., from the yard of Mr Hatcher, of Southampton was to make her début on the watery stage, and though she had not as yet shown her powers in a match, great things were said of her performances. The other yachts, with their alterations and doings, have lately been made mention of in our accounts of the Thames matches.

As the morning wore on the scene became very lively, both on shore and afloat. Excursion trains came in from London, pouring out their vast numbers over the esplanades, the cliffs, the rising fortifications, and the pier—on which was stationed the town band; and the waters were so thickly studded with yachts, steamers, and craft of all sorts, that it seemed as if the competing vessels would have no easy matter to thread them all. The *Orion* steamer, gaily dressed with bunting, came down from Ipswich with a large complement of passengers, and saluted the flag of the Commodore, which was flying at the mast-head of the *Novice*, kindly given by that officer for the use of the committee as the station vessel; she was also covered with a great number of flags, and her cabin-tables with a profusion of good things, and the band of the Suffolk Militia played on board during the day. Besides the yachts engaged in the match, the following were also on the Harwich waters, and most of them were under way during the day, forming a beautiful fleet—*Maggy*, 140 tons (G. P. Bidder, Esq.), *Lola*, *Wildfire*, *Novice*, *Minion* (J. E. Cox, Esq.), *Avalon* (J. Goodson, Esq., Commodore R. L. Y. C.), *Crockera*, *Will-o'-the-Wisp*, *Ottilia*, *Aquiline*, 55 tons (J. Cardwell, Esq.), besides a great number of smaller boats. The chief prize sailed for was a handsome silver cup and cover, the gift of A. Arcedeckne, Esq., the Commodore of the Harwich Club, and to the influence of this gentleman, and his close connection with the leading members of the great London clubs, Harwich Regatta is no doubt considerably indebted for its wide support. The cup, an elegant one, and valued at sixty

ROYAL HARWICH REGATTA.—"THE AMAZON" WINNING THE COMMODORE'S CUP.

guineas, is the workmanship of Messrs. Gerrard, of the Haymarket, and to contend for which the following yachts came to their stations at about 11.30 a.m., No. 1 station being to windward on the Suffolk shore:—

Name.	Tons.	Owner.	Name.	Tons.	Owner.
1. Glance	35	T. Berdett	4. Thought	29	G. Coope
2. Marina	55	W. J. Foster	5. Amazon	47	A. Young
3. Water Lily	34	H. Pannell	6. Phantom	37	S. Lucas

The course was round the Cork Light vessel, a flag-boat to the S.E., on Stone Bench, a short distance up the Stour, towards Arwarton, and back to the *Nowice*, twice round—a distance altogether of about forty miles, including tacking to windward; and half a minute per ton was allowed for difference of tonnage.

At 11.53 a.m., five minutes after the preparatory gun, the signal was made for the start, which was very well managed by all, the *Phantom* being, however, the earliest on the whole, and the first to get a large square-headed topsail set. They passed the *Nowice*, completing the first round, as under, according to the committee's time:—

	H. M. S.		H. M. S.		H. M. S.
Amazon	1 51 0	Marina	1 53 28	Thought	2 4 50
Glance	1 50 50	Phantom	1 55 43	Water Lily	2 7 30

No alteration took place with respect to the place of any of the others; and the completion of the distance was nearly a repetition of the first round. At the conclusion of this well-sailed race the vessels arrived at the following times:—

	H. M. S.		H. M. S.		H. M. S.
Amazon	3 43 45	Marina	4 1 3	Thought	4 10 30
Glance	4 1 0	Phantom	4 10 40	Water Lily	4 27 0

The *Amazon* was consequently declared the winner of the prize, and her owner was warmly greeted by the Commodore on coming on board the *Nowice*.

About an hour after the yachts had started, the stone boats came to their stations to contend for the Purse of Ten Guineas, given by J. Cardinall, Esq., the Vice-Commodore. The following started:—

Name.	Owner.	Tons.	Port.
Queen	Lines	23	Ipswich.
Marco Polo	Adams	25	Harwich.
Seven Brothers	Pipe	10	Harwich.
Unity	King	9	Ipswich.
Alfred	Rowson	26	Harwich.
Providence	Spalding	21	Ipswich.

The course for these boats—which are fine stout craft and good sailers, chiefly used in dredging—was the same as for the yachts, but only once round. Very great expertness was displayed at the start in getting the sails on them, and a large amount of skill in their sailing. After some excellent racing, the three first vessels all being entitled to something in the way of remuneration came in thus:—

	H. M. S.		H. M. S.		H. M. S.
Queen	3 17 50	Alfred	3 21 20	Marco Polo	3 25 50

The first vessel received £5; the second, £3; and the third, £2.

The sports concluded with races for yachts, gigs, and dinghies; a duck-hunt, and the other usual concomitants of a provincial regatta.

MUSICAL FETE AT GROSVENOR-HOUSE.

On Monday afternoon a fête was given in this magnificent mansion, under the generous auspices of the Grosvenor family, and the joint direction of a committee of gentlemen, composed of Viscount Chelsea, M.P., Lord Dufferin, Baron Marochetti, and the Hon. W. Ashley; the object being to aid the funds of a very deserving institution—the Hospital for Women, in Soho-square.

The superb picture gallery was arranged for the fête, which included a [illegible] of the original cantatella by Mr Tom Taylor. A platform stage of tasteful design was erected at one end of the gallery, under the superintendence of the Baron Marochetti and Mr. Phillips; seats for the company being conveniently arranged along the centre.

Their Royal Highnesses the Duchess of Kent, the Duchess of Gloucester, and the Duchess of Cambridge, honored the fête with their presence, and among the company were the Duchess of Orleans, the Princess Clementine of France, the Archbishop of Canterbury, Prince Edward Lichtenstein, Mrs. Van de Weyer, the Duke and Duchess of Norfolk, the Duchess of Sutherland, the Marquis and Marchioness of Abercorn, the Marchioness of Salisbury, the Marchioness of Alleshire, the Marchioness of Stafford, the Marquis and Marchioness of Lansdowne, the Marquis and Marchioness of Exeter, the Marchioness of Londonderry, the Earl and Countess of Ellesmere, the Earl of Clarendon; the Countess of Effingham, Wilton, Bruce, Craven, Howe, Frances Waldegrave, Beaudesert, Haddington, Mansfield, Yarborough, Derby, Ellenborough, Shaftesbury, Essex, Jersey, Hardwicke, Guilford, Tankerville, Lisburne, Norbury, Rosebery; and a long list of other distinguished members of the aristocracy.

The first part of the performances consisted of a musical selection, in which the amateur talents of Sir John Harrington, the Hon. W. Ashley, and Mrs. Sartoris were assisted by the professional skill of Signor Belletti, Mr. Charles Braham, and Mrs. Nassau, sen. Mr. Albert Smith also enlivened this portion of the entertainment by singing his favourite mélange, entitled "The Country Fair."

Mr [illegible] was followed by [illegible] who sang, with much [illegible] and [illegible] commendation; and the acting by the author, supported by Mrs. Sartoris, Mr. Alfred Wigan, Miss Mary Boyle, and Mr. Spence, was clever and spirited.

We understand that nearly 900 tickets were disposed of, at one guinea each; and, as the extra payment will in all probability defray the expenses, a large sum will be added to the funds of the Hospital.

Owing to the unhappy failure of their bankers, the provision made by the committee to [illegible] accounts, together with a legacy of £100, was lost; and, with the exception of some small sums in the hands of the matron and collector, the Hospital found itself without funds. Its expenditure last year, including £100 paid to the mortgagee, was £2089 4s. 0½d., leaving a balance in the hands of the treasurer of £56 19s. 10½d., towards the expenses of the year 1858. At the present time, in order to continue the Charity, it is necessary to re £1600 for the current expenses of the year, making—with a sum of £1500 required to [illegible] a mortgage debt on the Hospital—a total of £3[illegible].

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, JULY 12.

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Highest Reading.	Lowest Reading.	Mean Temperature of the Day.	Departure from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.

[illegible] the average and the sign + above the average. The numbers in the seventh [illegible] are calculated on the supposition that the saturation of the air is represented by 100

[illegible] the week was 30.05 in. by the 7th; decreased to 29.47 in. by the 11th; [illegible] amounted to 29.76 in. by the end of the week. The mean of the whole [illegible] height of 32 feet above the level of the sea, was 29.771 in.

The mean temperature of the week was 62°69—being 0°69 above its average value.

The range of temperature during the week was 28°2, being the difference between the highest reading, 78°0, on the 12th; and the lowest, 49·8°, on the 7th.

The mean daily range of temperature during the week was 17°7; the greatest was 26·2°, on the 6th; and the least 8°, on the 12th.

Rain fell during the week to the depth of rather more than two inches; one inch and seven-tenths of which fell on the 11th. Vivid flashes of lightning were seen during the evening of the 8th.

The Weather during the first three days of the week was very fine, and the sky almost cloudless; the rest of the week was dull, and the sky nearly covered.

Lewisham, July 12, 1858. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending last Saturday the births of 1356 children were registered in the metropolitan districts: of these, 689 were boys and 676 were girls, being 24 and 8 respectively below their average numbers. The deaths during the week were 926: 468 being males and 458 females. The average number in the ten corresponding weeks of the ten preceding years corrected for increase of population is 1056. The present return of deaths, therefore, shows an improvement in the public health.

STATE REFORM.

On Wednesday evening last a most influential and important preliminary meeting was held at the Freemasons Hall for the purpose of forming on an extended basis an association, the object of which should be the obtaining of comprehensive reforms in the various departments of the State. Notwithstanding the inclement state of the weather and the [illegible] hour, the room was quite full. The chair was taken by Jonathan Duncan, Esq.

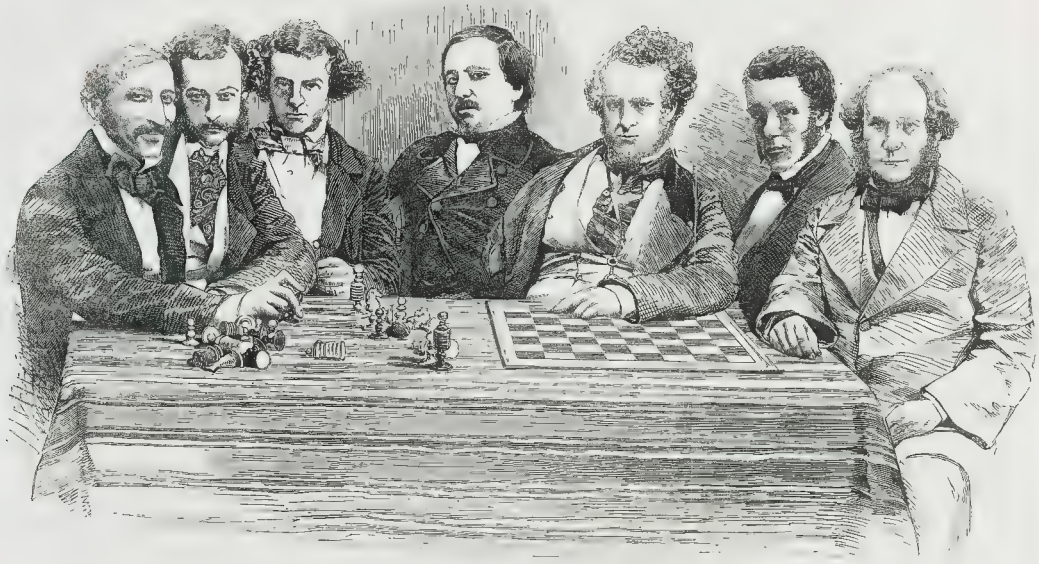
The Chairman, in opening the proceedings, said, it devolved on him, having been placed in the chair, to state the objects for which the meeting had been convened; but before he did so he wished specially to press upon the minds of his auditory; that this was an open and not a taken meeting (Loud cheers). They were aware that within the last fifteen years or thereabouts the ancient system of holding public meetings by free entrance at the doors had been discontinued, and that even then the so-called public meetings had per [illegible] expression of public opinion, but the expression or the opinion of those who harmonised for the achievement of a particular end (Hear, hear). The promoters of the present meeting had determined to put let credit to themselves for breaking through this new mode, and try, if [illegible] as far as they could to the old ancestral custom (Hear, hear). They rejudged every man to be a friend to reform, and earnestly invited all classes of the people to afford them native co-operation (Loud cheers). By the time he had explained the course they meant to adopt, he felt convinced that no man of common sense or common honesty in that assembly would refuse to come forward and support them (Cheers). All they asked was a fair hearing. If they did not put forward projects worthy the acceptance of the meeting let them be rejected; but let everything be done in a business like and conciliatory manner. There was nothing to be gained by violence, and nothing had been more fatal to the interests of the industrious classes than that clamorous impulse them which had strengthened the hands of the idle and dominant classes (Cheers). Now their object was, in as far as they could, to reconcile conflicting opinions, and by mutual concessions to bring about the whole popular force and the action of a united and intelligent people against the proved and admitted abuses in the State (Hear). The machinery by which they proposed to carry out that object he should now endeavour to explain. Those who had been present at former meetings of that description must be aware that the preliminary step in the formation of an association was the appointment of some persons who might act as executive committee. That they had done, but not in any exclusive spirit, for their intention was, that in due course, and when certain preparations were made, to invite to the meeting gentlemen connected with the executive committee. They invited the blacksmith from his forge, and the weaver from his loom; and if such men were willing, honestly and intelligently, to co-operate with the executive committee they would be admitted as members, and would not be asked to pay one shilling as subscription (Loud cheers) He had already stated that theirs was an open meeting, and that he regarded the openness of the executive committee to

commissioners with their £3000 a year who read the *Times*, picked their teeth, and signed a few papers, and then rested satisfied that they had laboriously earned their money (Laughter). He did not complain of the increased pay proposed for our noble army in the Crimea . . . He was sure that every man in that room would agree with him that our noble Guards who had so bravely sustained their country's honour on the heights of Inkerman were well worthy of any reward a grateful nation could bestow (Loud cheers). Lord John Russell (not having held lately been nominated to represent the country at Vienna, and they all knew how he had discharged his duty (Renewed hisses) . . . He had carried with him £5000 numerous returns of expenses, and occupied one of the largest hotels in the place, but when he went to the Conference, he discovered there that his best lesson was to preserve the honour—not of England, but of Russia (Hear, hear, and cheers). He (Mr. Ingram) thought the meeting would agree with him that a little inquiry into such doings would be very serviceable. All he had to say was that he hoped the next time Lord John Russell went to Vienna, he would be treated with less expensive accommodation (Cheers and laughter) . . . Again, how did they find the supplies voted in the House of Commons? Mr. James Wilson, of the Treasury—a very excellent man in his way—came down to the House at two o'clock in the morning, when all honest men were in bed (A laugh)—with an immense bundle of papers, and immediately £10 millions were voted away with not a word being said for or against it (Hear). He did not complain of the men, but of the system; and he hoped that it was one that this association would endeavour to reform (Hear, hear). As the Chairman had so fully gone into the objects of the association, he hoped he should be excused from addressing them at greater length, and, therefore, he should move "That it was desirable the association should forward to the purpose of obtaining the free expression of public opinion on the existing abuses of the State, and of taking measures for their reform." (Cheers).

Mr Hodgskin, in seconding the resolution, congratulated himself on the presence of ladies at the meeting, and . . . hoped well for an undertaking commenced under such favourable auspices. It could hardly be but a full and sure expression of public opinion if this meeting excluded the most valuable half of the community (Cheers). They had found that even when . . . itself could not be carried out without the assistance of the ladies as the exertions of Miss Nightingale and her fair colleagues our brave . . . and soldiers had met care and attention which our Government had . . . them (Cheers). If the Government had done its duty in . . . and should let laws be made that might to address them; but he felt—and . . . he believed that the feeling was very common in the country—that . . . present moment, we had received at a very grave and disastrous crisis . . . a new Parliament (Hear, hear). His experience—and it was a pretty long one—of our political existence, he learned that the country had gone through a series of what might be called revolts . . . The first that he recollected was . . . the Reform Bill, which took place in 1828-29, when the . . . agitation was that which took place in 1828-29, when the . . . Ireland, headed by O'Connell, formed themselves into . . . terror, and . . . the Government, and, in spite of the revolt of 1830, . . . supported by Wellington . . . Peel and the whole power of the . . . Church, carried the recognition of the great principle of religious free- . . . dom (Loud cheers). Following that revolt . . . came the revolt of 1830, which ended in the . . . ming for the people . . . and many reform (Cheers). And the well . . . gained by that . . . it was allowed him he would tell them what they . . . proposed to do. It was the duty he . . . to lay before . . . the great principle of popular representation . . . to . . . which . . . carried, but the purpose of the . . . was a great . . . to be attended by the action of the great party which . . . parliamentary reform . . . a revolt of . . . and moral nature, but . . . of still more importance . . . which, in spite of aristocratic power, carried the great principle of free traffic, as the basis of our future commercial legislation (Cheers). He thought this was proof that parliamentary reform, limited as it was, had done some good, as, if it had not been for the movement of 1830, he believed they would not have had the success of 1846. After the revolt the last great revolt that had taken place against the infliction of a compulsory stamp on newspapers, which had succeeded, although it was not as yet carried out as effectually as it might be. He believed that the people brought into effectual and free operation that change would confer great and lasting benefits on the people (Hear, hear). He now came to the last great revolt which was now in progress, not a revolt of a peculiar character, but of a general revolt of public opinion against the whole Government of the country (Loud cheers). There was at the present moment a feeling of intense discontent, and he thought he might . . . [illegible] . . . nation (Loud cries of "Hear, hear"). That indignation was directed more especially against the conduct of the Ministry in . . . the whole management . . . of the diplomatic relations of this country (Hear, hear). There being then this great discontent, this universal indignation, it seemed to him only reasonable and proper that the men who took an interest in the affairs of the country, who thought he could by any possibility benefit it, to come forward, as they had done that evening, and see whether in public council they could not devise some method of bringing the evil to a conclusion (Hear, hear). The general discontent being admitted, there was no necessity for his going into details: he would merely refer to one or two topics which he thought should immediately engage their attention. First of all, and which their Chairman had not mentioned, was the condition of our Army (Hear, hear). There had been something like a partial reform in the Army, but the thorough reform which it required was not yet to come. What they wanted was to throw all the honours, rank, and emoluments of the Army open to every deserving man who entered its ranks (Loud cheers). Let them throw open all distinctions and all grades, so that the private soldier should not continue to do all the fighting, and suffer all the calamities, without ever . . . [illegible] . . . per . . . (Hear, hear). If that were done, they would . . . [illegible] . . . men for the Army, and not, as . . . [illegible] . . . the most . . . [illegible] . . . and least respectable class of the community. Now he thought it would be obliged to employ foreigners to do that for Englishmen which Englishmen should be able to do for themselves (Cheers). He should like them also introduce into the . . . of civilised life into the Army, and procure generally those benefits, which the addition of a few "navvies" from civil life had lately created for our soldiers in the Balaclava Railway (Hear, hear). But it was not . . . having department of the military service. Improved regulations . . . introduction . . . improvement in weapons . . . at once adopted . . . as at present, finding our enemy . . . sharpening . . . invention. They wanted, then, to bring public opinion to bear in the formation of the Army, and next they . . . something for the Navy (Hear, hear). He knew some . . . the Navy, and was happy to admit that the detestable system of impressment no longer existed (Cheers), while there never was a time in which our sailors had more freely come forward, thus showing the . . . press of the principle of giving liberty and justice to all men (Cheers). But they read in the papers how inefficiently the Navy was managed. They found their naval barbours filled with great unmanageable hulks . . . and other small vessels necessary for the war could . . . be had. We had ships that could not be used at all in . . . and must be used but very little in the Black Sea . . . [illegible] . . . He might be told by those who wished to find excuses for . . . that the public were to blame by having, through the House of Commons, refused to empower Governments to build more ships for war. But, as a proof that such was not the case, he might mention that the war expenditure of the country had been fourteen millions annually, and that had been all expended in the construction of vessels that were found to be only incumbrances when they went to sea (Hear, hear). The . . . [illegible] . . . when the time of emergency arrived we found . . . [illegible] . . . proper means of defence. Mr. Hodgskin proceeded to point out the defects in the management of our dockyards; and, in conclusion, suggested that a better system of taxation might be devised. Our forefathers were right to consider the principle upon which revenue was raised in the United States of America. He seconded the resolution amid loud cheers.

Mr. Bowyer made some observations in support of the resolution, of which, as a member of the Administrative Reform Association, he begged to express his . . . [illegible] . . . Administration.

Dallas begged to . . . the Chairman a question. He . . . to know whether a sectional committee would be appointed to . . . the best . . . of extending the franchise, without . . . [illegible] . . . the . . . [illegible] . . . would be a mockery . . . [illegible] . . . [illegible] . . . present public excitement could . . . [illegible] . . . would . . . [illegible] . . . [illegible] . . . [illegible]



HERR LOWENTHAL. M. DE RIVIERE. MR WYVILL, M.P. HERR FALKBEER. MR. STAUNTON. LORD LYTTELTON. CAPTAIN KENNEDY.

CHESS CELEBRITIES AT THE LATE CHESS MEETING.—FROM PHOTOGRAPHS BY SIGNOR ASPA (LEAMINGTON CHESS-CLUB) AND MR. RUSSELL.

the agreeable poet, the amiable and virtuous man—if that shade could look down at the present time and see his own beloved Rugby still the retreat of domestic happiness, and private virtue, and public independence, he would rejoice, and he was sure, likewise, he would applaud his accomplished successor for lending his encouragement and patronage to the improving game of Chess.

The noble Chairman said he had to thank Dr. Kennedy for the undeserved terms of eulogy which he had made use of in proposing his health, and the compliment in which they had received it; but, having said the little he had to say on the subject of Chess, he would not venture to take up more of their time. It would give him great satisfaction to attend future meetings of the association.

Admiral Bigland gave "The Health of the Secretary, the Rev. Mr. Temple," whose absence was owing to the great exertions he had made for promoting that meeting. The toast was drunk with much applause.

The noble Chairman next proposed "The Health of the Vice-Chairman, Dr. Kennedy." It had given him great satisfaction indeed to be supported and assisted as he had been that evening by so eminent a man as the Head Master of Shrewsbury School.

Dr Kennedy returned thanks for the honour done him, and mentioned several former pupils of his own, players of Chess, who had obtained high scholastic distinctions at the Universities.

The Chairman next gave "The Vice-Presidents of the meeting."

Mr. Fox responded.

The Chairman then gave "The Committee," which was duly honoured.

Captain Gowan responded.

The noble Lord next proposed "Their Foreign Visitors," whose absence, with that of some of the most distinguished English players who attended the meeting, had thrown a damp upon their festive proceedings.

Herr Horwitz briefly responded.

The Chairman next gave "The Game of Chess," and connected with it the name of Mr. Staunton, the greatest of English players, and, speaking on the authority of a great Russian player, the greatest player in the world.*

The Chairman said he had much pleasure in giving the next toast, which, although it was late on the list, was not the less important—"Prosperity to the Town of Leamington."

Mr Hitchman, as an old inhabitant of the town, responded to the toast most cordially.

Admiral Bigland proposed "The Ladies who had honoured the meeting with their company;" after which Lord Lyttelton left the chair.

* Owing to an injudicious arrangement entered into by Messrs Staunton, Wyvill, and Kennedy not to leave the Conservation Gas, they were engaged in until it was far too much to the regret of all, nobody more so than themselves, the foreign guests, MM de Rivière, Löwenthal, and Falkbeer, were prevented from attending the dinner.

BRONZE STATUE OF THE LATE SIR ROBERT PEEL, JUST ERECTED AT THE WEST END OF CHEAPSIDE.

INAUGURATION OF THE PEEL STATUE IN THE CITY

On Monday this fine Statue, which has been executed for the Corporation of the city of London, by Mr Behnes, was placed on its pedestal at the western end of Cheapside, nearly midway between the General Post office and the eastern end of St Paul's Cathedral. The statue, which is 11 feet 2 inches in height, weighing three tons and a half, has been cast by Messrs Robinson and Cottam. The stone for the pedestal was supplied by Messrs. Gibb and Son, of the Aberdeen and Peterhead quarries. The base is of Aberdeen and the die-stone and moulding work are of Peterhead granite. The design of the pedestal, which is by Mr Tite, M.P., the architect of the Royal Exchange, has been much admired for its simplicity and characteristic appropriateness. The fixture of the immense blocks, weighing together upwards of twenty-five tons, was confided to the care of Messrs. Mowlem, Burt, and Freeman, of Puddington, who accomplished the laborious work of erecting the pedestal within ten hours. The statue, which had been for some months completed in the studio of the sculptor, is generally acknowledged to be a characteristic portraiture of the great statesman.

KENSINGTON GARDENS.

EVERY improvement of these delightful Gardens—a sort of Arcadia in relief to the contiguous brick and mortar Babel—will be received as a welcome contribution to the healthful recreation of the people. An addition of the above class has just been made to the Gardens by the office of Woods and Works, by the erection of a refreshment-room of picturesque design it adjoins the spot where the military band plays upon stated days in the height of the London season. The house is octagonal in form, slightly raised from the ground; and there is a broad covered way around the building, where the visitors can sit sheltered from the sun or shower For the space of five or six feet around the ground is paved with red and yellow encaustic tiles. Under the verandah—if it may be so termed—or covered way, flowers are arranged, adding much to the pleasure of the scene Besides the refreshment room there is a waiting-room, which will be found a room to the invalid or fatigued. The room is furnished with chairs and some small iron tables with revolving tops, around which may often be seen groups of fashionables partaking of the various refreshments which Mr. Richard Gunter has provide for him, and, it may be as well to add, at prices not exceeding those charged at his establishment in Motcomb-street.

REFRESHMENT-ROOM IN KENSINGTON GARDENS.

COSTUME OF A NEW TRIBE OF ESQUIMAUX, DISCOVERED BY DR RAE, ON VICTORIA LAND; AND ARCTIC IMPLEMENTS, FROM MR. BARROW'S COLLECTION, AT THE POLYTECHNIC INSTITUTION.

THE ARCTIC COLLECTION AT THE ROYAL POLYTECHNIC INSTITUTION.

THIS COLLECTION, the property of Mr. John Barrow, of the Admiralty, was, on the evening of June 30th, exhibited at the Royal Polytechnic Institution, when the Rev. Dr Scoresby, a veteran in Arctic life and adventure, inaugurated the opening by a lecture of great interest. In conclusion, the rev. gentleman paid an eloquent encomium to the memory of that ill-fated and much beloved commander, Sir John Franklin and his party. Looking to the number of that party, he could but think that there were still some eighty or ninety persons whose deaths were by no means accounted for; and he yet trusted that these gallant fellows would at some future day be heard of, and restored to their native land.

The Collection has been the work of many years, and we hesitate not to say that one consisting so many objects on Esquimaux and Arctic life in general does not exist in any part of the world. Mr. Barrow, from his official appointment at the Admiralty, his great love of Northern enterprise, and his never-ceasing kindness towards all Arctic officers, has created for himself a name and a reputation as great as his eminent father, the late Sir John Barrow.

Almost all the objects exhibited were presented to Mr. Barrow as tributes of respect and regard by the officers, on their return from the icy regions; among them we must particularly mention some twenty or more Esquimaux dresses: we engrave two specimens, brought from a newly-discovered tribe in Victoria Land.

On the centre table were some deeply-interesting relics of the Franklin expedition; the principal are a pair of Gloves found by Lieutenant Sherard Osborne at the winter quarters of Sir John Franklin, canisters of preserved meat and soup, and the only cylinder which has hitherto been picked up, dated "June 30, 1845, from on board the *Erebus*." Here were also assembled a large collection of spears, bows, nets, lamps, and other utensils belonging to the Esquimaux, such as knives and small hand adzes, being about the only tools they get from the tribes which are in immediate communication with the Hudson's Bay Company; a beautiful collection of Arctic drawings illustrated the different stages in the late search, showing critical positions, &c., of some of the vessels; several very complete models of boats, sledges, cooking-gear, and tents used by the different Arctic explorers, gave some idea of their manner of living, &c.

The Collection is altogether very interesting; and the public owe a debt of gratitude to Mr. Barrow for having lent the articles for exhibition at the Polytechnic Institution.

Among the company at the inauguration were Sir James Ross, Captain Collinson, Captain M'Clure, Captain Inglefield, Captain Kellett, Captain Beechey, Captain Hull, Dr. Rae, Mr Barrow (of the Admiralty), Mr. W Nurse, Miss Richardson, Sir George Caley, Bart., the chairman of the Institution, &c.

Amidst the novelties recently introduced by Mr. Pepper, the energetic and judicious managing director of this Institution, are some experiments illustrating the transmission of the sound of the human voice and vocal music through solid conductors. A singing mouse is introduced, which emits sounds similar to the note of the linnet.

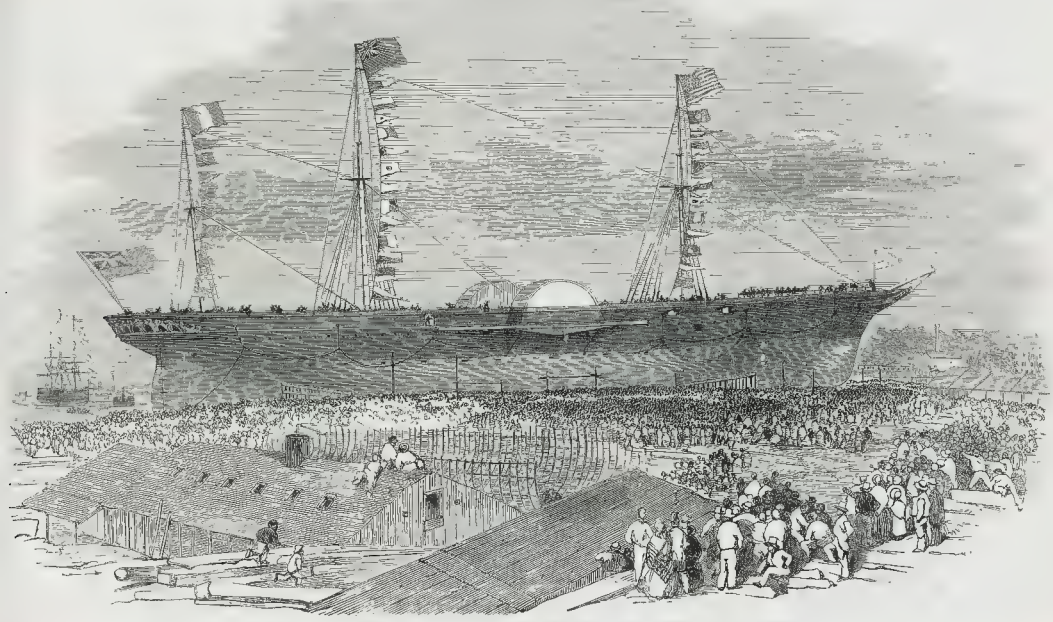
MADAME EMILE DE GIRARDIN (DELPHINE GAY).

MADAME EMILE DE GIRARDIN was born about the year 1803. Her father was Receiver-General of the Department of Noër. Her mother, Madame Sophie Gay, acquired a considerable reputation in the literary world. She was chiefly known as a sarcastic writer, and was the main cause of the privations inflicted upon her husband under the first Napoleon. In 1815 she might be seen at the head of those Parisian dames who crowded upon the path of Wellington, offering him bouquets of violets. The great Duke is reported to have rebuked her unpatriotic conduct, by saying

THE LATE MADAME EMILE GIRARDIN.

"Madame, if the French were entering in triumph into London, the English ladies would put on mourning."

Madame Sophie Gay, on the death of her husband, made literature her profession, and gained a large number of acquaintance, including many of the most distinguished writers of the Restoration. Her daughter was thrown at an early age into the society of refined and talented persons. At fourteen she was remarkable for her beauty which is described in the following terms by one of her mother's acquaintances:—"Large blue eyes, full of tenderness, magnificent flaxen



LAUNCH OF "THE PERSIA" ("THE LARGEST STEAMER IN THE WORLD") AT GLASGOW.—(SEE NEXT PAGE.)

hair, a fair forehead, a small delicately-shaped mouth (called a casket of pearls by a certain poet), an exquisite complexion - these are the characteristic features of the lovely Mdlle. Gay." Beranger said of her that she had shoulders like a Venus, and Chateaubriand thought her smile was like an angel's.

It was in the year 1822 that Mdlle. Delphine Gay sent her first poems to the Academy. The learned assembly accorded to her a special prize, and Charles X. gave her a pension of 1,000 francs. She accompanied her mother in her tour in Switzerland and Italy. The renown of the young poetess had already crossed the Alps, and she was received in Italy like another Corinna. She was conducted in triumph to the Capitol, and recited several pieces in presence of an enthusiastic assembly. On her return to France was the signal for a still more flattering ovation. Legrus, who had just completed the frescoes of the Pantheon, himself conducted Mdlle. Delphine to a place of honour beneath the dome. The whole of the aristocracy of Paris had assembled to hear her recite. After she had finished, she was crowned with flowers, and was borne on the shoulders of standing in a garden.

In 1831 she was married to M. Emile Girardin. She subsequently published in "Le Pays" several spirited articles, called "Lettres Parisiennes," under the *nom de plume* of Vicomte Charles de Launay. She continued to charm Paris with these piquant reviews till the year 1848. Her principal works are the poems "Napoline" and "Madeleine," the "Canne de M. de Balzac," the "Marquis de Pontgrave," the "Cross of Berny;" and the plays of "Judith," "Cleopatra," "Lady Tartuffe," "La Joie fait Peur, and the "Deux Mots."

M. and Madame de Girardin took up their abode at Chaillon, near the Champs Elysées in Paris, in a little house shaped like a Swiss cottage. Her door opened every evening to receive the aristocracy and celebrities of Paris. She was thoroughly domestic in her habits and ideas, and seldom travelled. During the winter season she held her court in her salon, and during the summer in a room in the middle of her garden.

The death of Madame de Girardin will leave a vacancy in the republic of letters which it will be difficult, if not impossible, to fill. Such at least is the opinion of the French press. A few months ago Madame de Girardin sued for court at Chaillon, receiving with the most courteous grace nearly the most noble and the most famous. Poets, painters, sculptors, musicians, philosophers - these were her courtiers and her subjects. Those who have had the good fortune to behold this celebrated lady engaged in the duties of hospitality will ever cherish the thought of it among their dearest recollections.

LAUNCH OF THE CUNARD LINER "PERSIA."

THE first steamer built in Glasgow for the Cunard line was the *Britannia*, in 1840, and since then twenty-six have been built. On Tuesday afternoon, the 3rd inst., the steam-ship *Persia* was launched from the building yard of Messrs. Robert Napier and Sons, at Govan, and the event came off successfully in the presence of 50,000 spectators. The Messrs. Napier, to whose eminence as marine architects and engineers we need not advert, are the builders of both hull and engines. The *Persia* is the largest steamer, both in capacity of hull and steam-power, that has yet been built; and there were people present on the occasion who had witnessed the launch of the *Comet*, in 1812, the first vessel propelled by steam in the British waters.

This, as we have said, is the largest steam ship afloat in the world, far exceeding in length, strength, tonnage, and steam-power, either the *Great Britain* or *Himalaya*; and exceeding, by 1200 tons, the united capacity of the largest of the splendid Cunard liners. Her chief proportions are as follows:—

Length from stem to stern	...	...	390 feet.
Length on keel for tonnage	...	...	360 „
Breadth of beam	...	...	45 „
Breadth over all	...	...	71 „
Depth of hold	...	...	32 „
Power	...	...	3,000 horses.

According to the strict rule of admeasurement her power is equal to that of 950 horses; according to the plan laid down in the Earl of Hardwicke's bill, her power is equal to 1200 horses; and according to James Watts' rule of 33,000 lbs. to the horse, she is expected to work up to between 4000 and 6000 horses. Stupendous as the *Persia* is, the lines of beauty have been so well worked out in her model, that her appearance is singularly graceful. The keel consists of several bars of iron, about 35 feet in length, joined together by long scarfs 13 inches deep by 24 inches thick; the stern-post is 19 inches in breadth, and 6 inches in thickness, carrying the rudder, the stock of which is 8 inches in diameter. She has seven watertight compartments, and the goods will be stowed in two of these divisions, each 90 feet long, 16 feet wide, and 20 in height. These goods-stores, or tanks, are placed in the centre of the ship, with the engines on either hand side of them. The liner will have eight large tubular boilers and four funnels; the firing-space for the boilers is placed in the fore and aft line, in order that the coal may be equally distributed. The engines are the largest according to their power ever constructed, and are supposed to be capable of exceeding by 800 passengers, supposed along the 3000 horses deck, and when the engines are on board, and she is fully loaded, the weight of the immense mass will be 5400 tons, at which time she will draw 23 feet of water. In her construction 2200 tons of iron have been used.

The launch itself was admirably conducted, and the vessel sped along the water as safely and easily as if she had been a wherry; and as soon as she was fairly afloat, upwards of 1000 ladies and gentlemen sat down in the moulding-loft to a sumptuous champagne lunch, provided by Mr. Forrester. The Lord Provost was called to the chair by acclamation. His Lordship, in proposing "Success to the *Persia*," remarked that it was the greatest triumph of art he had ever seen; and the men who had performed the work deserved applause from every citizen in Glasgow. Mr. Napier, in reply, cordially thanked his Lordship for proposing his health; and he might state that his son had been the principal instrument in performing the work. He mentioned this because he thought young people more especially should get honour when they deserved it.

The remaining another toasts were duly manufactured by the eminent firm of Henry Wood and Co., Liverpool. It will be recollected that the committee of naval officers and shipowners appointed by the Admiralty and Lloyd's in 1852, to test practically the merits of anchors of all nations, unanimously assigned to Mr. Trotman's invention a superiority to the extent of 28 per cent over the established anchor of the Navy. Their Lordships have ordered these anchors for her Majesty's new yacht *Victoria and Albert*.

LIBERTY OF RELIGIOUS WORSHIP.—On Thursday a public meeting of friends of religious liberty was held at the Freemasons' Tavern, Great Queen-street, with the view to support the efforts made by Lord Shaftesbury in the House of Lords to procure the passing of a bill for securing the liberty of religious worship. Rear Admiral Vernon presided. Among the speakers were Lord Eglinton, Mr. Josiah Conder, Mr. Huldane, and Mr. R. C. L. Bevan. A petition to the House of Lords was agreed to in support of the Religious Worship Bill.

NATIONAL SPORTS.

THE racing world goes quietly on without any very striking incident to vary it. Both the great two year-old prizes at the Newmarket July have been won by high-mated fillies from the Royal stud lot of last year; and, like Nat on Cock Pheasant, and Basham on King of Trumps, Prince has acquired the little glory by the style in which he brought up Rataplan, and won the Cumberland Plate by half a head on the post when not a hope of victory seemed left to the game old horse.

A stride we thought could be made at the meeting in the death of Mr. John Scott, the trainer of the Queen's stud, who was come from Malton to Newmarket to live, with the probability of his succeeding Mr. Oates as a Carlisle inn. He had a nice string of horses at Middleham, under the care of William Oates, whose brother George rode for him; and, considering the short period he had been on the turf, he had had very fair luck with Nelly Bill, Prince but little behind in pacing masters and known as a public courser, and as the owner of that clever cup-dog Larriston, who ended a good career by "running up" to Lord Sefton's Sockstein for the Waterloo Cup, in the March of '54. A few racing nominations are voided by his death - but the most eager to see either in the St. Leger of this year, or the Derby, Oaks, or St. Leger, of next.

It is announced, in a semi-official way, that Rifleman is lame again, and that his chance of carrying a St. Leger preparation is almost *nil*. Truly "the Square" has known but little luck in racing matters since the "Hark forward!" was heard "piercing the heavens," as he crossed the Leicestershire pastures on his favourite Clasher. The new Doncaster Cup (2 miles), ows are at present rather a mystery between the stewards and the burgesses of that sporting little town: the latter of whom, as well as the Clerk of the Course, are in favour of a more "levelled handicap" plan, which bids fair, with some other alterations as regards stakes and distance, to set this great race once more on its legs. The notion was originally propounded in the *Sporting Magazine*. As regards sales, the High Sheriff for Berkshire, Mr Elwes, has, we hear, purchased Onlston from Mr. Padwick for 6000 guineas—the best price that has been given for a race-horse since Hobbie Noble fetched 6500 guineas, in 1851. With health, nearly half the price ought to come back in the St. Leger, for which event he will now be ridden by Alfred Day, instead of Wells, as he has passed out of the Hindon into the Danebury stable.

The racing programme for the ensuing week is of rather a meagre character. Stourbridge claims Monday and Tuesday, and Stamford is fixed for Tuesday and Wednesday. The latter meeting looks too much like a bad imitation of Newmarket in its stakes ever to prosper much. Unless some more fixtures are made, the coming week will be rather a blank in the sailing and rowing world. Sculling matches are announced at Eton, but we only know of one regatta, which commences at two p.m. on Monday. We observe, by-the-by, that the late Marquis of Anglesey's celebrated yacht the *Pearl*, of 153 tons, is for sale. There were few sights like her, 'tis, with her mainsail set, she glided over the waters of the Solent, with her grey headed warrior owner at the helm.

Lord Ground has two matches of no small interest for the week. The one on Monday is a pedestrian contest against Eaglard; and on Thursday the Royal Household Brigade play 1 Zingari Club. On Wednesday the Surrey Club play the West Wickham, on the ground of the latter; while the All England changes its venue to London on Monday, and to Surbiton on Thursday.

LIVERPOOL JULY MEETING.—WEDNESDAY.

Croxteth Stakes.—Rataplan, 1. Acrobat, 2.
Mersey Stakes.—The Heir of Lynne, 1. Tulyar, 2.
Benacre Tenantcraft Stakes.—Bay Middleton, 1. Hanover, 2.
Lancashire Oaks.—Lady Tatton, 1. Ellermire, 2.
Seeling Stakes. T. Y. C.—Salmon, 1. Puss, 2.
United Kingdom Trainers' Stakes.—Prima, 1. Morgan Rattler, 2.

THURSDAY.

Liverpool Cup.—Seducer, 1. Cock Pheasant, 2.
Biennial Stakes. Rotherham, 1. Benhams, 2
Derby Handicap.—Prima, 1. Morgan Rattler, 2.
Queen's Plate.—Rataplan, 1. Sauce box, 2
Sweepstakes.—Sister to *Mrs. Rigby*, 1. Mystic, 2.

FRIDAY.

Produce Stakes.—Simcoy, 1. Vesuvius colt, 2.
Stanley Stakes. Ellermire, 1. Gaudy, 2.
Licensed Victuallers' Fate.—Early Bird, 1. Tape, 2.
St. Leger.—Not decided over.
Produce Stakes, T.Y.C.—Cetanites, 1. Assailant, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

It having been officially intimated that a new Turkish loan of £5,000,000, bearing interest at 6 per cent, will shortly be opened, the Consol-market in the early part of the week was rather heavy, and prices gave way nearly one-half per cent; but the decline has since been recovered; and numerous purchases of Stock, mostly for Dutch account, have been made on the account. The loan to which we have here referred is not likely, in our opinion, to have much influence upon the value of national securities from the immense amount of capital still seeking employment as an investment. It will be guaranteed by England and France, there can be no doubt but that the whole sum will be speedily absorbed. The settlement of the Egyptian tribute-money, and the revenues of Egypt, will, we understand, be set aside to meet the dividends, and the whole amount will be applied to war purposes. It order not to interfere with the new French loan of £30,000,000, it is purposed to raise the amount solely in London. The large parcels will reach as far quite the as 1 per cent, and the distribution of the remaining funds of the South Sea Company have produced an immense amount of ease in the Money-market. Good bills are taken at 3 per cent; but the present time they are comparatively scarce. Evidently, however, there have been more applications to the Bank for discount accommodation than for many weeks past.

The exchanges at last week's meeting more favourable, scarcely any shipments of gold have been made to the Continent; and the exports to other quarters have been small. The imports have been about £200,000, chiefly from New York, and we find that large parcels will reach us as quite the as 1 per cent this month. As the Treasury can no longer absorb some three or four millions of gold, we may anticipate a decline in the stock of that metal held by the Bank of England. At present it is rather over £18,000,000.

The Stock Market was rather inactive on Monday, and prices ruled ½ per cent lower than on Saturday: The Three per Cents Reduced were 91½ to 91⅝, the Three per Cents, 92⅜ to ⅝; the New Three per Cents, 92⅜ to ⅝; Bank Stock, 213; Long Annuities, 1860, 9 3-16 to 4; India Bonds under £1000, 30s.; Exchequer Bills, 1855, 20s. to 23s. premium; Exchequer Bonds, 1858, 100 to 100½. On the following days the market was rather heavy, but no material change took place in the quotations, with a fair amount of business doing in the various securities. The Three per Cents Reduced rose to 91⅞ to 92, and the New Three per Cents, 92⅝ to ¾. Bank Stock, 213; India Stock, 233; New Long Annuities, 1860, 4; Ditto, 1859, 3⅛; Ditto, 3 13-16; Ditto, 1855, 16 15-16; India Bonds, 2s. to 5s. premium; Exchequer Bonds, 1858, 100; Ditto, 1859, 20s. to 27s. prem.; Exchequer Bonds, 101. The Omnium realised ⅜ premium. Consols left off at 92¾ to ⅞, and the Three per Cent Consols, 91⅞; the New Three per Cents, 92⅝ to ¾; Bank Stock, 213; Long Annuities, 1860, 3⅞; Ditto, 1885, 16 15-16; India Bonds, 34s. to 37s. Exchequer Bills, 20s. to 23s. premium; Exchequer Bonds, 101 to 100½. On the following days the market was rather heavy, but no material change took place in the quotations, with a fair amount of business doing in the various securities. The Three per Cents Reduced rose to 91⅞ to 92, and the New Three per Cents, 92⅝ to ¾. Bank Stock, 213; India Stock, 233; New Long Annuities, 1860, 4; Ditto, 1859, 3⅛; Ditto, 3 13-16; Ditto, 1855, 16 15-16; India Bonds, 2s. to 5s. premium; Exchequer Bonds, 1858, 100; Ditto, 1859, 20s. to 27s. prem.; Exchequer Bonds, 101. The Omnium realised ⅜ premium. Consols left off at 92¾ to ⅞, and the Three per Cent Consols, 91⅞; the New Three per Cents, 92⅝ to ¾; Bank Stock, 213; India Stock, 231 to 235. The New Three per Cents were 92⅝ to ¾; and the Reduced, 92 to ½. Exchequer Bills were 23s. to 27s. prem.

The transactions in railway shares have been to a very moderate extent; nevertheless the quotations have ruled tolerably firm. Buenos Ayres Six per Cents have sold at 99, Mexican Three per Cents, 19¼; Peruvian four-and-a-Half per Cents, 79¾; Ditto, for the Account, 71; Ditto, Three per Cents, 49¾; Portuguese Four per Cents, 43; Spanish Three per Cents, 26¾ ex div.; Ditto, New, Deferred, 18, ex div.; Turkish Six per Cents, 82¼ to 83¾; Dutch Two-and-a-Half per Cents, 63¾ ex div.; Dutch Four per Cents, 96; Brazilian Five per Cents, 100 to 101; Chilian Six per Cents, 102¾.

Joint-Stock Bank Shares have continued very firm, and the quotations are well supported:—Australasia, 87; Chartered of India, Australia, and China, 24; London Joint Stock, 20; Oriental., 38¾; Union of Australia, 74¾; Union of London, 60¾. Miscellaneous Securities have sold as follows:—Australian Agricultural, 26; Bell's Canada Sea per Cent Shares, 3; Canada Agricultural, 3; Crystal Palace, 3; North British Australasian, ¾ ex div.; Peninsular and Oriental Steam, 62½; Ditto, New, 12¾; Royal Mail Steam, 74¾; South Australian Land, 37 ex div. In Canal Shares, so little has been done that prices are nominal. Victoria Dock Shares have realised 18¾; Hungerford Bridge, 12; and Waterloo, 3¾. There has been a better feeling in the market for most railway shares. Prices, almost generally, have been supported. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Caledonian, 62¾; Eastern Counties, 12; East Lancashire, 97¾; Great Northern, 98¾; Ditto, A Stock, Three per Cents, 59; Great Western, 67¾; Lancashire and Yorkshire, 81½; London and Blackwall, 7¾; London and Brighton, 101; London and North-Western, 100¾; Ditto, Eighths, 1¾; London and South-Western, 86; Manchester, Sheffield, and Lincolnshire, 26; Midland, 71¾; Norfolk, 80¾; North-Eastern—Leeds, 1d; Ditto, York, 80¾; South Midland, 69, Shropshire Union, 46; South-Eastern, 61¾; South Wales, 81¾; York, Newcastle, and Berwick, 70.

LINES LEASED AT FIXED RENTALS.—Clydesdale Junction, 102; Hull and Selby, 199; London and Greet with Preference, 23.

PREFERENCE SHARES.—Four-and-a-Half per Cent, 100¾; Great Northern, Five per Cent, 85; Great Western, Four per Cent, 93; Ditto, Birmingham Stock, 76; Chester Shares, 15; London and Brighton, Five per Cent, 110; Ditto, New Six per Cent, 124; Manchester, Sheffield, and Lincolnshire, New £10, 13¾; Midland Consolidated, 140¾.

FOREIGN.—Antwerp and Rotterdam, 8¼; Bombay, Baroda, and Central India, 28; Grand Trunk of Canada, A issue 11¾; Great Central of France, 14; Great Western of Canada Shares, 2¼ ex div. and New; Madras, 21¾; Paris and Lyons, 49¾; Sambre and Meuse, 10.

There has been a steady demand for Mining Shares. On Thursday St. John del Rey were 27¾; Cornes and Cashs, 3¾; Cobre Copper, 64; Fortuna, 1¾; Imperial Shell Road, 1¾ ex div.; United Mexican, 1¾.

The Bullion in the Bank of England has increased £1,707,000 during the week, as compared with the corresponding week in 1854.

Friday Evening.

Very little change has taken place in the value of National Securities to-day, yet the tendency of prices has been upwards. Three per Cent Consols, for Money, have marked 91¾; and, for the Account, 91 to 91¾. The Three per Cents Reduced have realised 91¾, and the New Three per Cents, 92¾. In Foreign Bonds and Railway Shares very little business has been transacted.

THE MARKETS.

COAL EXCHANGE (Friday). The receipts of English wheat up to our market this week, coastwise and by land-carriage, have been but moderate. From up to-day the supply was small, and the show of samples was limited. For all kinds we had a steady demand, at prices fully equal to those of Monday. The imports of foreign wheat have been very moderate. Free has ruled steady, and the demand has been limited. Barley has sold slowly, on former terms. In floating cargoes a steady business was done. Both English and foreign barley sold at full currencies. Malt changed hands to a moderate extent, at full quoted prices. Beans and peas were in good request, at full quotations. Indian corn sold slowly, and damp parcels were lower to purchase. Beans, peas, and flour were held at full prices.

Arrivals this Week.—English wheat, 1690; barley, 490; malt, 1850; oats, 110; flour, 1390. Irish oats, 140. Foreign wheat, 4160; barley, 9830; oats, 10,260; flour, 760 sacks, 190 barrels.

English.—Wheat Essex and Kent red, 69s. to 76s.; ditto, white, 72s. to 84s.; Norfolk and Suffolk red, 70s. to 75s.; rye, 40s. to 43s., grinding barley, 31s. to 33s.; distilling ditto, 34s. to 37s.; malting ditto, [illegible]; Lincoln and Norfolk, 56s. to 58s.; brown ditto, 44s. to 54s.; Kingston and Ware, 68s. to 72s.; Chevalier, 74s. to 77s.; Yorkshire and Lincolnshire feed oats, 20s. to 27s.; potato, 27s. to 30s.; Scotch and Irish Cork, black, 24s. to 27s.; ditto, white, 28s. to 30s.; ditto brown, 26s. to 28s.; poland, 29s. to 31s.; maple, 28s. to 32s.; white, 32s. to 34s.; Dutch, 25s. to 27s. per quarter. Town-made flour, 65s. to 70s.; Stockton and Yorkshire, 60s. to 62s. per 280lbs.; American flour, 55s. to 56s. per barrel.

Scotch.—Finest and extra sorts very stiff steadily, at very full prices. In other articles, no change has taken place.

Liverpool.—Wheat, 6d. to 1s. dearer; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Bristol.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Hull.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Leeds.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Wakefield.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Manchester.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Birmingham.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Sheffield.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Nottingham.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Leicester.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Derby.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Lincoln.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Norwich.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Ipswich.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Yarmouth.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Lynn.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

Boston.—Wheat, 1s. to 2s. per quarter; barley and Oats as 6d. to 12s. per quarter, corn, 3d. to 6d. per cwt.; flour, 6d. to 1s. per barrel.

310th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

312th—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

314th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

316th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

318th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

320th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

322nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

323rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

325th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

327th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

329th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

331st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

333rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

335th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

337th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

338th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

340th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

342nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

344th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

346th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

348th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

350th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

352nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

353rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

355th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

357th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

359th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

361st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

363rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

365th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

367th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

368th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

370th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

372nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

374th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

376th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

378th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

380th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

382nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

383rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

385th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

387th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

389th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

391st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

393rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

395th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

397th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

398th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

400th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

402nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

404th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

406th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

408th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

410th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

412th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

413th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

415th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

417th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

419th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

421st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

423rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

425th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

427th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

428th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

430th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

432nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

434th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

436th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

438th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

440th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

442nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

443rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

445th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

447th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

449th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

451st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

453rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

455th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

457th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

458th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

460th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

462nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

464th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

466th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

468th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

470th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

472nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

473rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

475th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

477th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

479th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

481st—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

483rd—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

485th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

487th—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

488th—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

490th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

492nd—[illegible] Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

494th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

496th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

498th—[illegible] Major Pack to be Lieutenant-Colonel, Brevet Major Nicholl to be Major, Lieuts. T. W. Marden and L. E. H. Hall-Macfadden and J. B. Lowes to be Captains, Ensign C. J. R. Ledford to be Lieutenant.

500th—[illegible] Lieuts. Hon. H. [illegible] Williamson to be Captains, Ensign W. H. Parker to be Lieutenant.

502nd—Lieuts. R. J. Adamson, W. R. Bell, to be Lieutenants; Lieut. R. H. Barney to be Captain.

503rd—Ensign C. H. Beak to be Lieutenant; Lieut. D. Dyneley to be Captain.

505th—Lieut. W. A. Baddle to be Captain; Ensign A. L. Emerson to be Lieutenant.

507th—Lieut. J. A. B. Todd to be Captain; Ensign W. J. Shandy to be Lieutenant.

509th—[illegible] Lieut. and Capt. St. John to be Lieutenants and Captains.

511th—[illegible] Lieut. and Capt. Balfour to be Captain; Ensign J. C. Boyce to be Lieutenant.

BEFORE SEBASTOPOL.—THE REDAN, FROM THE OLD ADVANCED TRENCH (SEE PRECEDING PAGE)

THE FRENCH CAMP AT HONVAULT.

THE View engraved upon the preceding page represents the French Camp more in detail than has been shown in our preceding Illustrations; while it is peculiarly interesting from its showing the superior economy of all the arrangements for the good order and comfort of the troops

The Camp lies about three miles from Boulogne, and is scattered in a long straggling line over hill and dale as far as the eye can reach. The greatest order and strict cleanliness prevail, although there are upwards of 40,000 men encamped here. Cafés, theatres, balls for officers and men, and amusements of every sort abound. The erections are of mud and plaster. Each officer has a hut to himself; and both internally and externally they are neatly constructed: the name of the inmate is placed on the door, on a brass plate. The huts have little patches of garden in front, often with a pet, in the shape of a dog or monkey, chained to the outside. A small bust of the Emperor, with the tricolor waving over it, is a popular decoration. Every evening hundreds of soldiers turn out with brooms and remove dirt and nuisance.

THE WAR IN THE CRIMEA.

(From our Artist and Special Correspondent.)

CAMP BEFORE SEBASTOPOL, June 29, 1855.

COMING in sight of Balaclava Bay the other day, I was struck with the crowded aspect of the water, covered with ships of every class rolling lazily on the heaving swell raised by an expiring south-west wind. The calamities of the 14th November were present to my mind as I viewed the familiar shore, its rocky precipices, and deep blue water. Then, a surging sea throwing its foaming particles over the water, ships dismasted, helpless, sinking, death in every shape around; and the elements let loose in every dire shape for the destruction of man—frost, snow, wind, and lightning. Now, a warm sun and a pure sky, awnings on the decks, mattings to keep the ships' sides from the heat, vegetation on the tops of the precipices, and boats securely rowing among mazes of shipping. Balaclava heights, however, had not recovered the picturesque and luxuriant aspect that rendered it so pleasant as we landed in October. The almond-trees and vines no longer clustered in the hollows—the meadows were not green—and though the Castle still adorns the heights, a row of wooden whitewashed huts makes the mind revert from reminiscences of the past to the sad realities of the present. These huts are hospitals for the wounded, and kind Dr. Mathews superintends the maimed and helpless soldiers who are brought there from the trenches.

Landing in the harbour of Balaclava, I found the same activity and much the same dirt as of old. There were no carcases in the water, it is true, but plenty of offal, and the smell of the wharves and streets was the more offensive from a total absence of wind, and the presence of a very hot sun. The picturesque old huts of the Greeks of Balaclava had disappeared almost entirely, to make room for wooden huts, more comfortable and more suited for our purposes. A saw-mill was at work making beams for a pier close by, where a band of bronzed Croats were heaving at a hammer, in the genuine Austrian manner, to the monotonous chant of a slow Turkish tune. Trucks were rolling heavily over the railway, through what once had been the main street; yet the water's edge seemed still to be filled by its never-failing crowds of soldiers, bât-ponies, camels and ox-carts, buffaloes, Greeks, Jews, and sentries. It must be owned, however, that a better classification and arrangement was visible on shore than I had been accustomed to. Coal was not heaped over biscuit, nor wood upon casks of pork. Everything had its place assigned, and all was business. Much of the best that has been done in the harbour was owing to the exertions of Admiral Boxer to whom, now that he is no more every one is anxious to give a good word. The great mistake that had been made in the first instance was the appointment of Admiral Boxer to superintend the naval business of Constantinople. There the Admiral, who was a downright English sailor, unaccustomed to the doubling and shuffling of Eastern officials, was entirely out of his element. He could get nothing done, because his temper did not enable him to obtain what was required in the manner best suited to the place and men who surrounded him. In Balaclava all the good qualities of the man came out, because he knew those whom he addressed, could command them, and show them the example of hard work, early rising, and a firm and unflagging purpose. His language, it is true, was sometimes more than usually unparliamentary. His temper was sometimes sorely tried, and when this occurred those around him suffered; but, after all he did a great deal at Balaclava. The piers which he erected, and those which he planned, will remain as monuments of his ability in the exercise of a duty for which his past services in Quebec had eminently fitted him.

In the arrangements of the town Colonel Harding has also been active. To him we owe the cleansing of the place, the establishment of horse-ponds at the top of the harbour, and the demolition of the smallest and most useless houses. The same bareness and want of trees or verdure mark the vale through which flows the stream of Balaclava as it does the rugged sides of the hills. The old vineyards are known by being dotted with round holes, where water stagnates and takes the place of the vines which the soldiers rooted out in winter for fuel. The graves which covered the water's edge have all disappeared, and nothing remains between the port and Kadikoi but a bare and swampy piece of ground, upon which are encamped the Croats, and along which pass the crowds of sutlers, camp followers, and soldiers in continual streams. Conspicuous amongst the rest are the men of the new Transport Corps—who, for men intended to be useful, are the most brigand-looking persons imaginable: a black sombrero, turned up on one side, with a cockade, the blouse and belt, make altogether very theatrical carmen and horse-drivers. The institution of this new corps and its dress forcibly remind me of what I have frequently been told respecting the first formation of a similar staff by the first Emperor Napoleon. Before his time the French army trusted for its transport to peasants and people pressed into the service on the site of active operations. The supply of men, horses, carts, and other necessary articles were fluctuating in consequence, but generally too small, as with us at the starting of the war, and as with us now. The Emperor, seeing the inconveniences of the old system, formed the *Equipments du train*, and gave them a grey dress and arms. The new corps was the source of continual fun in the army, and the soldiers of the *train* were christened *Dragons à quatre roues* (four-wheeled dragoons), and other names insulting to their pride. The *train*, however, was not long in gaining an *esprit de corps*, which prompted both men and officers to rebel against the general ridicule attached to them. They had proved their utility from the first: the officers were soon accustomed to fight, and capable of being trusted with valuable convoys, not merely to preserve them from robbery by thieves, but from the enemy in case of attack. The jokes of the other corps were put an end to by repeated duels, in which the *train* had the best of the encounters; and it was supposed at last that there were more good swordsmen in that corps than in any other. Since then the *train* is no longer ridiculed, and is considered one of the good formations of the army; the men are chosen from a class fitted to do the duty entrusted to Commissariat men, and they know their business. Amongst Englishmen there is less tendency to make butts of particular men than there is in France; but, certainly, if dress is calculated by its want of fitness to breed ridicule, the new Land Transport Corps is eminently calculated to raise smiles in all those who look at them.

Although Kadikoi has very nearly disappeared, a few houses and the old church which remain untouched mark the site where the village stood. In one of these houses General Della Marmora has fixed his head-quarters, and a portion of the Sardinian corps is quartered around. I cannot congratulate that army upon the healthiness of its position. The spot is in the centre of the swampy ground well remembered by the first comers to the Crimea; for it was here that a large pool flooded the road, and foot passengers had some difficulty in crossing without wet feet. The pool has been drained out, but the spot is still swampy, and the surface of the ground is cracked like the bare banks of a river from which the waters have receded in the summer heats. From Kadikoi to the front there is little or no change. The same wilderness of huts and tents is there as in February, and the only new feature is the railway, of which the position is marked now and then by two or three waggons slowly and painfully dragged up the inclines by horses.

The greatest novelty to me was the new ground which had been gained by the forward movement across the Tchernaya and up the vale of Baidar. As I looked along the crest of the ridge which in November had been entrusted to the defence of the Turks, I could see long rows of Sardinian tents glistening in the warm atmosphere, and the town of Kamara, with the conical spit in front of it, occupied in a similar manner. I had determined to visit my old friends, the Chasseurs d'Afrique, and, as they were encamped at the other side of the ridge, on the sloping ground leading to the Tchernaya, I crossed the Woronzoff road near one of the redoubts which we had lost on the 25th of November, and looked down upon the field of the battle of Balaclava. In the bottom of the gorge leading towards the Tchernaya lay the deserted battery against which the efforts of our cavalry had been mainly directed. On the left of it, the heights from which, on the same day, the Chasseurs d'Afrique so opportunely drove the Russian artillery—were occupied by French infantry; and the slopes on the right were covered with the camps of the French Cuirassiers and Hussars, under d'Allonville, and the Chasseurs d'Afrique, under Maurice. It was as pretty an encampment as one could imagine: the tents stretched in rows in the midst of a thin oak scrub, the horses, whose coats seemed burnished when the sun glanced upon them; the river in the hollow, with parties going down to water: the distant hills, on which the Piedmontese sentries might be distinguished, like specks, as they were relieved—combined to make the scene a lively and a pleasing one. I entered a tent, and found myself not under a close covering of canvas, but in a sort of grotto of bough-, called by the French a *gourbi*. The tent, which was square, had one of its sides opened up in the interior, and the canvas was stretched to form the ceiling of the *gourbi*. The air gently marmured through the branches of the slender edifice, and gave to the officers assembled round a table a coolness and freshness unattainable otherwise.

The Chasseurs d'Afrique form a corps of cavalry of which no other country has the like in respect of rules and constitution. They are to all regular cavalry what the Zouaves are to the infantry. There is not a soldier who joins the Chasseurs that has not spent upwards of two years in other cavalry regiments; and, as the honour of belonging to the corps is great, the privates are men who have made of them given up ran[illegible] where in order to obtain the privilege of coming in. The men be[illegible] tried, there is never a recruit in the squadron, and the officers are free from the tedious duty of drill. On the other hand, the field is their inevitable lot. They are always encamped never in garrison; and this makes men and horses the hardiest against fatigue—the strongest against climate. When the horses of the British and French cavalry and artillery were perishing by hundreds during the winter, those of the Chasseurs d'Afrique lived and endured. Whilst the new soldiers were dying of disease, these old ones survived and enjoyed health. Such were the men whom I had just fallen amongst, and whom I surprised as they sat round their hospitable board. It was soon arranged that a visit should forthwith be paid to Tchorgoun, and a small party was formed which started immediately. The Tchernaya, at the base of the slope which leads from Balaclava to it, breaks through a barrier of rock, and is very deep there. A part of the current is here diverted, and made by the Russians to pass over an aqueduct, and thence along the sides of the vale to Inkerman, where it enters the town of Sebastopol. Here were crowds of soldiers bathing, washing, and fishing. One of our party, a burly *sous officier*, fond as a *gourmet* of that French luxury "*une blague*," instantly dashed into the river and diligently searched the holes in its sides for crayfish. The upper holes had, however, yielded their prey to previous fishers, and it was only by diving, which he did with great success, that he succeeded in reaching the deeper holes; and emerged at intervals triumphantly holding in his hand the fruits of his labour. The fish caught by the soldiers in large quantity were usually black and gudgeon, familiar to the young Waltons of the river Lea. After crossing the aqueduct, and consequently the barrier of hills which bars the entrance into the vale of Tchorgoun, we found ourselves in a beautifully wooded bottom, intersected with numerous channels, apparently used for irrigation, and interspersed with poplars, walnut, and other fruit trees. A post of Piedmontese Chasseurs, or *Bersagliéri*, guarded the entrance to the vale, while videttes from the same corps crowned the neighbouring heights. Peeping up at a short distance was a tower, where a few days before a garrison of Albanians in Russian service, held their ground, and shot with long rifles and uncertain aim at all who approached. What tale tower may once have been I was at a loss to discover, as the remains which I found in it were not of a kind to assist in discovery. The houses about were well gutted of their contents, and there were evident signs of more than one band of soldiers having passed by that way. Two deliciously cold springs rose out of the rock close by, and these, with the groves of poplars and walnut trees had already made Karlooka, as it is called, a favourite resort for rest and shade in the intervals of labour in the Camp and trenches. Having seen of Karlooka everything that was to be seen consistent with personal safety, we returned to the camp of the Chasseurs d'Afrique, where a savoury dinner and generous wine, partaken of in the open air, were gratefully enjoyed after our exercise.

Next morning, after a night disturbed by mosquitoes and centipedes, we started on a visit to the vale of Baidar, where the Turks, under Omer Pacha, had established themselves some days before. The Woronzoff road, which leads thither, passes to the right the village of Kamara, dips into a vale through which flows a small tributary of the Tchernaya, and crossing the stream at the bottom by a stone bridge, ascends the course of the waters through a series of passes remarkable for the beauty of the rocks which overhang the woods on every side, and for the bold manner in which the way has been cut out of the solid rock by blasting. Instead of crossing the bridge, our party diverged slightly to the left of the road, crossed a ford, and we found ourselves ascending a hill, at the summit of which was a host of Sardinian infantry. A view of the surrounding country, precipitous and wild as that on which we stood, but guarded by Russian videttes, proved to us that we had mistaken the way. Our steps were necessarily retraced, and we soon discovered the Woronzoff road again, by the number of Turks whom we met on the way, toiling on the dry road, some of them on foot, others on pack horses and mules. The road wound round the spurs of the hills, at a considerable height above the stream, which was sometimes visible at considerable depth, gilding slowly over ferruginous rocks, surrounded by verdure. At other times the road again descended to the bottom of the pass; and in those places it was wider, and the ground diversified by a little open vegetation. Five miles rode through this beautiful place brought us to the mouth of the pass on the side of Varnoutka, where the country opened and discovered to us the wood-clad hills of Baidar—the deserted village destroyed by the Cossacks, and the encampments of Omer Pacha's army. The hills round Varnoutka formed a vast segment of an amphitheatre of which the Turkish camp was the centre. The tents were pitched in a favourable position on an elevated plain, sloping downwards to the rear. Batteries of artillery were in position on each flank of the encampment, the guns being ingeniously concealed by boughs and foliage resembling the *gourbis* of the French; whilst in the rear of the guns were the Turks, having their tents pitched under the shade of beautiful large trees amongst meadows yielding abundance of grass.

From Varnoutka the Woronzow road led us up the Vale of Baidar, through beautiful woods and meadows, until we halted near a kiosque (or hunting box); three villages, of which I was unable to ascertain the name, exhibiting their low red roofs in the landscape. These villages were inhabited by Tartars, I believe, and not held by the Russians, for the former had come up to the Turkish outposts, and we were trading in pipes and tobacco, but Ali Pacha, who occupied the kiosque, refused permission to pass the sentries, and I had to remain satisfied with a distant view of the upper portion of the vale, which is truly described by Clarke, by Pallas, and by Dauby Seymour as a little paradise.

You will, doubtless, expect me to tell you something respecting the military operations of the past week. In truth, they have not been such as to require description. All that can be said is that since the failure of the 18th the siege continues, and that the Generals are determined to be stopped by no obstacles. General Pelissier, who was the author of the assault, whilst Canrobert deprecated such a proceeding, is said to be of opinion that his reputation is staked on the capture of the town. The opinion of the 18th is described on all hands as an ill-devised and worse executed one. I was unable to reach Camp in time to witness the affair, of which the details must have reached you a week ago, I will not, therefore, repeat any of the numerous stories which are current; for, in fact, indeed, one almost suspects the difficulty that there is in making them agree. The result of the affair, however, is that the Malakoff tower is abandoned by the Russians, who find it too hot for them. On our part we should find great difficulty in keeping hold of it, unless the shipping were previously silenced. To do this is, I believe, the object in view, and for that purpose fresh batteries are in course of erection, notwithstanding, I believe, almost insuperable difficulties of execution. It is observable in the meanwhile that the Russian men-of-war are daily forced to retrograde, and they will soon be close to the sunken booms, where it is doubtless their fate to be sunk either by the Allies, or by the Russians themselves. This end being attained, the Malakoff would not be so difficult to hold. I at that moment be taken before the Redan can again be assaulted in any effective condition of every one

June [illegible]

Yesterday the melancholy intelligence was made known in Camp that on the previous night Lord Raglan had expired at Head quarters, after a short illness. It had been known by a few that his Lordship was ill; but the news of his death was most unexpected. The shipping in harbour hoisted their flags half-mast high, in token of mourning. It is believed that the body will be enclosed and taken to England. General Simpson assumed the command vacant by the death of the Field-Marshal, Sir G. Brown having left Camp a few days before, for the benefit of his health.

Cholera is supposed to have been the cause of Lord Raglan's death, as it was that of General Estcourt.

The 13th Regiment arrived yesterday in the *Robert Low*.

I think you may hear of a fresh assault on some portions of Sebastopol before you receive this note. The failure of the assault on the 18th, which so disheartened our army, and is said to have caused Lord Raglan's death, will, doubtless, be followed by some success. General Pelissier is very determined. He is said to have taken General Rose at St. Jean d'Angely severely to task for being in bed at four on the morning of the attack on the Malakoff, and accused the Generals of supineness and want of vigour. "To-morrow," said he to the Engineers, "we shall commence a battery at such an such a point, and in three days I shall go and see it." "General," was the reply, "what you require is impossible," said the Engineers. "What I will," said Pelissier, "I will. Make the battery." And then he said to himself—*Ah! ils disent que j'ai enfumés des Arabes. Eh bien! qu'ils viennent les Russes les asphyxier!* Such is the energy of Pelissier. It is said that Omer Pacha is to be helped at Baidar by some regiments of English cavalry.

OFFICIAL DESPATCHES FROM THE CRIMEA

War Department, [illegible]

Lord Panmure has this day received a despatch and [illegible] the following are copies, addressed to his Lordship by the [illegible] Major the Lord Raglan, G.C.B.:—

Before Sebastopol, June 23, 1855

My Lord,—I have the honour to transmit to your Lordship [illegible] ing letter, dated the day, from the Inspector General of Hospitals.

Your Lordship will observe with pain that this report exhibits a considerable increase of both admissions and deaths, arising chiefly, however, from the accidents of war, resulting from the assault of the Redan and the attack of the Cemetery, on the 18th inst., on both which occasions the troops were exposed to a heavy fire of artillery and musketry.

It will be satisfactory to your Lordship to find that the arrangements, both for the accommodation and treatment of the sick and wounded, have been such as can rarely be expected under such circumstances, and [illegible] spared to render their situation as comfortable as possible.

I regret to say that cholera and bowel complaints have been somewhat on the increase; but neither the admissions nor the deaths have been so marked as to attract special attention. I have, however, with much sorrow, to report the very sudden death from cholera of Captain Charles Hyde Hall Hussars, an officer of great merit, who had served in India with distinction, and is much regretted in the regiment.

Amongst the killed I have to announce the loss of Lieut. and Adjutant H. Marsh, 33rd Regiment, who was killed in the trenches on the 24th inst. This young officer had served throughout the campaign, and was distinguished for his gallantry and devotion to the service; and his conduct on the 18th drew forth the warmest praise from his commanding officer.

I beg to inclose the lists of casualties on the 18th inst., and of those that have arisen up to the 24th inst. inclusive.

I have, &c.

The Lord Panmure, &c. RAGLAN

Head-quarters, Camp before Sebastopol, June 23.

My Lord,—The weekly return of sick and wounded I have the honour to inclose shows a considerable increase of both admissions and deaths, arising chiefly from the accidents of war, occasioned by the assault on the 18th instant on the Redan and the attack on the works in the Quarry and Cemetery. Many of the injuries received were occasioned by grape-shot, fired at short range, and were of a very serious nature. The loss, consequently, has been heavy; but I have much satisfaction in being able to assure your Lordship that prompt aid was afforded to all; and, the action having taken place within a short distance of our land hospital establishment, accommodation was provided for them at once. This is an advantage rarely attainable on active service in the field, so that the wounded were placed under as favourable circumstances as could be expected in the amount of mortality, therefore, amongst them is mainly attributable to the severity of their wounds, and not to any want of either surgical aid or hospital accommodation, as both were at hand. There was no necessity for their removal to the more seriously wounded, when on others were brought in, and the cases selected to be sent down to the surgical hospital at Balaclava were not more likely to be injured by the journey; and I am happy to say are nearly all progressing in a most satisfactory manner. Indeed, they have done so well, I regret, our accommodation at the Castle Hospital, which is in no extensive, but, unfortunately, the ground will not admit of its being enlarged.

The hospital now in course of erection on the high bold promontory near the Monastery of St. George, will soon be ready for the reception of patients, and so far as position is concerned, I think they will be placed under as favourable circumstances as can possibly be obtained. The situation is high and dry, overlooking the sea, and subjected to no malarious influence; but I can discover; and, whatever the result may be on trial, the site is admitted by all who have seen it to be unexceptionable.

Cholera and bowel complaints still prevail, and have been on the increase within the last two or three days, but under the [illegible] the deaths have been so marked as to attract special attention. I trust it is enough to create uneasiness.

Taking the whole force, the admissions into hospital during the week have been in the ratio of [illegible] per cent, [illegible] the deaths in strength are in the ratio of 0.65 per cent [illegible] must be borne in mind that [illegible] were [illegible] wounds alone.

The Second Division Contingent has suffered [illegible] the Baltic, troops have done nothing since the epidemic first made [illegible] the end of April. Great attention is paid to the clothing [illegible] on the first appearance of cholera, the attention [illegible] are regularly inspected, and directions given for the [illegible] and arrest of the premonitory diarrhœa. [illegible] more form dable stage of the disease.

I have, &c.

JOHN HALL, Inspector-General of Hospitals

To Field Marshal Lord Raglan, G.C.B., Commanding-in-Chief

SUPPLEMENTARY RETURN OF OFFICERS WOUNDED ON THE MORNING OF THE 18TH JUNE, 1855.

1st Dragoon Guards—Deputy Assistant Quartermaster-General Brevet-Major Stuart Wortley, slightly. 11th Foot, Captain R.J. Stephenson, slightly

JEWELS EXHIBITED BY MR. HANCOCK, AT THE PARIS PALACE OF INDUSTRY.

diamond stomacher. The diamonds are interlaced, and form a glittering and graceful trellis work. These rich and artistic ornaments were, a few days previously to their being sent to Paris, submitted to her Majesty, who was pleased to express her admiration of them.

INSURRECTION AT BARCELONA.—RESIGNATION OF ESPARTERO.

A GENERAL strike among the workmen o Barcelona took place on the 3rd inst. Two manufacturers have been assassinated—one of whom was a deputy, who had always shown himself a zealous defender of the work-

GENERAL ESPARTERO.—FROM A RECENT SKETCH.

ing classes. General Zapatero ordered the *rappel* to be beaten; but the captains of the National Guard could not answer for the co-operation of their companies. The following manifesto from the working men has been extensively circulated:—

We have risen peacefully, in order that we may obtain justice. We wish to re-establish an association of *secours mutuels*, which has been dissolved. We demand a jury of manufacturers and workmen to amicably settle our differences. He who shall attempt a Carlist demonstration—he who seeks to excite the manufacturers against us—shall be at that instant punished with death.

We bring our complaint to the Captain-General of Catalonia, because the province, being in a state of siege, all authority belongs to him, and it is at his hands that we look for justice.

We are ready to sacrifice ourselves a thousand times for Espartero, for Liberty, and that the Revolution of July may become real

It is not supposed that Marshal Espartero has any sympathy with the insurrection; but it so happens that the *Madrid Gazette* of the 1st inst.—two days before the outbreak—contained an account of his having tendered his resignation in the following letter to the Queen —

Madame,—Last year, when the whole nation rose to recover its rights, and put an end to the abuses which had been introduced into the Government of the State, I was called on by the heroic inhabitants of Saragossa, and invited to support the movement, which had taken place in that city, and in other towns of Arragon. I went without hesitation to support so noble a cause, and I solemnly pledged myself to labour with all my power for the accomplishment of the national wishes. Your Majesty afterwards deigned to confide to me the Presidency of your Council of Ministers, and I accepted that honourable and delicate post with the firm intention of resigning it as soon as the Constituent Cortes should have assembled; the convocation of that assembly having been one of the principal conditions which I made to your Majesty on accepting office, and which your Majesty granted with the greatest readiness. The Constituent Cortes being assembled, I had the honour, in conformity with the engagement which I had taken, of tendering my resignation to your Majesty, but well-known circumstances have compelled me to remain at the head of the Government out of deference to your Majesty's orders, until the Constitution should have been adopted. That task has now been accomplished since the bases of it have been voted. I have therefore fulfilled my engagements, and my health not permitting me to attend longer to public business, I beg your Majesty to relieve me from the functions of President of your Council of Ministers. I shall be eternally grateful to your Majesty for this favour, which is the greatest that you can confer on me. May God preserve your Majesty, &c.

BALDOMERO ESPARTERO.

The General had not confided his intention to any one before making it known to the Queen. He knew that his colleagues would oppose it, and that he should be obliged to yield to their solicitations. Her Majesty, who was much affected at the resolution which he had come to, would not accept the resignation; but Espartero, who was unmoved by the supplications and the tears of her Majesty, refused to withdraw it. The Queen then sent for Marshal O'Donnell, who was astonished to hear what had taken place, and fully concurred with her Majesty as to the necessity of keeping Espartero at the head of the Government. The Queen declared to Marshal O'Donnell that if the President of the Council persisted in his determination she would instantly leave Madrid, as her life would no longer be secure. Marshal O'Donnell immediately waited on the President, who for a long time remained inflexible; and it is even said that O'Donnell was almost obliged to go on his knees to him before he would consent to withdraw his resignation. A Cabinet Council was held in the evening, when the other Ministers heard for the first time what had taken place.

THE BRITISH CEMETERY AT MADRID.

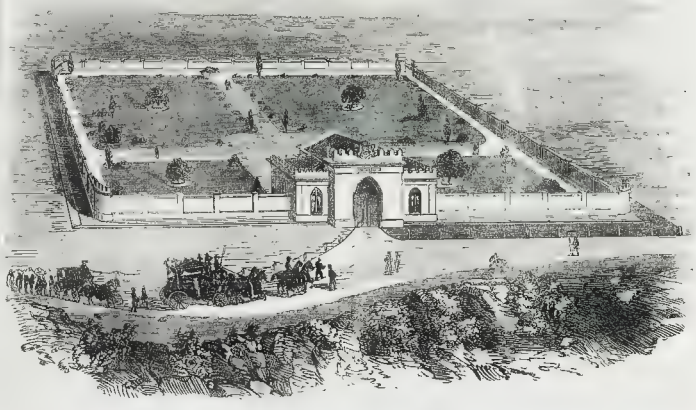
AFTER fifty years of stubborn opposition, we have at last—thanks to the Government at home, and to the diplomatic address and unremitting energy of our Ambassador, Lord Howden, what was granted long ago at Cadiz and Malaga—a British Protestant Cemetery in Madrid. The first two funerals were very grand affairs for Madrid. One had a hearse with four horses, followed by eight carriages. Although this had been expressly prohibited by the late Spanish Government—on what grounds may be easily imagined—yet a good many Spaniards came into the ground, some taking part, others as spectators.

Of the land (which is the property of her Britannic Majesty, and is about two acres in extent), nearly one acre is inclosed by a brick wall and piers, topped with a granite coping. There is a handsome and commodious entrance-building and iron gate, surmounted by marble blocks, on which are sculptured the words, "British Protestant Cemetery," and above are placed the British arms. On one side of this entrance is the Chapel for the Burial Service, and on the other the Lodge for the Sexton who has charge of the Cemetery.

The work appears to be well executed; and the general appearance and position of the Cemetery is good, being at a short distance from the high road which leads from the grand Toledo gate of Madrid, and about a mile from the bridge across the Manzanares.

Much difficulty and annoyance, however, on account of the hostilities attending the outbreak of the Revolution in July last, were encountered, but eventually overcome. Indeed, while the fighting was going on the works were steadily progressing, under the direction and determination of Mr. Albano, of London the gentleman to whom this service was entrusted by the Board of Works

We feel much satisfaction at the manner in which this want has at length been supplied by the authorities in England, and hope that more thoroughly Christian feelings will be in future evinced by the Spanish people at large.



THE BRITISH CEMETERY AT MADRID.

EMBARKATION OF THE 3RD REGIMENT OF LANCASHIRE MILITIA, AT LIVERPOOL, FOR GIBRALTAR.

REINFORCEMENTS FOR THE CRIMEA.

ORDERS were transmitted on the 22nd ult. to the regiments in England and Ireland under orders for foreign service to prepare for immediate embarkation. Orders per telegraph were also transmitted to Marseilles, to be forwarded thence by special steam-boat to the Governors of Malta and Gibraltar, and to the Lord High Commissioner of the Ionian Islands, to send as many efficient men, not only of the regiments stationed in those fortresses, but of the reserve of the Household Brigade battalions as can be conveniently spared previously to the arrival of reliefs of regiments of the Line and the Militia.

To carry out a portion of these arrangements, on Friday, the 23rd ult., the 3rd Regiment of Lancashire Militia, which had been some time stationed at Preston, embarked on board the *Lord Raglan* transport at Liverpool. The regiment, which numbers about 800 men, was to proceed to Gibraltar, to garrison that place, in lieu of the regiment of the Line ordered for active service. The regiment is under the command of Colonel Wilson Patten, M.P.; whose wife and family accompany him. The embarkation took place under the superintendence of Captain Bevis, the Admiralty Agent, and Colonels De Rinzy and Swaun; a portion of the landing-stage being reserved for the purpose. The Cunard steam-tenders *Jackall* and *Satellite*, and the barges *Monkey* and *Badger*, were engaged to take the troops from the stage to the *Lord Raglan*, which lay anchored in the stream. The Mayor (J. A. Tobin, Esq.), and Messrs. J. B. Lloyd, T. Bold, J. A. Picton, Parker, and other members of the municipal body, were present to witness the embarkation, which was conducted with the greatest order and precision, and amidst loud and hearty cheering—the bands of the Artillery, Militia, and the 3rd Lancashire playing "Cheer, Boys, Cheer," "Auld Lang Syne," "Partant pour la Syrie," &c. The Bishop of Sodor and Man, whose son is an officer in the regiment, was also present. The 3rd Lancashire are for the most part small men, but young and active; they are armed with the old-fashioned musket and bayonet. Sixty-two soldiers' wives and eighty children accompany the regiment.

Part of the above details appeared, by mistake, in a portion of the impression of our Journal of last week, beneath an Engraving of the *Exmouth*, 91, flag of Rear-Admiral Seymour, of the Baltic Fleet.

OPENING OF THE HEREFORD, ROSS, AND GLOUCESTER RAILWAY.

AT length we have the satisfaction to record the opening of this line Railway, which took place on the 1st day of June last, with great rejoicings. On a rocky eminence looking over the Wye stands the town of Ross. Nothing can be more picturesque than its position from the Railway. The church stands upon an elevated ridge of rock; and the town occupies the rising ground; while behind are wood-crowned hills. The

THE ROSS, HEREFORD, AND GLOUCESTER RAILWAY.—THE TOWN OF ROSS.

pretty town of Ross is dear to the poetical mind from its connection with Pope and his immortal theme, "The Man of Ross," not less than for the beauty of its site: to the tourist for the sweet landscape of hop-hills and waving woods, and the "linked sweetness" of the manifold winding Wye. What a boon is this to the health-seeker for pure air on Penyard's top, and over the long-deserted site of Roman Ariconium! How beautifully is the locality pictured in Pope's noble lines:

> Who hung with woods yon mountain's sultry brow?
> From the dry rock who bade the waters flow?
> Not to the skies in useless columns tost,
> Nor in proud falls magnificently lost,
> But clear and artless, pouring through the plain
> Health to the sick and solace to the swain.
> Who taught that heaven-directed spire to rise?
> "The Man of Ross," each lisping babe replies

Leaving the town, the traveller's eyes catches at one glance two objects full of ancient associations, yet how dissimilar. From the commodious bridge of John Kyrle to the ruined walls of Wilton Castle, what a leap! As he passes the base of Caplar Hill, washed by the Wye, its strong reverberance to the better-known scenery on the same river, near Tintern Abbey, will at once strike the tourist. The wild base of Pen-y-wharp, with its fine old church bursts next in view. Approaching Holme Lacy—once the seat of the Duke of Norfolk, but now retained not to be the line of its more ancient holders, the Scudamores and Stanhopes the tourist comes into the silvan vale of the Wye, of which a broad expanse is framed between the camp-crowned hills of Dinedine and Aconsbury on the left, and the Backbury and Dowington hills on the right, and in the background the range of Lugwardine and Shucknall:—

> Blessed is the eye
> Twixt Severn and Wye.

We should add that the opening of this line of railway gives the tourist cheap and easy access to the tour of one of the finest rivers in Europe. The Wye tour considered not to be excelled by any in Switzerland, can, by means of this railway, be accomplished in less than two days: and, by an excursion-train of the Great Western, there is not a mechanic in London who may not enjoy, at the cost of one day's labour and three days' wages, a treat that can only within reach of the wealthy. Leaving the train at Ross, itself worthy a day's sojourn, an hour's boat, which to a party would cost only a few shillings, the tour of the Wye to Chepstow (a distance of about forty miles) may be pleasingly made on a summer's day, and the following interesting objects viewed: Goodrich Court and Castle; Courtfield, with the little church of Welsh Bicknor and its curious monuments; Coldwell Rocks and Petrifying Spring, Symond's Yat, Monmouth, St. Briavel's Castle, Llantrissa, Tintern Abbey, Wyndcliff, Piercefield and Chepstow. Here the return-train will enable the tourist to reach London the same night, having seen in one day more objects of interest than can be seen in an ordinary tour of a week.

MUSIC.

NOTHING new has lately been produced at the Royal Italian Opera, the energies of the establishment being concentrated in preparing for the great novelty of the season, "L'Etoile du Nord," which, it is understood, will positively be performed next week. There are frequent rehearsals every day, under the direction of Meyerbeer himself, who expresses himself much gratified by the progress which has been made. Meanwhile, Grisi's appearances in *Norma*, *Lucrezia Borgia*, and *Norina* (in "Don Pasquale"), are as attractive as ever.

THE Concerts of this season seem to have come to a close. The last, of any note, have been Mrs. Anderson's, Mr. Alfred Mellon's, that of the Musical Union, and that of the Royal Academy of Music.

MRS. ANDERSON'S Concert was given on Friday morning, at the Royal Italian Opera, which was crowd with the most fashionable company in London. She was assisted by the whole vocal and instrumental strength of the establishment, including Madame Grisi and Signor Mario, Mdlle. Bildee, Madame Viardot, Mdlle Rosio; Messrs. Tamberlik, Graziani, Lablache, Tamburini, and Formes. The orchestra was conducted by M. Berlioz. There were also Madame Clara Novello and several other performers not belonging to the theatre. Mrs. Anderson, who has scarcely ever been heard in public for years, in consequence of the severe accident which injured her wrist, played the pianoforte part in Beethoven's Choral Fantasia with all the power of hand, refinement, and expression, which has always distinguished her as a pianist. The principal feature of the concert was the "Stabat Mater" of Rossini: the solo parts being exquisitely sung by Grisi, Rosio, Viardot, Mario, and Lablache —Mr. Mellon's Concert was given at St. Martin's-hall. His concerts have been growing in public favour. For a moderate price of admission the public can enjoy for once a quality not surpassed in London. His orchestra, about fifty strong, exhibits a remarkable union of individual talent with collective discipline; and their performance of the symphonies of the great masters is one of the highest treats which an amateur can enjoy. This last concert, as it was one of the best, was also the most crowded of the season.

THE meetings of the MUSICAL UNION were brought to a close on Tuesday last. There was literally an overflowing assemblage, many ladies and gentlemen being unable to find seats. The concert was peculiarly interesting. It began with Haydn's last quartet, exquisitely played by the usual hands Sainton, Cooper, Hill, and Piatti. This beautiful composition breathes all the freshness of youth, and revived the freshness of youth in the many veteran amateurs who listened to it. A similar feeling was excited by Charles Halle's performance on the piano of one of Mozart's simple, old-fashioned pieces, the air with variations in A major. It was indeed refreshing to hear one of the favourites of our youthful days long since thrown aside and almost forgotten, but now revived by one of the greatest performers of the day. It is a good musical sign of the times that our most popular and influential masters are now reverting so often to the works of the old school. The more they do so, the more successful they will be in giving a healthy tone to the general taste. MR. ELLA is entitled to the thanks of the public for what he is doing in this way. We have no hesitation in saying that he has done more than any other single individual in bringing our higher classes with a taste for what is really pure and beautiful in music.

A SERIES of concerts has been set on foot under the auspices of the Royal Academy of Music, being réunions of the members, associates, and students of the above institution. The first took place at St. Martin's-hall on Wednesday evening. The singers and solo players were all of them old pupils of the Academy, and the orchestra and chorus were composed of Academicians. The principal singers were Madame Weiss, Miss Birch, Miss H. Taylor, Miss Rainford, Mr. Wallworth, Mr. Randle Bodda, Mr. Hemsley, and Mr. Wallworth. The concert was conducted by Mr. Lucas. The programme contained an excellent selection of music, including the finale to the second act of Macfarren's opera, "Don Quixote;" the finale to the second act of Lucas's "Nagidee;" Mr. Sternsdale Bennett's concerto in F minor, played by Mr. Hodges; a violin solo, composed and played by Mr. Blagrove; and the fine tarantella, "Trouar sul ondo," sung by Messrs. Herberte, Wallworth, and Wallworth. These réunions are calculated to have excellent effects, and will, we trust, be encouraged by the public

THE one hundred and thirty-second meeting of the Three Choirs of Hereford, Gloucester, and Worcester will be held this season at Hereford. It takes place on the 21st, 22nd, 23rd, and 24th of August, the week preceding the Birmingham Festival. The principal vocal performers engaged are Madame Grisi, Madame Clara Novello, Madame Weiss, Miss Miss Dolby, Mr. Sims Reeves, Signor Mario, Mr. Montem Smith, Mr. Barnby, and Mr. Weiss. Mr. Arnott will preside at the organ, Mr. Done at the pianoforte, and Mr. Townshend Smith will be the general conductor. On Tuesday morning there will be a sermon preached in the Cathedral by the Rev. Mr. Hopton, with the full cathedral service. On Wednesday morning, "Elijah;" on Thursday morning, Mendelssohn's "Hymn of Praise," Spohr's "Christian's Prayer," and Mozart's "Twelfth Service," and on Friday morning, "The Messiah" On the evenings of Tuesday, Wednesday, and Thursday there will be miscellaneous concerts

SONGS, DUETS, and GLEES. The Poetry by CHARLES MACKAY, Esq. the Music by J. GRAY

These pieces will delight every one who regards music, not as a display of brilliant difficulties, but as the sister art of poetry -capable of heightening the beauty and the power of poetical thought and feeling. There is always much music in Charles Mackay's poetry, and Mr Gray may well be called a poetical musician His music is extremely simple; but his style is pure, and its very simplicity enhances its expression

The first of these compositions, "Jubal and his Children," may be called (though it is not so entitled) a cantata; for it consists of a series of solos for different voices and a trio, in which one subject is continuously treated That subject is the discovery by Jubal ("the father of all such as handle the harp and organ") of the powers of music; and it is fanifully ascribed to the suggestions which the patriarch receives from his children. The eldest son has in and the air, standing in the breeze; the second son has heard the sea roaring against the shore; another has heard the rushing of the winds; another, the sound of the cataract. His daughters have heard—one, the murmuring of the brook; another, the song of the skylark; a third, the congers has heard, and mingled with both, her mother's whispered word of love. They describe their different feelings, and each exclaims "I was music to my soul!" The poem concludes

> And Jubal to his children's voice
> No word in answer made,
> But still the more he fill in thought
> His quiet mind grew glad;
> And bright his eyes, with keen delight,
> Upon their faces shone,
> "O children mine, a power divine
> Is burning in my soul."
>
> He reared the wild wood-lyre,
> And taught it sound of praise;
> To the tale of mighty men in bld—
> The needful strength was given;
>
> And first, to please his daughters mild,
> They gave the harp he strung,
> Due for the as a built organ pipes,
> And strung till it was rung.
>
> "Joy, children, joy!" he shouted forth,
> "He all your art hath poured,
> The organ swell shall ever tell
> The glory of the Lord;
> But where your songs of earth and men,
> Of human love and joys
> Your harps shall sound in softer strains,
> Harmonious with the spheres."

This last stanza forms a trio for two sopranos and a bass—exceedingly simple, but especially well sung as a chorus by a number of voices) capable of a grand effect. Altogether, this is a piece, t king the poetry and music in one point of view, of much beauty and interest.

MR. HACKAY'S powerful poem, "Tubal Cain," is formed into a glee for four voices. A song of such length, and of so many verses, is not well suited for a glee. It ought to be set to a simple, speaking tune—an *aria parlante*—enabling the singer to recite the words with all the variety of character and expression which they require We would rather hear this song sung to Mr. Gray's melody alone than encumbered with the other parts.

"Come back, ye happy days," is a sweet and tender little song, joined to very pretty music. It may be sung either as an air or a duet, the second devoted part being *ad libitum*. "Love in Hate" is the passionate outpouring of an injured damsel, exquisitely hatred, but breathing undying love. The words are very beautiful, and so is the melody, which is perfectly akin to the poetry

ON the whole these compositions do honour to Mr. Gray's talents. He has much and natural vein of melody which is not alloyed by abrupt modulations and chromatic passages

THE THEATRES, &c.

HAYMARKET. Miss Faucit appeared on Friday week in two new characters, so far as London is concerned -that of "King Rene's Daughter," in a translation of that pleasing poem by T. Martin, Esq.; and that of *Mrs. Beverley*, in Mr. Oxenford's version of the "Tragedy Queen." The first is a high-poetry part, and received from Miss Faucit's interpretation a picturesque development, which entitled her to one of the most distinguished places as a dramatic artist; the second is a modern realistic part, in which the ideal is rather the point of attack than that of departure; and in her efforts to disguise her lower with all manner of dialects, Miss Faucit came perilously near the verge of excessively amusing. The house was fashionably attended. On Monday next MR. W. FARREN, after a professional career of fifty years, will take his farewell benefit at this theatre under the patronage of her Majesty

THE NEW Play at the HAYMARKET, which will be produced on Monday week, is founded on a story by Sir Richard Steele in the *Spectator* (No 322), signed "Octavia." The heroine, as we have already stated, will be impersonated by Miss Edith Heraud

ADELPHI. An old subject, newly treated, was produced with success on Monday, at the Adelphi, under the title of "Jack Sheppard; or, A Night with Jonathan Wild," written by Messrs. G. A. Beckett and Mark Lemon. This burlesque is smartly written, magnificently appointed, and most effectively performed. Miss Wyndham, as the *Captain* of the Forty Thieves was superbly costumed and sang capitally; Mr. Keeley as *Humphrey*, Paul Bedford as *Ali Baba*, and Miss Woolgar as *Cogia*, were all admirable the very types of humour, caricature, and eccentric acting, combining in one result the artistic and the burlesque. The house was well attended.

ORNITHOLOGY. A great assistance to this study has been rendered by opening a museum in the Marlborough Gallery in Pall-mall. This admirable exhibition must have been collected at great cost, and required the devotion of many years, contains almost every known variety of the feathered race, in their natural attitudes and in several hundred, and nine of such beauty as to defy description. As the models have been carefully prepared before being invested with skin and plumage, the form of the bird is in every case given with the utmost exactness. The room should be visited by every one who desires information in Ornithological science.

THE QUEEN AT ALDERSHOTT.—On Tuesday the Queen paid her first public visit to the Royal Encampment at Aldershott, accompanied by the King of the Belgians, the Prince of Wales, the Princess of Wales, and Prince Alfred. The Royal party left Buckingham Palace shortly after twelve, in a special train of the South-Western Railway, and arrived at Farnborough shortly after one o'clock. Here two of her Majesty's carriages were in waiting, and conveyed her Majesty to the camp. A guard of honour, composed of a company of the Royal Scots, with Major and Lieutenant-Colonel Hamilton at their head, received her Majesty on the station-yard, and on her Majesty's arrival the band played "God Save the Queen." A short drive of little more than a mile brought the Royal party to the extreme right of the camp, the centre of the Guards, where her Majesty alighted off from the turnpike-road and was met by General Knollys and the Equerries in waiting. The Queen and Prince of Wales, the Duke of Cambridge, and other members of the Royal family, and Adjutant-General Lord Seaton, and several other distinguished personages, were also present on horseback. Here two companies of the Scots Fusilier Guards, the Coldstream and Fusilier Guards were first inspected by her Majesty, and subsequently the various regiments of Militia, including the Royal Surrey, the East Norfolk, the East Kent, the Queen's Middlesex, the West Kent, were marched past and reviewed in review order. The Queen, at the head of the troops, was accordingly saluted first, and very creditably, by the Militia in charge. The Guardsmen, numbering somewhat more than a thousand men, all of whom had been recruited within the last twelve months, were commanded by their first lieutenants; and the Militia regiments, with few exceptions, were fully up to the same day of the late. As soon as the troops had defiled past, the Queen proceeded to the open space in front of the Manner of Wark Hut, where the various regiments formed in square to allow of her Majesty an opportunity of conferring the Crimean medal on those gallant men whose bravery at Alma and Inkerman entitled them to the distinction. Among those of Militia chosen for this honour were Sergeant Major Alexander, of Aberdeen, and Sergeant Shute. These were Sergeant J. Tuit, life of the 55th Regiment, Sergeant John Cunningham of the 47th, and Sergeant Alexander Macdougal of the 93rd. The presentation was made by her Majesty in person, personally, the particular action in which these brave fellows had distinguished themselves being explained by the commanding officer in attendance. The ceremony so studied by Majesty and the Royal party returned into Lord Panmure's hut, where the Queen, the Prince of Wales, and the Duke of Cambridge remained for some time, viewing the varied panorama of the locality as seen from this spot. Her Majesty left the Camp shortly before four o'clock, and returned to Farnborough, whence the Royal party proceeded by special train to Gosport, en route for Osborne

THE EMPRESS EUGENIE.—The health of the Empress has already improved since her residence at Eaux-Bonnes, and the pure air of the mountains has had a visible effect. The inhabitants and visitors of the place have paid the greatest care to the Empress, and by every means of their devising, so that her Majesty is able to move about unmolested, which she constantly does, only attended by one or two persons of her suite. A few days since a grand fête took place at Eaux-Bonnes, in honour of the Empress's arrival. The inhabitants of Aas, who excel in some of the songs and dances of the country. The Empress conversed with them in the most affable manner, and they received, after the performance, a handsome, but highly delighted with the reception which had been given to them.

THE LATE JOHN BLACK.—A Scottish correspondent informs us, in reference to our memoir of this editor and member of the public press, that the Grammar-school of Dundee, where Mr. Black received his early education, was not a "parochial" school in the Scottish sense of the term, but that it was, and now is, a school of local celebrity. David Ritchie received his early education in the same institution. Dr. John Brown, the author of the Rosicrucian system, was an assistant there, at the same time that the late Professor Blackie was master of the first class of Greek and Latin. We also inform us that he never was an errand boy, but that he was first placed under an apprentice in Dundee to learn printing, as subsidiary; and that he thereafter left a few years, to enter the office of the Edinburgh Witness of the Signet, continuing in that town till he came up to London.

NAVAL AND MILITARY INTELLIGENCE.

WE understand that among the numerous inventions which have been submitted to the attention of the Ordnance authorities is one of a reflective tube, the purpose of which is to enable the engineers at work in the trenches to see the interior of the enemy's works without exposing to the fire of a bullet.

AT the Lowmoor Ironworks, Bradford, there are shells being manufactured for the Government with a measure 8 and 10 inches in diameter and weigh upwards of a ton. "Monster" shells, indeed!

ORDERS have been received to lay down a gun-boat at Sheerness yard of a very light draught of water, to be commenced immediately, The Admiralty have ordered the old 44-gun Frigate *Forth* and *Sea Nymph* to be fitted as mortar-ships, to carry each 13-inch mortars, and to have engines of 200-horse power to propel them. The *Europa*, at Sheerness, is another of the frigates selected for a similar service.

THE Russian prisoners of war in the Old Gaol at Lewes have been again placed in the enjoyment of those privileges which they had forfeited by their foolish acts of insubordination some time since. Their shaven heads have received the attention of the hair-cutting now employ themselves in making lists. These, however, do not yield so freely, as strangers are only admitted into the prison in very limited numbers.

FROM a late Parliamentary return as to surgeons in the Baltic fleet, it appears that there are forty-five ships and but forty-eight surgeons, being twenty three less than the proper complement during peace, and forty less than the proper complement during war. There are, however, sixty-seven "dressers" on board.

THE boat flotilla consisting of launches, pinnaces, and cutters, fitted to carry one gun each—is now ready at the various dockyards to proceed to its destination. Twenty-two have been fitted out at Portsmouth, thirty-three at Devonport, and twenty at the eastern yards, making a total force of ninety-five very serviceable armament, and not one of them drawing three feet of water. They are all to be armed with howitzer guns.

A LARGE range of wooden huts, capable of accommodating a force of 1000 men, is immediately to be erected on Hobb's Point, in the vicinity of Dunbrick Lock yard. The contract has been taken by the Canadian Land and Emigration Company, well known for their success. When complete, the huge body of militia will be located in them; the new regiments of Glamorganshire Artillery and the Pembrokeshire Artillery, making eight, have been named, the waters of the bay affording excellent practice-ground.

ON Monday 1000 stand of Minie rifles, a large number of Victoria and other carbines, and revolvers for the use of the Polish Contingent, were despatched from the Ordnance Office, Tower, to Woolwich, for conveyance to Constantinople, as stated plate the Polish Legion is being organised and disciplined. The rifles and carbines are in cases containing twenty stand each, addressed to Colonel Count Leinayski, Polish Contingent, Constantinople." A quantity of shot for field pieces, 9-pounders, and shell for 24-pounder howitzers, were also forwarded for the same service

A FURTHER body of 2000 men, to be stationed for training at Brecon for the Land Transport service, is immediately to be raised. The depôt will be at Bodmin Barracks, Bristol, where the other bodies of this branch of the service are stationed. Of these there are scarcely any left—the last complement, 300 strong, having been sent off a few days ago. Each man is fully armed, having a revolver pistol, in addition to his usual equipment

AN establishment of Guides has been raised at head-quarters, under the direction of Mr. Calvert, the interpreter of Russian, consisting of one lieutenant at 6s. 6d. a-day, and eight privates at 1s. 6d. a-day—all with free rations, and house to live in. Lieutenant Adjutant-General Hume, late adjutant of the Rifle Brigade, is already at work taking charge and issuing Quartermaster-General's orders. Some men have been transferred to the Ordnance Department, and it is presumed that Captain Gordon, superintendent of the Pembroke Dock of war-steamers, will also be transferred to the Crimea.

ON Monday afternoon the Royal Highness the Duke of Cambridge arrived at the Crimean mansion about thirty invalid and wounded soldiers from the Crimea, who had been selected from those who would be present at the recent distribution of her Majesty at the Military Hospital, Vauxhall-bridge road. His Royal Highness was attended on the occasion by Miss Nightingale, Colonel Storey, and Colonel Lefroy, who were lately in command at one of the regiments; but the ceremony was of a strictly private character, no one except the recipients being aware of his Grace's visit to the establishment, and consequently no notice could be given by the usual drum and ground notices. His Royal Highness has been frequently in the habit of visiting the hospital for the purpose of inspecting the convalescent soldiers, and of conversing with them since his return. As he has always presented the medals to those men who were sufficiently recovered to assemble on parade, proceeded into the hospital, and handed the medals to the soldiers as their names were read consecutively to their wards, and, in doing so, bestowed them in terms of the greatest kindness and the highest appreciation of their above conduct in the field. Several of the recipients of the honour have served at Alma, Balaclava, and Inkerman.

ON Tuesday, at the afternoon drill of the 1st Regiment of Derbyshire Militia, now actually at Derby, 24 officers, 19 sergeants, 20 corporals, 6 buglers, and 280 privates volunteered for foreign service. It is expected that many more names will be added. The commanding officer is Lieut.-Col. de Coke

A PORTION of Captain Shirreff's company of the Royal Sappers and Miners (the Driver Corps) has received its draught harness. It is expected that a part of the company will leave Woolwich about the end of the month. A number of the horses belonging to this corps is already absolutely, and are trained for service with the Pontoon train.

ON Monday orders were issued from the Horse Guards for a number of the invalided out pensioners at Chelsea Hospital to be sent to the Cape of Good Hope; and, in order to induce the men to volunteer for the service, grants and gratuities, in the shape of pay and grants of land, are to be made.

A FIRE occurred on Tuesday in the Government dockyard, Plymouth, which at one time threatened its destruction. It was suppressed by the military, after consuming a large store full of pine timber

A POLICEMAN'S WORK.—The Commissioners of the Metropolitan Police have recently got animated testimonials to constable, named William Jones, who was engaged in the Fleet Prison, on May 6, 1843, in arresting a debtor who was escaping. While he was in the house he apprehended a person for various offences, and from March, 1845, to March, 1855, he had altogether 5 cases of felony, 3 of which were the same person he apprehended in the house, and 1 of misdemeanour. He had also 3 cases of persons that intent the robbery. He was in court on the two occasions on the first, and in new September, when a purse was presented to him by the Commissioners, containing £5 5s.

THE LATE CAPTAIN LYELS. The following extract from a letter from one of the officers of the *Rinaldo* may be interesting to our readers —"Thanks, June 6th. Our ship, Captain Lyons. His wound was in the arm, and he died on the 4th. It was at 11 a.m. that the wave broke. I, by myself, was on the watch at the time. He began to hang, sending a message on board of us individually, and hanging for the soundest time. He died on the 4th. I do not like to dwell upon the subject to-day. The ship has lost one of its greatest ornaments, and we have lost one who, to us, was more than a friend. He was buried in a very quiet, secluded, and romantic place, that we all love. I am sure he would have wished it. On Monday evening, the 28th of June, we had a terrible storm. On one of the high rocks a mile off his interment. The leader of our Greek and Albanian was shot away almost at the same time. Poor fellow! he died a glorious death."

REDUCTION OF THE AUSTRIAN ARMY. The *Allgemeine Zeitung*, which is always well informed, says the Vienna correspondence tells us that the reductions in the Austrian army will not be 240,000 men, as the first announcement had stated, but only 180,000, and that of these 120,000 are to be principally found in infantry regiments, and the rest in order to have a footing with Prussia, whose regular cavalry and artillery is placed and will be placed on a war footing. The Austrian army, on a general total of 21,500 officers and 300,000 men, will be divided into 60 regiments of grenadiers, amounting to 600 men on a war footing, to be raised to nearly half its strength; and as of the 600 not more than 150,000 are reserves. It is evident that other men are likewise to be raised to complete the effective of the first and second army, which is to consist of corps d'armée in the former down to the Carpathians, having been discovered, as a fine fact not to mention whatever to not, unless, perhaps, Russia be divided into a number of parts, to be master of their forces in the event of a war.

THE speech of Governor Price, of New Jersey and Delaware gives promise of being the large steamer known. Contracts have already been made for the delivery of large quantities of iron from at very low prices.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

THE ABJURATION OATH BILL.

The Earl of DERBY appealed to Lord Lyndhurst to withdraw the bill he had introduced for repealing the Abjuration Oath. The session was drawing to a close, the measure involves the most controverted question respecting the admission of Jews to Parliament, and Government, some time since stated, in the other House, that they did not intend to revive the subject this year.

Lord LYNDHURST declined to abandon his bill, to which he intimated he has obtained the assent of Ministers.

Lord GRANVILLE corroborated that statement and, after some further conversation, the second reading of the bill was fixed for Tuesday next, the 17th instant.

THE IRISH CATHOLIC BISHOPS.

The Earl of WINCHILSEA renewed his complaint that illegal titles have been assumed to certain Irish Roman Catholic Bishops in a letter lately presented by the Maynooth Inquiry Commissioners. He moved a resolution declaring that the recognition of these ecclesiastical titles was a direct violation of the Catholic Emancipation Act, and offering an amended copy of the Report, with the objectionable words omitted, should be laid on the table. After some conversation, in the course of which it was stated that the Government had taken steps to consult the Earl of Winchilsea reluctantly consented to withdraw his motion.

HOUSE OF COMMONS.—MONDAY.

MR. ROEBUCK'S MOTION.

Mr. ROEBUCK gave notice that he should move on Tuesday evening for a call of the House on the 17th inst., the day fixed for the discussion of his motion respecting the conduct of the war.

Mr. H. ANDERSON, on behalf of Mr. S. Anstey, gave notice of his intention to propose, as an amendment to Mr. Roebuck's motion, a resolution declaring that the policy which determined the expedition to Sebastopol was bold and magnificent in its conception, and commensurate with the objects of the war; and that perseverance in that policy offered the most certain prospect of an honourable and permanent peace.

THE AUSTRIAN PROPOSITIONS.

Viscount PALMERSTON, in reply to Mr. Gibson, said her Majesty's Government had determined to lay upon the table the whole correspondence bearing upon the proposal of Austria. It was in preparation, and he hoped that in the course of a couple of days at all events he could be able to lay it before the House.

EXCHANGE OF PRISONERS.

Mr. PEEL, in reply to Mr. Crauford, respecting exchange of prisoners, said a proposal had been made through the Danish Government to the Court of St. Petersburg, and that proposal had been favourably received. The question of a general exchange of English and French against Russian prisoners was in the hands of a committee of English and French officers, now sitting in Paris.

THE RIOT AT THE WEST-END.

Mr. LIDDELL wished to put a question to the right hon. gentleman the Secretary of State for the Home Department, of which, however, he had given him notice. He understood that in case of outrages being committed in this country there was a power given of claiming compensation from the hundred in which such outrages had occurred. He wished to ask, in the case of injury to property within the City of Westminster having been effected by a riotous assembly of persons, encouraged by the speech of one of the members of that House—(Order)—

The SPEAKER was understood to say that the hon gentleman must withdraw the blame of those proceedings upon any speech made by a member of the House.

Mr. LIDDELL would withdraw those words, as he was told from the chair that they are not Parliamentary; and he would put his question without them. He wished to know, in case of injury to property within the City of Westminster

EXPLANATION.
NOTE – The principal epochs in the History from the foundation and consequent enlargement of the Russian Empire are shown in the Map and Traced as follows –
Grand Dukedom or Principality of Moscow (Moscovy), at the commencement of the 15th Century.
Extent of Russia at the Accession of Peter the Great 1682.
Acquisitions from Poland since the Peace of Oliva 1660.
from Sweden since 1721.
from Turkey and the Khan of the Crimea since 1783
from Persia since the middle of the 18th Century.
from Tartary and other eastern Tribes.
Districts maintaining their Independance (Circassia &c.)
English Miles 69.15 = 1 Degree.
NOTE – The Governments and Provinces are called after the names of Places shown in the Map and underlined thus o Samara
The Great Divisions of Russia are shown thus EASTERN RUSSIA

THE GROWTH AND ENCROACHMENTS OF RUSSIA.

THIS is an historical map. It not only gives the situation and dimensions, but the past career, of a country—presenting you with the scene and also with the story which belongs to the scene—both of these simultaneously, both of them clearly, and all the parts of each in the same single view. It is a very singular idea, and produces a singular effect upon the mind. To a man of business, a man of rapid life, of hurries, of active and multiplied engagements, such a contrivance is of sensible value; and we only hope that the principle will be further applied, and that all the chief empires of the earth may be thus treated. Of course, but a very general and massed conception of the country's antecedents could be derived from this process, if not preceded by others: nobody, in fact, would trust to such a process for learning a nation's history, but to be refreshed in the recollection of that history, and to be provided with a convenient and ready handed reference to the dates, names of treaties, leading facts, and to a number of circumstances calculated instantaneously to recall the rest to the mind: this is a truly excellent expedient, the profit of which anybody, however learned, might experience. The historical matter is necessarily, a mere compendium, and it is not in a compendium we would first study the records of a powerful State. A compendium, however, has its own uses, and among them is that of fixing safely in the memory what has been previously investigated more at large. It would be a poor substitute for more particular chronicles, but it is an admirable aid to them. Nor does an ordinary compendium afford a just or adequate illustration of the advantages of the map before us: even in its more purely historical ingredients. For a compendium is all vague confusion to the eye, and exacts from the mind incessant attention to distribute each fact in its due home, so to say, under pain of either forgetting it or confounding it with others. But here we are not so much told of the order of events as made to see it, in short, one of the fundamental requisites of mnemonics is fulfilled by the location of the occurrence with the theatre of it. Every incident has at once its "local habitation" as well as its "name," and the well known lines are peculiarly appropriate—

Segnius irritant animos demissa per aures,
Quam quæ sunt oculis subjecta fidelibus.

We must bear in mind that these advantages are pure surplusage, and that all the purposes which we expect an ordinary map to subserve are at the same time secured, so that while this chart is truly "a map and something more," it is a very good map meantime. By its means we may make our mental journey through *time* as well as through *place*; it addresses the mind as much as the eye. That is its grand feature.

We have said that the effect is rather singular. So far as the chart partakes of the nature of a record, it reminds the scholar, when he unrolls it, of the manner in which the ancients were obliged to read their books. When Milo, then at Marseilles, received the pamphlet containing the speech which Cicero *had intended* to pronounce in his defence, he had to spread the work before him, as we, such an historical chart. The ancients perused their books in a form which we have retained exclusively for plans and representations whether topographic or pictorial, and it is only when these last, as in the case before us, besides seeming to scan, furnish matter to *read*, and that matter becomes a chief and primary characteristic of the publication, that we are practically reminded of the now obsolete appearance of pristine libraries, before the printed page began to govern mankind.

Perhaps it would have complimented Mr Bowen's Map of Russia had he really fulfilled to the letter the promise of his title; perhaps, had he really shown "*Russia's earliest extent*," and *all* its subsequent encroachments, down to its present boundary, he would have turned out his chart one vast indistinguishable blot before our eyes. But the fact remains that, much as he has performed, and noble as his publication is in the extent to which he has combined the character of a commodious topographic plan with the advantages of an historic compendium, he has *not here* shown us Russia's "earliest extent," nor its numerous preliminary revolutions. Long before the Dukedom of Moscow or Muscovy, a Russian State flourished there and around it, and, anterior to this Russian state, there existed an extensive, if not a great, empire, and an equally great republic, with Novogorod for their metropolis. The annals of the map commence with the fifteenth century; and will it be said, then, that it depicts the earliest extent or a dominion which exercised its sway ere the first Crusades, ere Godfrey de Bouillon had refused the Royal Crown of Jerusalem, or had left his nursery? Let us glance back at what the chart overleaps in silence.

In exceedingly remote times there was a Finnish empire in the heart of European Russia, and Novogorod Wilkii, or New Town the Great, has superseded its primitive seat of Government, if it stands not on its very ground. This empire traded with Armenia, with Persia, and even with India, as many old Arabic coins and monuments attest, and all that prosperity now departed, all that glory now extinct, belonged to a period when ancient Gaul was not yet definitively ravished from the relaxing grasp of the first empire of the West. Later, in the ninth and tenth centuries when the Northmen were pouring down upon the dominions of the earlier kings of France, the Varangian Rossi and other kindred Scandinavians took an eastward turn in their descents, and conquered Novogorod the Great, which had already passed from the Finns to their masters the Slavonians. Ruric, a Varangian "*Ross*," was founder of the most enduring of the names by which the inhabitants have been hence forth known the "*Russians*." And now, when the new blood had warmed them into a more warlike people, we come to their audacious and immense forays into the dependencies of the Lower Empire, up to the very walls of Byzantium from which they carried back the Greek alphabet, Greek usages, and the Greek theology. Under Yaroslaf, who has bequeathed his name to a town, the rising

race appear with his code, a regular system of statute law; and then extends before us a well-ascertained and, surely, a long career of history, from the eleventh to the fifteenth century, during which Novogorod, a member of the Hanseatic League, a commercial emporium of high importance, a centre for the supply of Asia and Europe, a free city, and the mistress of a powerful and busy State, maintained no mean character and played no insignificant part in human destinies. Why, we hesitate not to say that the portion of annals omitted in Mr. Dower's map transcends in magnitude the portion supplied; only that, of course, the period passed tacitly over being more remote from us may be less interesting to the present generation. Exactly so; but why say of the map that it shows Russia's "earliest extent," when this is not the case? It would be a sufficiently large attraction to state the exact truth, that it displays Russia as Russia was at the end of the fourteenth century, and in the various stages of her subsequent progress and development

The confusion results from this, that a revolution which suddenly set Muscovy above Russia is taken as the starting-point of Russian history. In reality, this was like the conquest of China by the Tartars,—the conquerors accepting the language, the customs, the laws, and the religion of the conquered, who immediately obtained a social, moral, and political predominance, never afterwards subverted, although modified by the introduction of Germans, their instalment in all high offices, and their matrimonial or dynastic subjugation and retention of the throne With this last silent and gradual colouring, rather than revolution, we have nothing to do here. It resembles what Mr. Disraeli calls the "Danish invasion" of England.

The map begins chronologically, far down, indeed, in the history of Russia, at the epoch when Muscovy won that Tartar advantage and underwent that Chinese defeat of which we just now spoke. In the second half of the fifteenth century, Ivan, titled Grand Duke of that name in Moscow, and afterwards first Czar, rose against Novogorod with success; and on the 27th of January, by the correct reckoning, in the year 1478, the glory, and the sceptre and the power, and all the regalia, and the treasures passed away from that ancient place of sway, and were formally deposited in Moscow. The silver, the gold, and the precious stones filled three hundred carts in their conveyance. But Novogorod, although despoiled and mourning like a widow, still retained some life and renown, for above two hundred years. Then, Ivan the Fourth held therein a more "bloody seize" than that known in our own history by the name; and in five weeks put to death, in cold blood, 40,000 innocent human beings, and sacked and ravaged and destroyed all that remained of their ancient opulence and splendour. Novogorod never recovered that fearful carnage, or that unsparing spoliation, and even now some six thousand oppressed and impoverished people creep about amid the scene which once echoed with the footsteps and the revels and the voices of half a million flourishing artizans and enlightened freemen in a princely community.

But, although the title of the Map, if strictly taken by what the Map contains, is found to be somewhat too comprehensive; yet this is only a modern matter, and to our reasoning. In the first place, the point involved is merely a point of degree, not of principle—the new principle implied in the title of the Map being most signally and brilliantly exemplified even the date 1600 down to that of 1855. In the next place, this great boon being conferred on the purchaser, and the announced principle being fairly carried out, the error which mis-states the extent to which the principle is carried out, becomes merely clerical. It can be remedied even in the present Map without touching the essence or substance of the design in any way. Still it was necessary for us to point out this little inaccuracy of execution, this want of complete correspondence between promise and execution. Having discharged our duty without mincing it in any great measure, we proceed with our narrative.

Under the Czars Russia grew steadily, crushing her successive acquisitions into a homogeneous empire, and the map before us depicts the result as it stood at the next decisive epoch the accession of Peter the Great, in 1682—after the lapse of another century. At that time, as the map shows us with accuracy, Russia was still a very second-rate power. Europe, unequal to several which have since either disappeared altogether, like Iceland, or, without disappearing, have yielded to the general spoliation of their fairest possessions, and can no longer contend with her single-handed as of old. We see all this in the map, with the exception of each part of the progressive booty duly marked; while the territory transferred is differently shaded, to enable the reader to keep in mind, from instance, the districts from which the temple Jagellons led the chivalry of Poland to the very walls of Moscow; or those which Charles the Twelfth, the knights, but acknowledged not yet the Russian Hercules—with the twenty provinces had passed indeed into the power of the Teutonic Livonia, Courland, and the whole of Lithuania, to Poland. as well as Volhynia and Podolia; while Turkey contained to hold sway over Bessarabia, Ekaterinoslaw, Kherson, the Don Cossacks, and at least as Suzerain—over the Crimea. The Crimea was free, nominally truth, have certain parts of it ever been subdued, either in ancient or in modern ages. From the time of Cimon and Darius to the time of Abdul-Medjid these regions have afforded a disputed and a beleaguered, but an unstormed, refuge to liberty and independence. The negotiations from these various quarters, with the dates of the transition, and a note from whom they were respectively wrested, are all marked on this useful map. It conveys to the eye a prodigious spectacle of the volcanic restlessness of the central power which thus on every side—literally all round—is in circumference—overflowed in torrents of ravage. The aggressions are seen to be positively circular. Independently, therefore, of any attraction from without, there must have been an inherent propulsion from within. No explanations will suffice, if they would try to account for these aggressions by merely citing the temptations which natural wealth offers to rapid cupidity. The bleak tracts of Finland are apparently as alluring to this grand imperial organisation of the Russian as the sunny and pleasant provinces of Persia, which are appropriated by war and treaty in our own century with the same steady spirit of rapine no greater eagerness being shown in the one case than in the other. In fact, from a very remote period there seems to be neither a more violent nor a less violent principle of depredation actuating the Russian policy. He who history reveals the instinct of prey, and aggression is the most perceptible law of its nature. Of this, just as good an illustration could be derived from the acquisition of Essen, marked in the present map 1552, of Astrakan (1554), of Tobolsk (1677), as from the stipulations of Turkmanchai and Chuta Lavan (1820), or of Gulistan (1814), on the further confines of Armenia.

The three Monarchs who have most added to the empire are Peter the Great, the infamous Catherine II., and the late Emperor Nicholas. Alexander I., on the whole, rather consolidated than increased the territories of his predecessors and of the three others. Catherine, by means of the two partitions of Poland (1772 and 1793) may claim to have made as rich an instalment in point contributions. The time of both partitions, and the particular districts which changed hands on each occasion, are set forth in the map, corresponding with the first Polish partition, the reader perceives more to the south and almost contemporary date, 1774, granted over a dark belt, in which is mapped the country between part of Russia, partly Tartar—of Ekaterinoslaw, Kherson, and the Don. A little below he sees the same date 1768 recorded across what were then Crim-Tartary and Circassia; but the new are Crimea and Taurida respectively. Bessarabia is not all appropriated at the same time, nor under the same title. After the Treaty of Kainardji, in point of time, which treaty is marked somewhat in the regions just mentioned, from the river Dnieper to the Caspian Sea, we plunge into another treacherous looking type, the words "Treaty of Jassy, 1792." Then pass further west, into Bessarabia proper, and also into another reign, and behold, we notice, running at right angles with the Danube, the printed memorandum, "Treaty of Bucharest, 1812." More north we fall back again just twenty years into the second partition of Poland, 1792

Thus we see in this admirable method of topography not only where a region is, and to whom it now belongs, but to whom it belonged of old, and when it either ceased to be independent nor changed its allegiance.

It is very curious that the late General Aide-de-Camp description has been much accelerated since the destruction of the municipal law to which Russia, at least in her nobility, once exercised. Three more absolutely devilish sovereigns, than the three who made the circumnavigation round her enormous dominions, could never be conceived, nor would never be ideal. And, while the best of the three, Alexander, was the least to the Empire, the worst of the three, Catherine, was also the most successful and the most extensive marauder. She not only divided with enthusiastic profit the spoils of Poland, but incorporated those important southern regions we have mentioned, including the Crimea. These she made her famous tour of illusion, in which, at each stage of her progress, the still and desolate steppes were, of beautiful villages which did not exist, smiling gardens, and enchanting appearances of fertile scenery were fabricated by Potemkin to create upon the salt marsh and the unpeopled steppe the likeness of a fairy and an abundance of which that newly-gained territory was notoriously quite devoid. The apparition of a more vile spectacle was made to stand between the eyes of Potemkin's crowned mistress and the treasonable act of her conquest. Far different from this transitionary and transitory vision was a peninsula exhibiting under a southern fringe of rich verdure and teeming luxuriance, but, like the apple of the Dead Sea, containing an arid, sterile, and deleterious core. The "Sentinels of the North" was delighted even more with this seeming paradise which stretched away into the Euxine, than with these conquests which seemed to open to her eagles the road of Central Europe.

Altogether a more suggestive, or a more useful map we have not seen; and we only hope, to repeat our former wish, that the plan of it may be more extensively applied. In the present instance geography is made eloquent to us, but gloomily eloquent, as we contemplate the long aisles to which we are accustomed in all other charts, but which here alone remind us at every step who passed that way—telling us of what catastrophes and vicissitudes they have been the scene. The general diorama which moves slowly before the mind's eye, as the physical chart is passed, has a grave significance. It is a funeral procession—a track of calamities and tragedies—a dark progress—the march of shadows and mists, which more and more widely obscure the spots sacred to virtuous fame and freedom, or more and more closely approach the present refuges and sanctuaries of European civilisation.

The design of the publication is, we perceive, worthy of all encouragement and of public; the execution of it is equally entitled to our notice. It is evident that it must be immensely more complicated than an ordinary map with lines and shades. Great simplicity of method and great variety of detail were necessary to prevent this multiplicity of varying signs and tints from perplexing the eye. At a first glance, it really almost seems to the reader as though he should never disentangle that intricate maze of typography; but each moment of survey brings it out more and more clearly, and definitely, in all the distinctness of classification. Each hue is an era; each particular boundary or running border represents some great territorial redistribution: each note and nearly every name are made to recall whole volumes of protocols and long pages of annals.

To an ignorant person, as we said before, this map would not serve its full intention; yet even to him it would at least form, perhaps, the very best guide-book for reading up the deficiencies of his own information. It would suggest what pages of what works, in all the dilatori

THE SILENT MEMBER.—(No. XXV.)

THE amount of business done in the House of Commons bears a relative proportion to the length of the sitting; for a great deal of work is generally got through when a little time is occupied. If we find the morning papers filled with several columns of debate, we may be tolerably sure that few, if any, bills have been forwarded a stage; but, if the Parliamentary report is brief, we may conclude that several measures have been advanced, or that vast sums of money have been voted. In a Committee of Supply it is curious to observe how many thousands of pounds are disposed of in a single line, and even millions do not seem to go a very great way, for a few of them are often comprised within some half-dozen paragraphs.

Parliament is thinning almost every day, and, with a due appreciation of the importance of the private business of its own members, the House of Common s has declined to agree to a proposal to call it together for the consideration of the public interest. Mr Roebuck's motion will, therefore, be made next week, in a House perhaps almost as thin as the opponents of the hon. gentleman could desire. One would imagine that the interest attaching to the subject of debate would ensure a full attendance of members; but Mr. Roebuck cannot trust to the intrinsic attractions of the topic he is about to handle, for he has heard that "attempts have been made to persuade members to leave town" before he brings forward his motion. Who are the parties that are desirous of giving the House of Commons the benefit of country air has not transpired; and indeed—though at elections it has been sometimes customary to carry away those who might give inconvenient votes—it can hardly be credited that members of Parliament would permit themselves to be "smuggled," or sent out of the way, in the same humiliating fashion.

Everybody professes himself a friend of Administrative Reform; but parties are divided as to how this reform is to be effected. The debate the other night on the proposed alterations in making appointments to the civil service elicited a large variety of opinion, which is at present too conflicting to lead to any practical results of a beneficial character. The plan proposed on one hand to confer places on candidates admitted uncondemned to a public competition would be somewhat awkward: for it would require such a building as Exeter-hall to accommodate the competitors, and another building equally large for the friends who would be anxious to look on and see fair play for their respective favourites. This method would certainly offer to the public an enormous amount of choice, without the opportunity of judicious selection. The probability is, that, if the doors were thrown open for the indiscriminate admission of all the world into the public service, it would be found that "fools would rush in" so abundantly that the operation of extracting a needle from a bottle of hay would be simple and easy compared with the task of extracting real merit from the mass of incompetency that would offer its services to the nation. Such a plan would never be adopted by the largest or smallest of ordinary business establishments, and it would be equally impracticable where the service of the public has to be provided for.

One of the great causes of the inefficiency of the public service is the fact that those by whom it is performed are unfairly treated. It may be quite true that many are treated better than they deserve to be; but that only makes the injustice greater towards those whose merits are insufficiently rewarded. The recent abandonment of the promised bill for altering the present oppressive system of superannuation has tended to disheartten many of the civil servants, the hardship of whose case has been allowed by three successive Chancellors of the Exchequer, every one of whom has promised to do something, and every one of whom has faithlessly done nothing. It is but justice to Mr. Disraeli to say that he showed himself to be most in earnest during the short time he held office, and, in all events, the first to admit the justice of a claim which he did not remain long enough in power to satisfy. Mr. Gladstone promised very fairly when in office, and has talked liberally since he quitted the Chancellorship of the Exchequer. But it seems to be the fatal effect of the possession of power that it prevents men from doing writ they see to be the duty of any one else as soon as they themselves have quitted the post to which the duty attaches. No one would seem to be so well qualified to execute the office of a Minister as he who has just quitted place or is on the eve of coming into it. Lord Palmerston was just the man for Prime Minister, according to universal opinion for some time previous to his accession to the Premiership, but since that time the discovery seems to have been made that he is not so fit for the place as was thought to be. If anything should occur to turn him in again, the probability is that, after a reasonable interval, his qualification for the Premiership will reappear, and public acclamation will cut him in again. When Sir George Cornewall Lewis is no longer Chancellor of the Exchequer, he will, if he can spare time from the editorship of the *Edinburgh Review*, be most anxious to do justice to the Civil Service, whose case he now neglects; and it is very possible that he may be among the first to proclaim the unfitness of his successor, on the ground of so many of those very omissions which the honourable Baronet himself had been guilty of.

I lately took occasion to regret the tone and spirit that had been generally adopted with regard to the police; who, as a body, have been somewhat unfairly attacked, on account of the misconduct of a few on the day of the Hyde-park demonstration. Such had been the discouragement thrown on the authorities by the temper exhibited towards them in influential quarters, that the police have been blamed almost as much for being too backward on Sunday last as they were for having been too forward on the Sunday preceding. I pointed out last week the danger that might arise from discouraging those who properly performed their duty by including the whole police force in a censure which, it is to be feared, some of them may have merited. Had they shown themselves on Sunday last it is almost certain that the vagrants who broke the windows at the west end of the town would not have dared to perpetrate the mischief they committed. This mischief was not confined to the breaking of windows, for I know of more than one instance in which alarm and excitement caused the most serious consequences to some of those whose property and personal safety had been threatened. It is quite right that the guilty should be punished, but it is equally desirable that those to whom we are indebted for the preservation of the public peace should not be sacrificed to an indiscriminating "cry," and be, as it were, intimidated into a reluctance to show themselves where their services are wanted, lest they should be charged with provoking, through their presence alone, the disturbances it is their duty to prevent or to pacify.

The Sunday Beer Act is on its trial before a Committee of the House of Commons, where, among other witnesses, several metropolitan police magistrates have been examined. It seems rather unfair to ask those gentlemen to define a "traveller," and, indeed, the definition should rather come from the Committee itself, which forms part of the Legislature by which the word was used, and members therefore are, or ought to be, the best judges of its meaning. That the Act is felt as a grievance there can be no doubt; but yet it is alleged on what seems good authority that it has greatly curtailed the amount of drunkenness. Such, at least, is, perhaps, come out when the police authorities are examined as to the number of charges that have been taken at the different station-houses before and since the Act came into operation. The fact, however, will not affect the principle that the use of anything ought not to be prohibited because its abuse is possible. It may be all very well to ask magistrates and others what they would propose to do as a remedy for the evil of drunkenness, but with all due deference be it said, —it is the business of the Legislature to find remedies for social evils, without restricting the reasonable enjoments of the community, and it is the business of the magistrates to administer the laws, and not by any means to tell the Legislature what laws ought to be enacted.

CHESS

TO CORRESPONDENTS.

T. T. T. Problem received.

J. P. Problem received.

W. C. C., Liverpool.—To save time we believe, be solved in four moves each, if White has the best of it.

J. M., Manchester.—If a player by moving any piece leaves his King in check, he is bound to do one thing or the other, and then to play his King's move, provided it will again be legally allowed. You are the sixty-fourth sufficiently studious!

J. C. C., Ilsley.—We will read your letter with K to Q B 3rd, mating next move.

G. T., Dorton.—Thanks. The games are now out of print.

A Member of the Manchester Chess Club.—In the position of your match Black can win by playing Q to Q B 3rd, and if White play as you suggest Black may give check with his Rook at 8, and win next move, for if, then, White must play K to Q B 2nd, and Black can give check with Queen at Q B 3rd, and win the Rook.

W. Mac.—The problem shall be inserted on next week.

Alpha.—The games between Messrs. De Rivière and La Roche should be continued by correspondence.

J. J. J.—We are somewhat depressed at this moment by the multiplicity of games despatched to us. In addition to the numerous contests of the Leamington Meeting there are the remaining games between MM. La Roche and De Rivière, the great battle played between the latter and the great German player, Von Heydebrand der Lasa, the match between the Man Leamington and Liverpool Clubs, besides a host of minor games. It is impossible, therefore, to find room for more than a few specimens of each match; but we will endeavour to find room for the communications enclosed in a day or two.

ANSWER TO PROBLEM No. 58.

If well made by Le Lyttenton, and by the Rev. Mr. Moor of Bramham, as also the following:—

1. Q to Q B 3rd, and mates next move.

GAME BETWEEN MESSRS. DE RIVIÈRE AND LA ROCHE.

(Remove Pawns and Pieces.)

WHITE (Mr. De Rivière). BLACK (M. La Roche).

1. P to K 4th. P to K 4th.
2. Kt to K B 3rd. Kt to Q B 3rd.
3. B to Q B 4th. B to Q B 4th.
4. P to Q 3rd. P to Q 3rd.
5. B to K Kt 5th. B to K Kt 5th.
6. P to Q R 3rd. P to Q R 3rd.
7. B to K R 4th. B to K R 4th.
8. P to Q Kt 4th. P to Q Kt 4th.
9. P to Q B 5th. P to Q B 5th.
10. Kt to K 2nd. Kt to K 2nd.
11. Kt to Q 3rd. Kt to Q 3rd.
12. P to K B 4th. P to K B 4th.
13. P to K 5th. P to K 5th.
14. P to K Kt 3rd. P to K Kt 3rd.
15. P to K R 3rd. P to K R 3rd.
16. Kt to K 2nd. Kt to K 2nd.
17. Kt to K B 3rd. Kt to K B 3rd.
18. Kt to K 2nd. Kt to K 2nd.
19. Kt to K B 3rd. Kt to K B 3rd.
20. Kt to K 2nd. Kt to K 2nd.
21. Kt to Q 4th. Kt to K B 3rd.
22. K R to Q sq. B to K Kt 4th (*a*)
23. K R to Q B sq. P to Q Kt 3rd.
24. K R takes Q B P. B to K Kt 3rd.
25. Q R to Q B sq. Kt to K 5th.
26. Q to K R 4th. Q R to Q sq (*b*)
27. B takes Q R P. Q takes Q B P.
28. B to Q Kt 6th. Q R to Q 2nd.
29. Q to B 4th. R takes R.
30. R takes R. B to K B 2nd.
31. B to Q 4th. B to Q 4th (*a*)
32. B to K 5th. R to K B 2nd.
33. R to B 8th (*ch*). B to K B sq.
34. R to Q B 7th. B to K B 3rd
35. P to Q K 5th. Q to Q Kt 3rd.
P to Q Kt 6th. R to Q Kt sq.
P to K R 3rd. P to K R 3rd.
Q to B 6th. Q to Q 3rd.
R to B 2nd. Q takes Q (*a*)
Kt to Q 7th.

And in a few more moves the game was abandoned as a drawn battle.

(*a*) The closing [illegible] played, as the was, before a numerous and strong body of amateurs in the adjacent rooms. These players were not, of course, aware of every hidden point, but, as all the games were open, as the consultations were, and would have been in fact by some amateur, the spectators, as few were long in the room, and, moreover, as they knew, would have been very much on a par with each of the players, [illegible]

(*b*) As suggested by Mr. Staunton, which seriously crippled Black's forces, and seems to keep them benefit for a long time.

(*c*) If they taken the preferred Pawn it would have compromised their Game materially:—

8. Q to Q Kt 3rd	K R takes Q B P	8. Q takes B	P to Q R 4th
9. Q to K 3rd	P to Q Kt 5th (*ext*)	9. Q to Q B 3rd	Q to K 2nd
10. Q to K 3rd	P to Q Kt 6th	10. B to Q 3rd.	

(If they extract the Bishop a White takes the [illegible] And Black have a very bad position.

(*d*) Mr. De Rivière recommended this call of this weak step, that they should [illegible] would be [illegible] but he was overruled.

(*e*) Very good play. [illegible] White.

(*f*) The best of expedients. [illegible] Book appear to have thought this Pawn could not be [illegible] and [illegible]

(*g*) We were assuming that [illegible] have been! they could now [illegible] Pawn with [illegible] Bishop, and if the Bishop were captured, and if why the [illegible] Pawn would [illegible] Bishop, and if the Bishop were captured, and if why the [illegible] Pawn would [illegible] Bishop, and if the Bishop were captured, and if why the [illegible]

(*h*) Up to this move out. White has been [illegible] after winning two Pawns, and apparently much the better game. [illegible] Mr. Staunton, that ought to move or a win was [illegible] Mr. Staunton, that ought to move or a win was [illegible] Mr. Staunton, that ought to move or a win was

"COLLECTING THE OFFERING IN A SCOTCH KIRK."—PAINTED BY J. PHILLIP.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

and, no doubt, Mr. Markland is now in a position to make many important additions to his paper. We will add an anecdote which Mr. Gilbert's picture has brought to our recollection. Some 120 years ago—the exact day was the 3rd January, 1725—King George I landed at Rye, in Sussex, on his way to London, from one of his visits to his Hanoverian dominions. He was impatient to return to St. James's, but six days had to pass before he was enabled to reach London. There had been a heavy fall of snow. The road from Rye being mostly raised between ditches the road was barely visible, and it was not till the 7th that the snow had been sufficiently cleared "to make his Majesty's passage safe." King George I. was then two days on the road from Rye to London. From Rye to London is now an easy stage—three hours, winter or summer.

COLLECTING THE OFFERING IN A SCOTCH KIRK

FROM THE ROYAL ACADEMY EXHIBITION

In the Middle room of the Exhibition of the Royal Academy is a clever picture by Mr. [illegible] representing the Offering in a Scotch kirk, with the appropriate motto, "Give, and ye shall receive." It is one of four pictures contributed by an artist who has of late years made several successful strides to additional distinction in his walk of Art.

This Picture we have engraved for our Paper this week. It is in many respects essentially Scottish. There is a North-of-the Tweed look about the leading persons in the congregation; and the "decent basin" of the English Church is characteristically represented in the "long ladle" which the reverend elder extends to "Grannie," and the young mother is so charmingly teaching her youngest born to comprehend and remember. The boy in the foreground of the composition is a little too lazy in attitude for the strict observances of the Kirk; but, viewed artistically, there is no fault to be found with his position. The whole picture exhibits great observation of life, conveyed with a ready and faithful pencil, and—no light merit—a fine eye for colour.

"THE STAGE-COACH OF THE LAST CENTURY."—PAINTED BY JOHN GILBERT.—FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS.

NEW BOOKS, &c.

THE COMIC TIMES. Price One Penny Published Every Week. Office, 1, Crane-court, Fleet-street.

Just published, 2s. with patent, 1s. with cloth boards,
A GUIDE to the ISLAND of JERSEY: with a short account of its Natural History, &c. &c. Also a more detailed account of its Antiquities, Jersey Dialect, La Langue Normande, &c. Post free, 13 stamps. Office, 13, Hatton-garden.

Just published, in 8vo, price 1s.
POETICAL ENIGMAS, by FRED. J. WAY, Esq. With Answers and Explanations. Suitable for reading, especially in the evening. A real amusement for all Railways. Sent post free, cloth, for 14 stamps. London: Darton and Co., 58, Holborn-hill.

Just published, price 1s. 6d.
GEOLOGY SIMPLIFIED AND POPULARIZED, with Illustrations, INTRODUCTORY TEXT-BOOK of GEOLOGY. By DAVID PAGE, F.G.S. Author of a Text-book on Mineralogy, &c. Adam and Charles Black, Edinburgh and London

By the Author, 12 stamps.
THE SCHOOLMASTER at HOME. Errors to be Avoided and Methods to be Followed in Teaching, with Numerous Illustrations, Practical and Theoretical. A New and Improved Edition. Words of similar sound Distinguished. London: James Cornish, 26, Paternoster-row.

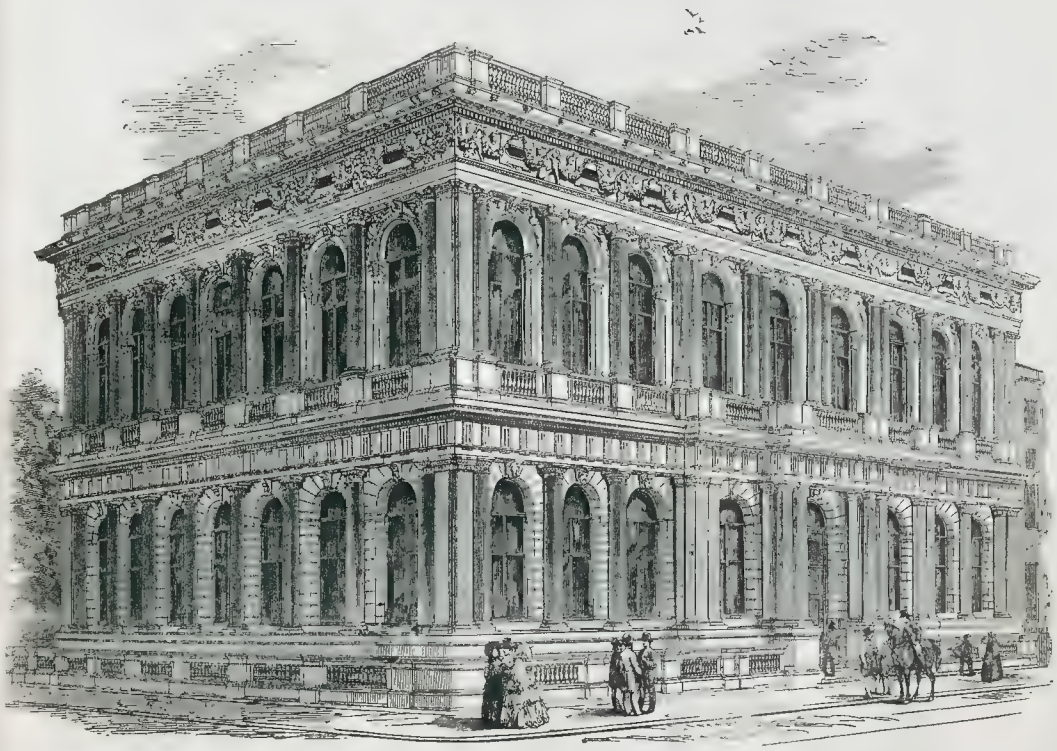
THE MINISTRY.

As we last week anticipated, Lord John Russell has ceased to be a member of the Ministry. It does not appear, however, that any sense of his own unfitness—any knowledge or appreciation of the fact that he had outraged the public feeling—led him to resign office. Neither does it appear, from his own explanations or those of Lord Palmerston, that his colleagues were in any way scandalised by his companionship, or conscious of their weakness in having in their councils, while carrying on the war, a man who thought and declared that his country had rejected fair and reasonable proposals of peace. Had there been silence in Parliament and in the press; had public opinion not declared itself in loud and unmistakable terms against such cravens in council—such palterers with the honour of a great nation; had not such men as Sir Bulwer Lytton on one side of the House, and Mr. Roebuck on the other, spoken bravely out, and called for the deliberate opinion of the Legislature, it is most probable that Lord John Russell would still have been in office. The Ministerial explanations of Monday night show that his colleagues, in spite of his unseemly bewilderment on a plain question of duty, were quite content that he should share their councils. Nay, more than this had not several subordinate members of the Government declared their intention to vote with the Opposition on Sir Bulwer Lytton's motion, it is doubtful whether the Ministerial conscience would have sufficiently awakened to the fact that Lord John Russell had not only damaged himself, but was damaging them. They would have hobbled on with their rotten limb, unconscious that they were lame; and when they stumbled would have blamed the stones against which they fell, and not their own incapacity to run the race. The names of those honest servants will be honourably remembered, although a cry has been raised against them for their insubordination to their chiefs, in daring to speak the truth in a critical emergency. But they have done the State good service, and can afford to despise factious and sectional animosity, and throw back upon Lord John Russell the contempt which he has been pleased to affect toward them.

Let us hope that the country has seen and heard the last of Lord John Russell, as a Minister of State and a leader of the House of Commons. In the House of Peers he may yet find a retreat, at the side of Lord Monteagle, Lord Broughton, and other ex-Ministers. In the cold shadow of his faded glory he may continue to raise his voice on such questions of domestic policy as he has most deeply studied; but from a more active career, and a more responsible position, it is necessary to his own fame, and to his country's welfare and honour, that he should hold, or be kept aloof. Rich and powerful as England is, she cannot afford to have such men in her councils. There is, however, such a vitality about his vanity; such a pertinacity about his rashness and presumption; and such a hopeless jumble among the Parliamentary parties amongst whom the Queen must look for her Ministers, that Lord John Russell, damaged as he is, may yet emerge from the slough of disgrace into which he has fallen, and aspire to be the leader of Senates and the master of Governments. But, if so, there will indeed be a dearth of statesmanship amongst us; and we shall have to undergo much suffering and humiliation before a new race of statesmen shall arise to vindicate the national honour, so sorely compromised by the effete cripples of our Parliamentary arena, and the national fame, so dimmed in its lustre by the blundering incapacity of pedagogues and pragmatics, by the cowardice of *doctrinaires*, or by the treachery—most dangerous of all treacheries, because the most difficult to be foreseen and averted—that springs from weakness of character and intellect rather than from dishonesty o. purpose.

We doubt, however, whether Lord John Russell's retirement will be sufficient to restore the confidence which the country once felt in the Administration of Lord Palmerston. The people of all ranks and classes, with the intuition of common sense and honesty, feel that the War is a business which requires the undivided thoughts



THE CARLTON NEW CLUB-HOUSE, PALL-MALL.—(SEE NEXT PAGE.)

and concentrated energies of the whole nation. All other questions sink into insignificance and nothingness before it. Public opinion on this question has been sound and wholesome from the first. There is, and has been, no wavering, no mistake, no faintheartedness anywhere; unless it be among a few Quakers and members of the Legislature, and a few members of the late, and possibly of the present, Ministry. It is on the latter point that the country requires, and must have, still futher satisfaction than Lord John Russell or Lord Palmerston has condescended to afford. It does not fear Quakers, or individual members of Parliament; but it does fear to see the friends of an illusory and precarious peace in the high places of the Ministry. It lavishes its blood and its treasure, and objects to no sacrifice that shall secure, or help to secure, the signal defeat and humiliation of Russia; not because it hates Russia or loves war, or indulges in vain and wicked dreams of military glory and aggrandisement, but because it knows there is no hope of peace being durable if it be concluded without the effectual punishment of the Power whose reckless and insatiable ambition keeps the world in a flame. Lord Palmerston may be the very man that the country requires; his colleagues may be all that the most ardent patriotism may desire; and may be destined, as we most earnestly hope they are, to secure, by the defeat of Russia, a peace that shall last for half a century at the least; but the events of the last two years have shaken confidence in them, and in all the public men who have held office during the interval. Nor is this want of confidence surprising, when the mismanagement of the Crimean expedition, under the Government of Lord Aberdeen, and the secession from the present Ministry of no less than four distinguished statesmen, and the causes which led to it, are recalled to the public mind. The Crimean mismanagement was deplorable and disgraceful; but has been stopped, if not remedied; but what shall stop the discouragement and the disgust that are excited, when men, once so trusted as Sir James Graham, Mr. Sidney Herbert, Mr. Gladstone, and, greater and more trusted than all of these, Lord John Russell, prove out of their own mouths that, when they were Ministers charged with the conduct of a great war, they disapproved of its continuance? Lord Palmerston must be made to speak out, not with rant and undignified passion, as on Monday night; but with the calm dignity befitting the occasion; and the Parliament, before the close of the Session, must give the whole Ministry the opportunity of setting itself right with the people. It is useless to conceal the fact that great distrust prevails, and that though Lord Palmerston may be whitewashed by factions who dislike each other, but who dislike with greater intensity the prospect of a dissolution of Parliament, he will not be absolved by the country, until some satisfactory assurance be given that, with Lord John Russell, the last of the cravens and waverers has been ejected from the councils of the Sovereign. The public mind must be satisfactorily assured that no secret pro-Russian and pro-Austrian directs in any Ministerial function the conduct of one of the greatest and most momentous wars ever waged by any nation in ancient or modern times. A change of Ministry and a dissolution of Parliament would doubtless be inconvenient; but neither of them is so mighty an evil as to make the country prefer dishonour to the annoyance and evil of the change. The worst and most pernicious of all evils, at the present time, is the evil of divided councils. The honour of the nation is at stake and, with its honour, its existence as a leading Power in the European system. The country knows this; and heavy is the responsibility, and condign will be the punishment, of any Ministry that shall not be equally well convinced of it.

THE CARLTON NEW CLUB-HOUSE, PALL-MALL.

NEARLY two centuries have rolled away since Pall-mall become a locality for club houses. There is no street in London which has been more celebrated for its taverns, whereat clubs were held before the members built for themselves a local habitation which has been properly enough named a club-house. Pepys, under the 26th of July, 1660, says:—"We went to Woods' at the Pell-Mell (our old house for clubbing), and there spent till ten at night." This is, as Mr. Cunningham observes, one of the earliest uses of the word "clubbing" in its modern signification. The oldest existing mansion in Pall-mall used by a club, we believe, to be No. 86, the Ordnance office, originally built for Edward, Duke of York, brother of George III., and subsequently a subscription club-house, called the Albion Hotel. (See "Curosities of London," page 577).

Here, upon what Captain Morris called "the sweet shady side of Pall-mall," has been erected a range of club palaces, which, from their grandeur of design and richness of ornamentation, have given the street a patrician air. Here, westward of the Reform Club-house, is nearly completed a magnificent new mansion for the Carlton Club. This is strictly a politica. club, and was founded by the late Duke of Wellington and a few of his political friends, in 1831 (a year of stormy politics), when the Club first set up in Charles-street, St. James's. Next to it remained to Lord Kensington's house in Carlton-gardens; and in 1836 Sir Robert Smirke built for the Club a new house, of poor Grecian design; to which, in 1846, an addition was made by Mr. Sydney Smirke. Eight years later the original Club-house was taken down, and to the new wing built by Mr. Smirke, he has added a centre and another wing, the entire design presenting a façade of 180 feet. While the first Club-house remained untouched by the side of the finished portion of its successor, it strongly exemplified the revolution which in a few years had taken place in architectural taste, "from the affectation of Grecism to the adoption of highly florid Italianism."

The new building, as we now see it, completed externally, is, with some few variations, a facsimile of Sansovino's Library of St. Mark, at Venice; "a work," observes a judicious critic in "Weale's London," "whose celebrity converts into admiration the censure that this imitation of it would, were it an original composition, else incur for the monstrousness of its proportions, and violation of all orthodoxy and rule: nothing less monstrous, in fact, can the Ionic, or upper order, be pronounced, if it be tested by ordinary rules, especially as it is considerably more ponderous than than that of the Doric order below." Another architectural critic condemns this adaptation of Sansovino's work as "not creditable to English art, or even politic as to intended effect. Some of the best features are omitted in the copy, and, of course, any defects that there are become doubly reprehensible in the work of a copyist."

In the Club-house facade, Sansovino's design is extended, to nine intercolumns, or compartments, instead of three, and broken into three divi-ions, each having three windows on a floor. The centre division is made wider than the other two, by the columns being there coupled. One unavoidable deviation from the original is that, instead of forming an open arcade below, the arches on the ground floor, or Doric order, are filled in with windows the same as in the upper order—an alteration requisite to adapt the design to its new purpose. In the original, both orders are nearly alike rich in their ornamentation; here, in the Doric floors, the metope sculptures, the moulded archivolts of the arcades, and the spandril figures, are omitted. The slightly-projecting portico is also a departure from the original design. The shafts of the columns and pilasters are of polished Peterhead granite. The carving throughout has been executed by Mr. John Thomas, and remarkable for its bold and rich character.

We have engraved the entrance-front of the Club-house in Pall-mall, and the flank. In the garden-front pilasters take the place of columns in the front and flank, and are of the same material—polished Peterhead granite.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

AN old saying bids us not holla till we are out of the wood. Ten days ago we were rejoicing over the arrival of summer, basking in the sunshine, despising our umbrellas, altogether bearing ourselves with that absurd security that mankind or womankind is so extremely inclined to adopt when it finds itself endowed with a little prosperity. Now our experience might have proved to us that all this was very ridiculous; that summer now-a-days has no season residence anywhere; that railways and other travelling accommodations have giving her a love of gadding; and that, like the rest of the world, she likes to go about wherever there is a chance of seeing anything new. Accordingly, no sooner does London, Paris, Vienna, Berlin welcome her, rejoice in her arrival, sing her praises, prepare fêtes in her honour, than, laughing in her sleeve, the *capricieuse* packs her portmanteau, and is off, leaving her adorers to cast off their *habits de fête*, and to resume clogs and coutchoucs, paletôts and parapluies. At present she has left us as a substitute a sort of cross between March and April. Like the weather in the vocabulary books, *il tonne, il pleut, il fait beau, il fait froid, il fait du vent, il fait chaud*, all in the course of the twenty-four hours a state of things which requires those who venture forth to brave the elements to adopt a style of costume like that made use of by the riders in circuses, where, at a moment's notice, the unfastening of a button, the untying of a string, suddenly presents the individual in a new individuality suited to the circumstances and occasions, and the Odalisque becomes a Cossack, the Esquimaux emerges an Egyptian, accordingly as wintry winds or summer sunshine gains a momentary pre cminence.

But enough, dear reader, of *le pluie et le beau temps*: let us see if we cannot find somewhat in the sayings and doings of this "Petit Paris, près St. Denis" to entertain you with. Permit us to announce to you, that to greet our Queen, a fête *mais une fête royale, imperiale, merveilleuse, miraculante—une fête enfin, comme il n'y en a pas*—is to be given at Versailles: fire and water are to do their best; the park is to be illuminated *à la Louis XIV., les grandes eaux* are to play; nothing, in short, that can be done to give éclat and splendour to this fête is to be spared. Visitors, take your tickets; in other words, secure your lodgings, or, what with the Exhibition, and the Queen's visit, your chance of obtaining them later will be of the slenderest.

Apropos of the fête of the 15th, it is said that, contrary to the usual custom, no decorations will be distributed, all the orders being reserved for the Eastern army.

The most strenuous exertions are being made at the Grand Opéra to get ready the "Santa Chiara," the opera of Prince Ernest of Saxe-Coburg, that the Queen may be present at the first representation of the work of her illustrious relative.

The Exhibition is complete. Among the last arrivals are the productions of Spain, Portugal, Rome, Tunis, and Turkey. The last is among the most singular, and in some points interesting, of all the collections, from the curious mixture of magnificence and inutility, of splendour and barbarism, it presents. Every article—arms, costumes, furniture, stuffs, instruments, musical instruments—all are exactly as they were represented in pictures and descriptions of centuries ago. Among the French productions we should certainly say the specimens of Sèvres china and the tapestries of the Gobelins and Beauvais hold the first rank; anything more beautiful or artistic than these it is impossible to conceive. Among the most curious, and certainly about the most horrible, stall, is in the Gallery on the Quai. It is that of Dr Auzoux. Fancy the shop of a butcher in the Cannibal Islands, where they hang up men instead of mutton! The visitor, horrified, is about to fly; nevertheless, he will, as he is there, take another look first. He peeps fearfully: the thing has an awful fascination: he turns to it again, when lo! the corpse on which he is gazing is whipped down from its hook, and the anthropophagal butcher begins to dismember it! The visitor trembles. He expects that the next stall will be a kitchen; the next, a banqueting hall, where perhaps he may perforce—the idea is too fearful! He begins to feel sick at the notion of how he may be made to "sup full of horrors," when lo! to his infinite relief, he discovers that the ghastly corses are but images of humanity anatomical dolls, which are taken to pieces and put together again at will

It is said that at the conclusion of her present engagement at the Opéra Mdlle. Cruvelli purposes quitting the stage. A matrimonial project is supposed to be the incentive to this resolution. The *rentrée* of Roger and Alboni, in the "Prophète," has had a splendid success. At the Palais Royal a vaudeville in one act, entitled "English Spoken," is becoming highly popular; it is extremely amusing, and played with all the verve of that most comical company. The Porte St. Martin is producing this week a drama in *twenty-seven* tableaux, named "Paris;" and a three-act comedy, "Le Mariage d'Olympe, by Emile Augier—a piece which resembles Madame George Sands' "Mariage de Victorine" as little as can well be imagined. One of the great attractions of the moment consists in the night fêtes at the Jardin d'Hiver, which are highly effective, and remarkably well attended.

AMERICA.

The mail-steamer *Asia*, which left New York on the 3rd inst., arrived at Liverpool on Sunday morning.

The despatches from Washington, though brief, are interesting. Mr. Wilson, Commissioner of the General Land-office, received his dismissal on the 27th, and immediately evacuated his post. His successor will probably be ex-Governor Shannon, of Ohio. It had been reported that Secretary McClelland would resign in the event of Wilson's dismissal, and a score or two of expectants were eagerly waiting to have their anticipations fulilled.

The difficulty between the United States Government and France, arising out of the arrest of M. Dillon at San Francisco, is assuming rather a troublesome character, having recently formed the subject of a lengthy correspondence between Mr. Mason, the Minister at Paris, and Count Walewski, the French Minister of Foreign Affairs.

The meeting of the Know-Nothing State Council of Massachusetts, at Boston, on the 28th, was attended by about 300 delegates. The course of the seceders from the Philadelphia Convention was approved of heartily, and a platform of principles identical with that reported by the minority of the National Convention was adopted. The Maine State Temperance Convention adjourned on the 27th, after a two days' Session. It was fully attended, and the resolutions adopted were of the most ultra-politico temperance character. The speakers strongly supported Neal Dow in his conduct at the Portland riot. The regular democracy of Maine have formally come out in opposition to the prohibitory law, and consequently the speakers mainly directed their efforts against the only organised opponents to that law in the State.

Upwards of 10,000 persons attended a meeting for opposing the new prohibitory Liquor Law, in the Park, at New York. All the speakers denounced the law as fanatical, unconstitutional, and totally inadequate to promote the cause of temperance or other useful purposes; while, on the other hand, it would destroy millions' worth of property, and blast the prospects of their fellow-citizens. They passed resolutions accordingly.

A movement in North Carolina is soon to be submitted to the Legislature of that State, to render legal the institution of marriage among the slaves, to preserve sacred the relations between parents and their young children, and to repeal the laws prohibiting the education of slaves. It is said that the main features of the movement have been adopted in practice during many years by all classes in the south, and the effect has been so salutary that it is now deemed expedient to incorporate the system into a legal form and to make it as universal as possible.

In the United States' Circuit Court at Boston, Judge Curtis has decided, in the case of the brig *Porpoise*, that a vessel which had acted as a tender to slavers, and had carried merchandise which was used for the purchase of slaves, and had otherwise aided in slave transportation, although she had not actually a single slave on board, was guilty of being engaged in the slave trade within the meaning of the statute. The brig was consequently declared forfeited.

BOMBARDMENT OF MALLAGHEA BY THE "TRAZER" STEAMER.

MASSACRE OF BRITISH TROOPS.

The papers from Freetown, Africa, received this week, give a full account of the failure of the expedition sent in her Majesty's steamer the *Trazer*, to compel the chief, Bamba Mimah Lahi, to fulfil the treaty entered into between him and Commander Selwyn, of the steam-sloop *Prometheus*, in which the chief promised to pay an indemnity of 1090 dols. for injury done to the British.

It appears that last year the acting Governor of Freetown received a letter from the chiefs of the Morea country, and from King Stephen, of Wonkafong, complaining that two of their canoes, loaded with slaves, had been seized in the Sherbro country by the British Consul, and some of their people killed there, and demanding the surrender of a number of people, also slaves, who they stated had been carried away by us from the island of Matteocng. No satisfaction could be given for the capture of the slaves, inasmuch as the Sherbro treaty with the Sierra Leone Government empowers us to seize all canoes found with slaves on board. The surrender of Mendolo Yele, a Foulah, who had fled to the English settlement, was also demanded by these chiefs, who stated, that, if he was not given up, the King of Foulah would immediately close the roads. This demand was also refused, as there is no treaty to deliver up Foulahs to the Soosoos, even for offences committed in the latter country. The chiefs, dissatisfied with the refusal of the Sierra Leone Government to accede to their demands, peremptorily ordered the British and Freetown traders to leave the river Bumbora within ten days; after which period they (the chiefs) would not be responsible for the safety of their goods. Notice of this having been given by our traders to the Colonial Government, they were instructed to adopt such measures for the removal of their property as their own judgment would suggest, in the event of pacific measures failing, and her Majesty's steamer *Prometheus* arriving at the same time, it was deemed advisable to send an armed expedition to enforce the demand, for the protection of our commerce in the rivers; and her Majesty's vessels *Trazer* and *Bermuda* were despatched, with the Gambia contingent in the Cape Coast war, and a formidable force being in the colony, a requisition was made to the Governor to send these vessels to the Mallaghea. In compliance with this request upwards of 400 rank and file of the three West India Regiments, under the command of Captain Brookes, of the 2nd West India Regiment, embarked on board the above vessels, the squadron being under the command of Captain Hesseltine. This expedition left on the 25th of November last year, and, having arrived and landed at Mallaghea, Bambeh Mimah Lahi, the chief of that place, proposed that an amicable arrangement should be entered into with the Sierra Leone Government; and an indemnification for the losses of the traders, sustained by the removal of their goods, was the sole infliction imposed. The indemnification amounted to 1090 dollars, and was to be paid by the middle of March last. The time having elapsed, and the promised payment not forthcoming, the acting Governor deemed it advisable to make some inquiries respecting it. Mr. Dillet, his Excellency's private secretary, was therefore directed to proceed to the river for that purpose, and, in case of failure of payment, to intimate to the chief that the next visit would be a hostile one.

Mr. Dillet left Freetown on the morning of the 19th May, in H M steamer *Trazer*, which had a few days before arrived from England, and returned on the 21st, failing to carry out his mission, the chief offering to compromise the affair for 300 dollars. On the issue of Mr. Dillet's mail being made known to his Excellency the acting Governor, the *Trazer* was directed to return to Mallaghea the same evening, with 150 rank and file of the 1st and 3rd West India Regiment; and Capt. Nicholas, of the *Trazer*; Captain Fletcher, commanding the troops; and Mr. Dillet, as Commissioner, on the part and behalf of the Government, to demand, if necessary, to enforce payment. On their arrival at Mallaghea a rocket and shell were thrown over the town; when it was observed from the masthead that a white flag was hoisted on the chief's flag staff—it being understood at the previous visit that this signal would show their willingness to continued friendship; but, as it afterwards turned out, it was an intimation to the people to quit the town. The Commissioners, on observing the signal, landed under an escort of the troops, and having met several persons on the beach, they desired them to acquaint the chief that they were prepared to treat with him on their mission. Some time having elapsed, other messengers were dispatched upon the same errand. In the meantime the chief's prime minister, Momodoo Tourray, came down to the wharf. He was informed that if the chief did not make his appearance in half an hour fire would be opened upon the town. At the expiration of that period, the chief not appearing, the flag of truce which had been hoisted on board the *Trazer* was hauled down, and Momodoo Tourray seized as a hostage for the chief's appearance. The ship immediately opened fire upon the town, the mosque was in flames, and the fire appearing to extend over the greater part of the town, the troops were safely embarked, having had five men wounded.

Next day a portion of the town still appeared standing, when it was determined to land the troops, and fire the remainder. A man was sent to the mast-head to look out, who reported no sign of the natives in the town, but a considerable number at a distance. An advanced guard having been selected, consisting of 50 persons, under the command of Lieutenant Vincent—Commander Nicholas and Mr. Dillet volunteering to accompany it—they proceeded into the town. They had not gone far into the ruins when a murderous fire was opened upon them by a numerous and formidable enemy there concealed. Mr. Dillet was wounded at the first discharge in the head and leg. The main body soon came up to the support of the leading party, when a smart retiring fire was kept up with the enemy till our troops had reached the wharf, where, under cover of the ship's guns, they had partly succeeded in embarking; but the pinnace, with a number of men, on pushing off from the wharf, is said to have been struck by a bullet, and filling with water, the men from alarm capsized her. A flag of truce was immediately hoisted from the ship; but the men were barbarously shot in the water by the men on the shore. Lieutenant Wylie was among this party: he was shot, but is supposed to have been drowned. Several of those who had been capsized fortunately escaped the deadly fire of the natives on the shore, and swam safely to the ship. To the above melancholy disaster the severe loss of our troops is said to be principally attributed.

Of the advanced party but five returned to the ship—Commander Nicholas, Lieutenant Vincent, and Mr. Dillet, all wounded, and two soldiers, several wounded in the head; Acting Paymaster Andrews, who had also volunteered, having been killed among the others of the party. Sergeant Scanlan, an Irishman, and formerly of one of the Irish regiments, who was also shot while leading his company, is said to have behaved nobly, and died gallantly in the discharge of his duty. The men also behaved well, and were with some difficulty induced to obey the sound for retreat.

The following extract from the *Freetown News Era* of June 9 gives the latest particulars relating to this melancholy affair—

"The *Trazer* returned to this on Tuesday evening from the river, whither she conveyed, as stated in our last number, J. Millard, Esq., and a native of the interior, for the purpose of effecting an adjustment of the unfortunate difference with this colony, which, we are happy to say, has, to some extent, been successful. Mr. Millard having, we have been informed, obtained from the chiefs the requirements laid down by the executive. The rivers, we are told, have been declared open to the free intercourse of English and French traders. The payment of the money has been promised in instalments, and two prisoners, with nine guns and a soldier's coat, delivered up. There is now scarcely a doubt that Mr Fitch was murdered, and subsequently decapitated, although he had long declared himself wearing the head people for grigras. With respect to the other white men who were missing nothing is known. The recital of the miseries of our poor soldiers is said to be harrowing to humanity. Sergeant-Major Scanlan is said to have been decapitated, and had his arm also cut off; but subsequently his head and arm were buried by the natives with his body, in the bush. The body of a white man, supposed to have been that of Lieut. Wylie, and twenty-nine soldiers, were picked up at Mellacorie river, and have buried. A man of colour, a soldier, is reported to have shot himself, rather than fall into the hands of the enemy. A number of our people are reported to be yet in the bush."

LORD PANMURE has appointed Henry R. Greenfell, Esq., one of his Lordship's private secretaries, to succeed, as Captain F. M. Ramsay, 58th Foot, who joins his regiment now under orders for the Crimea.

BONAMY MANSELL POWER, Esq., has been appointed one of the Corps of Foreign Service Messengers in Ordinary to her Majesty.

At Genoa the fear of cholera has kept away almost all visitors who usually resort there at this time of year for sea-bathing; but there have not been more than two or three cases this year, and at present the health of the town is everything that could be desired.

THE WAR IN THE CRIMEA.

(From our Artist and Own Correspondent.)

CAMP BEFORE SEBASTOPOL, July 9, 1855.

Lord Raglan being no more, Sir George Brown having departed on sick leave and unlikely to return, and General Eyre having resigned, few of the chiefs in command who started with the expedition to Old Fort now remain in the Crimea. Sir Richard England, Sir Colin Campbell, and General Bentinck, are the only names that I call to mind at present as of those who have weathered the vicissitudes of the last eight months. General Simpson, who assumed the chief command on the death of Lord Raglan, has been confirmed by a telegraphic order from England; and Colonel Stephenson, of the Scots Fusilier Guards, is appointed to the Military Secretaryship vacant by the retirement of Colonel Steele. Col. Stephenson, however, is not in the enjoyment of health, and will be unable for some time to perform active duty. Col. Steele will, therefore, I believe, remain at his post a little while longer. The whole of Lord Raglan's Staff, with this exception, leaves, or has already left, the Crimea. In the commands of the cavalry brigades changes are also to take place. The regiments are, it seems, considered numerous enough to form three brigades. Colonel Lawrenson takes the Heavy Brigade, Lord George Paget the Light Brigade, and Colonel Parlby the Russian Brigade (Lord George is not at present here, having left Balaclava for Constantinople. If the gossip of the Camp is to be listened to, a movement is contemplated shortly, and officers have been requested to be in readiness to start; there is no doubt that a few days ago the whole division of cavalry was under orders to march and join the 10th Hussars in the vale of Baidar. Motives of health were those assigned for the change, a few cases of cholera having appeared in the camp of Karanyi. The horses, too, would, it was said, be invigorated by the fine new grass of which the vale is full. It became known, however, that, although Varnoutka and its neighbourhood were favourable for the horses, the health of the men was not likely to be improved there. The 10th Hussars had suffered severely from cholera, and it was determined not only that the cavalry should remain at Karanyi, but that the 10th Hussars should fall back. In the meanwhile other circumstances have happened which rendered change [illegible] Russians, who had, it is said, received numerous reinforcements of late, appeared in force in the neighbourhood of Baidar, and Omer Pacha determined on raising his camp at Varnoutka. The 10th Hussars followed the movement, and returned to Karanyi yesterday.

In the works of the siege there is nothing new to describe; and this only to say that works are proceeding for the purpose of driving back the shipping, and, if possible, destroying it. The casualties are increasing daily as we approach nearer to the town. The Cemetery—which we occupy, after having already abandoned it is one of the dangerous places on our side; the new batteries which the Russians are constructing along the shore opposite Sebastopol inflict daily losses upon our allies. They have lost, it is said, as many as fourteen killed and fifty or sixty wounded there in one night. Captain Eyers' company met with a sad accident a few evenings ago as it left the advanced works. The men were seen crowding along the parallel, and the enemy threw a shot, which skipped from man to man, killing or maiming no less than thirteen. On the night of Thursday Captain Gordon, of the Artillery, a volunteer in the service in which he was at that time engaged, was killed by a round-shot.

Another week of suspense has passed, in which it would almost seem as if the commanders of the Allied armies were waiting to see what is to come of all our wretched party-fighting at home before they begin their more important work in deadly earnest. Every night the troops are idle. The preparations for a tremendous bombardment are said to be going forward with great activity; but it will not commence for a week yet, or [illegible] longer. We are still a considerable distance from the Malakoff, more than the space that separates us from them being quite exposed, and swept in every direction by the Russian projectiles, the approaches progress very slowly. Both French and English are working incessantly on the right; but the closeness of the enemy's works does not allow of our opening the trenches by day; it is only by night that we can advance them, and on the nights are very short, it is barely two hours and a half out of the twenty-four that the works can be actively carried on. It is considered necessary that our parallels should be advanced so close to the enemy's fortifications that our advancing columns may not have to pass over more than sixty or seventy yards under a fire of grape.

A French letter dated July 3 says:—

The casemated battery erecting at the extremity of Careening Bay, for the purpose of keeping the fleet at a distance, is far from being terminated. It is consequently probable that we shall not be prepared to give the assault, with any chance of success, for another week or two. We cannot, besides, take too many precautions before we direct a fresh attack against so form dable a fortress as the Malakoff Tower, defended, as it is, by immense and powerful artillery, and by a numerous and constantly renewed garrison. It is much to be regretted that, early in spring, when the Allies were at least numerically equal to the Russians, we did not attack the enemy in his positions on the right side of the Tchernaya, drive him from the great plateau of the Forest of Inkerman, and establish ourselves on the Sumpheropol road. By this movement we should have partly invested or blockaded the place, and there remained until reinforcements permitted us to give to our lines a greater development. At present, and under less favourable circumstances than in March and April last, perhaps we shall be obliged to have recourse to that plan, the result of which would be the complete investment and proximate surrender of Sebastopol.

Another letter from Kamiesch Bay, in the *Courrier de Marseilles*, gives the following description of the Russian defences:—

We now know what we have to do. The Malakoff is no longer a tower, as for some time past the Russians have completed the work of our cannon, and have demolished the two stories. The masonry work at the foundation has been surrounded by a parapet in earth of a certain height, and pierced with embrasures. A ditch runs along the front. From the Malakoff Tower to the redoubted there is a well-fortified line of defences, interrupted by two batteries. One, mounted with 15 or 18 guns, fires in two directions, and from its right face sweeps the front of the Tower—this is called the Small Redan of the Careening Post. The second, of 12 guns, is united to the former, and also to a third of the same strength, which, from its position, is called the [illegible] of the Careening Point. These works are well established, and support each other.

On the night of Sunday last the Russians made a sortie against the French, but were driven back with great loss, as will be seen from the following despatch which the French Minister of War has received from General Pelissier:—

July 16, 11 p.m.

The enemy, who had for some days in vain endeavoured to stop our left approaches in front of the Malakoff Tower, attempted last night to drive us back. They were repulsed by the First Division of the Second Corps.

Three times the Russians threw themselves upon our trenches with their usual shouts, and after each attempt they were compelled to retreat by the steady fire and calm attitude of our soldiers, leaving behind them many of their slain upon the ground.

The General of the Trenches, Vinoy, had made most excellent arrangements which greatly contributed to this success.

A despatch received by Lord Panmure on Thursday, dated 18th of July, states that a sortie on the left attack was repulsed with only three casualties on our side.

The Russians do not seem to be in want of ammunition. The French works on the east of Careening Bay have recently been exposed to a frequent fire from the guns on the north side, and from the Russian batteries on the west side of the port. Their object is to interrupt the important works of our allies in progress on that point.

On the 5th inst. the 12 gun battery on the north side kept up a persevering fire in this direction. Fort Constantine also fired frequently from some quarters placed on the roof. The grape given must be very heavy, as the shells have to pass across the mouth of the harbour, and over the Alexander Fort, and other works, to reach the French approaches against which the missiles are directed.

The Russian working parties can be seen in considerable numbers returning toward sunset from the direction of Star Fort, and marching toward the more distant camps. Every appearance tends to confirm the suspicion that the nearer encampments on the high ground above the harbour, and stretching along the line of hill to the right of Star Fort, are those of the Russian ambulances. Although the greater number of the tents composing these camps are completely under view, and with a good telescope an individual moving among them can be readily distinguished, there is never observed the movement, or the constant ingress or egress, which characterises the ordinary encampments of troops. There can be but one other explanation of their remarkably deserted appearance; if they are not occupied by sick and wounded they are in a great measure empty, and have been left standing for some purpose of deception.

The deserters and prisoners report that the Russian line-of-battle ships anchored in the roadstead opposite Fort St. Nicholas have suffered severely from the fire of the mortar battery on the side of the Quarantine Bay. On the 27th a shell passed through the three decks of the *Tchesmé*, killing and wounding several men; and then, bursting in the hold, set fire to her after-part; and there are now only three artillerymen for each gun. The rations of vegetables and brandy have been diminished one-half on board the Russian vessels, and the captains of them have received orders to economise their consumption of salt pork as much as possible. The Commander-in-Chief has ordered the inhabitants to quit the town. The opinion that the place must infallibly fall into the power of the Allied armies is more and more general among the besieged, and that feeling is said to have greatly increased their discouragement.

The *Journal de St. Petersbourg* publishes a summary of the reports of General Gortschakoff from the Crimea to the 29th ult. It refers to the repulse of the Allies on the 18th, which it describes as "one of the most heroic feats in Russian annals," and says that in consequence of it the Allies "will be under the necessity of continuing the regular siege of Sebastopol, will, no doubt, cost them a great deal of time and immense sacrifices. In estimates, on the authority, it declares, of deserters, too loss of the French in that affair at 10,000 killed and wounded, three times greater than that of the English at 3500, and two of their generals; the prisoners taken were besides, it says, 600, and amongst them were one English and one French superior officer. After the repulse, the fire of the Allies is stated to have declined, but on the 19th it opened the Russians lost of 62 killed and 292 wounded, but, having further declined, the loss from the 19th to the 23rd is stated to have been only 7 killed and 27 wounded. "Amongst the latter," it is added, "we have to regret Major General Tolleben, who had his left arm carried away on the 20th, but this will not prevent him from continuing to direct the works of defence as heretofore." "Notwithstanding the extreme heat, says the report in conclusion, "which has lasted more than a month, and has completely burned the earth, making the works of extraordinary difficulty, the garrison of Sebastopol, owing to the zeal it displays, has succeeded in repairing all works and preparing new means to defend them with the greatest obstinacy."

From the general tone of the Russian despatches it is tolerably plain, however, that they have given up all hope of being able to hold out much longer. General Gortschakoff shows that he and the men under him are fight it out to the last, but that is all they can promise.

OFFICERS NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED AND WOUNDED, FROM THE 2ND TO THE 5TH OF JULY, 1855, INCLUSIVE.

KILLED.

JULY 5. Royal Artillery. Captain A [illegible]
JULY 3. 3rd Foot: Private John Neil. 17th: Private William Brandrick. 2nd Battalion Rifle Brigade: Private John Bates, Jame Martin. 97: Private Mitchell
JULY 4.—1st Battalion Scots Fusilier Guards: Private John Cochran. 42nd Foot: Private Alexander Boland. 88th: Private Robert Lynch. 93rd: Private Charles Gibson.
JULY 5. 33rd Foot. Private Thomas Sullivan. 72nd: Private Alexander Merrilees.

WOUNDED.

[illegible] Foot. Lieutenant [illegible]. Buchanan, severely
[illegible] Foot: Captain C [illegible] slightly
[illegible] Foot: Lieutenant [illegible] Cook, severely
[illegible]: Private John [illegible] slightly
[illegible] Private Thomas Martin, severely
[illegible] Private John Taylor, slightly
Angus Mckay, severely; Private [illegible]
Corporal Joseph Collins, severely
[illegible] Leather Guards
[illegible] 1st Regiment of Foot: Corporal Michael Heffernan, severely
Private Patrick Carroll, James Smith, Ephraim [illegible]
[illegible] slightly. 34th Privates Thomas Chapman [illegible]

[illegible]: Private Joan Duff, slightly
[illegible], severely. 88th: Private [illegible]
[illegible] slightly. Private James Nunn, slightly
Alexander Agnew, William Hardy, John Mckay, severely
Private Daniel Orr, John Lewis, Thomas Cambert, Joseph Clarke, Charles Hall, severely
Groves, severely: James Childs, John Keiffe, John Watkinson, James Long, James Hanlon, severely
Henry White: Edmund Lowe, slightly. 47th: Private Thomas Hall, severely
[illegible] Battalion Grenadier Guard: Privates [illegible] Wesson, Charles Isaac, Thomas [illegible] severely. Henry Harriott, James [illegible] slightly. 1st Battalion Scots Fusilier Guards: Privates Henry Smith severely; James Bacon, William Bell, slightly. 3rd Foot: Private John Hudson, slightly. 8th: Privates Michael Nash, severely; Thomas Hennessy, slightly; John Masters, Thomas Hynes, Matthew Connell, slightly. 46th: Private [illegible] M'Kenzie, severely. Armourer Sergeant Hayes, slightly. Private Edward [illegible] Barnes, slightly. 88th: Sergeant Alexander Watson, slightly [illegible] Private Thomas Lee, Jonathan Mason, severely [illegible] Thomas Hazey, severely; John Griffin, dangerously. 88th: Private [illegible] severely; [illegible] slightly. 97th: Private [illegible] Michael Monaghan, severely. 19th: Private William Ryan, John Cain, severely. Private Alexander Wilson, severely. Private Daniel Mahoney, slightly. Private James M'Grath, severely. 44th: Private John M'Carthy, severely [illegible] Thomas Wilson, slightly. Field Private John Tooley, severely. Privates John Counihan, Richard Pallen, [illegible] William Dunn, severely. Private Hugh Campbell, John Watson, severely; James Graham, slightly. 88th: Private [illegible] Patrick Kennedy severely; James Carney, slightly. 98th: Private William Norris, severely. 4th: Private Edward Jennings, slightly. 1st Battalion Rifle Brigade: Private George Clark, dangerously.

THE WAR IN ASIA.

The latest news from Kars is of the 23rd June, and of a nature to excite anxiety. The Russian army under the command of General Muravieff, had not moved from its quarters at Zaim, as eight siege guns were on their way from Gumri, and until their arrival nothing will be undertaken. The Cossacks, in the meanwhile, had advanced on the road to Erzeroum; as far as Gul Cheer, and besides cutting off the communications of our allies, had destroyed property belonging to the Christians inhabiting the miserable villages of Tchildir. The Turks, who are 13,000 men in all, have sent off for reinforcements in all directions; and two couriers have arrived at the Porte with despatches from Vassif Pacha and General Williams. Batoum has been placed in a good state of defence, and is provisioned for three months. An officer, writing under date of the 22nd, says, "The soldiers are eager to fight the Russians, and there is no doubt will display as much daring and heroism as at Silistria." The garrison of Batoum are also menaced in their positions, the Russians having advanced as far as Leven, which aggressive move has necessitated the retreat of the Turks to Sensekalasy five hours distant from their former head-quarters. The latest advices do not mention the arrival of the Commander-in-Chief, Mustapha Pacha, from his excursion to the Kouban, although messengers had been sent to inform him of the state of things. It will be perceived by this rapid survey that military operations in Asia are in favour of the enemy; and that, in the presence of a menacing danger, no measures whatever have been taken to remedy it. The same apathy exists at Constantinople; and if, in lieu of discussing the exigences of the day, active efforts had been made by the Turks, the difficulties might have been greatly obviated.

The Russian forces are said to consist of 27,000 infantry, 5000 horse, and 70 guns. The Turks have orders to hold Kars to the last, and then retire to Erzeroum. The Turkish General, who was otherwise well provided, only asks for reinforcements of troops, and there has been some talk of sending 10,000 men to his aid.

Letters from Trebizond report that the inhabitants were in the greatest fear of a visit from the Russians, and talked of raising some temporary fortifications, and arming all the able-bodied inhabitants. Their fears, however, must be entirely groundless, as the Russians will hardly dare to attack Trebizond, with the Allies masters of the Black Sea, and able in four-and-twenty hours to land any force they please.

THE ANGLO-TURKISH CONTINGENT.

The Anglo-Turkish Contingent, which is to be carried to the number of 24,000 men, begins to assume a respectable appearance. Besides the recruits enlisted from all the warlike races of the empire—Albanians, Kurds, old Bashi bozouks (under permission from Omer Pacha), &c. the English have got the Porte to turn over to the Contingent some 10,000 men borrowed from the regular army, and, in great part, even from the Sultan's Guards. This force is now assembled at Buyukdere, where the head-quarters of the Contingent have established themselves in the former palace of the Russian Embassy. There the English officers of the Contingent are quartered as in a military school. These officers are principally drawn from the Indian army, and have been long accustomed to live with Eastern peoples, and to govern and command them. They are learning to know their men, while getting them into discipline, and settling the different elements of the corps into a homogeneous mass; and, above all, they are learning the language of the country. Their progress in all these points is said to be very rapid, and, as the pay is good and the rations regular, the soldiers are as hearty and willing in attendance to their drill; so much so, indeed, that the Porte was desirous of immediately dispatching some of the regiments from Buyukdere to the Asiatic frontier, where the Russians have resumed the offensive, and are threatening Kars and Erzeroum. But General Vivian has absolutely refused, and will not take the field till his corps is completely organised, and the officers tolerably competent in the Turkish tongue.

ADULTERATION OF FOOD, DRINKS, AND DRUGS.

The Select Committee appointed by the House of Commons to inquire into this subject has commenced its sittings. The Committee consists of the following gentlemen:—Mr. Scholefield (chairman), Mr. Alderman Cubitt, Viscount Ebrington, Viscount Goderich, Mr. Gregson, Lord Claud Hamilton, Mr. Kinnaird, Mr. Knight, Mr. Moffatt, Mr. Ossulvy, Mr. Peacocke, Mr. Swift, Mr. Charles Villiers, Mr. Wise, and Mr. Sheridan.

Dr. Hassall, the first witness examined, said he was a medical man, and had devoted a good deal of attention to the adulteration of food, drinks, and drugs. Adulteration was exceedingly prevalent in almost all articles of consumption. Adulteration consisted of the addition of substances—1st, to increase the bulk and weight of the article; 2nd, to colour and heighten its appearance; and 3rdly, to impart to it smell, pungency, and taste. He intended, in the first instance, to give the fact of adulteration, and the prevalence of the practice; 2nd, to treat of the sanitary bearings of the question; 3rdly, to show the importance of the microscope in discovering adulteration; and lastly, to suggest such remedies as occurred to him. Dr. Hassall then read a long list of articles, with the substances with which they were adulterated. He then showed how the following articles were adulterated:—Cayenne pepper, custard and egg powder, ginger, rum, mustard, curry powder, flour, gingerc, marmalade, porter, pickles, snuff, tea, vinegar, &c. These articles which he found, by personal analysis, were adulterated. Many of these being poisonous are highly detrimental to health. He had discovered the adulteration partly by means of the microscope and chemistry. It was not known before that the microscope was so generally applicable for the detection of adulteration. He stated these adulterations with perfect confidence as to their accuracy. The results had been published from time to time in connection with the names of the parties; and if they had not been correct, the parties would have shown in what respect they erred. The statements had appeared for four years, and had involved the publication of the names and addresses of many hundreds of manufacturers. Great care was taken in the purchase of the articles, and each one was labelled with the name of the individual from whom it was obtained. Thirty or forty specimens of a particular article were examined before any report was drawn up upon it. The purchases were made in a very impartial manner, from all classes of traders—the object being to ascertain truly how far adulteration prevailed. No information was given to the shopkeeper as to the object of purchasing the article. Gamboge, he said, was adulterated with Russian blue, and other substances which were calculated to deteriorate health. There was no such thing to be got as pure green tea, which possessed a natural green hue. Although it reached this country in its genuine state. He never found any adulteration of cream, but he had not examined cream to the same extent as other articles. Red lead was often used in cayenne pepper—a snuff the adulteration consisted of another description of lead. He heard the other day of a gentleman who had a paralytic stroke; he was a large consumer of cayenne, which he was supposed to take as every meal. In cayenne was adulterated with lead, it was impossible to disconnect the fact of his taking it in very large quantities with the attack of paralysis.

Dr. Hassall then went on to say that Scotch marmalade was adulterated with turnips, potatoes, and other vegetable substances. Snuff was subject to a very large amount of adulteration. Then, tea was scarcely any adulteration in cigars. Coloured confectionery was also very greatly adulterated. In France no extensive did this evil prevail that the Government prohibited the use of certain colouring matters in confectionery, and pointed out those which might be employed. Plaster of Paris was used in some confectionery in this country to the extent of 43 per cent. This was one of the most injurious adulterations. Arrowroot was only met with to a small extent in specimens as there was in others: while some contained [illegible] worth of alcohol, others had not more than 6s. worth. The strength was mainly attributable to adulteration. Some contained a very large quantity of cayenne, which gave it a hot, burning taste. In no case had he detected sulphuric acid in gin. Some gin was flavoured with juniper berry, but very little was treated in so simple a manner. All gin was flavoured with preparations called gin flavours, which were not in general poisonous; but consisted chiefly of aromatic things, which gave a flavour to the palate. Juniper was not dear. The manufacturers found that these gin flavours produced an article which was liked better. All English drugs were more or less adulterated. The remedies which he suggested were of two kinds—first those for detecting adulteration; and, secondly, those which were necessary for its prevention. In order to detect adulteration, it was requisite to have a central board, consisting of analytical and physical chemists, and to have district officers appointed to keep a close watch upon all articles sold to purchase specimens of them, and send them to the central board for examination. He also proposed that the board should issue cheap tracts, containing plain directions for discovering adulteration. For the prevention of adulteration, it would be necessary to publish the names and addresses of all persons whose goods were analysed, whether the articles were proved genuine or adulterated; also, to punish the seller of the adulterated article by fine, and the actual adulterator by fine or imprisonment, both.

He had brought this subject before the President of the Board of Health. Sir Benjamin Hall told him it was his intention to take up the question of the adulteration of food and drugs, but he had not done so; and his time had lately been very much engaged.

On Wednesday the Committee again met, when Dr. Hassall resumed his evidence, and said that he had brought a hamper of samples of pickles, bottled fruits, and vegetables, in two series. One exhibited the natural state, and the other artificially coloured with poisonous salts of copper. Two bottles of anchovy sauce—the one a natural colour and nearly white, and the other adulterated, of deep brick red, being coloured with bole armenian, in the proportion of 10 lb. of earth to 100 gallons. There were also various samples of coloured sugar confectionery, with colouring of chromate of lead, red lead, arsenite of copper, Brunswick-green, gamboge, and cochineal, which he detected even independent of analysis. The samples were handed round to the Committee, and Dr. Hassall said that the red earth was so much dirt added.

TESTIMONIAL TO DR. HASSALL.—An influential general committee has been appointed for the purpose of presenting a testimonial to Dr. Hassall, the first witness examined before Mr. Scholefield's Adulteration of Food Committee, in accordance with the following resolution, passed at a preliminary meeting of gentlemen interested in the various questions relating to the public health:—"That the eminent scientific merit of Dr. Arthur Hill Hassall, in demonstrating on a large scale, as chief analyst of the Lancet Sanitary Commission, the numerous adulterations of our food, our beverages, and our drugs, ought to be authenticated, and that the great service he has thus rendered to the community calls for a suitable public acknowledgment."

THE CAMP OF THE FOREIGN LEGION AT SHORNCLIFFE.

THE organisation of a Foreign Legion was a reinforcement to our Army in the Crimea having at length been resolved upon by the Government, the spot chosen for its encampment is Shorncliffe, a fine plain, at the foot of the noble range, of hills about three miles from the Folkestone station of the South-Eastern Railway. Here it is proposed to organise a corps of 10000 men, for whose encampment huts and other accommodations have been some time in progress. Our Artist's Sketch represents the encampment in an early stage of the works; the building-poles, scaffolding, &c., being here and there shown. The View was sketched from a hill known as the "Old Schools," in the neighbourhood that the old Light Division was formed and exercised under Sir John Moore. In the mid distance of the View are seen the Royal Horse Artillery Barracks and Folkestone, with the shafts and the Martello tower near the Upper Station.

About a week since the huts at Shorncliffe, numbering nearly 200, were nearly finished. The drainage, which measures thirteen miles, is hastening to completion, the contract for that and the immense rain-water tanks having been taken by Mr. Edwards, of Folkestone. Messrs. Jackson, of London, are building the church, which is to be of wood and slate; length 125 feet, width 64 feet, giving accommodation for 1400 men. There is to be a house for the commandant, and five schools, with masters' quarters attached. The roads between the huts are covered with beach three inches thick. Five canteens are to be erected on the camp-ground by Messrs. Mackeson, the brewers of Hythe.

A visit to the Camp forms an interesting attraction to the residents of the neighbouring country. There were, at the above period, 50 officers; and the men, who mustered 1000, were chiefly Germans. "It was feared," says the *Dover Telegraph*, "that the assemblage of such a large number of foreigners at Sandgate would be prejudicial to the letting of the houses for visitors, but no such gloomy anticipation has been realised."

THE CAMP AT SHORNCLIFFE.—(SEE PRECEDING PAGE.)

INVALIDED SOLDIERS IN THE GARDENS OF FORT PITT, CHATHAM.

HER MAJESTY'S INSPECTION OF THE WOUNDED TROOPS AT CHATHAM.

THIS very interesting visit of sympathy was recorded in our Journal of the 23rd ult.—the date of the visit being the 19th. The Queen was received by Colonel Eden, commanding the garrison. Her Majesty and Prince Albert first visited Fort Pitt. The whole of the wounded troops who were in a condition to leave their beds were drawn up in two lines on the lawn of the hospital, each man having a card containing the particulars of his name, age, corps, where wounded, and the nature of his wounds. Her Majesty passed along the front of each line, inspecting each man, and occasionally addressing kind observations to those who particularly attracted her notice. Dr. Perry, one of the medical staff of the hospital, drew her Majesty's attention to any cases of particular interest.

The number of patients in Fort Pitt was upwards of 200, the whole of whom her Majesty inspected. During her Majesty's inspection of the wounded troops, she frequently stopped to ask questions relative to particular cases of Dr. Perry and Dr. Dartnell, and, on the conclusion of the inspection, expressed her general approval to Dr. Dartnell.

Her Majesty and the Prince then went to the Military Hospital at Brompton. Many of the patients in this hospital had but recently returned from the Crimea, some of them were suffering from frost-bite. About 240 of them were drawn up, of some of whom her Majesty made inquiries as to their wounds, length of service, &c., and all were much pleased with the condescension and kindness exhibited towards them. The Queen and Prince Albert then visited the invalids at St. Mary's Hospital, and thence proceeded to the Strood station on their return to town.

Her Majesty was so much interested with the Crimean heroes whom she saw at the Chatham Hospitals during her recent visit, that she desired a photographic artist to take portraits and groups of those who had distinguished themselves, or who were of particular noteworthiness for their wounds. The first group, which we have engraved, is of a large party of invalids on the lawn in the gardens of Fort Pitt. The men were mostly dressed in the grey hospital-coat and cap. They seemed to be very cheerful, notwithstanding the severity of their wounds; and we could not but remark that the happiest of all were the men who had lost a leg!

CORPORAL COURTENAY, OF THE 44TH

The two lower Engravings are of groups before the Hospital Barracks at Brompton. Some of these men have let their beards grow to such a size that they might easily be mistaken for foreigners were it not for their honest British faces. We could tell, however, by most unmistakable evidence to our ears, that many of them are from the far North and from the Green Isle. The men here are dressed in the same costume as those at Fort Pitt, and seem equally contented.

In the centre of the page is a portrait of Corporal Courtenay, of the 44th. This valiant fellow, after having passed unscathed through the fires of Alma, Inkerman, and Balaclava, was shot with *seven* bullets in an attack on the Russian rifle-pits before Sebastopol One bullet knocked out his right eye, another ball lodged and still remains just under his forehead, and the scar of a third may be traced on his left temple. Courtenay, who is now among the convalescents at the Casemates at St. Mary's, was particularly noticed by her Majesty, and is not a little proud of the honour. He suffers scarcely any pain, and is quite ready to tell of his "hair-breadth escapes," and to "show how fields were won."

We must not forget to mention that the photographs from which, by her Majesty's permission, we have engraved these pictures, were executed by Mr. Joseph Cundall, of the firm of Cundall and Howlett, Photographic Institution, New Bond street.

A characteristic anecdote of her Majesty is related in the *Dover Telegraph*:—

The Queen, while walking on the balcony of St. Mary's Barracks, looking down some twenty feet, observed one or two wounded men walking leisurely below, she immediately observed to the Commandant, Colonel Eden, "There is a man I have not seen, there is another, and there is a third." So firm was the impression of the Commandant that her Majesty had seen them, that he said, "Please your Majesty, I think, indeed, you have." Her Majesty replied, "No, I certainly have not." Colonel Eden immediately asked the men if they were not paraded before her Majesty! They replied, "No, Sir." The Colonel asked why they were not there! "Because, Sir, we have this afternoon arrived from the East, and received no orders." Her Majesty thereupon observed, "I thought I had not seen them." These fresh arrivals were immediately paraded for Royal inspection.

INVALIDED SOLDIERS BEFORE THE HOSPITAL BARRACKS, AT BROMPTON.

CALENDAR FOR THE WEEK.

SUNDAY, July 22.—7th Sunday after Trinity. Battle of Salamanca, 1812.
MONDAY, 23.—Gibraltar taken by Sir G. Rooke, 1704.
TUESDAY, 24.—Insurance Offices established in London, 1720.
WEDNESDAY, 25.—St. James. Duchess of Cambridge born, 1795.
THURSDAY, 26.—St. Anne.
FRIDAY, 27.—Marshal Turenne died, 1765.
SATURDAY, 28.—Robespierre guillotined, 1793.

TIMES OF HIGH WATER AT LONDON-BRIDGE,

Now ready, bound in cloth, gilt,

THE ILLUSTRATED LONDON NEWS, VOL. XXVI from JANUARY to JUNE, 1855—Containing upwards of 600 SPLENDID ENGRAVINGS; including a large Number of Scenes of the War, from Original Sketches, by the Artist of this Journal, at the seat of operations, as well as by Naval and Military Correspondents. Office, 198, Strand.

Covers for binding the Volumes are likewise ready.

SKETCHES OF THE WAR.

We have received from our Artists and Correspondents in the Baltic and the Black Sea, and before Sebastopol, the following Sketches, which will be engraved with great care, and appear in the ILLUSTRATED LONDON NEWS for next week:—

The Funeral Procession of Lord Raglan .. .. By C. Guys.
The Funeral—Embarkation at Kazatch Bay .. .. „ E. A. Goodall.
The First Shot and Shell lodged in Cronstadt .. „ J. W. Carmichael.
Burning of Thirty Russian Vessels near Nystad. „ J. W. Carmichael.
Portraits of the ships *Caesar* and *Wessel* .. .. „ J. W. Carmichael.
The *Bellisle* Hospital Ship .. .. .. „ J. W. Carmichael.
The Tolboukin Lighthouse .. .. .. „ J. W. Carmichael.
The *Nile* at General Quarters .. .. .. „ J. W. Carmichael.
The Commissariat Camp, Balaclava .. .. „ E. A. Goodall.
Turkish Batteries and Woronzow Road .. .. „ C. Guys.
New Hospital, Balaclava .. .. .. „ C. Guys.

And other Illustrations of the War.

ALSO,

The Dummow Flitch of Bacon Custom, One Hundred Years since.
Presentation of the Dunmow Flitch, on Thursday last.
Meeting of the Royal Agricultural Society of England at Carlisle; several Illustrations. &c., &c.

*** The greatly increased demand for the ILLUSTRATED LONDON NEWS, in consequence of its enlarged size and reduction of price, renders it necessary that orders should be given several days prior to the date of publication to ensure punctual delivery.

THE ILLUSTRATED LONDON NEWS

Publishes a Stamped Edition. The stamp must be folded outside; and this will frank the paper throughout the United Kingdom for fifteen days. Should any difficulty be found in procuring the stamped edition, it will be forwarded on application direct from the Office.

The Unstamped Edition cannot be forwarded by post except on the terms of the Treasury Minute for the Conveyance of Books and Printed Matter.

Both Editions contain Two Large Sheets every week. Unstamped, Fivepence; Stamped, Sixpence.

TO ADVERTISERS.—All Advertisements must be sent direct to the Office, 198, Strand. No connection with any person or persons as Agents.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 21, 1855.

In the absence of any single event of great importance, the narrative of the war is naturally fragmentary, and composed of details which are only connected by their common relation to the good cause. From the grand scene of action, before Sebastopol, we only learn that tremendous preparations were still in progress, and that they were not so far advanced that the time for commencing another attack could be fixed, but speculation assigned a day which would fall about the termination of the present week. The Russians had certainly received reinforcements. There is, however, nothing as yet to confirm the startling statement which an Opposition organ has put forth that General Luders and Grabbe, the former with 80,000, and the latter with 60,000, men, were advancing by forced marches to the relief of Sebastopol. It was stated that this information had been forwarded by the Court of St. Petersburg to that of Berlin, in order, of course, to strengthen the Cossack tone of the latter Court; and King Cliequot was apprised, for his still greater comfort and consolation, that the effective army of Russia now amounts to 650,000 men. These assertions look very terrible upon paper; but there is such a thing as foolishly overrating as well as foolishly underrating the power of an enemy; and whereas the blunder of the early part of the war was the latter absurdity, there is now some reason to apprehend a discouraging lapse into the other folly. It is by no means unlikely that St. Petersburg should send to Berlin the most highly-coloured accounts of Russian resources; it is not even out of the cards that, in his extreme *finesse*, the good King Frederick William may have desired to receive such accounts, in order to provide matter for some more plausible and sophistical State protests against being called on to vindicate the honour of his people. That the Russian army has of late been greatly increased, numerically, is also patent to Europe; but the barbarous levies which have torn old men and boys from their homes to stagger under the musket do not constitute "effective" forces; and the theatrical expedient resorted to at Sebastopol, of picking stalwart men to be paraded when flags of truce are in use, and substituting these for the soldiery who had usually occupied certain positions, shows that the Russian Generals are disinclined to submit their ranks to the critical inspection of shrewd English and French officers. But, finally, if certain reinforcements (which have no doubt been sent down to pick their way over the remains of other thousands who have perished by cold, starvation, and fatigue, in trying to struggle to the Crimea) have not been magnified into relieving armies, and these other Generals are coming up, there is but one way for them to come; and the united armies of the Allies are now large enough to detach strength enough to fight a battle in the field, and to retain strength enough to bombard the stronghold. The news is probably so nearly false as not to represent the existing state of things; but, if true, the Allies are prepared to deal with the new situation.

Meantime, deserters say that food is falling short in the town and in the Russian ships, and that rations are being diminished; and, if this be true, Gortschakoff literally reckoned without his host in making light of the destruction of the Azoff granaries. The same informant states that all the inhabitants of Sebastopol have received orders to be ready to leave it at two hours' notice. Of course, due allowance must be made both for the *animus* and the ignorance of the deserter; but it is evident that the enemy is being reduced to extremities—a fact which he will most probably endeavour to conceal by demonstrations of desperate audacity. His repeated sorties from the Malakoff against the French are proofs of his desperate condition; and their gallant and signal repulse, no less than three times, affords equally convincing proof of the steady valour of the Allies.

The Baltic fleet is taking vengeance, by instalments, for Hango. Svartholm (an important port, which could mount 122 guns, and had casemated barracks for 1000 men) has been destroyed, with Lovisa, the town it protected. When the authorities, called upon to surrender, demurred that the demand was unaccompanied by a flag of truce, Captain Yelverton most properly replied—that, after Hango, Russians had no right to such a guarantee. The fort of Koika has been blown up, and forty-seven ships near Nystad have been destroyed. And an interesting incident has occurred at Cronstadt, where the great ships maintain their watch. Admiral Dundas has discovered a long range, and has thrown the first shots into the island of Cronstadt itself, from a distance of nearly three miles. This result was obtained by swinging a 32-pounder at an angle of 45—apparently a simple process, now that it is found out. The Russians have not yet attained it, and the gallant Admiral will no doubt have taken advantage of his discovery. Some other operations induce our naval correspondents to think that an attack upon the supposed impregnable Cronstadt is not unlikely. The presence of the fleets is declared by Russian organs to be "completely ruinous to commerce." Two floating batteries are now ready to be sent to the Baltic.

The living are not so busy but that they can afford time to render honour to the dead. The order of the day in which General Pelissier announces to the French army the death of Lord Raglan is an eloquent and touching tribute. After briefly alluding to the event itself, General Pelissier proceeds "Those who have known Lord Raglan who have known the history of his life, so noble, so pure, so full of patriotic services those who were witnesses of his intrepidity in the days of Alma and Inkerman—who can recall the calm and stoical grandeur of his character throughout this rough and memorable campaign in a word, all men with hearts will deplore the loss of such a man. The sentiments which the General-in-Chief here expresses will be those of the entire army. He himself is shocked by this unlooked-for blow. The general grief is increased with him in finding himself for ever separated from a companion in arms whose cordial spirit he loved, whose virtues he admired, and with whom he always found loyal and affectionate concurrence." The remains of Lord Raglan are not to repose with those of the thousands of brave men whose glory and whose death he shared, but will be laid in his family grave at home. The *Caradoc* will land the body at Bristol, whence, with due honours, it will be borne to its last resting-place. There was a rumour that Prince Albert would attend the obsequies of his brother Field Marshal, but the statement appears to have been unwarranted. It is not decreed that at the funeral of our lost soldier, whose "ancient classic heroism" was recorded by his colleagues, the ancient classic honour—the image of the captured city should be carried in triumph; but he has nobly earned the right to have his tomb inscribed with its name, in memory of the most terrible siege of modern history, considering the disadvantages under which it was conducted by the departed chief *Placidâ compositus pace quiescit!*

LORD PALMERSTON has correct notions on the uses and functions of a national Post-office. In reply to a question from Mr. Moffatt, on Monday night, his Lordship said "that the Post-office was to a certain degree, no doubt, an office of revenue, inasmuch as the Post-office service produced a certain amount of revenue though not to any important extent; but he considered that the collection of revenue by the Post-office was rather incidental than an essential function, and that the Post-office was an administrative department of the Government rather than one for the collection of revenue. It was the opinion of those who had most studied the matter that the main object of the Post-office was, *not to collect revenue, but to effect an easy, ready, and cheap transmission for correspondence for the convenience of the public and the promotion of the commercial interests of the country.*"

His Lordship might have added, that for the convenience of the commercial interests of the country, and as a great means of social education and improvement, the expeditious and cheap conveyance of newspapers was equally important. This fact is appreciated in Canada, if not in the mother country; for the Canadians are so firmly convinced of it that they are not contented with transmitting newspapers cheaply, but have undertaken to convey them gratuitously to every part of the colony. We are glad to see that Lord Palmerston's views on the subject are so sound and statesmanlike, and wish that the subordinate officers of the Post-office, and especially Mr. Rowland Hill, could be made to entertain opinions equally comprehensive and reasonable. But we regret to observe a narrowness of mind in Mr. Rowland Hill, in reference to the functions of the Post-office, and more especially with regard to the transmission of newspapers, which is surprising in a person of his general attainments and undoubted public services. To Mr. Rowland Hill it must never be forgotten that we owe that great social reform—the Penny Post. But Mr. Hill who, when not a functionary, was a most admirable servant of the people—has been spoiled, we are afraid, by his contact with officialism, and bids fair to degenerate, unless public opinion set him right, into as arrant a devotee of red tape as ever yawned over a newspaper in Downing-street, or was saucy to a deputation in Whitehall. No sooner had the Legislature abolished the compulsory newspaper-stamp, than Mr. Rowland Hill devised measures of repression against newspapers, which have already had the effect of preventing their usual circulation in the Colonies, and of very greatly limiting their circulation at home. As shown by Sir Cusack Roney, in his very proper and convincing letter to the Secretary of the Post-office, published in the *Times*, every British colony which, before the passing of the Newspaper-stamp Abolition Bill enjoyed exemption from newspaper postal rates, has been subjected to a rate of one penny for each newspaper (in addition to the Somerset-house penny stamp); and in the case of Canada to a rate of twopence. This penny and twopenny rate must be prepaid in England. The consequence has been that very great dissatisfaction has been excited, and that still more will be felt; that many tons of newspapers are lying in the Post-office, and will not be forwarded; that our colonists will, to a large extent, be deprived of what is to them a luxury of life, and a necessary of civilisation the English newspapers; and that their friends in England will be taxed, without the consent of Parliament, to a serious extent, if they wish by means of newspapers to communicate with the Colonies, with which they have so many relations of business as well as of affection.

Nor is this the only point. This Journal, if stamped with the penny stamp at Somerset-house in the usual way, can be posted free, and reposted every day for fifteen days; and by this means be circulated to every part of the country. This is a privilege for which we are grateful. We took it upon ourselves, however, to submit to the authorities of the Post-office that it would be a great convenience if our unstamped copies could, for the sum of one penny, paid by a postage stamp or Queen's head affixed to the cover, be transmitted *once* through the Post-office, and forwarded to Lord Canning a copy of the ILLUSTRATED LONDON NEWS of the 23rd ultimo, containing an article in which we detailed our views upon the subject, and a letter directing his Lordship's attention to it. The following is the reply with which we have been favoured:—

General Post-office, 7th July, 1855.

SIR,—Having submitted to the Postmaster-General your letter of the 23rd ultimo, together with a copy of the ILLUSTRATED LONDON NEWS, by which it was accompanied, I am directed to acquaint you that Lord Canning is unable to admit that it shows any just ground of complaint.

You state that, but for the issue of the Treasury Warrant, which has extended the facilities previously existing for the distribution of printed matter in general, the new regulations applicable to newspapers would have been satisfactory. But the Treasury Warrant, of which you complain, in no way diminishes the facilities attached to newspapers, and consequently deprives you of no advantage which you had previously enjoyed.

Moreover, although you have lost no advantage, others have undoubtedly gained one. The Treasury Warrant gives a boon to postal facilities to all publications, whether newspapers or not, *where no newspapers are*; but the ILLUSTRATED LONDON NEWS cannot avail itself of these facilities, because it exceeds that weight; and surely, when even you admit the privilege of having your publication, though of the unusual weight of nearly six ounces, carried repeatedly for a penny (*a privilege so great that its continuance can only be defended on the ground that it grew up under a law of many years' standing*), you cannot think it a hardship that other proprietors should have their publications of only four ounces carried once for a penny.

It appears to the Postmaster-General that nothing more can be required than a clear statement of the case to satisfy you that your complaint is not reasonable; and I have only to add that his Lordship can hold out no expectation that the important privilege afforded the public by the Treasury Warrant can be withdrawn, or that the weight of printed matter of all kinds to be carried for a penny—already very large, being eight times that allowed for letters—can be still further extended.

I am, Sir, your obedient servant,
J. TILLEY.

To the Editor of the ILLUSTRATED LONDON NEWS.

From this letter it is evident either that the officials of the Post office do not understand that it would be worth while to carry once for a penny a packet which, if stamped in a peculiar way, they can be compelled by the Government to carry fifteen times for the same sum; or that, if they do understand it, they have systematically determined to obstruct the transmission, as far as they can, of such journals as the *Times* and the ILLUSTRATED LONDON NEWS—the two journals of the kingdom that are the largest in size, and have the largest circulation. The letter by no means meets the objection we raise, which is simply this—that it is very absurd in the Post-office to refuse to do once for a penny the service which it may be compelled to perform fifteen times for the same sum. Mr. Rowland Hill for he, and not Lord Canning, is the virtual head of the Post-office—wishes evidently to be relieved of newspapers altogether, and to make himself purely and simply a letter-carrier. But the Post-office is not the whole Government; and these questions are to be considered on higher grounds than those of mere revenue. The whole management of the newspaper branch of the Post-office has been in a high degree vexatious since the new law came into operation, as if Mr. Rowland Hill had sedulously determined that the public should reap no advantage from it; but that the Post-office, in a manner unforeseen by the Government, and adverse to the interests of the Government as well as of the people, should derive a larger amount of revenue than before. Mr. Rowland Hill had the genius to devise one great scheme: and we should be loth to believe that he is a man of one idea, or that the sweets of office had made him indifferent to the public opinion, which bore him to the place he holds, and which can alone maintain him in it. The parenthesis in the letter, which we have printed in italics, betrays the animus of the mind from which it emanated. Lord Canning or Mr. Hill cannot see the advantage to the public of the privilege of transmission and retransmission possessed by stamped newspapers; but fortunately this is a national question, not to be settled at St. Martin's-le-Grand, or measured by the narrow compasses of that establishment. There is not much time for Parliament to take it up; but we understand that the Session will not be allowed to close before the whole question, both as affecting the Colonies and the circulation of newspapers at home, will be seriously considered

not in the restricted sense of Mr. Hill or Lord Canning, but in the statesmanlike and wise sense of Lord Palmerston, and of every one else who has devoted attention to the great subjects of popular enlightenment and the due extension of trade and commerce. All these are involved in the cheap, if not the free, transmission of newspapers—though perhaps Mr. Rowland Hill is not yet aware of the fact.

NEWSPAPER "OBITUARY."—A few days ago we announced the demise of two penny daily newspapers in Manchester, which died in early infancy from want of adequate nourishment. Since that time two other penny journals have given up the ghost—namely, the *Leeds and Yorkshire Daily Express* and the *Newcastle Courier*. The former was the offspring of the *Leeds Times*, and it expired on Tuesday, aged fourteen days, of actual starvation.

IMPERIAL PARLIAMENT.

(Continued from page 87.)

HOUSE OF LORDS.—THURSDAY.

EDUCATION (SCOTLAND) BILL.

The Duke of ARGYLL moved the second reading of this Bill in a speech of some length, in the course of which he stated the purposes of the measure, and the reasons which urged the Government to propose it.

A discussion then took place.

The Duke of BUCCLEUCH opposed the bill, repeating the same arguments which had been urged in the Commons by the opponents of the measure, and moved as an amendment, that the bill be read a second time that day three months.

The Duke of ARGYLL ultimately, on the part of the Government, consented to withdraw the bill.

The question having, however, been put, a division was insisted upon, when there appeared—For the bill, 1; against it, 86—majority against the bill, 85. The bill was therefore lost.

The other bills upon the paper were advanced a stage.

HOUSE OF COMMONS.—THURSDAY.

Viscount ERRINGTON presented a petition from the Rev. C. C. Layard, complaining that he had been refused admittance by the Bishop of Exeter to a benefice in Devonshire, to which he was lawfully presented by Sir J. Kennaway, though he had received commendatory and testimonials from two Bishops, a number of clergymen, and two congregations among whom he had laboured.

ADJOURNED DEBATE. THE ARMY BEFORE SEBASTOPOL.

On the order of the day in reference to the adjourned debate,

Mr. ROEBUCK presented a petition from Birmingham, praying that the House would agree to the vote of censure on the Ministry, and would carry it out to its conclusion namely, impeachment.

Mr. OTWAY presented a petition from the Potteries to the same effect.

Mr. GASKELL then resumed the debate, and complimented the Sebastopol Committee on the zeal and ability with which they had discharged their duties. He reviewed the proceedings of the late Government in reference to the war. There had been a want of definite policy, and a want of Ministerial sympathy, for when an army was in jeopardy there was no meeting of her Majesty's Cabinet. For these shortcomings he held that the First Minister of the Crown was mainly responsible. Reviewing the career of Lord Raglan, he affirmed that that gallant nobleman was called upon to carry out an expedition which his judgment condemned, and that he did it through evil report and good report he had pursued his career with calm and unshaken fortitude. The hon. gentleman concluded by stating that he should vote for the resolution of the hon. and learned member for Sheffield.

The ATTORNEY-GENERAL referred to the efforts that were made by the Conservative party to form a Government when the Aberdeen Administration left office, and to the failure they had experienced. When the people from one end of the country to the other called the noble Lord (the member for Tiverton to the head of affairs, a generous forbearance was promised, and it could never be supposed that the noble Lord should be made responsible in respect of transactions anterior to that period (Hear, hear). The hon. and learned gentleman arrayed his criminals at the bar, and first and foremost placed the Duke of Newcastle, whom he entirely acquitted. Then came Mr. Sidney Herbert and Sir J. Graham, for whom he made ample apologies. But there was one person upon whom he wished to bring the full tide of public censure and Parliamentary reprobation. That was one who had nothing to do with the administration of the war, but who was engaged in the direction of the internal affairs of the country. Why, then, was that nobleman marked out for Parliamentary censure? simply because he was the Prime Minister of England, and because the hon. and learned member for Sheffield desired to upset the noble Lord's Government, and to substitute for it a Government from the other side of the House (Hear, hear, from Mr. Roebuck). The hon. and learned member for Sheffield was in direct political alliance with the Conservative party, and it would save him a great deal of trouble if he would now at once take his place on the Ministerial side of the House, and take his seat on the other side. (Cheers, and "Oh, oh!") He (the Attorney General) maintained that the Conservative party intended supporting the motion of the hon. member for Sheffield, simply because the noble Lord would not form an alliance with them, and because he was at the head of their opponents. If the noble Lord had been their ally instead of their opponent, they would have unanimously resisted the resolution now before the House (Loud cheers). In dealing with this subject, he trusted that the House of Commons would remember that they were not assembled to discuss mere party question, but to decide judicially; and he would ask whether it was worthy of them as a mere party proceeding to run down a veteran statesman who had served his country so many years, and whose faults, if there were any, the House and the country had condoned when they called upon him to accept the eminent position he at present occupied (Cheers). Looking to the resolution proposed to the House, he found that it went much further than the report of the Sebastopol Committee. The hon. and learned gentleman condemned the expedition to the Crimea, but it must be remembered that it was only the result of an accident that that expedition was not successful. If that accident had not occurred the expedition would have been successful, and the House and the country would have rung with the praises of the Government (Cheers). It was clear that the House was not justified in introducing confusion and disorder while the war was being carried on with vigour and energy, and he thought, therefore, that a sense of justice should induce the House to reject the amendment proposed by the gallant member for Huntingdonshire (General Peel).

Mr. WESTERTON supported the resolution, as tending to secure Parliamentary probity and Ministerial responsibility.

Lord J. RUSSELL said he could not accept the apology of the Attorney-General that the noble Lord at the head of the Government was not responsible because he was only Home Secretary in Lord Aberdeen's Government. He would accept of no such apology for himself, for every member of the Government of Lord Aberdeen must share the responsibility so long as he remained a member of the Government. He then proceeded to defend the Government of Lord Aberdeen from many the charges of Mr. Roebuck. The hon. and learned gentleman had said that the members of that Cabinet were not at their posts when the army was perishing from cold, hunger, and tempest. Was that honest? The Cabinet was absent from the latter end of August until the 17th of October. It was long after that that suffering befell the army of the Crimea; and yet, in his anxiety for justice, he put two periods together which he knew to be widely different; and this he did to gratify his morbid desire, he would not say to pour out venom, but to attribute blame. The hon. and learned gentleman indulged in a great deal of imagination wholly unsupported by argument. The House knew nothing which could enable them to form a judgment to justify such a motion as that of the hon. and learned gentleman. The noble Lord then proceeded to defend the policy of the expedition to the Crimea, and contended that the motion was one which under no circumstances could be justified

Mr. BRIGHT gave his entire approbation to the conduct as well as to the report of the Sebastopol Committee, and thought it impossible that some step should not be taken upon their report. How it happened that some of the parties to those transactions were punished that others were to escape? The only one that, in his opinion, ought to escape was Lord J. Russell; for, when he found that Sebastopol was not about to be captured, he turned King's evidence, and persons holding that position were always exempted from punishment. He viewed the motion as one of censure upon the Government of the day, and not upon the noble Lord at the head of it; and he hoped he would not ride off upon the shabby apology put forward for him by the Attorney-General.

Sir EDWARD EVANS thought that Mr. Roebuck deserved the thanks of the country for his services in reference to the Sebastopol Committee; but he could not concur in such a sweeping censure as he had proposed, or pass a sentence of perpetual exclusion from the public service against every member of the late and the present Governments. He thought that there were great shortcomings on the part of the late Government, and even a deficiency of energy on that of the present one. Had it not been for the admirable conduct of the newspaper press in awakening the country to a sense of the position of its army in the Crimea, and had it not been for the loyalty of our ally, the Emperor of the French, that army would not now be in existence. He condemned the negotiations that were carried on while we were engaged in such a war, and spoke with the greatest confidence of the attainment of our great object—the subjugation of Russia—if we continued the war with that vigour and energy which became us as a great nation

Captain GLADSTONE, as a member of the Sebastopol Committee, was opposed to the proposition before the House

Mr. MUNTZ spoke in favour of Mr. Roebuck's motion.

Mr. SIDNEY HERBERT denied the many discrepancies between the statements in the Report and the evidence upon which they were founded. He did not think that justice had been done to the Duke of Newcastle, who had himself organised a land transport service, and also a hospital staff, in the East. The Government had sent out a reserve as a reinforcement, after the battles of Alma and Inkerman, up to the month of December last. He was opposed to evading the main subject by voting for the previous question.

Mr. E. ELLICE, as a member of the Committee, justified the Report, but declined being a party to the resolution of Mr. Roebuck.

Mr. G. GREY defended the Government from the charges that had been brought against it.

Lord J. MANNERS thought that the House ought to assent to the bill already made to it by Sir J. Graham and Mr. S. Herbert, and should not seek to get rid of the real issue before it by voting for the previous question.

Lord PALMERSTON said that the principal parties that were exposed to censure by the resolution of Mr. Roebuck were the heads of the War and Admiralty departments in the late Government; but the hon. and learned gentleman, instead of censuring them, passed compliments upon them; consequently, the other members of the Government in assisting to carry out the general objects of the Administration could not be considered by the hon. and learned member as censurable. The noble Viscount then, at some length, entered into a justification of himself and his Government.

Mr. DISRAELI pronounced a brilliant philippic against the Government, and called upon the House to vindicate their consistency in supporting the resolution of Mr. Roebuck, which was founded upon the report of their own Committee.

Mr. ROEBUCK briefly replied,

The House then divided:—

For General Peel's amendment	.. .. ..	.. 289
Against it	.. .. ..	.. 182
Majority in favour of the Government		.. 107

HOUSE OF LORDS.—FRIDAY.

Lord LYNDHURST complained of the few measures introduced by the Lord Chancellor, during the last two Sessions, for effecting any substantial reform in the law, notwithstanding the pledges given by the noble and learned Lord to carry out such reform

The LORD CHANCELLOR refused to plead guilty to the charge, and referred to several measures he had introduced, some of which he had yet to receive the Royal assent, and others were postponed in consequence of the all absorbing interest in questions relating to the war, which had occupied four-fifths of the time of the present Session.

Lord BROUGHAM hoped that the noble and learned Lord would give his earnest attention to a reform of the law relating to Marriage and Divorce.

His Lordship again rose, and, in presenting a petition praying for an inquiry into the subject of Slavery and the Slave-trade, alluded to the cruelties that were practised in Cuba; and expressed a hope that the Government would use every exertion possible to put an end to that abominable traffic.

Lord CLARENDON said that the Government were fully alive to the importance of the subject, and to the necessity of doing all that could be done to effect the total abolition of Slavery and the Slave-trade

The Merchant Shipping Act Amendment Bill, and the Bills of Lading Bill were read a second time.

The Bills of Exchange and Promissory Notes Bill was read a third time and passed.

The Burials Bill, after some discussion, was reported, with amendments.

The Raglan Annuities Bill, and the Dwelling Houses (Scotland) Bill, were read a third time and passed.

Several other bills upon the paper were advanced a stage.

HOUSE OF COMMONS. FRIDAY.

Sir W. MOLESWORTH, in reply to Mr. G. Langton, said he had heard of a picture having been stolen from Hampton Court, and of others having been damaged. A reward had been offered for the detection of the offender. Great improvements were going on at Hampton Court with reference to the convenience of the working classes

Mr. F. PEEL, in reply to Mr. Wells, said it was not intended to alter the present system of billeting the Militia.

THE DANUBIAN PRINCIPALITIES.

Lord PALMERSTON, in reply to Mr. Layard, repeated that the First and Second Points at the Vienna Conference were only provisionally agreed to as part of the whole, and therefore Government were perfectly free to discuss any propositions which might be made. There was a combined commission of French, English, and Austrian functionaries to take into consideration any grievances complained of by the inhabitants of Moldavia and Wallachia. The noble Lord, in reply to another question from Mr. Layard, said that Sir C. Napier had been offered the Grand Cross of the Bath, but he had declined to receive it.

Lord PALMERSTON (in reply to Mr. Disraeli) said he could not lay on the table the papers relating to the general instructions given to Plenipotentiaries.

Mr DISRAELI said that the noble Lord had himself moved for similar papers in the case of Sir W. Ouseley and Lord Ashburton.

Lord PALMERSTON objected to give the whole of the instructions given to Lord J. Russell in his mission to Vienna, but had no objection to give such extracts as might be necessary to elucidate the Four Points.

MASSACRE ON THE COAST OF AFRICA.

Mr. BRIGHT drew the attention of the Government to a conflict on the coast of Africa, the details of which appeared in the newspapers.

Sir C. WOOD said the Admiralty had not as yet received any official information of the occurrence, in which it was stated that many of our troops, and 400 of the enemy, had been killed.

The Metropolis Local Management Bill was read a third time. Several clauses having then been added, the bill passed.

THE TURKISH LOAN BILL.

The House having gone into Committee upon this bill, Lord PALMERSTON moved a resolution that her Majesty be authorised to guarantee the payment of the interest on the loan of £5,000,000, to be contracted for his Imperial Majesty the Sultan, in pursuance of the convention signed in London, on the 27th of June last, between her Majesty, his Majesty the Emperor of the French, and his Imperial Majesty the Sultan.

Mr. RICARDO must oppose the noble Lord's motion, as he felt that the proposition was nothing less than a recurrence to the old system of subsidy, which they ought to be ready to put to the Statute Debt. He would, on a future occasion, divide the House against the proposition.

The CHANCELLOR OF THE EXCHEQUER denied that this was a subsidy or a guarantee, and nothing more.

Mr. GLADSTONE opposed the resolution upon the same grounds as that urged by Mr. Ricardo.

Lord PALMERSTON said, the necessity for the money was imperative, and it could be much more easily raised by means of this guarantee than if Turkey went into the money market on her own credit alone. There would be Commissioners on the part of France and England in Turkey to superintend the expenditure of the money.

Mr. DISRAELI said the House should pause before it assented to the resolution. For his own part, he was incredulous as to the description of the resources of Turkey; for the noble Lord was equally sanguine as to the resources of the Greek Government on a former occasion, and yet not a shilling of the loan to that country had ever been repaid. His advice was that the House should not authorise this step; but that they should take into their serious consideration the financial position of our own country. Should the House agree to the resolution the effect would inevitably be to involve this country in a financial position of considerable difficulty.

Sir DE LACY EVANS thought that the House should be furnished with much more information before they assented to the resolution.

Mr. LAING urged several objections to the proposition

Mr. LINDSAY rebuked the idea of coming to a war on behalf of a Power that was already obliged to beg the loan of £5,000,000 on the credit of this country to prevent it falling to pieces

Mr. WILKINSON supported the resolution

Mr. CARDWELL condemned the proposition in the most unmeasured terms, and said that if we were obliged to assist Turkey in the way of money it would be much better for England and France to contribute the sum required in equal halves than to enter into a guarantee of this kind, which would certainly give rise not only to quarrels with Turkey, but also to serious differences between us and our ally.

The CHANCELLOR OF THE EXCHEQUER submitted that the House would be pleasing her Majesty in an embarrassing position if they negatived a resolution founded upon a treaty which she had entered into with the Emperor of the French and the Sultan.

After some further observations from Mr. WALPOLE, and Lord PALMERSTON, in reply, the House divided, when there appeared—For the resolution, 135; against it, 122: majority in favour of the resolution, 3.

The other orders of the day were then disposed of.

THE ROYAL AGRICULTURAL SOCIETY'S VISIT TO CARLISLE.—The arrangements necessary for the Royal Agricultural Society during its visit to Carlisle are rapidly progressing. The city is to be decorated. Triumphal arches are to be raised in suitable situations. The ladies are solicited to give the committee the benefit of their taste and handiwork; large flowers, made of common calico of divers hues, are required. The arrangements for the ball are already advancing. The flower-show, it is expected, will be one of the most brilliant floral and horticultural fetes ever held in the north of England.

THE FRENCH REGALIA. The great object of attraction at the Paris Exhibition at present is the crown and the rest of the regalia, which are placed in the centre of the Egyptian Building. Every part of these jewels, however, are to be removed at present, the rest not having as yet been received from the hands of the Crown jeweller, to whom they have been entrusted for some repairs and setting. The state of the Crown jewels is the diamond set worn by Empress of the Regent, because it was purchased, in 1717, by Philippe II., Duke of Orleans, during the minority of Louis XV. It weighs 136 carats, and is valued at about £500,000 sterling. According to the last inventory made of the jewels and plate of the State are in number 64,312, weighing 18,751 carats, and are estimated to be worth 24,000,000 f. The rarest articles are the sceptre, a rose-cut white diamond less than 7296 brilliants, 146 rose diamonds, and 70 sapphires—the whole valued at 14,709,708 f. 85 c. Next comes a sword, with 1506 roses—valued at 261,165 f. 99 c.; a clasp with 217 brilliant—value, 273,119 f. 37 c.; a sword ornamented with 1576 brilliants—value, 241,874 f. 47 c.; a clasp for a cloak, mounted with an opal valued at 37,500 f., and 197 brilliants worth 30,658 f.; and a button for the hat with 21 brilliants—worth 240,760 f. Among the articles for ladies are four head-dresses—estimated in value at 1,165,163 f., 263,755 f. 59 c., 285,816 f. 9 c., and 139,820 f. 63 c.; a brilliant necklace, worth 153,900 f.; and some wheat-ears, valued at 191,475 f. 62 c.

LATEST INTELLIGENCE.

THE WAR IN THE CRIMEA.

The *Moniteur* of yesterday (Friday) confirms the news of a sortie of the Russians on the 16th inst. It announces that the Minister of War has received the following telegraphic despatch from General Pelissier:—

CRIMEA, July 18, Eleven p.m.

The Russians made a small sortie last night against the Inkerman line of attack. It is needless to say they were repulsed. To-day I visited our works at Kamiesch; they are progressing towards completion.

A letter from Paris says—"The last despatches from the Crimea state that the great works against the Malakoff tower advance but slowly; but the opinion is that, when completed, they will be irresistible. Every gun in the batteries is provided with ammunition for 500 shots.

As exchange of prisoners, it is said, is about to be made. Five hundred Russian soldiers will be sent from the dépôt at Toulon to Odessa, where the exchange will take place. It is for those French soldiers who remained within the lines of Malakoff in the attack of the 18th, that the Russian prisoners will be exchanged.

THE BALTIC FLEET.

The *Geyser* arrived at Dantzic with the mails on Friday (yesterday).

Admirals Dundas, Seymour, and Penaud were at Nargen. Admiral Baynes, with the rest of the fleet, was before Cronstadt. On the 14th the *Ruby* gun boat, with the boats of the *Arrogant* and *Magicienne*, had a sharp affair at Wiborg. One officer and one man were killed, and ten wounded

According to a correspondence from the northern parts of the Gulf of Bothnia, inserted in the *Aftonbladet*, no vessels of the Allied fleets had arrived as far north as Umea by the 4th inst. In Wasa there were at that time 200 to 300 Russian troops, and in Ny-Carleby only twenty to thirty Cossacks. Gamla-Carleby, where they took forward to another visit from our countrymen, has a garrison of 2000 men in the town and neighbourhood; earthworks also have been thrown up round the town. All pilots that formerly had their stations in the outer channel had been compelled to take up their abode in the town.

THE COURT.

The generally perfect health of the young members of the Royal family has been interrupted since the arrival of the Court at Osborne by a slight attack of scarlatina which their Royal Highnesses the Princess Louisa and Prince Arthur have sustained. The same disease has also declared itself in his Royal Highness Prince Leopold, who was left at Buckingham Palace in consequence of a slight accident. Their Royal Highnesses are going on most favourably; and the remainder of the Royal family are perfectly well

On Saturday the Court of Flanders left Osborne for London, whence, on the following day, his Royal Highness proceeded to Edinburgh, attended by Sir Robert Carswell in the evening of Monday Vice-Admiral Sir Thomas Cochrane, Major-General Bruton (commanding the South-Western District), and Captain the Hon J. Denman had the honour of dining with her Majesty

On Tuesday the Queen, accompanied by the Princess Royal, the Princess Alice, and Princess Charlotte of Belgium, drove to Carisbrook Castle. Prince Albert rode on horseback, with the Prince of Wales and Prince Alfred. In the evening Lieut.-Colonel Jeffreys and Lieut.-Colonel Harvey, of the Dépôt Battalion at Parkhurst, had the honour of dining with her Majesty.

Viscount and Viscountess Palmerston gave a magnificent banquet on Wednesday to their Royal Highnesses the Duchess of Cambridge and the Princess Mary, his Royal Highness the Duke of Cambridge, and her Royal Highness the Hereditary Grand Duchess of Mecklenburg-Strelitz.

The marriage of the Hon. Helen Duncombe, youngest daughter of Lord and Lady Feversham, with Mr. W. B. Denison, son of Mr. Denison, M.P. for the West Riding of Yorkshire, was celebrated on Wednesday, at St. George's Church, Hanover-square, in the presence of a numerous circle of the aristocracy

Note. The sign + denotes above the average and the sign — below the average. The numbers in the seventh column are calculated on the supposition that the saturation of the air is represented by 100.

The reading of the barometer decreased from 29.92 in. at the beginning of the week to 29.78 in. by the 14th; increased to 29.89 in. by the 15th; decreased to 29.44 in. by the 16th; increased to 29.71 in. by the 18th; and decreased to 29.55 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.68 in.

The mean temperature of the week was 61·6°—being 0·0° below the average.

The range of temperature during the week was 30·7°, being the difference between the highest reading, 78·7°, on the 13th, and the lowest, 48°, on the 17th.

The mean daily range of temperature during the week was 18·0°.

Rain fell during the week to the depth of one inch.

The Weather.—On Saturday, at 6 a.m., many flashes of lightning were seen, and peals of thunder were heard, but no thunderstorm was experienced here; although in the west of London there was a heavy thunderstorm, and rain fell heavily. The temperature, which in the two preceding weeks had been above the average, declined on Monday below it. Rain fell heavily on the 16th, and was accompanied by thunder on the 19th.

Lewisham, 20th July, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—The births of 1370 children were registered within the week ending July 14: 679 were boys and 691 girls. The average number for the same week, from the registers of the preceding ten years, is 1286. The deaths registered within the same space and term were 861—namely, 435 males and 426 females. The average number derived from ten years' observation, for the twenty-eighth week of the year, corrected for increase of population, is 1049, so that the result of the comparison is that 188 persons died less than the corrected number, exhibiting a result as favourable as was shown last week.

DOWNING-STREET BROKEN DOWN.—From a report of Mr. Pennethorne, the architect, just printed in a Blue-book, it appears that the building in Downing-street and square is in a very dilapidated condition. Their foundations are upon peat, and every one of them has settled considerably; all the heavy chimneys have sunk, and the walls having been shaken and split by the chimneys, they are not susceptible of alteration nor worthy of repair. The Foreign-office is "propped or tied up" in various parts; the Colonial-office is still worse; and the First Lord of the Treasury's office is, though in appearance strong, in a more dilapidated condition than the others.

THE THUNDERSTORM OF LAST SATURDAY.—Early on Saturday morning last the metropolis and the adjacent country within a circle of thirty miles were visited by a thunderstorm, accompanied by hail and rain. The atmosphere during the night was hot and close, with light and variable airs. Shortly after six o'clock the storm burst over the metropolis; the lightning was intensely vivid, whilst peal upon peal of thunder followed incessantly. The rain descended in sheets. About a quarter before seven o'clock a tremendous peal shook the houses in the northeastern districts with their tremendous crash, so alarmed the inhabitants that numbers rushed out half-dressed into the drenching rain. The storm afterwards passed rapidly way, and was succeeded by sunshine. The streets in the South-Eastern, Eastern Counties, and Great Northern railways state that in some places the lines were temporarily submerged. In the vicinities of Holloway, Islington, and Hornsey, considerable damage has been sustained by nurserymen and market-gardeners, by the breakage of glass, partly caused by the driving hail and partly by the reverberations of the thunder. The electric fluid struck the house of Mr. C. Brotherton, situate at No. 24, Estredge-place, St. John's-wood. At the time of the shock Mr. Brotherton was asleep in one of the top rooms, and was aroused in the greatest consternation by the falling of a portion of the roof about his ears. Not only was the place covered with the *débris* from the roof, but the back of a chest of drawers was torn out, and a large quantity of paper and furniture were scattered about the apartment. The fluid, it is believed, passed down the chimney, across the drawers, and then made its final exit through the roof, which it tore open in its progress.

"THE SNAP" GUN-BOAT OF H.M.S. "JAMES WATT" SENT TO INTERCEPT ALONG-SHORE TRAFFIC.

THE BALTIC FLEET.

ALTHOUGH not employed in any grand undertaking, the Allied fleets in the Baltic are making their influence felt all along the coast in a way that must be the reverse of agreeable to those who have the ill-fortune to live there. For the last few weeks the gun-boats have been keeping a very sharp look-out on the coast traffic. Not a boat even so large as a Thames wherry can float upon the waters within sight of our cruisers.

The *Snap* gun-boat, represented in this Engraving, accompanied Captain Hall, of the *Blenheim*, when he went to Narva a few weeks ago. A letter from an officer on board, in speaking of the affair in which the *Snap* and *Pincher* were engaged, says:

Those boats were admirably managed by their commanding officers, and made excellent practice with shot, shell, and rockets; range varying, as they shifted their positions, from 1200 to 2000 yards. Lieutenant Travers, R.M., with a party of artillerymen, and Mr Harper, senior Assistant-Surgeon of the *Exmouth*, were on board the *Snap*. At six a.m. *Exmouth* and *Blenheim* anchored. At 7.45. Gun-boats ceased firing, and rejoined their ships. The entrance to the river being over a bar, with only about eight feet water, the banks on either side very high, and nine miles up the river being the town and large military station of Narva, we presume it would have been folly to engage the forts, not having any troops to land and destroy the guns and batteries; but the Admiral, thinking it would be good *practice* for the ships, worked them in to 2000 yards (distance from forts) at 1 p.m., and getting springs on the cables, commenced firing on the batteries, taking good aim, and firing steadily. Very few of the enemy's shot reached the *Exmouth*, but some struck the *Blenheim*, wounded the mizen-topmast, and a splinter struck the captain of the marines on the chest with some violence. This was the only casualty. What damage was done to the forts and stores we cannot tell, but they ceased firing long ere we ceased our gun practice. At four p.m. ships secured their guns, and steamed out, and joined the fleet off Seskar at 8 a.m on the 19th. Narva was not visited last year, and the batteries appear to have been lately thrown up, and not yet finished. Many embrasures were without guns. It is only about sixty miles from St. Petersburg. The object of Admiral Seymour's visit was to reconnoitre.

The arrival of the Russian steam-yacht *Couveur*, with a flag of truce, bringing despatches to Admiral Dundas, took place on the 29th ult. The Russian steamer was met and boarded by Captain Boyd, of the *Royal George*, and conducted by him to the north division of the fleet, where the Admiral was. There would no doubt be many a sharp glance thrown by the persons on board the Russian vessel at the presumptuous foreigners and their mighty fleet.

The other Engraving represents the *Amphion*, 34-gun frigate, at a place called Sandhamn, in the neighbourhood of Helsingfors. Captain Astley Cooper Key had been ordered to stop the shore traffic, and while doing so had fallen in with three gun boats which he endeavoured to cut out. When he got his ship in he found that the Russians had seven masked batteries, five of which opened fire upon him. Nothing daunted, he returned the fire, dismounted several of their guns, blew up a warehouse, and then made off, having sustained very little damage.

"THE AMPHION," 34-GUN FRIGATE, AMONG THE BATTERIES AT SANDHAMN HELSINGFORS.

RUSSIAN STEAM-BOAT, WITH A FLAG OF TRUCE BRINGING DESPATCHES FOR ADMIRAL DUNDAS.—(SEE PRECEDING PAGE.)

THE HYDE-PARK RIOTS

COMMISSION OF INQUIRY INTO THE CONDUCT OF THE POLICE.

THE Commissioners appointed to inquire into the conduct of the police during the late riots in Hyde-park held their first sitting on Tuesday in the Court of Exchequer at Westminster. The Commissioners are: The Right Hon. J. S. Wortley, Recorder of London; Mr. Armstrong, Q.C., Recorder of Manchester; and Mr. Henderson, Recorder of Liverpool. At the commencement of the proceedings very few persons were present; the numbers increased somewhat in the course of the afternoon; but at no time was the court crowded.

The first witness called was Mr. William Oliver, who, in answer to questions by Mr. Mitchell, stated: I reside at 15, Great Quebec-street, Montagu-square. I was in the Park on the 1st of July, at half past four. I made an observation on the conduct of the police, especially that of constable 413 A. I took no notice of any other. I saw him strike a man, who fell, when on the ground the constable struck him over the back and across the loins with his truncheon. It was on the north east side of the Serpentine, 400 or 500 yards from the road leading to it. The man was lying down when struck. I cried out "Shame!" I did not see the man strike the police. I do not know what had occurred previously. When the man was taken up his eyes were staring out of his head, and he appeared very much hurt. I could not ascertain who the man was. He appeared about forty years of age. He did not resist the police in any way. I saw two or three policemen take him off. The hurdles were broken down, and it appeared to me that there was an attempt at a rescue, but I do not think it succeeded. I remained in the Park from half-past three to half past four. I walked across from the Marble Arch. The conduct of the people was very good. There was very little calling out; when there was the police rushed upon the parties with their truncheons. I returned through the Park about eight o'clock, and saw bodies of eight and ten of the police running about like in a play at Astley's. I did not see the police strike any women or children. I cannot say I heard any bad language from the police, nor any swearing.

Henry Salisbury, master tailor, of Staverton row, Walworth-road, saw Mr. Muir attacked by three policemen. He saw them handling him with so much violence that it raised his indignation. They rushed at him and collared him with great and unnecessary violence. He could not say he saw a blow struck, but he saw a parry, as if Mr. Muir was parrying their blows. He did not see Mr. Muir strike the police. He could not have done so without his seeing it. He saw them drag him along with great and unnecessary violence. He was a gentlemanly man, and apparently in delicate health. There was no hooting or calling out on the immediate spot. When Mr. Muir was carried off the ground I cried out "Shame!" There were so many similar cases that his did not excite any extraordinary commotion. He observed unnecessary violence and a great excitement on the part of the police during the afternoon. They pushed about females and well-dressed persons in all directions. He saw well-dressed people used with a degree of ruffianism that he did not believe the police capable of. They rush'd suddenly in companies of twenty on the people without any warning. The general conduct of the police on that day displayed a great deal of unnecessary violence. He observed the mounted inspectors riding up and waving their hands, as if giving instructions. The police appeared, in consequence of them, to form themselves into companies, and then assault the people.

Cross-examined by Mr. Ellis: I saw the police thrust their hands into Mr. Muir's collar with unnecessary violence; he was standing still; he was parrying with his stick; I could but infer that a blow had been struck at his head. He could not strike the police without my seeing him. The police might have struck him in the scuffle; the police made the scuffle; they rushed at him as he was the tallest of the crowd. I had been in the same place about three-quarters of an hour. I consider that the excitement got up by the police was most unwise. They appeared to act under the impression that a degree of violence that I never saw before. I have no idea of the number of the people there if the police wished to disperse the crowd, the number of them there was not too great. I saw the notice of Sir R. Mayne, but did not read it. I did not shout at the carriages. I think it would be quite a justifiable interference on the part of the police to prevent people shouting at the carriages.

To Mr. Mitchell: The excitement was of the police's own creating. There was no outrage, but some peculiar observations. I saw no positive outrage.

Mr. Francis Henry Mair examined: I reside at No. 44, Charlwood-street, Warwick-square, Pimlico. I am an ecclesiastical and estate agent for the purchase of advowsons. I carry on business in Threadneedle-street, Covent-garden. I was in the park on the 1st of July. I entered it at five minutes to four. I was alone. I walked on the southern side of the main ride going towards the serpentine. I continued my walk until I came to the crossing from Albert-gate to the east end of the Serpentine. I crossed to the north side, and placed myself behind the rails. In crossing the road I was pushed forward by two policemen, to whom I had never spoken. I stopped on the grass, near the posts at the corner. The rest of the rails were filled up four or five deep. When I was standing there I uttered no observation to any person. After I had been there a minute or two I was attacked by the police. After standing two or three minutes pretty still, I observed a gentleman on horseback, in uniform, come up and give some directions to the police, but I did not hear what they were. Immediately the whole body that were in the ride went up to the rails, and drove the people back. They held up their truncheons first in a menacing attitude, but as the people were four or five deep the people in front could not get back, upon which the police struck them right and left with their truncheons. Policeman 370 A struck at me with his truncheon. At first he came in a menacing attitude to the people, and I asked him, "What are you going to do, fellow?—are you going to kill us all?" He said, "They are our orders." But whether he meant to kill us all I do not know. I was excited at the time, and I said, "—— such orders!" I was afraid of being struck, and if I had not stepped back I should have been hit The blow was aimed at me particularly. Policeman 370 A then rushed at me through the posts, and struck at me. I held up my stick to parry the blow, and in doing so the point of it touched the policeman. His truncheon then touched me. I said immediately, "I beg your pardon; I did not mean to assault you." If I had not held up my stick I believe the truncheon would have struck me. I held up my stick in self-defence. The policeman immediately called "An assault!" Several policemen collared me at once behind, before, and every part where they could get hold of me. They pulled me down with great violence, and tore my shirt. I made no resistance, nor did I address a single word to the people. The people cried "Shame" and I was put into a cab. I held out my hand and said, "Will will see fair play?" by which some gentleman might see that I would follow me. Mr. Bruce followed me. I was taken to Vine street, and a charge was made before the inspector of assault and riotous conduct. I was put into a cell, as they would not hear my witness. Mr. Bruce offered to become bail for me. Mr. Bruce is a barrister, and one of the *Civil Service Gazette*. I was put into a cell with three drunk and disorderly characters from the Saturday night. It was a very small cell, ten feet by seven feet, and eight feet high. The smell was very offensive There were six of us in it all night—a rather dark notice, and two drunk and disorderlies. When I got in the stench was so intolerable that I thought I should faint, and I implored them to bring me water, which they did after some time. It was a very hot night, and the perspiration ran off the ends of my fingers. I lay down on my back on the floor for some hours, as I considered the air was more pure there. One of the drunk and disorderlies was brought up from a lower cell, and he said that at this place we have been to the cell he had just come from, as there were thirty-six people in that cell. A gentleman named Acton came to eleven o'clock on Sunday night, and offered to become bail for me; but the police said they had orders not to take bail. I had been confined in my room fifty weeks. A friend applied to the inspector, as I was in delicate health, that I should be allowed a glass of wine, but he refused. I was taken out of the cell at ten o'clock on Monday morning, and was put into a large room with about one hundred persons. A short my solicitor came, 370 A and his sergeant came [illegible] soon as he saw me they said that he should not see me particularly. I then saw Acton [illegible]

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE petition from the English engravers to her Majesty has been the chief subject of conversation in artistic circles during the present week. We have been favoured with a copy of this petition (it is still in manuscript), and shall transcribe it entire, for it puts the "hard case" of the engravers in a striking and unmistakable light. It runs thus:—

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

The Humble Petition, &c.,

Sheweth,

That the art of engraving has been since its first discovery universally esteemed (except as is hereafter shown by the Royal Academy of Arts in this country) as one of the most valuable branches of the Fine Arts.

That the greatest painters are indebted for the universality of their reputations to the art of engraving—the best remembrance of the famous "Last Supper" of Leonardo da Vinci existing now and for ever in the noble engraving by Raphael Morghen

That some of the greatest painters, such as Rembrandt, Vandyke, Hogarth, &c., were engravers, and that very large prices continue to be paid by collectors and by the Trustees of the British Museum for choice specimens of their art with the graver and etching-needle.

That the Trustees of the British Museum are engaged in framing the choicest specimens of the art pursued by your Majesty's humble petitioners, entrusted with skill by your Majesty and your Majesty's Royal Consort, deeming an exhibition of the best engravings as one that will naturally conduce to the advancement of the Fine Arts.

That Raphael, in return for a present of prints from Albert Durer, sent the great German engraver a present of his own portrait, painted by himself.

That Heinsius was knighted by Louis XIV.; and that the highest honour awarded by a sovereign of this country to any member of the Royal Academy of Arts, viz., that of knighthood, was awarded by your Majesty's Royal grandfather to an English engraver—Sir Robert Strange.

That the Royal Academy of Arts in London, especially excludes engravers from every advantage or honour in the Academy—its laws and regulations directing that its six Associate Engravers "shall not be admitted into any office of the society, nor have any vote in their assemblies."

That the best English engravers—viz., Strange, Sharp, Woollett, and Raimbach whose masterpieces are recognised examples in European schools, were substantially discountenanced by the Royal Academy; and that one and all of these great engravers, whose works are known wherever Art is known, refused to allow their names to be put in nomination for election to the subordinate degree of Associate Engraver of the Royal Academy, properly feeling that their art would have been degraded in their persons had they stooped to such a course

That the existence of a law which has prohibited the greatest engravers of this country from lending their names to the Royal Academy is injurious to the promotion of the Fine Arts; while, by admitting engravers too often of inferior merit, as it has frequently done, to the rank of Associates, it gives to strangers and the public at large an unworthy notion of the state of engraving in England, and of the fitness of the members of the Academy to make a selection into its ranks from the professors of engraving

That the present vacancy in the class of Associate Engravers is publicly advertised to be filled up on the 1st of November next, and that the Council of the Academy has issued an advertisement, calling on engravers to notify their intention of offering themselves as candidates for election, and to send in specimens of their works, a course of proceeding which tends to degrade the art of engraving in the public eye, while it demands a condescension not required by the Academy from any other class of artists, and quite unnecessary with engravers, whose works are more widely distributed than those of any other class of artists

That the six Associate Engravers of the Royal Academy are not now, and have not been at any time, an average example of the value of the art of engraving in this country.

That your petitioners, one and all of whom have been engravers for at least thirty years, have shared, and still continue to share, that feeling of conscious pride which induced a Strange, a Sharp, a Woollett, and a Raimbach, to refuse the degrading rank attached to the art of engraving by a law of the Royal Academy, and, while such law exists, will never suffer themselves to become candidates for election into the Academy

That your petitioners (some of whom are Members of the Royal Society) have good reason to believe that an alteration in the law in question is favourably entertained by many members of the Royal Academy, and only waits the approbation of your Majesty, as the immediate Patron of the Academy, to be taken into consideration by the President and members

That you petitioners have ever been ready to concede full precedence to the severer faculty and higher order of design, as exhibited in the arts of painting, sculpture, and architecture; while they have ever been unwilling to acknowledge the justice of a law which excludes the best engravers from the full honours of a body patronised by Majesty, encouraged by the free use of public rooms, and boasting the comprehensive title of a Royal Academy of Fine Arts

That your petitioners look upon the art of engraving as one akin to the art of translation; while they remember with pride what Dryden has said, "That to be a thorough translator, one must be a thorough poet;" and that Dr Johnson has called the translation of the "Iliad," by Pope, as certainly "the noblest version of poetry which the world has ever seen."

Your petitioners, therefore, humbly entreat that your Majesty will be pleased to entertain the prayer of their petition, more especially as a similar law of exclusion as regards engravers does not be found among those of any Continental Academy of Art. And your petitioners will ever pray, &c.

All that has as yet been done on this just and well-worded petition is, that Mr. Samuel Cousins, a mezzotinto engraver (and eminently distinguished as such) has been elected an "Associate Engraver of the New Class," and an "R.A. elect." This does not meet the demands of the petition; and something more must yet be done to atone for the injustice rendered by the Royal Academy (and by the Royal Academy alone) to a very noble art.

The arrival in London of Mdlle. Rosa Bonheur, the distinguished French artist, has been hailed with many marks of satisfaction by English artists of every rank. She has brought with her "The Horse Fair"—considered by many her masterpiece; and about which all our artists are in a fever of delight. Idle talkers marry her in imagination to a very distinguished animal painter of our own school; but there is no more truth in the rumour than there is in the pleasantry of a reply which Mr. David Roberts is said to have made to a letter from Mr. Ruskin regarding his "Notes" on Mr. Roberts' pictures.

Our old friend Sylvanus Urban, a Correspondent informs us, has led us into a mistake. The letter which we printed last week, from Dean Swift to his publisher about "Gulliver's Travels," is not so great a novelty as we were induced by Mr. Urban to believe it to have been. The letter, we are told, was printed by the late Dr. Cooke Taylor in his edition of "Gulliver," and this fact our Correspondent properly observes should have been noticed by our friend Sylvanus. Oddly enough, while we are correcting our mistake, some of the originals of the series of letters from Swift to Motte (unknown to Sir Walter Scott) are passing under the hammer of Messrs. Puttock and Simpson. We shall have more to say on this subject

Actors are talking of the admirable criticism on Mr. Farren in the *Times* of Tuesday, and very admirable it is. The writer has omitted to mention one of his capital parts, that of *Justice Shallow* in "Henry the Fourth." When, some six years ago, all our leading actors and actresses assembled on the stage of Covent Garden, each to play a part in Shakespeare, for the benefit of the Shakespeare House Fund, the united testimony of the best-informed critics on that occasion (and there were many present) was, that Mr. Farren's *Justice Shallow* was by far the best piece of Shakesperian acting on that night. And it was the best.

The well-timed and appropriate appearance of Mr. T. P. Cooke and Mr. Harley as the supporters of Mr. Farren on his farewell night recalled pleasantly to many who were present the lines in the epilogue by Rowe, when the great Betterton, after a stage life of fifty years, took his last benefit:—

> "Time was when this good man no help did lack,
> And scorn'd that any she should hold his back;
> But now so age and frailty have ordain'd
> By two at once he's forc'd to be sustain'd."

The two on this occasion were Mrs. Barry and Mrs. Bracegirdle.

There is a near chance of our obtaining two new volumes of Mr. Macaulay's History. They are advertised by the Messrs. Longman as actually forthcoming.

LITERATURE.

ASPEN COURT; a Story of our Own Time. By SHIRLEY BROOKS. Bentley.

Mr. Shirley Brooks is well known to the public as a successful writer for the stage, and as a pleasant contributor to the best class of our periodical literature. This novel, we believe, is his first work of fiction on an extended scale. It will raise his reputation, not only from its own intrinsic merit, but from the promise it gives of still riper fruits of a cultivated mind. Taken as a whole, it betrays inexperience in the art of construction, taken in its parts, it is full of striking and beautiful things—a great variety of characters drawn from the life, scenes of the London society and manners of our time, evidently sketched from close and acute observation, and in which the gay and humorous is blended with the pathetic in a manner which reminds us of the best efforts of Dickens. But the effect of these excellent qualities, we must repeat, is, in some measure, impaired by the author's deficiency in constructive skill. He has not been able to combine unity of design with variety of detail to frame a clear and coherent story, involving the fortunes of his principal personages and rising in interest to the denouement; for, in truth, he has created so many principal personages, every one demanding a share of our attention and sympathies, that we cannot concentrate them upon any one object or group of objects; and interest, so divided and subdivided, is sure to be weakened. Mr. Brooks, in short, has not yet learned to restrain the exuberance of his imagination, and to husband the riches of his inventive power. He has used up, in this one novel, as large a quantity of valuable materials as might—and even with better effect—have served him for half a dozen.

In the female portion of his book Mr Brooks is conventional, as many others have been before him. He writes, not from life, but from books. But when he sets himself to paint the life in which he has mingled, and the manners where he has observed, how different he is! How fresh, how graphic, how animated, how real!

It fortunately happens that a large portion of his book is made up of such pictures, and it is from these that it will derive its vitality. We cannot give specimens of them, as it would require much preliminary explanation to make them intelligible; but we can assure our readers that they abound in every volume. We must, however, give one sample of our author's style. The hero, Carlyon, has written a play, and hears with alarm that the Lord Chamberlain is going to refuse his licence. Carlyon hastens to wait upon his Lordship, who very graciously states his objections. After a number of remarks, amusingly frivolous, like those which a certain Deputy Chamberlain was in the habit of making, his Lordship went on:—

"And now, Mr. Carlyon, we come to a very serious matter, and one which makes me doubt whether, under any circumstances, I can license this comedy. This you need not write down, but have the kindness to consider what I say. Your Sir Malachite, a person of low birth, who has been knighted by an accident (*there*, you must of course remove, as every body knows to whom you refer), seeks to seduce the wife of a nobleman. Now, in these times, what can I say to this

"I would merely say, my Lord," said Carlyon, "that though your Lordship and your predecessors have hitherto protected the monopoly of theatrical vice, I have thought myself justified in opening a little new trade. From time immemorial the stage seducer and libertine has always been a nobleman, and he was then a plebeian. Every drama intended for the lower classes is framed in the spirit of one of their most popular songs, 'See the star-bespeckled villain to yonder cot bound.' People have been taught to believe the anatomy and manners of cruel, ignorant, and selfish Don Juans. That the sort of representation has been always permitted, and is at the moment taking place in a dozen theatres attended by the classes to whom these amusements really make an impression, is a fact to which the attention of your Lordship's office has no doubt been directed. But in securing my libertine from another body than the House of Lords, I venture to think that I have not done a good service. I have exhibited a good motive

"There is much in what you say, Mr. Carlyon, and I deplore the habit which has arisen of permitting the class of pieces you describe. But my business is with the drama immediately before me. In making the libertine a man of the people, you have attention to such undesirable principles, and that is very unlearned. All is very quiet in the country just now, and we will try to keep it so."

"It is a specious quiet, my Lord, that turns its back upon a disease, and denies the existence of what it refuses to behold," said Bernard.

"All politics are a compromise, you know," said Lord Doveton, smiling. "But we are straying from point.

"Perhaps not, my Lord," said Carlyon. "I am sure your Lordship will accept me as an intendon of delicate declination; but I would respectfully urge upon you that this is not a mere question of detail. Your Lordship, exercising a discreet supervision of the drama, sees many allusions and inuendoes in every play, upon the propriety of retaining or rejecting which, your opinion, as that of a well-informed nobleman as well as a gentleman of the world, ought in all reason to be final. For myself, I could wish nothing better than to see genuine comedy, which would tend at once to the improvement of the tone as well as to the art of the dramatist."

Lord Doveton nodded—not assentingly, but in token that he listened.

"But I would urge upon your Lordship the consideration of one simple fact. There are fifteen theatres open every night, without counting aristocratic establishments where *Masaniello*'s treason, *Lucrezia*'s incest, and *Bertram*'s blasphemy will, it is presumed, fall harmlessly upon the exalted and educated. But at each of the other theatres a large average of the usual spectators nightly assemble—with the good faith, greediness, and earnestness of uneducated listeners—precisely such lessons as it suits Lord Government they shall learn. Fifteen thousand eager auditors every night attend the sermons appointed for them by their betters, and your Lordship may rely that no portion of text or inference escapes them. This mighty crowd may be reached in the most effectual manner, and in spite of themselves, by as weighty a machine, now in your Lordship's hands. But Government does not think it worth while to influence ninety thousand people every week—nay, not even to take care that they shall not be influenced by its enemies. The only cure of Government is that the dramatic machine shall not give offence by speaking; but your Lordship's office is to oil the wheels."

Carlyon spoke earnestly, but with so much natural courtesy, that it was impossible for Lord Doveton to take offence at the expressions of the animated author. But when he had concluded, Lord Doveton said

"You feel strongly upon a matter connected with your profession, Mr. Carlyon; and that as a sure omen of your success in it. But unless you are willing to alter your comedy in conformity with my opinion which I see no cause to change, I fear you must reckon its prohibition as one of the obstacles in spite of which I have no doubt you will one day attain deserved popularity."

What could Carlyon do? How, and, having ascertained from the Chamberlain that, subject to the alterations he had dictated, and a few similar ones afterwards mentioned by Lord Doveton, there would be no further objection to the play, take it to the theatre, and alter it in conformity with instructions.

SELECTIONS FROM THE PAPERS OF LORD METCALFE Edited by J. W. KAYE Smith, Elder, and Co.

Lord Metcalfe passed a long career, of forty years' duration, of incessant official activity, in the course of which he arrived at the highest posts and honours of Colonial Government—successively Governor-General of India, Governor of Jamaica, and Governor-General of Canada. A man of observation and of original thought, he from time to time drew up a mass of papers, relating to almost every conceivable department of the service, which, as they were received with attention and respect by the various authorities of the day, contain much that is worthy of preservation for the guidance of future Governments. Mr. Kaye, who has already published a "Life" of the distinguished statesman, now produces a volume of "Selections" from the voluminous State papers reserved to him. The task of selection and arrangement has been generally judiciously done, affording the opportunity of easy reference to any particular subject which the reader may be investigating. Lord Metcalfe's authority is especially of importance in reference to our East Indian empire, the precarious tenure and doubtful advantages of which he insisted upon on many occasions. In 1827 1836, he writes:—"Empires grow old, decay, and perish. Ours in India can hardly be called old, but seems destined to be short-lived. We appear to have passed the brilliancy and vigour of our youth, and it may be that we have reached a premature old age. We have ceased to be the wonder that we were to the natives; the charm which once encompassed us has been dissolved, and our subjects have had time to inquire why they have been subdued. The consequences of the inquiry may appear hereafter." Again:—"Our greatest danger is not from a Russian invasion, but from the fading of the impression of our invincibility from the minds of the native inhabitants in India. The disaffection which would willingly root us out exists abundantly; the concurrence of circumstances sufficient to call it into general action may at any time happen." For the cause of this,—"Our Government is not a national Government, that can rely on the affections of its subjects for defence against foreign invasion. It is the curse of a Government over a conquered country that it cannot trust the people." With this conviction firmly in his mind, he turns to the questions often mooted, of admitting natives to high appointments. "If it be intended," he says, "to substitute native for European agency in the higher offices, the attempt will fail. When native agency predominates we shall be turned out of the country. We are not here by the will of the natives—*non tali auxilio, nec defensori isto tuis*." But the worst feature of the case is that "the revenues of India are not equal to the support of its expenses, and, judging from past experience, are not likely to become so. We may and we must reduce our ordinary expenditure within our income; but we have a heavy debt to discharge, and we have no security against future wars, which must increase our financial difficulties." These speculations, put forth a quarter of a century ago, are not unworthy of consideration at the present time. Of course there are many matters referred to in these papers which have undergone change since Lord Metcalfe wrote—as the right of residence of Europeans in the Company's territories, the emancipation of the Press in India, &c.; but these any one who takes interest in the subject will readily take into account.

RECOLLECTIONS OF THE MESS-TABLE AND THE STAGE. By H. CHILLING. Bosworth.

This is a collection of trifles some grave, but the major part gay—well adapted for light reading—very light in the railway or steam-boat. Many of the theatrical anecdotes are given upon the authority of a once-popular favourite, Samuel Russell—better known under the *sobriquet* of *Jerry Sneak*, in "The Mayor of Garratt."

The Mess room stories are the author's own; and, besides an amusing account of "My First Detachment," include several random incidents of the last war, particularly of the Peninsular Campaign and Waterloo. In addition to all these, to complete the discursive character of the volume (which the author confesses to in his short preface), we have "Some Account of the Cinque Ports in General and Sandwich in Particular;" "An Exposition of the Cruelties practised upon Cab and Omnibus Horses in London" (good in intention, but perhaps a little overdone); some smart criticisms upon English society, under the title of "the Foreigner in London." From the military reminiscences we select an anecdote of Picton at Waterloo, which is highly characteristic of the intrepid man:—

I once heard an anecdote of Picton, from an officer, who was himself at Waterloo.

Picton, I was told by this officer, was wounded the day before Waterloo, but had concealed his hurt, and with the most heroic fortitude remained in the field. During the night, however, the agony of his wound obliged him to send for a surgeon, who remained with him until dawn; and, on his leaving, Picton thus addressed him:

"You say that my wound is dangerous mortal; that I am unfit for duty, and must be represented so to the Duke?"

"Such is my opinion," said the medical man. "I think it would be impossible for you to take command to-day, General."

"Leave me to judge of that, sir," said Picton, "and in the meanwhile, allow me to ask you a question. From your long knowledge of me, do you consider me capable of strictly keeping my word?"

"I have every reason to believe so," returned the surgeon; "but why the question, Sir Thomas?"

"Simply for this reason, my dear Sir," "that I have made up my mind to be in the field with my brigade, and I give you my word of honour, both as a gentleman and a soldier, that, if you place my name in your report as unfit for duty, I will shoot you with my own hand."

He [illegible] his shoulders, shook Picton by the hand, and withdrew.

"Be a gallant General's name was accordingly omitted from the list of the wounded; and, as his wish had often been expressed, that he might die amidst the blaze of battle, he was gratified.

The "Foreigner in London," whilst he very fairly ridicules our weak points—as our submission to the tyranny of fashion, our servile admiration of titles, the *triste* reserve of our habits, even at our clubs, &c. is not exempt just when speaking of our army. He draws an invidious comparison between the regiments of the Line and the Household troops. It is quite true that a "Line regiment is seldom complimented (however hard the service it has just performed) by a tour of duty in the metropolis;" "not so the Life Guards—they are constantly taken on the service marches through London it causes as much curiosity to the Londoners as a battalion of France, just arrived from Africa, would cause to the Londoners; but there might be good reasons why the distinction between the services should be kept up. London is a little world of two and a half million souls; and it is to be considered the Guards have police duties to perform amongst them, which from old habit, they perform with greater ease, success, and satisfaction to all parties, than Line regiments, strange to the localities and habits of a London mob. But when he adds, "*Certainment* the Line has the glory, the others wear the gold lace," he indulges in a sneer which is not deserved. The Guards, when called upon, have never shrunk from active and arduous service; and their noble achievements at Waterloo, in Canada, and lastly in the Crimea, attest that the blandishments of a generally favoured position, amidst the glitter and gaiety of a London life, have not undermined the "pluck," and stalwart courage of Englishmen. Alas poor fellows, of the thousands who went out proudly to their duty, amidst the vociferous cheering of their admiring brother cockneys, little more than a twelvemonth ago; how few will return to their accustomed haunts and routine of *dive duty*!

STORIES FROM A SCREEN. By DUDLEY COSTELLO. Bradbury and Evans.

An attractive title, and a capital collection of stories. The author informs us that he obtained the hint for the former quite accidentally. Finding himself at an auction of household furniture somewhere in the neighbourhood of Covent garden, a large screen covered with pictures attracted his attention. He purchased it, and, after setting it up in his study, was struck with the rich variety of "subjects" for the author's pen the designs presented, "if one had only the key to them." The key was soon found in the author's fertile imagination, and hence the amusing random romances of everyday life which are comprised in the handsome volume before us. Glancing through the pages, we have been especially amused with "My French Governess," and "to Brighton and back for Three-and-Sixpence;" and can bear testimony to the merit of "The Queen's Counsel and his Pretty Wife."

POLYTECHNIC INSTITUTION. On Monday Mr. Weld, of the Royal Society, delivered at this institution a lecture on "The Recent Arctic Expeditions," to a most crowded assemblage of the working classes. After stating the numerous expeditions, and showing on the admirable map the different routes, he concluded his lecture with a tribute of admiring regret to Lady Franklin, whose high talents and indomitable energy have only been equalled by those of her gallant husband. The audience listened to the lecturer with the deepest attention, and evinced their pleasure and sympathy by repeated and continuous applause. The lecture was given in the theatre containing the Arctic collection belonging to Mr. Barrow; and at the close, the relics of the Franklin Expedition, on the centre table, were objects of great interest.

SOUTHWARK LITERARY INSTITUTION.—A public dinner took place on Wednesday, at the Bridge-house Hotel, London-bridge, in aid of the funds of the Southwark Literary Institution. Sir W. Molesworth, M.P., was in the chair, supported by above seventy gentlemen, who appeared to be deeply interested in the success of the institution, which had been twenty three years in existence. The chairman made a very handsome donation to the funds of the institution, in addition to a very able and eloquent appeal in its behalf.

EGYPTIAN DISCOVERIES.—Mr. John B Greene, son of an American banker, has succeeded, notwithstanding the difficulties attendant on clearing away the palace of Mendnet Habou, in discovering the celebrated Egyptian calendar, of which Champollion could only copy the first line.

Ten thousand letters were landed at Lisbon by the mail steamer *Great Western*, from the Brazils. 5,000 of these were from Rio de Janeiro alone. They were all punched twice with a chisel, and then thrown into a window, on a grating beneath which disinfecting substances were burning to fumigate them.

THE MANCHESTER WELLINGTON MEMORIAL.

M. NOBLE, SCULPTOR.

In this very noble design, which is rapidly progressing towards completion, both the civil and military capacity of the Duke are represented by the sculptor; the statue itself giving the moment when the Duke stood erect and calm after having spoken the following words in the House of Lords:—"I am one of those who have probably passed a longer period of my life in war than most men, and principally in civil war; and I must say this, that if I could avoid, by any sacrifice whatever, even one month of civil war in the country to which I am attached, I would sacrifice my life in order to do it." The abstract figures at the angles of the pedestal are those of Wisdom, Valour, Victory, and Peace. The panels a little below these figures illustrate in relief the four most prominent events in the Duke's life—namely, the Battle of Assaye, the Battle of Waterloo, his Presence at the Congress of Vienna, and his Receiving the Thanks of the House of Commons on the memorable occasion in 1814.

It will give the public some idea of the magnitude of this fine Monu-

ment when we state that the principal figure is 13 feet in height, and the weight of the bronze and granite required for the work will not be less than 160 tons. It will be altogether a magnificent group of monumental sculpture; and its selection is creditable to the taste and judgment of the inhabitants of Manchester, by whom this Memorial is to be erected to the great Wellington.

"THE LIGHTHOUSE," BY CLARKSON STANFIELD, R.A.

THE private theatricals at Campden-house, to which we made brief reference last week, have furnished us (by the kind permission of that distinguished artist, Mr. Clarkson Stanfield, R.A.) with an illustration of great beauty and power. The play was called "The Lighthouse," and is supposed to take place in the edifice built by Rudyerd in 1706. The story of the drama is very impressive. Three light keepers are shut up in the Lighthouse during a great storm, their provisions are exhausted, and all relief from the shore impossible. Two Gurnocks, father and son, are the principal personages, but the third, *Jacob Dale*, whose daughter is betrothed to the younger *Gurnock*, is a character of much power.

Aaron Gurnock, the father (most admirably played by Mr. Charles Dickens), exhausted by famine and watching, is driven by the injunction of a spectre which he fancies he has seen, to make confession to his son of a murder to which he has been accessory. The son is horror-stricken at this revelation, and abandons at once all hope of marrying the daughter of honest *Jacob Dale*, and the change produced in him gives occasion for some very dramatic situations when relief has arrived from the shore. *Aaron*, his physical strength restored, is impressed with a vague idea that he has revealed his dreadful secret, and in a very masterly scene he endeavours to convince his son that he has listened to the ravings of a dreamer. A ship has been wrecked on the Eddystone, and among the persons saved is a *Lady Grace*, whose appearance and forgiveness restore peace and goodwill to all concerned. To illustrate this story, Mr. Stanfield lent the aid of his great genius, and, in addition to the exquisite picture of the exterior of the Lighthouse, he also painted the room in which the drama takes place.

Our Illustration represents the building by Rudyerd, which was commenced in 1706, three years after the destruction of the first Lighthouse by a dreadful hurricane. Winstanley was the first who attempted to build a Lighthouse upon the Eddystone rocks, and in 1696, after great exertions, he succeeded in erecting a column, composed partly of wood and partly of stone, but not of a sufficient height for the lantern to be at all times secure from the action of the waves, and it was said to be possible for a six-oared boat to be lifted up upon a billow and driven through the open gallery of the Lighthouse. In 1703 some repairs became necessary, and Winstanley undertook to superintend the workmen. Some friends intimating the danger to which the Lighthouse was exposed in such tempestuous weather, Winstanley replied that he was so satisfied with the strength of the structure that he only wished to be there in the greatest storm that ever blew under the face of the heavens. His wish was gratified, and fatally for him. On the night of the 26th of November, there came a hurricane unparalleled in violence, and swept the Lighthouse and all its ill-fated inmates into the sea.

Rudyerd's structure took three years to complete, and on the 2nd of December, 1755, it was destroyed by fire. The light keeper on watch went into the lantern as usual to snuff the candles, and found the whole of the cupola in flames. He aroused his companions, and whilst they were endeavouring to put out the fire, a most singular accident occurred to one of the light keepers named Henry Hall. As he was looking upward, a quantity of lead, dissolved by the heat, rushed like a torrent from the roof, and fell upon the man, who imagined that a quantity of the lead had passed into his stomach, but in the confusion and terror of the moment no attention was paid to him by his companions. The men were compelled to retreat downwards from room to room as the fire advanced over their heads, and when a boat came off to their rescue the three light keepers were found in a hole in the east side of the rock in a state of stupefaction, and it was with much difficulty that they could be got into the boat. When they reached the shore one of the men made off, and no tidings was ever afterwards obtained of him. The man Hall contended that nothing would do him good until his stomach was relieved of the lead, but the assertion appeared so incredible that the surgeon who attended him would not believe him. For some days the man continued to swallow many things, both liquid and solid, but on the twelfth day, after being seized with cold sweat and spasms, he died. The surgeon, Mr. Spry, dissected the body, and found in the stomach a solid piece of lead of a flat oval form, which weighed seven ounces five drachms. An account of this extraordinary circumstance was transmitted to the Royal Society.

The existing Lighthouse was built by Mr. Smeaton, a philosophical instrument maker, and is said to have been designed after the waist or bole of a large spreading oak. Mr. Smeaton published a very interesting "Narrative of the Building and Construction of the Eddystone Lighthouse," which is extremely valuable, as it contains an exposition of most of the principles on which buildings exposed to the action of the seas and storms should be erected.

THE WELLINGTON MEMORIAL FOR MANCHESTER, DESIGNED BY M. NOBLE.

"THE LIGHTHOUSE," PAINTED BY CLARKSON STANFIELD, R.A., FOR THE PRIVATE THEATRICALS AT CAMPDEN-HOUSE.

THE STAMFORD RACE-CUP

THE noble Stewards of the Stamford Races, the Earl of Strathmore and Lord Wm. Poulett, have this year exercised great taste in the selection of the design for their Cup, which we here engrave. The object sought has been real utility; and Mr. Hancock, of Bruton-street, has succeeded in combining that qualification with a highly ornamental object. The Cup, designed and manufactured by him, is in the Italian style of the period of the fifteenth century, and is extremely chaste in its composition, and classic in its outline; the whole is richly relieved by alternate frosted and bright silver; it is ornamented with two beautifully modelled figures of

THE STAMFORD RACE-CUP, 1855.

Diana and an attendant Nymph, with dogs; and it has two basso-relievo compartments filled with sporting subjects, &c. The races took place on Tuesday and Wednesday.

HENDON CONGREGATIONAL CHURCH.

OF late years the places of worship erected for various Christian sects have presented some very commendable adaptations of the Ecclesiastical style of architecture, instead of following the unsightly mode in which were built the Dissenters' chapels of the last and early part of the present century. The new edifice which we now engrave is an additional exemplification of this advanced taste. It has just been erected for the Congregationalists (or Independents) in the village of Hendon, seven miles north-west of the metropolis. The building occupies a fine position in the high-road, being situated on a high point of rising ground.

The church is built in the Decorated style of architecture of the fifteenth century. The western front has four entrance doors, and is terminated on either side by a massive stone octagon turret, surmounted by a richly-decorated spire. Within these turrets arrangements have been made for obtaining ready access to a western gallery, should such an addition be required at any future time to increase the accommodation.

The works have been carried out consistently throughout, under the superintendence of the architects, Messrs. W. G. and E. Habershon, of London. The material employed is Kentish rag-stone, laid in random courses, and pointed triangularly in dark mortar: the dressings to the

NEW CONGREGATIONAL CHURCH AT HENDON.

windows, doors, buttresses, &c., are of the best Bath stone. The whole of the windows are filled with superior stained glass, by Lavers, of London, the cost of which has been defrayed by a friend. The roof has a noble effect, from its large circular principals with Lammer-beams. It is open to the top. The timbers are darkly stained, and shown with good effect, relieved by the whitened ceiling between the rafters. The length of the building is 65 feet, and the width 35 feet—ample accommodation being afforded to above 400 persons. The cost, including the purchase of the freehold ground, will be about £3000

The church was opened on Wednesday last.

The committee formed for the erection of this church have submitted to the inhabitants of Hendon an able statement of the objects contemplated by the originators of the undertaking, and explained the principles maintained by the Congregational Churches. To this circular are appended some striking extracts from writers of different persuasions, showing that, as a body, the Congregationalists (or Independents) have rendered essential service both to the cause of vital religion and also that of civil and religious liberty.

ROMAN REMAINS JUST DISCOVERED AT WESTON TURVILLE, BUCKS.

ROMAN RELICS
FOUND AT WESTON TURVILLE RECTORY, BUCKS.

(From a Correspondent.)

ON Saturday evening, May 19th, 1855, a labourer was excavating in my Rectory garden, and at the depth of 4 feet 6 inches below the surface discovered a Roman vessel of coarse yellowish pottery, which bore the trace of old fractures, and was further broken into fragments by the discoverer. It appears to have occupied a hole 18 inches in diameter. Its thickness varied from half an inch to an inch; and it seems to have been used for the purpose of covering over the undermentioned articles, being either an amphora or cinerary urn. The clay in which it was found is cretaceous, very tenacious, and impervious to water. The contiguous clay was streaked with dark lines, which distinguished it from the surrounding portions, bearing marks of disturbance to the eye of the practised excavator.

A. Articles in glass:—

1. One blueish green glass vessel, circular (resembling the drawing in Mr. Wright's "Celt, Roman, and Saxon," p. 226, outside figure on the left hand). Fragments of the top and bottom have been joined, which enable me to give the height at 11½ inches, and the diameter at 5½ inches. The fragments of the middle are deficient. Adhering to this were found pieces of bone.

2. Green glass vessel, nearly perfect (resembling the drawing of Mr. Wright, same page, second figure on the left). Height nearly 6 inches, 2½ square. In this were found ashes.

3. A vessel similar to No. 2; only the bottom found, 2¾ inches square. In this were discovered some little silver beads, one bead with a wire in it (see 14): ashes, and among them part of a wooden pin, about an inch long.

4-5. The handle of this has a different pattern from the handle of No. 2, and the glass is thinner, and of a lighter green. Height not ascertained; 3 inches square.

B. Articles in red Samian ware:—

6. A patera, nearly entire, height more than 2 inches, diameter 7 inches. Name of the potter at the bottom, inside, very clear—MVXTVLLIM. Contained ashes: and among them leaves, probably the remains of garlands and wreaths used at the burial: a white substance, perhaps balsam, which emitted, when pressed, an aromatic scent; some more little silver beads, one with a wire in it; an ornament in shape like a glass bugle (13), nearly 4-10 inch long; a fibula or brooch, in bronze (E 3), with the place for the pin perfect, length more than an inch; another bronze ornament, like a fly, nearly an inch high (16).

7. A patera. Height 1⅞ inch, diameter 6½ inches. Nearly restored.

8. A cup, apparently belonging to Patera, No. 2. Very nearly restored. The name of the potter very distinct, MEPTLM. Height, nearly 2 inches. Diameter at the top 4½ inches, at the bottom 1⅞ inch.

C. Articles in coarse light red pottery:—

9. Resembling the middle figure of the seven in Mr. Wright's book, p. 226. Neck broken off; height 7 inches; largest diameter 4 inches. In this were found ashes, a twisted wire, and a rivet-head.

D. Drab-coloured ware:—

10. Imperfect. Indented with a cross-barred pattern: height rather more than 3¾ inches; diameter of the highest and most projecting rim, 3 inches.

11. Top with the handle and bottom so pieced as to enable one to conjecture the height to be between 9 and 10 inches, and the diameter 5½ inches.

12. Height more than 2½ inches; diameter not quite 2 inches.

13, 14, 15 Ornaments.

E. Various articles:—

Several pieces of iron with rivets and short nails. These have fibres of wood adhering to them; and one piece especially seems to show that they belonged to a wooden chest, from half an inch to an inch thick. As some of the vessels described above were evidently fractured long ago, the probability is they were put into a chest, and were broken by the pressure of the earth when the wood yielded to decay.

16. Fibula.

17. The segment of a circular plate in silvery bronze—perhaps part of a mirror, or of a circular fibula.

18. Part of a pin, with ornamented head, two inches long, coloured bone, or very hard wood.

19. Part of a plain bone pin, three inches long.

20. A small piece of leather, with sharp little nails in it, perhaps part of a sandal.

There are also a dried fruit, the exterior mouldy, the interior white and pulpy, about 1½ inch by 1 inch in length and breadth, and nearly 2 inches in thickness, shrivelled since exposure; besides many pieces of human bone calcined.

The ornaments afford evidence that the burial was that of a female.

I have been greatly assisted in these investigations by Mr Burgess, the secretary of the Bucks Archæological Society. This village is situated two miles from the Icknield Way, near Aston, Clinton hill, supposed to have been the site of a British and Roman encampment. And in a cottage garden, not many years ago, two coins were found of the reigns of Vespasian and Adrian, now in the possession of Mr. Fowler, of the White Hart Hotel, Aylesbury.

A FAMILY OF LIONS.

THE Zoological Society of Clifton and Bristol, have the good fortune to possess a Garden and Menagerie, which are finely situated in pure and healthful air, and are kept in excellent order; and the management have frequently succeeded in obtaining rare additions to their collection. A few years since we illustrated a specimen of the two-toed Sloth, the only living example brought to this country. We now illustrate a very recent acquisition—a family of Lions of four generations. The father and mother are about four years old. In September, 1853, the largest pair of young were cubbed; and in 1854, a second pair, of which one is in the Gardens of the Zoological Society, in the Regent's Park. The youngest in the group were cubbed about three months since. Thus there have been three litters of six cubs in two years and a half.

Another peculiar attraction of the Clifton and Bristol Gardens is a large Aquarium, containing several specimens of the splendid zoophytes of the Bristol Channel, which the Rev. Mr. Kingsley has so eloquently described in his recently-published work, entitled "Glaucus; or the Wonders of the Shore:" one of the most interesting sea-side books which it has been our fortune to meet with.

FAMILY OF LIONS IN THE GARDENS OF THE CLIFTON AND BRISTOL ZOOLOGICAL SOCIETY.

NAVAL AND MILITARY INTELLIGENCE.

THE gun-makers at Liège, in addition to large orders received for Spain and Sweden, have now in course of execution an order for England of 40,000 carbines

THE *Simoom* arrived at Malta on the 9th inst., with sixty-two Russian prisoners, principally sailors, and thirty pieces of Russian ordnance from Kertch fine large guns twenty of them very handsome pieces of brass. She has also on board Mrs. Platts, an English lady settled at Kertch, and her eight children.

THE number of non-commissioned officers and artificers required for the four troops of Turkish Horse Artillery, attached to Beatson's Horse, have been obtained, and are to be posted as follows, viz.:—Two staff non-commissioned officers, three sergeants, and three artificers to each troop; the total number being 32 Europeans. Each individual has obtained his full kit and necessaries, and they are daily at riding drill. The officers and men expect to embark on the [illegible]

It is said an augmentation of sergeants is to take place in the Royal Artillery. These sergeants are to be supernumeraries, and are to replace those non-commissioned officers who act as clerks in the Adjutant-General, Commandant's, and battalion offices, as well as in several other departments. Each company will, under the [illegible] have a proper number of non-commissioned officers.

THE Board of Ordnance have secured [illegible] for building [illegible] Aberdeen, Montrose, and Oban, for the accommodation of the Militia regiments of the counties of Aberdeen, Forfar, and Argyll These buildings have hitherto been used as public works, but a little alteration [illegible] render them suitable for the purpose for which they are intended. It has also been arranged to erect barracks at Hamilton, for the Lanarkshire Militia.

DURING the past week above 100 fine horses have joined the Regimental Depôt at Woolwich from the country. The different field battery stations of the artillery at Aldershott, Newcastle, and Weedon, have more than been completed to their full complement of horses. There are at present twelve field batteries in the United Kingdom—viz. C, D, I, K, L, M, N, O, S, T, U, and Z; and the following batteries at the Crimea:—A, B, E, F, G, H, J, P, Q, V, W, X, and Y. Eleven of these field batteries consist each of four 9-pounder guns, and two 24-pounder howitzers. C and V compose a 32-pounder battery of six guns. In addition to these, there are three troops of Horse Artillery, making a force of twenty field guns in actual service in the Crimea. The number of companies as siege artillery are twenty-four, and three for reserve. In addition, a number more are under orders, in addition to five companies as siege companies, and expect to embark shortly.

HOUSEHOLD TROOPS FOR THE CRIMEA.—On Wednesday morning orders were issued to the respective commanding officers of the seven battalions composing the household infantry brigade to hold in readiness, for immediate embarkation, the reinforcements of volunteers which have been told off to join the Guards in the Crimea. The force for service are 350 volunteers from the 1st and 2nd battalions of Grenadier Guards for the 3rd battalion; 250 volunteers from the 2nd battalion of Coldstream Guards for the 1st battalion; and 250 volunteers from the 1st battalion of Scots Fusilier Guards for the 1st battalion; making a total of 850 rank and file The reinforcements will proceed [illegible] whence the reserve at present there will [illegible]

CHURCH, UNIVERSITY, AND GENERAL.

APPOINTMENTS.—The Rev Dr. Beal, Vicar of Brooke, Norfolk, to be Surrogate for, and throughout, the diocese of Norwich *Rectories* The Rev. W. Butler to Hemington, with Hardwick, Northamptonshire; the Rev. R. Howell to Drayton, Norfolk; the Rev A. T. Paget to Rickinghall, with Langhall, Norfolk; the Rev. A. Watson to Bridestowe, Devon; the Rev. H. Wickenden to Tydd St. Mary; the Rev. J. Blackmore to Stotfold to East Grafton, Wiltshire; the Rev. J. Wheeler to [illegible] Tiverton; the Rev. W. Williams to Llanl[illegible] Carmarthen; the Rev. H. Rendall to Great Rolright, near Chipping Norton. *Dignities* The Rev. J. Wilkinson to Harlekirk, Northumberland; the Rev. R. J. F. Thomas to Yeovil-cum-Preston. *Incumbencies*: the Rev. E. Cree, M.A., to Holy Trinity Church, Tooting; the Rev. J. Woolf, to East Bergholt, Suffolk.

OBITUARY OF EMINENT PERSONS.

DR ARNOTT

On the 6th inst the death occurred at his residence in Dunfriesshire, in his 84th year, of Dr Archibald Arnott, of the 20th Regiment, who was formerly so conspicuously and creditably known as the medical attendant of Napoleon when dying at St. Helena. Dr. Arnott entered the Army upwards of sixty years ago, and retired from active service in 1826. During his long and active life he was, for a few years, attached to the 11th Dragoons, but for a much longer period he was with the 20th Foot, sharing the perils and exploits of that regiment on the Nile, in Calabria, Portugal, Spain, and Holland, and earning a medal with clasps for Egypt, Maida, Vimiera, Corunna, Vittoria, the Pyrenees, Nivelle, Nive, Orthez, and Toulouse.

After the war Dr. Arnott accompanied his regiment to St. Helena and India At St. Helena he became the medical attendant of Napoleon Bonaparte. Arnott's professional ability, ingenuous character, and upright and dignified deportment as an officer and gentleman, at once ensured him the confidence of the illustrious invalid, whose good opinion, strengthened by daily intercourse, ripened into warm attachment and sincere esteem. Shortly previous to his dissolution, the Emperor gave signal testimony of his appreciation of Dr Arnott Napoleon as he lay upon his death-bed bequeathed a valuable gold box brought to him, and, with his dying hand, and a last effort of departing strength, he engraved upon its lid with a penknife the letter "N," and presented it to Arnott. Napoleon also bequeathed to Dr. Arnott 12,000 francs, and the British Government, to mark its approbation of his conduct, granted him £500 more. Napoleon expired with his right hand in that of Dr. Arnott.

Dr. Arnott was almost the last survivor of those whose names will be handed down to posterity, in connection with the last days of Napoleon. Dr. Arnott's memory and tenacious mind was richly stored with recollections and anecdotes of that momentous period; yet, with the exception of a clear and distinct "Account of the Last Illness, Decease, and Post-Mortem Appearances of Napoleon Bonaparte," published in 1822, he could never be induced to write on the subject.

Dr. Arnott latterly retired to his native parish, and there, on his patrimonial estate of Kirkconnel-hall, spent the evening of his days beneficently to the neighbourhood and honourably to himself, both in the relations of life and in his public duties as a magistrate and heritor

JOHN M'CLINTOCK, ESQ., OF DRUMCAR.

THE death of this venerable gentleman took place at Drumcar, in the county of Louth, in the afternoon of Thursday week, after a brief illness. Mr. M'Clintock had reached the patriarchal age of ninety years, having been born in the year 1765. At the early age of twenty-four years he was appointed to the important office of Sergeant-at-Arms, the duties of which, in the Irish House of Commons, he discharged from the year 1794 to the period of the Legislative Union. As a magistrate, landlord, and country gentleman, he was much beloved. Mr. M'Clintock was, we believe, the oldest magistrate in Ireland. He was High Sheriff for the county of Louth in 1798, and was present in that year at the battles of Arklow and Vinegar-hill. He was Vice-President of the Central Society, and sat for Athlone in 1823, and at the general election in 1831 was elected for the county of Louth. He was twice married—first to the daughter of Thomas Bunbury Esq., M.P. for the county of Carlow; and, secondly, to Miss Elizabeth Jane Power, daughter of Patrick Power, Earl of Clancarty Her Ladyship survives him. By his first marriage there are two sons—John, who now inherits the family possessions in the counties of Louth and Fermanagh; and William, now Captain M'Cumbee Bunbury, R.N., M.P. for the county of Carlow.

WILLS, PERSONALTY, AND CHARITABLE BEQUESTS.—The will of the Very Rev. Thomas Gaisford, D.D., Dean of Christchurch, Regius Professor of Greek, Oxford, Prebendary of St. Paul's and Lincoln, was proved under £100,000. The Rev. John Reid Combe, of Rolydon, £30,000. General Sir Andrews Francis Barnard, G.C.B., G.C.H., Governor of Chelsea Hospital, £30,000. The Right Hon. Georgiana Laura Fitzroy, £95,000. George Lee, of Watford, Esq., £90,000. Rev. James Carmichael, £19,000. The late Right Hon. Sir George Henry Rose, G.C.H., P.C., of Old Palace-yard and Sandbanks, Hants (personalty £70,000), by a codicil has bequeathed towards a £70000 to religious and charitable institutions, as under:—British Society of London and Irish Church Missions (amalgamated), £2000; Christianity among the Jews, £1000; Westminster Hospital, £500; Winchester Hospital, £500; Southampton Infirmary, £300; Consumption Hospital, £500; Lock Hospital, St. George's, £300; Operative Jewish Converts Institution, Curtain Road, Missionary, £300; Protection of Irish Converted Prisoners, Lord Church Education, £300; Deaf and Dumb Asylum, Kent-road, £300; Asylum for Orphans of Irish Clergy, £200; Church Pastoral Aid Society, £200; Welsh and Wadesons Society held in London, £150; London Female Penitentiary, Islington, £100; the Ventry and Dingle Mission, £100; London and Newmark Scripture Readers' Society, £100; Sunday-School Society for Ireland, £100, British and Foreign Bible Society, £100; Ballinasloe Missionary School, Welsh-pan Missionary, Scripture Readers' (Ireland), and the Reformation Society, £50 each. The Right Hon. John Charles Herries, one of her Majesty's most Honourable Privy Councillors, died intestate, personalty £30,000

THE CASE OF STRAHAN, PAUL, AND CO.

Sir J. Paul, W. Strahan, and R. M. Bates were once more brought up to Bow street on Wednesday last. Mr Bodkin appeared for the prosecution; Mr. Ballantine for Mr. Strahan, and Mr. Sleigh (in the absence of Mr. Parry) for Mr. Bates. The continued interest taken by the public in these proceedings was manifested by a crowd almost exceeding that of any former occasion

Mr. Bodkin, on the part of the prosecution, said it would be remembered that a difficulty had arisen in consequence of the fact that the house of Overend and Co. were at issue in the actual description of the securities deposited with them by Sir John Paul. The difference in the accounts given respecting the securities in question necessitated a reference to the books of the bankrupts, which, although refused at first, had ultimately been accorded. On the part of the prosecution persons were appointed to institute a most searching inquiry into the facts of the case; but, owing to the voluminous character of the books, the solicitor to the prosecution had found it necessary to call in the aid of a professional accountant, whose services had been exercised exclusively devoted to the examination of the books. That inquiry was still going on. Some important results had been already brought about, but as nothing like a full and complete examination could be accomplished for some time to come yet, he (Mr. Bodkin) preferred delaying any statements of those results at present. He rather concurred in the suggestion of Mr. Balantine, sanctioned by the still higher authority of his worship, at the last remand, that the course most desirable for them to pursue should be made to master the details of the case by private inquiry before proceeding further with the matter in court; and for this purpose he begged, therefore, to ask that the three defendants might be remanded for another week

Mr. Jardine: Does it occur to you, Mr. Bodkin, as absolutely necessary that the secretaries of Dr. Griffith should be actually traced to their late or present destination—whether in the hands of Overend and Co., or elsewhere?

Mr Bodkin: I by no means think it is; but we consider it of great importance to know the fact, although it may not be essential, or at least absolutely so, to the prosecution

Mr. Ballantine, as a matter of personal feeling, must beg of his friend to bring this case to a conclusion. It was a frightfully painful thing for prisoners to be brought up in this way, week after week, to be the objects of publicity and derision—the objects of an exposure of the most revolting kind. If the accounts were alone concerned he might allow this; but all parties were inconvenienced by these repeated remands. He, therefore, hoped his friend would use all possible diligence in the matter. He should not oppose the present application.

Mr. Bodkin was sure the Court would grant that, looking to the difficulties interposed [illegible] the [illegible] they [illegible] reasonable delay in [illegible] any material progress would [illegible] next week, but he was quite willing to assent to a merely formal remand.

Mr. Jardine: Then must I understand you to have the defendants brought up to the bar again, in that case Could not the case be again formally adjourned without their attendance?

Mr. Jardine: That must be brought up as matter of form, but let it be understood that we only remand this next Wednesday, to comply with the Act; that nothing will be done on that occasion, except the formal remand of the prisoners again to the following Wednesday so that, in fact, it will be a remand, in effect, for a fortnight from this day, by which time I hope Mr Bodkin will be ready

Mr. Bodkin expressed a similar hope

The prisoners were then individually remanded, with the [illegible] all parties, for a week, to be again brought up on the [illegible] of August

NATIONAL SPORTS.

FEW Jockey-club propositions have created so much discussion [illegible] regarding the abolition of p.p. betting, which will be brought forward during the next Second October Meeting at Newmarket. It has originated in the feeling felt by the large majority of persons out of doors for the Last Derby, and, if carried, it bids fair to ruin round betting altogether. It remains, however, to be seen whether Mr. Davis (who never bets more than 2s to 1 against a horse) will choose to be dictated to by any one; and he is quite powerful enough to enforce his own views on the matter. The public and the ring would, we believe, be none the better for any alteration in the present rule, as it would be virtually evaded, by bragging horses to the post quite unprepared, simply to make the bets against them safe, and then their secret would be achieved. In fact, more mischief might be done, as many of the public never back horses until they see them at the post, little dreaming that they are "done" on the Goodwood Cup betting is still very languid, and the two Dutch horses and Oulston excite but the attention of the Ring. We are still, however, firm in our belief that, good as Oulston may be, he has no chance with Rattle at 12lbs. The St. Leger betting is a dead letter; and Oulston's sale—If it be one—has not increased his backer's confidence in the Gosforth colt. Fell is the latest party to go out of training for the St. Leger Derby, and, if carried, it bids fair to ruin round betting altogether. It remains, however, to be seen whether Mr. Davis (who never bets more than 2s to 1 against a horse) will choose to be dictated to by any one; and he is quite powerful enough to enforce his own views on the matter. The public and the ring would, we believe, be none the better for any alteration in the present rule, as it would be virtually evaded, by bragging horses to the post quite unprepared, simply to make the bets against them safe, and then their secret would be achieved. In fact, more mischief might be done, as many of the public never back horses until they see them at the post, little dreaming that they are "done" on the Goodwood Cup betting is still very languid, and the two Dutch horses and Oulston excite but the attention of the Ring. We are still, however, firm in our belief that, good as Oulston may be, he has no chance with Rattle at 12lbs. The St. Leger betting is a dead letter; and Oulston's sale—If it be one—has not increased his backer's confidence in the Gosforth colt. Fell is the latest party to go out of training for the St. Leger, with its 167, is exactly on a par with last year, which had the largest entry ever known

The racing fixtures for the week are few and uninteresting. Marlborough and Chelmsford each occupy Tuesday and Wednesday. The latter meeting is now under the able care of Mr. Percy, of Leamington, who has made extensive repairs for its handicap, in which Rataplan has to give Mr. Payne's Cock Pheasant of the same year 3 lbs.

Yachting will be pretty brisk during the ensuing week, and commences with the Regatta at Dartmouth on Tuesday. On Tuesday and Wednesday the Royal Western Club (Ireland) hold theirs at Cahir, Belfast Lough; and on Wednesday a regatta will also come off at Mr. Mary's, Rother hithe. The Prince of Wales' Yacht-club sailing match is fixed for the latter day as well; and on Thursday the Victoria Thames Yacht Club are more be called into requisition for the Eastern Thames Regatta. A boat race against time is exciting much interest in Oxford, in which the taker of the odds undertakes that a four-oared boat shall be rowed from Oxford to Iffley and back, doing the present long vacation.

An "All England" cricket match is set down for Newark, on Thursday; but the "United All England" do not play during the week. Some of its corps, as well as of "All England," will join in the great match, at Lord's, on Monday, of "The gentlemen against the players." "All England" was cleverly beaten by sixty-three runs in one innings, when they encountered Earl Stamford's twenty-two, last week; and it is thought that the same fate awaits "The United," when they pitch their wickets in their turn, on July 30th, in Enville-park.

STOURBRIDGE RACES.—MONDAY.

Prestwood Stakes.—Argyle, 1. Nemesis, 2
Stourbridge Stakes.—Master Sadder, 1. Whitelock, 2.
Innkeepers Plate.—Roving Betsy, 1. Alma, 2.
Last Worcestershire Stakes.—Thwaite, 1. Miss Hatch, 2.

TUESDAY

Ladies' Purse.—Revib, 1. [illegible] Helene, 2.
Gold Cup Stakes. Wildrake, 1. Kirdyer, 2
Handicap Stakes.—Whitecock, 1. Tamarisk, 2.

STAMFORD MEETING TUESDAY.

Handicap Plate of 70 sovs.—Miss Middlethumb walked over
Stamford St. Leger Stakes.—Benhams walked over
Burghley Stakes.—Beelka, 1. Hermit, 2.
Sweepstakes of 5 sovs.—Little Duke walked over.

WEDNESDAY

Sweepstakes of 15 sovs.—Adamant, 1. Plenty 2, 2.
Sweepstakes of 10 sovs.—Exchange walked over.
Ketton Stakes.—Beelka, 1. Sandboy, 2.
Gold Cup.—Beelka, 1. Skaravogue, 2. Only these two ran. Won by a neck

NOTTINGHAM RACES.—THURSDAY.

Scarbors' Stakes.—Rataplan and Sune-gun-non divided forfeits.
Robin Hood Stakes.—Tilly, 1. Leamington, 2.
Nottingham Handicap.—Tyree, 1. Bramey, 2.
Sherwood Handicap.—Hazleout, 1. Hybla, 2.

FRIDAY

Bunney Park Stakes.—Duet, 1 San Domingo, 2
Chesterfield Handicap.—Le Nord, 1. Sancelox, 2
Forest Stakes.—Louvat, 1. Merry Monk, 2.
Queen's Guineas. Rataplan, 1. Goorkah, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Although our advices from Paris state that the whole of the French Loan of £30,000,000 will be almost immediately taken up on the opening of the lists Messrs. Rothschild and others have intimated that they are prepared to receive applications for the Loan in question at a charge of 4 per cent commission. The applications, we are informed, must not be for less than 900 francs of Rentes in the Four-and-a-Half per Cents, and 750 Rentes in the Three per Cents. It is by no means improbable, however, that all sums subscribed in this country will be returned, should the loan be taken up with avidity in France. As the new Turkish Loan of £5,000,000 will be jointly guaranteed by England and France, very little doubt can be entertained but that the whole of it will be subscribed for, and without having any effect upon our Money market, which remains easy, notwithstanding that another instalment of the Englas Loan of £15,000,000 fell due on Tuesday. In the bonds of the last loan contracted for Turkey there have been numerous purchases effected, and a considerable advance has taken place in the quotations.

The amount of business transacted in the Consol-market has been very moderate during the whole of the week; nevertheless prices, almost generally, have been well supported. The Directors of the India-houses have given notice that on and after the 31st of July, 1855, the interest on India Bonds will be received from and after that day at the rate of £3 3s. per cent per annum. The following day and the market was most favourable appearance Bank Stock realised [illegible] Reduced were [illegible] Three per Cents Reduced were [illegible] Three per Cent Consols for account and time [illegible] Annuities, 1880, 4 1-16; Ditto, 1885, 16; [illegible] Bonds, 3s. to 5s. pm.; Exchequer Bills, 3s. to 5s. pm.; Ditto, under £1000, 3s. pm.; Exchequer Bills, 1858, 101 to 102. On Wednesday prices were [illegible] and numerous small purchases of Stock were effected on account of the public. Bank Stock, 214 ex div.; Reduced and New Three per Cents, 91¾; Three per Cent Consols, 91¾; the New Three per Cents, 92¾; the New Two-and-a-Half per Cents, 76; Long Annuities, 1860, 4; Ditto, 1885, 16; India Stock, 262 to 260; India Bonds, 3s. 3s. pm.; Exchequer Bills, 1858, 3s. pm.; Exchequer Bills, 1859, 101 to 100. Thursday's business was limited, and several sales of stock were effected Three per Cent Consols were done at 91¾ for the transfer, and 91¾ for the account; Reduced, 91½; and New, 91¾. The New were quoted 16 16-16; Exchequer Bills, 20s. to 27s. premium. With the exception of Turkish Bonds having advanced nearly 2 per cent, there have been no important changes in the value of Foreign securities, for which, however, the market has ruled firm. Brazilian Five per Cents have sold at 101¼. Ditto, Four-and-a-Half per Cents, 90 ex div.; Ecuador Bonds, 4; Granada Deferred, [illegible] Three per Cents, 86¾; Russia Five per Cents, 106; Ditto Four-and-a-Half per Cents, 90 ex div.; Sardinian Five Cents, 87; Spanish Passive Certificates, 8¾; Ditto, New, Deferred, [illegible] Three per Cents, [illegible] Two-and-a-Half per Cents, 19¾; Ditto Three per Cents, 39¾; Dutch Two-and-a-Half per Cents, 63¾ ex div.; Dutch Four per Cents, 95; Ditto, Six per Cents, 1.

There has been a steady business done in Joint-Stock Bank Shares, at very full prices. Colonials have realised 84½, British North American, 44; Colonial, 20½ ex div.; Commercial, 22½; London Chartered of Australia, new, 4; London and County, 37; London Joint-Stock, 20½; Oriental, 20½; Provincial of Ireland, 1½; Union of London, 29½ ex div. Miscellaneous Securities have mostly remanded better rates—Berlin Waterworks have marked, 8; Canada, 121, Ditto Government, Six per Cents, 111½; Crystal Palace, 4; Ditto Debentures, 3½; London Gas, 97; Oriental Gas, 8½; Peninsular Land and Mineral, 2½; Peninsular and Oriental Steam, 61½. Canal Shares have ruled dull, yet very little change as to the prices in their quotations: Ashton and Oldham, 130; Coventry, 300; Grand Junction, 240; Leeds and Liverpool, 870; Oxford, 110; Regent's, 14½; Stafford and Worcester, 425; Stourbridge, [illegible] Insurance Companies' Securities have remained dull—Sales in Albion, 128; Globe, 110; Law Life, 57; Rock, 8½; Union, 84½.

We have to draw attention to the value of money. On the Stock Exchange for short periods it may be had at 2 per cent per annum

The Import of the precious metals have amounted to £180,000 from New York, and £162,500 from Australia. We have intelligence that several vessels have left Melbourne with large quantities of gold aboard. The shipments have been about £40,000 to the Continent, and 120,000 to Calcutta, Lisbon, and the Pacific.

There has been about an average business transacted in Railway Shares, although the half monthly settlement has taken place. The following are the closing prices [illegible] on Thursday.

ORDINARY SHARES AND STOCKS.—Aberdeen, 23½; Bristol and Exeter, 93½; [illegible] Eastern Counties, 11½; Great Northern, 102½; [illegible] Great Western, 67½; Lancashire and Yorkshire, 57½; London and Blackwall, 3½; London and Brighton, 93½; [illegible] London and North Western, 91½; Manchester, Sheffield, and Lincolnshire, 36½; Midland, 73½; North Eastern Berwick, 73½; Ditto, Extension, 12½; North Staffordshire, 7½; Scottish Midland, 69; Shrewsbury and Chester, 12½; South Wales, 81½; Waterford and [illegible]

PREFERENCE SHARES.—Aberdeen, 101; Eastern Counties Extension, Five Per Cents, 10½; Ditto, Great Northern Five per Cent, 12. Ditto, Three-and-a-Half per Cent, 105½; Ditto, Five per Cent Scrip, 7½; Midland Consolidated, 4½; Oxford, Worcester, and Wolverhampton, 104; Shrewsbury and [illegible] 4½; Waterford and Kilkenny, 1½

LINES LEASED AT FIXED RENTALS London, Tilbury, and Southend, 10 to 10½; Midland-Bristol, 1.

[illegible] Bristol and Exeter, 86 to 87; Dutch Rhenish, 9½; East Indian Railway Co., [illegible] Luxemburg Shares, 3½; Great Western of Canada, [illegible] Madras, New, 1½; Ditto, Extension, 1; Western of France, 30¾

[illegible] Canada Copper and Cuseba were done at [illegible] Australasian Steam Navigation Company, 1½; Pontgibaud Silver Lead, [illegible]

The last [illegible] Bank has [illegible] a fall [illegible] in stock of bullion of £3,340,000.

Friday Evening

Very little change has taken place in prices to-day, and the amount of business doing in most stocks is moderate. The Three per Cent Consols are 91¾ ex., the Three per Cents Reduced, 91¾ ¾; and the New Three per Cents, 92¾. Exchequer Bills are 20s to 23s. prem. Foreign Bonds and Railway Shares are somewhat [illegible]

THE Bank of England have purchased for their West-end branch establishment, in exchange for the Mansion of the Marquis of Anglesey (Uxbridge-house), in Burlington-gardens, Piccadilly, for a sum of £45,000 or £47,000.

HYDE-PARK ON SUNDAY. The Sunday demonstrations in Hyde-park are [illegible] and in another week or two there will be [illegible] Mr. Locke's bill, which has been [illegible] Lord Robert Grosvenor's judicious measure gave rise. On Sunday the number of people assembled showed a decided falling off, and the more respectable classes held themselves aloof from the meeting, apart from a number of urchins and thieves who had collected. Of course these latter did all in their power to get up a disturbance, rushing hither and thither, making as much noise as possible, and scarcely giving the police time to secure one of their number. A considerable force of the police was in attendance, but the previous Sunday they fixed on Hyde-park corner as the most convenient spot for carrying on their operations. Last Sunday the venue was changed to the Albert-gate, and the police, not having anticipated this move, had consequently an opportunity of watching how we deal with street rows in London. Beyond a considerable amount of pocket-picking very little mischief was done, and the number of police on the ground acted most powerfully to check the disposition to riot. The police did not show in the park itself, but at the different outlets and in the neighbourhood they were most strongly represented in force, while a mounted patrol kept up with the quick movements of the mob, and prevented any serious injury to property being attempted. No carriages appeared in the drive, so that no facilities existed for getting up a disturbance, and we have fairly hope that next Sunday afternoon the park will present its usual peaceable aspect. All feeling of irritation towards the police has evidently subsided, and we have no doubt that they will now be heartily supported in establishing and maintaining good order. Two attempts were made by the rabble on Sunday to penetrate into Belgravia from Albert-gate, but both were promptly frustrated by the police, and the ringleaders were arrested.

DR PRADES' PICTURE OF THE EARL OF CARDIGAN AT BALACLAVA.—We have recently inspected, at Messrs. Fore's, Piccadilly, a fine painting by M. de Prades, illustrative of one of the many heroic incidents in the Crimean Campaign, namely, that of "Balaclava." The picture represents the Earl of Cardigan, as in his familiar "Ronald," in the heat of that bloody fray. It possesses great merit in all essential respects; and will, we have no doubt, be greed on with interest by thousands of our fellow countrymen. An engraving of the picture, by Mr. Henry Cousins, is preparing for publication.

IRISH REMITTANCES FROM AMERICA. If the emigration drain from Ireland to the United States is being gradually diminished, as no doubt it is, the influx of money from the United States to Irish hands is steadily on the increase Just take a few figures in illustration of this statement. The number who left Ireland for all parts of the States, British America, and Australia, in the year 1853, was 162,601; whereas the number who left Ireland in the year 1854 did not exceed 150,209. Of these 111,095 emigrated to the United States, 22,909 to British America, and 16,202 to Australia. In 1853 the amount of money sent home by Irish emigrants to their relatives in Ireland, for payment of passages as well as for various other purposes, was £1,439,000; but in 1854 that amount, vast and wonderful as it was, was far exceeded, it having reached to £1,745,000, or nearly £300,000 over what it was the previous year. In the hands of the world there is nothing like this amazing proof of the strength and [illegible] of the feeling of affection and family attachment which ever distinguished and adorned the calumniated Irish race.

THE MARKETS.

CORN EXCHANGE (Friday).—The arrivals of English wheat up to our market this week, coastwise, have amounted to 1466 quarters; by land-carriage, first, up to-day, the receipts were Limited, and the show of samples was small. All kinds were in good request, at prices fully equal to Monday. In some instances selected samples were considered rather dearer. The imports of foreign wheat are rather over 12,000 quarters. Good heavy qualities were the turn higher, and other sorts ruled steady, as full prices. All floating cargoes sold steadily, at full quotations. Grinding barley was firm, and quite as dear as on Monday. Other kinds were a slow inquiry, in the value of malt no change to note place. We were fairly supplied with oats, which moved off steadily, at full quotations. Beans were in good, and flour ran, and previous rates.

Arrivals in Mark: English—wheat, 1466; barley 791; malt, 350; oats, 1080 [illegible] Irish: oats 2100. Foreign—wheat, 12,693; barley, [illegible]; oats, [illegible]; flour, [illegible].

English. Wheat, [illegible] per qr.: fine white, 76s to 77s; ditto, white, 76s to 80s; Norfolk and Suffolk, red, 71s to 76s; rye, 43s to 45s; grinding barley, 30s to 33s; distilling, 34s to 36s; malting, 36s to 38s per qr. Beans, 40s to 43s; Lincoln and Norfolk, mail, 65s to 70s; Severn ditto, 62s to 64s; Kingston and Ware, 66s to 71s; Chevalier, [illegible]. Peas, [illegible]. Oats, [illegible]. Flour, [illegible]. Linseed cake, [illegible]. Rapeseed, [illegible]. Coals, [illegible].

Irish. Oats, [illegible]; flour, [illegible].

Foreign. Wheat, [illegible]; barley, [illegible]; oats, [illegible]; flour, [illegible].

Seeds.—All agricultural seeds are a slow sale, at about extremely low quotations. Linseed, [illegible]; rapeseed, [illegible]; mustard-seed, 12s. to 14s.; white ditto, 8s to 10s.; tares, 6s. to 10s. per bushel. Canary, [illegible]; hempseed, 38s. to 40s. per quarter. Linseed cakes, [illegible]; £12 5s. to £12 10s.; ditto, foreign, £11 15s. to £12 10s. per ton. Coriander, 9d. to 10d. per quarter.

Bread. The prices of wheaten bread in the metropolis are from 10d. to 10½d. of household ditto, 9½d. to 9½d. per 8lb. loaf.

Imperial Weekly Average.—Wheat, 76s. 1d.; barley, 34s. 7d.; oats, 28s. 8d.; rye, 44s. 8d.; beans, 41s. 10d.; peas, 42s. 6d.

The Six Weeks' Average.—Wheat, 75s. 6d.; barley, 34s. 3d.; oats, 28s. 9d.; rye, 45s. 7d.; beans, 42s. 1d.; peas, 42s. 2d.

English Grain Sold this Week.—Wheat, 33,360; barley, 6204; oats, 9193; rye, 117; beans, 2,960; peas, 230 quarters.

Tea.—The sales of samples being rather extensive, the demand is heavy, and prices are barely supported. Common sound congou is selling at 8½d. per pound.

Sugar.—All raw sugars have moved off steadily, and, in some instances, a further advance of ½s. per cwt. has been realised. Refined loaves has changed hands at 34s. 6d. to 36s. 6d.; Grenada, 34s. to 36s. Besides, 36s. 6d. to 37s. 6d. per cwt. has been the figure of foreign have produced extreme rates. The demand for refined goods is steady. Brown lumps, 4s. 6d. to 4s. 7½d.; and 5s. to 5s. 2d. per cwt.

Coffee.—Nearly all kinds have been in good request, and prices are rather on the move. Inferior descriptions command previous rates. Eastern and foreign qualities are unaltered in value. There are [illegible] further advanced is per cwt. Home and chease are the turn dearer. In other kinds of provision only a moderate business is doing.

Tallow.—There is a fair demand for tal ow, and prices continue to advance. P.Y.C. on the spot and last month, 67s. 3d.; and for October to December 66s. per cwt. Town tallow, 5s. 4d. net cash. Rough fat, 2s. 4½d.

Spirits.—There has been a fair demand for rum, at full prices. A Government contract for 15,000 gallons is announced. Brandy is rather dearer. Geneva and malt spirits are quoted at 12s. 12d per gallon.

Hay and Straw.—Old meadow hay, £3 10s. to £4 6s.; new ditto, £4 10s. to £5 5s.; old clover ditto, £4 5s. to £6 10s.; new ditto, £4 10s. to £5 5s.; and straw, £1 7s. to £1 10s. per load.

Hops.—The public are supplied readily, at very full prices. English qualities are firm, and quite as dear as last week.

Potatoes.—The supplies of new English are increasing, and nearly 90,000 baskets have arrived from the Continent. A steady business is doing, at 30s to 80s per cwt. for kegulah, and 3d to 4d. per basket for fine qu[illegible]

Coals [illegible] Relmont, 19s 3d; [illegible] Ma.

20s Haswell, 2 s. 6d.; Hutton 2s. 6d.; Stewart's, 21s. 6d.; Hough Hall, 19s.; Lambton, 20s. 6d. per ton.

Hops (Friday).—As the plantation accounts continue very favourable, our market is very dull, and prices are barely supported. Available, our market is very dull, and prices are barely supported. Available, our market is very dull, and prices are barely supported. Nearly 800 bales of American hops have duty to-day at 40s. 6d. Mid and East Kent pockets, 4s. to 6s.; ditto, 5s. to 8s.; Weald of Kent, £11 8s. to £12 12s.; Sussex, £10 10s. to £11 10s. per cwt.

Leather (Friday).—A very limited supply of hides was on sale to-day's market, and the demand for all sizes and sorts was extensive in the highest description obtained, with a rise of 2s. per 56lbs. The number of sheep was soon, for the time of year, and the market ruled rather firm, at 4d. per 8lbs. more money. Inferior and middling supply of which was only moderate—sold readily at 2d. per 8lbs. more money. Lambs were in good request, and the supply was pretty large, at 6d. per 8lbs. more money. Calves were steady, at last week's currency. Pigs met a dull sale, on former terms. Hides were firm, at full prices. Tallow was in moderate request, at 6d. per cwt. more money.

Per 8 lbs. to sink the offal—Coarse and inferior beasts, 3s. 8d. to 3s. 10d.; second quality Lots, 4s. 0d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s. 2d.; coarse and inferior sheep, 3s. 8d. to 3s. 10d.; second quality ditto, 4s. 0d. to 4s. 2d.; prime large ditto, 4s. 4d. to 4s. 6d.; prime small ditto, 4s. 8d. to 5s.; large pigs, 3s. 8d. to 4s.; small ditto, 4s. 4d. to 4s. 8d.; suckling ditto, 5s. 0d. to 5s. 4d.; prime ditto, 5s. 8d. to 6s. 0d.; Total supply in Smithfield this week: Beasts, 2,600; sheep, 23,000; calves, 270; pigs, 280.

Per 8 lbs. to sink the offal—Inferior beasts, 3s. 8d. to 3s. 10d.; second quality Lots, 4s. 0d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s. 2d.; coarse and inferior sheep, 3s. 8d. to 3s. 10d.; second quality ditto, 4s. 0d. to 4s. 2d.; prime large ditto, 4s. 4d. to 4s. 6d.; prime small ditto, 4s. 8d. to 5s.; large pigs, 3s. 8d. to 4s.; small ditto, 4s. 4d. to 4s. 8d.; suckling ditto, 5s. 0d. to 5s. 4d.; prime ditto, 5s. 8d. to 6s. 0d.; Total supply in Whitechapel this week: Beasts, 2,520; sheep, 23,280; calves, 270; pigs, 290.

Newgate and Leadenhall (Friday).—The supplies were very limited, and the trade ruled brisk, as follows.

Per 8 lbs., to the purchaser—Inferior beef, 3s. 6d. to 3s. 8d.; middling ditto, 3s. 10d. to 4s.; prime large ditto, 4s. 0d. to 4s. 2d.; ditto small ditto, 4s. 4d. to 4s. 6d.; large pork, 3s. 8d. to 4s.; inferior small ditto, 4s. 4d. to 4s. 8d.; middling ditto, 5s. 8d. to 6s. 0d.; prime ditto, 6s. 4d. to 6s. 8d. Veal, 4s. 8d. to 5s. 8d.; mutton, 4s. 4d. to 5s. 8d.; lamb, 6s. 8d. to 7s. 8d.

[illegible]: Ensign E. Ansell to be Lieutenant.

[illegible]: Lieut. Hon. H. Nicholson to be Ensign.

[illegible]: [illegible] Hunt, P.C. Savage, to be Ensigns.

[illegible]: [illegible] Hunt, P.C. Savage, to be Ensigns.

ROYAL REGIMENT OF FOREIGN LEGION.—1st Regt. Capt. Major A. Schaper to be Major-Commandant with brevet rank: 2nd Regt. Lieut. Anthony Rathbone, Jr. to be Captain; C. G. Von Wurmb, to be Major with brevet rank: Depot at Shorncliffe. Lieut. C. Mills to be Depot Adjutant. Depot at Heligoland: E. Hoffman to be Depot Adjutant with the rank of Lieutenant. Depot at Shorncliffe: Staff Quartermaster.

BRITISH SWISS LEGION.—1st Light Infantry: J. Gray to be Paymaster.

DISPATCHERS.—Brevet Lieut.-Colonel Hon. J. L. Browne to have the Brevet rank of Major, dated the 12th July, 1855.

HOSPITAL STAFF.—Senior Surgeon J. F. Williams to be deputy Inspector General of Hospitals: Surgeon J. C. Gunning, Senior Surgeon S. Chesbon, and Staff Surgeon of the second Class W. Sall to be Surgeons of the first Class. Assistant-Surgeons H. D. Fyfe, P. S. Warren, D. J. Doherty, W. Perry, T. Ships, and Staff Assistant-Surgeons W. Blane and J. Rainsford, to be Staff Surgeons of the Second Class.

T. O. Hagger to be Purveyor to the Forces.

To be Lieutenants—1st Foot: H. F. Wakefield, W. Hoge. F. A. Gould, J. A. Mackay, J. Ramsay, J. W. Dalgety, to be Lieutenant-Colonels. Majors W. Jones, H. St. Gardiner, L. B. Jamieson, C. E. Cooper, J. C. Crawford, G. H. Page, R. Mant, to be Majors. Capt. G. Tennant, to have the additional rank of Captain in Turkey while employed under the command of Major-General Beatson. C. B. Barnes, A. L. Hoyle, to have the local rank of Assistant-Surgeon in Turkey while so employed.

ADMIRALTY, JULY 14

Royal Marines: Colonel Brevet Commandant J. Childs to be Colonel Commandant: Lieut.-Col. T. F. Lwyer to be Colonel Second Commandant: Brevet Lieut.-Col. W. B. Langford to be Lieutenant-Colonel: Maj. [illegible] Hall to be Captain; Second Lieut. W. H. T. M. Hodgin to be First Lieutenant.

BANKRUPTS.

ELIZABETH M'MULLAN, Bow-street East, Oxford-street, plumber-dealer—G. [illegible] BEAUMONT, Manchester, general warehouseman—J. [illegible] NEWELL, Friar-street, Reading, [illegible] Buckinghamshire, carrier and leather-seller—J. DAWSON, High-street, Shadwell, [illegible] Wellclose-square—J. [illegible] NICHOLS, Swansea, agents, Lancashire-road surveyor, commission agent, and general dealer—T. [illegible] LOCKLEY, Wisbech, painter and glazier—D. WILLIAMS, [illegible] Chelsey, Berks, wheelwright and carpenter—E. GREEN, Ely, [illegible] Cambridge, [illegible] AUSS, Strand, stationer—J. SHARLAND, Penzance, builder and draper—T. G. SHAW and J. LANE, Old-market-street, City, and 67, [illegible] March—J. EDWARDS and T. WHITLOCK, Upper Thames-street, both carpenters—G. NALDEN, Lodsdale, builder and carpenter—J. CHINN, Wellington, Shropshire, victualler—J. S. [illegible] SUTTER, Manchester, manufacturer—J. [illegible] Bristol, [illegible] under-clerk—J. [illegible] banker, and grazier—W. [illegible] Wingate Grange and Low Spennis Moor, [illegible] grocer and [illegible] HORNER, late of Black-swan-yard, Bermondsey-street, Bermondsey, leather-dresser—S. M. and N. S. BURNELL, Newcastle-upon-Tyne, and of North Shields, merchants and ship and insurance brokers.

BIRTHS.

On the 12th inst., at Shrubenhow, Forest-hill, Sydenham, Kent, the wife of Charles Barry, Esq., of a son.

On the 14th inst., at Basingstoke, Balliol College, Oxford, the wife of the Rev. Henry Bessell, Master of Balliol, of a daughter.

On the 15th inst., at Hendon, Middlesex, the lady of Mrs. W. L. Fallow, of a son, stillborn.

On the 15th inst., at Lytchett Matravers Rectory, the wife of the Rev. W. M. Heath, of a son.

On the 15th inst., at Shrewsbury, near Denbigh, the wife of John Cognac Wynne-Edwards, Esq., of a son.

MARRIAGES.

On the 12th inst., at Holy Trinity Church, Pimlico, by the Rev. Henry Garth, Mr. Frederick Rose, of Great Pulteney-street, St. James's, to Mary Elizabeth, daughter of Mr. Black, of Grosvenor-terrace, Westbourne.

On the 17th inst., at St. Ann's, Soho, by the Rev. R. Gorett, Mr. Frederick Jones, to Miss Mary, youngest daughter of the late George Coles Arcangh, Esq., of Stanwell, Middlesex.

At Stillingfleet, near York, by the Rev. Wilson, of the Abbey, Wm. Wetherspoon, Esq., Manchester-house, Paisley, to Jessie, youngest daughter of Thomas Lees, Esq.

On the 14th inst., at St. Michael's Church, Coventry, by the Rev. Charles H. Rice, of Culworth, Northamptonshire, Constance Hayward Read, Esq., Ceylon Rifles, to Caroline, eldest daughter of Edward Thomas Fearn, an, Esq., of Coventry.

At Edinburgh, on the 16th inst., by the Rev. Hugh Knightsbridge, William son of the late William Hooper Boys, Esq., of Alborda, Kent, and nephew of the present Rear Admiral Boys, to Elizabeth Ann Frederick, Mary, only child of Frederick Boyd [illegible].

DEATHS.

On Saturday, on the 28th inst., of wounds received in the action of the 18th June, Captain William Henry Mansfield, 44th Regt., son of the late Admiral Sir William Mansfield, of Mansfield Lodge, in the county of Kildare.

On the 3rd inst., of a wound received on the 18th, Capt. G. H. Norman, of the 57th Regt., eldest and beloved son of G. W. Norman, Esq., of Bromley, Kent.

On the 5th inst., in Dublin, at the Under Secretary's lodge, Phœnix-park, Lady D'Aguilar.

On the 12th inst., at Bath House, Colesbill-street, Eaton-square, universally respected, beloved and lamented, Col. J. Enoch, Assistant Adjutant-General at Head Quarters, London, aged 71.

On the 17th inst., at Langdon, Dawlish, after a long and painful illness, wife of William Cosens, Esq.

THE ROYAL VISIT TO PARIS.—I am able to inform you in a manner almost official, that her Majesty Queen Victoria and his Royal Highness Prince Albert will disembark here on the morning of Friday, August 17; that they will sleep in this city and leave the following morning for Paris. His Royal Highness Prince Consort will pass the Sunday in private, and will not receive officially until the Monday. The English Admiralty have already sent one of its officers to take the necessary steps for the disembarkation. It is believed that the Emperor will be here to receive the august visitors, as, in addition to the Imperial Prince, which will be prepared for the Queen and her suite, an hotel has been arranged for a high personage. The city of Calais, proud of the preference which Queen Victoria shows in choosing that port, is preparing to give her Majesty a worthy reception. Captain Fendall, courier of the English Cabinet, landed yesterday morning, bearing the despatches of her Britannic Majesty to the Emperor. His Highness Prince Lucien Napoleon Bonaparte embarked yesterday morning for Dover on board the steamer *Imperatrice.*—*Letter from Calais in the Indépendance Belge of Tuesday.*

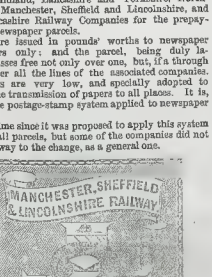
THE HEALTH OF THE ALLIED ARMY. Diarrhœa is all but universal in all the armies, and cholera will, I fear, be much more so during this month and that of August, than it has been hitherto, if, indeed, it does not be so. It always unpleasant to lay oneself open to the imputation of being a croaker, but it is impossible not to entertain apprehensions in the present state of things. No one can already hardly point to a single man who has not got diarrhœa. Dyspeptic people are looked upon in England as remarkable for nervousness, but here in Crimea out here is quite the reverse, confinement of the bowels makes happy, careless, merry dogs, whom everybody admires and envies, who drink their beer and devour their tough beef with impunity, whilst their neighbours are looking melancholy over various compounds of rice, or sloppy mixtures supposed easy of digestion. I was in the camp of the 10th Hussars the other day when a man whom the prevalence of cholera had "demoralised" sent in a fright for the doctor, because for two days he had been the victim of dyspepsia. When the story was related to a group of officers, "Oh that I could say the same!" was the universal cry. *Letter from the Camp.*

NEWSPAPER PARCEL PREPAID STAMPS

LABELS like the one engraved below have been adopted by the Midland, Lancashire and Yorkshire, North-Eastern, Manchester, Sheffield and Lincolnshire, and East Lancashire Railway Companies for the prepayment of newspaper parcels.

They are issued in pounds' worths to newspaper proprietors only, and the parcel, being duly labelled, passes free not only over one, but, if a through parcel, over all the lines of the associated companies. The rates are very low, and specially adapted to enable the transmission of papers to all places. It is, in fact, the postage-stamp system applied to newspaper parcels.

Some time since it was proposed to apply this system to all small parcels, but some of the companies did not see their way to the change, as a general one.



This excellent system is at present confined to the above companies. But soon the London and North-Western, and Great Northern Companies, will follow and give the metropolitan press the advantage of the new system, now confined to the country.

The system of a cheap prepaid label, or stamp, avoids booking, weighing at stations, or delay; and enables the transmission of newspapers into localities, where otherwise from high cost of conveyance they could never penetrate, except to the houses of the rich.

SKETCHES IN THE GULF OF FINLAND,

(From a Correspondent.)

BURNING OF GOVERNMENT BUILDINGS.

On Wednesday, the 20th June, Captains Yelverton, of *Arrogant*, and Vansittart, of *Magicienne*, accompanied by the masters of their respective ships, proceeded in the *Ruby* gun-boat to reconnoitre the entrance of the Kymene river, from the fort of Kotchensalm. On the adjacent island of Kotka they discovered a large barrack, stables, hospital, &c., calculated to accommodate 6000 men. On nearing these buildings two rockets and a gun were fired as a warning to the non combatants to escape. No resistance being offered, a party from the *Arrogant* and *Magicienne* of sixteen or seventeen landed in the cutter of the former and gig of the latter ship, and set fire to them at once to set fire to the immense pile of buildings, and soon had most of them in a grand conflagration. The Sketch represents the principal buildings when the fire broke out. The bridge to the right, over which some Russian troops and peasants may be seen escaping, connects the island with the mainland. To complete the work of demolition it was necessary to land at two other points to destroy detached buildings that cannot be shown in the Sketch. The telegraph seen to the left was also destroyed, the occupant of which had literally just time to "take up his bed and walk."

Our ignorance of the existence of the fort of Rotshensalm and barrack of Kotka must be ascribed to the well-known policy of Russia in keeping secret all her military affairs; but they are not, therefore, to be considered of less importance nor their loss of less consequence to the enemy. The spoils were not much, although the barracks had been recently supplied: they consisted of a few pairs of silver epaulettes and a number of ladies' bonnets; with the latter Jack, when his work of destruction was over, rigged himself out and cut a ludicrous enough figure. The whole work was happily effected without the slightest casualty.

BLOWING UP OF FORT ROTSHENSALM.

This Sketch shows the destruction of Fort Rotshensalm, situated near the mouth of the Kymene River, in Finland, on the 21st of June, by the crews of H.M.S. *Arrogant* and *Magicienne*. The fort was circular, built of Lake rock, very solidly, and completely commanded the approach by sea to the extensive barracks on the island of Kotka, as well as the entrance to the river. The following are nearly its dimensions and character: Circumference, about 400 yards; height, 30 feet; having embrasures for 42 guns, casemated throughout, and bomb-proof. It had been deserted for some time. Notwithstanding that both ships were anchored for a part of two days in a line inside the fort, whilst their crews were engaged in mining and blowing it up, not the slightest resistance was offered; although, judging from its construction, it must have cost a large sum of money, and to replace it will necessarily require much time and large outlay.

THE "BELLEISLE," HOSPITAL-SHIP, IN FARO SOUND.

THIS fine hospital-ship has accommodation for 164 patients, each of whom has a separate iron cradle on the main deck. There are two officers' wards, containing 10 beds in the ward-room; and two beds for patients who may have just undergone operations. The lower deck has 124 cradles, besides a washing and wringing apparatus for the cloths, and a patent mangle. There are also fixed and moveable baths, which are supplied from coppers on the main deck. The other bedsteads are on the crlop deck, for convalescents.

The medical officers in charge are Dr. M'Keehnie, inspector; Dr Robert Butt, first surgeon; Mr. Jas. J. Maslin, second surgeon; Mr. R. Brien, assistant-surgeon; and three dressers.

A HURRICANE.—A storm of terrific violence broke over Paris in the early part of Monday afternoon. Two men, who were at the time employed in soldering some part of the steeple of the Sainte Chapelle, had all their apparatus blown away, and it was with the greatest difficulty they could maintain their hold of the scaffolding. In the Rue Montmartre a face of pigeons were surprised by a squall, and several of them driven with such violence against the chimney that they were killed. The trees on the Quais, in the Tuileries, and in the Bois de Boulogne, and Champs Elysées, bent like twigs, and many of them, of large size, were blown down. Tiles and chimney-pots were blown and scattered about in all directions, and the flags at many of the public buildings stripped in ribbons.

GREAT NATIONAL STANDARD THEATRE, Shoreditch.—The glorious Comedians WRIGHT and PAUL BEDFORD, of the Adelphi, are still drawing crowded houses at this magnificent establishment. They appear every evening

W. S. WOODIN'S OLIO of ODDITIES EVERY EVENING at Eight, at the POLYGRAPHIC HALL, King William-street, Strand: Stalls, 3s.; 1st, Sofa, 2s.; 1st, Area, 2s.; Amphitheatre, 1s. Box-office open from Eleven to Five.

WILL SHORTLY CLOSE, the GERMAN ARTISTS' Third ANNUAL EXHIBITION of NEW WORKS Open from Ten till Six. Admission, One Shilling.—ENGAGED, 61—GALLERY, 66, New Bond-street, next door to the Clarendon.

THE SECOND ANNUAL EXHIBITION of the FRENCH SCHOOL of the FINE ARTS is NOW OPEN DAILY, from Ten to Six o'clock, at the GALLERY, No 121, PALL-MALL, opposite the Opera Colonnade. Admission, 1s. catalogue, 6d.—Mdlle. ROSA BONHEUR'S Picture of THE HORSE-FAIR (just completed) has arrived, and is now added to the Collection.

ROYAL SURREY ZOOLOGICAL GARDENS.—Mons. JULLIEN and his unrivalled BAND, with the SIEGE of SEBASTOPOL, Every Evening

THE ZOOLOGICAL GARDENS, REGENT'S-PARK are the finest collection of living Animals in existence, comprising a magnificent Herd of Lions, Lion Whelps, Clouded Tigers, Hunting Dogs, and other Carnivora, Bleinds, Elephants, Rhinoceros, and a pair of Hippopotami (supposed to be the same number of Hippopotami, Reptiles, Fish, and other Marine Animals. The Band of the 1st Life Guards will perform by permission of Col. Darley every Saturday at four o'clock until further notice. Admission, 1s.; Monday, 6d.

A RUSSIAN INFERNAL MACHINE picked up off Cronstadt by H.M.S. "Wellington," is on view, and its use explained DAILY, at the ROYAL PANOPTICON, Leicester-square. Admission, 1s.; Schools and Children, Half price

ROYAL POLYTECHNIC INSTITUTION. The Effect of Russian Infernal Machines on Vessels demonstrated daily, at 3 12 and 8.45. ANAPA, FROM THE SEA.

NEWLY-CONSTRUCTED OVENS FOR HEATING SHOT AT ANAPA. (SEE NEXT PAGE)

ANAPA.

(From a Correspondent.)

ANAPA is a complete fortification, enclosing within it all the buildings composing the town. It has the sea on the northern and western sides, and is defended on the land side by a wall with batteries, and a wide deep ditch. On the northern side of the sea face the bastions are not very high, being about thirty-five feet, the cliffs rising gradually on the western side, where the highest guns were about fifty five feet above the level of the sea; the coast, trending south-easterly, rises immediately into high bold cliffs, which are the western extremity of the Caucasian mountains. On the northern side of Anapa is an extensive plain, with a sandy beach, and a small river called the Teuzour comes down a short distance from the fort.

On the 10th ult news arrived at the fleet (then anchored about nine miles to the southward of Kertch) that the Russians had left Anapa, and early the following morning Admiral Houston Stewart, in the *Hannibal*, accompanied by the *Highflyer*, Captain Moore, and two French ships, the *Napoleon* and a smaller steamer, went down. The Russians had made an effectual clearance of everything, having blown up the magazines, dismounted and disabled their guns by spiking them and knocking off the trunnions, which in many instances they had driven into the muzzles. Much new work was completed, or in progression, on the western side, where the cliff is highest: here the heaviest guns had been recently placed, a new magazine was building, and a number of ovens for heating shot had been lately built.

A number of Circassians were in and about the place, and collected to meet the Admiral upon his arrival, a conference being held during the morning. They did not appear be in any formal occupation of the place, but merely to ride about more as a matter of curiosity, and to see what they could pick up, than anything else. They were all dressed very much alike: the upper garment was a light-brown cloth, something like a very loose frock-coat closed in front, and having large sleeves; loose trousers tied in a tight bottom, and lightly-made yellow or buff boots completed the dress. Their arms are a long knife, the handle and case ornamented with silver studs in sheath in the girdle; a single very long barrelled pistol, with a large white knob at the butt, generally ornamented with silver, worn across the back in the belt; a sword in a wooden sheath, and a light basket in a case made of hide, with the hair outside. Some wore chain armour below the upper cloth, and a few had bows and arrows. They all wore high conical caps, with a band of black sheeps-skin, round the lower part. The cartridges were carried in two rows of little pockets, one row on each breast. All had a small whip, with a hard straight lash. They had generally thin faces, with long noses and ample beards, with a restless, hawk-like expression of eye, and very independent manner. There were many old men amongst them, who with their with beards and long hooked noses, looked like so many Fagins as they poked about to see what they could find among the heaps of rubbish which the Russians had left. Some of the chiefs were very fine men, with a truly noble bearing and manner.

The *Hannibal* remained a day at Anapa, and then returned to the fleet. The entire yacht *Stella*, R Y S., belonging to Mr. Franklin, and at present with the fleet, arrived, and anchored off Anapa as the *Hannibal* was coming

FUNERAL OF LORD RAGLAN.

(From our Artist and Special Correspondent.)

CAMP BEFORE SEBASTOPOL, July 6, 1855.

THE mortal remains of Lord Raglan are borne as I write to a last resting place in England. The deeds of arms which are inseparably connected with his name will cause it to be long remembered by posterity; and if it was so disposed that the grand object of all our efforts—the capture of sebastopol—was not consummated in his time, the memory of Alma, Inkerman, and Balaclava will no more perish than his name be forgotten by the firesides of England. In death, as in life, Lord Raglan was surrounded by all the grim sounds and turmoil of war. As the funeral procession wound its way slowly along the hills and hollows of the Chersonese, the boom of great guns from the walls of Sebastopol, answered in quick response from the English batteries, proved that, although one of the main actors in the scene had expired, the work was still to be done, and was still proceeding.

Signs of a mournful celebration were visible early on the 3rd of July, not only round the Traktir Inn where the deceased Field Marshal lay, but in the most distant parts of our vast encampments. Funeral parties of fifty men from each regiment were told off, and marched in solemn silence to the rendezvous. From the front came the contingents of the infantry and artillery, whilst from the vale of Karanyi rode forth squadrons of cavalry, to form the guards of honour, and the escort of the body. As the various companies of infantry came up, they formed in lines along the road leading from head-quarters to the residence of the Commander-in-Chief. The cavalry stood at the bottom of the vale by Traktir, and the artillery was drawn up on the slope, with matches lighted. Behind these, and at both sides of the lines, the motley crowds of men of all nations and costumes, looked on in silence to witness the pageant. Beyond the lines of red uniforms, which marked the presence of our troops, and as one approached the French head-quarters, the ground was held by the remnant of the Zouaves in all the martial beauty of their best costume. Green shawl on red fez, overhanging tassel, black jacket, and red bags of trousers, yellow leather leggings, and white gaiters; add to these the bronze face and determined look of these warriors, it was a complete picture on the road the long cool and bear skin marked the presence of the Imperial Guard. On a knoll was a battery of the Artillery of the Guard and a detachment of Sardinian Lancers, with blue pennons floating in the breeze; and far away in the blue distance the ships at anchor in Kamiesch Bay.

At three in the afternoon the funeral car—a 32-pounder, surmounted by a platform drawn by ten horses, moved to the door of the house, and a line of infantry closed the ground in front from intruders. The court then began to fill, as the generals and officers of the four armies crowded in. Amongst the first to arrive was General de la Marmora, clad in a plain grey uniform; he was followed by a numerous staff whose blue feathers fluttered gracefully in the air. There were the blue Hussars, with their red caps; the *bersaglieri*, with the round hat and cock's-tail—all mounted on small but spirited chargers. Shortly afterwards Omer Pacha appeared, accompanied by a numerous suite. He was thinner than usual: he wore a fez embroidered with gold, and a broad red ribbon. His staff of fat pachas, sunburnt by exposure and from wearing the fez, wore coats with thick golden collars standing upright, over which hung their sallow protuberant cheeks, with their cream-coloured trousers and little Arab chargers and high saddles they formed a characteristic group. As Omer Pacha alighted and was welcomed by numerous officers around, and by General de la Marmora, a detachment of the Guards, headed by the band, moved into the ground, and formed in line opposite the house. The Generals and officers from the several regiments gathered in picturesque groups behind, and formed a motley mass of glittering uniforms, changing its hue at every movement created by the arrival of new comers. Presently a more lively commotion was visible amongst the nodding plumes and curvetting chargers, and through the press appeared two men on whom all eyes were turned—these were General Pelissier and General Canrobert. There was a moment of curious intentness on the part of the crowd; for Pelissier wore the cocked hat, fringed with white, peculiar to the Commander-in-Chief; whilst Canrobert, to whom that rank had so short a time before belonged, wore the fringe of black, the badge of a General of Division. The change in the relative position of the men rose to the mind at once, and the noble self-denial of Canrobert, who had preferred a subordinate rank to abandoning the active service of his country, caused him to be greeted with kind glances—a proof of the admiration felt for his conduct. This last sensation had begun to subside when the body was borne to the gun, covered with a pall, and in the folds of the British flag. The Marshal's hat and epaulettes were placed side by side, and General Pelissier crowned the whole with a wreath of yellow *immortelles*. The boom of a gun was heard on the slope, the drums beat a funeral note, and the solemn measure of the Dead March in "Saul" burst upon the ear. As the minute-guns dotted the slopes with puffs of smoke the procession moved from head-quarters, which gradually became deserted of its glittering crowd of men.

The road from Traktir Inn to General Pelissier's quarters was lined with our infantry, which stood in the attitude of mourning, with arms reversed. Thence to Kamiesch, the Zouaves, the Imperial Guards, and troops from various regiments formed a continuous line of brilliant uniforms. The order of the procession seemed to me, as I watched its departure from head quarters, to be this: Six French Gensdarmes led the way, followed by three or four officers of the French and English Staff. Two squadrons of English and two of Piedmontese Lancers headed the line, followed by two batteries of French and English horse artillery. The band of the Chasseurs d'Afrique then advanced in front of two squadrons of the 1st and 4th Regiments. Four squadrons of the 6th and 9th Cuirassiers, also with their band, and one of French Hussars, followed. Then came the artillery of the Imperial Guard and an English battery. All these preceded the remains, which were surrounded by the Allied Generals and a numerous Staff. General Simpson and General de la Marmora rode foremost, near the body—the former taking the left, the latter the right. Behind La Marmora rode Pelissier; and behind General Simpson, Omer Pacha. The French General alone had his *guidon* borne behind him by an aide-de-camp. The French did honour to the dead by presenting arms as the warlike bearer passed by. At intervals the cortège was saluted by the lowering of regimental colours, which drooped in sign of mourning. I cantered off towards the head quarters of General Pelissier, and watched the long line of the glittering procession, as it wound up and down the hills and hollows, rolling its sides like that of a vast serpent, with golden scales. In the distance appeared the blue mountains of Baidar and Baglanecserai, variegated and dappled by shades cast upon their surface by the clouds. The tents and huts of the French head-quarters were relieved in light upon the distance, and the detachments of cavalry from the heavy and light brigades were moving away towards their camp, their duty as guards of honour having ceased. Detachments of the 12th Lancers and 10th Hussars joined the procession on its way. The whole proceeded in order towards Kamiesch, where the ships might be seen showing their clumps of masts, like a forest in the extreme distance. The whole of the road through the French camps were lined, as I have described. The procession passed before Kamiesch without a pause, and arrived at the Bay of Kazatch, where the *Caradoc* lay ready to receive her freight. The ship's boats had taken to the shore their complement of officers and men, and they formed an imposing escort when the body was taken from its place on the funeral gun and transferred to a boat. There was no salute, no funeral oration, no ceremony. The remains of Lord Raglan were put on board thence, in due course, to sail for England. The various actors in the ceremony then dispersed homewards at about eight o'clock in the evening, and the Camps resumed their wonted aspect of toil and activity.

OFFICIAL DESPATCHES.

DESPATCHES FROM GENERAL SIMPSON

War Department, July 17, 1855.

Lord Panmure has received from Lieut.-General Simpson, Commanding her Majesty's Forces in the East, [illegible] list of casualties, which have occurred between the 29th of June and the 1st inst.

OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES, KILLED AND WOUNDED, FROM 29TH JUNE TO THE 1ST JULY, INCLUSIVE.

1st W Guards, 3rd Foot, June 29

1st Battalion Rifle Brigade, June 30

Killed—Private William Rice

Wounded—Private George Fisher.

July 1—Lance Corporal George Heartley.

Wounded.

June 29—3rd Battalion Grenadier Guards. Privates Edward Appleton, severely; Thomas Mason, slightly; [illegible] Privates [illegible] Corporal [illegible] slightly; 23rd Foot: Private [illegible] severely; James Jarvis, slightly; 30th Private [illegible] severely; [illegible] Private [illegible] severely, slightly; 49th Private [illegible] severely; [illegible] Private William [illegible] severely; 50th Privates [illegible] severely; [illegible] Private [illegible] severely; 55th Private James Wren, Lawrence Blackney, severely. 88th Corporal [illegible] Private [illegible] severely, slightly; Private Harry Holland, slightly. 93rd Private [illegible] severely; [illegible] Private [illegible] slightly. Rifle Brigade: Private [illegible] Archer, Elijah Bennett, Joseph Grier, George Day, severely.

June 30th—3rd Foot: Private Thomas Bennett, severely. 19th, Private James Pelton, severely. 23rd Private William Shier. Corporal George Green, 57th Private James Neil, slightly. 47th Private Thomas Williamson, severely. 55th Drummer Richard Lovers, severely. Private Edward Chester, slightly. 57th Private George Dirke, severely. 90th Private [illegible] slightly. 93rd Privates Francis M[illegible], slightly; Charles Forsyth, severely; [illegible] Private Wilson, severely, dangerously; Sergeant Bland, one Warren William Phipps, slightly.

July 1st—14th Foot, Private Michael Kenny, severely. 17th: Private John Fitzgerald, slightly. 39th Private William Healy, severely. 90th, Private Edmund Power, slightly. Lance Corporal [illegible] severely. 93rd: Private Edward [illegible] slightly. 55th: Private Michael Hoare, severely; Michael M'Donald, slightly. Private Robert Richardson, dangerously. 77th Private [illegible] severely, slightly.

FUNERAL OF LORD RAGLAN

War Department, July 18.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Lieutenant-General Simpson, Commanding her Majesty's Forces in the East.

Before Sebastopol, July 7.

My Lord,—I have the honour to acquaint your Lordship that the remains of our late lamented Commander-in-Chief, Field Marshal Lord Raglan, were removed from head-quarters to Kazatch Bay, on Tuesday, the 3rd instant, and placed on board her Majesty's ship *Caradoc*, which departed for England that same evening.

Nothing could be more imposing than the whole line of this melancholy procession. The day was fine, and the appearance of the Allied troops as lengthened as many as could be spared from duty in the trenches, and with safety to these Camps, were collected, and the procession moved from the door of this house exactly at four o'clock p.m., in the following order:

In the court-yard of the house was stationed a guard of honour of one hundred men of the Grenadier Guards, with their drums and rear rank colours; fifty men, with one field officer, one captain, and one subaltern, from the Royal Sappers and Miners, and from each regiment, lined the road from the British to the French head-quarters, a distance of about a mile, a squadron of cavalry was stationed on the right of the line, two batteries of artillery and a squadron of cavalry on the left of it: the infantry were commanded by Major-General Eyre, C.B.

The road from the French head-quarters to Kazatch Bay was lined throughout the whole way by the infantry of the French Imperial Guard, and of the 1st Corps; bands were stationed at intervals and played as the procession passed, and field batteries (French) at intervals, on the high grounds right and left of the road, fired minute guns.

The procession to escort the body was as follows

Two squadrons British Cavalry (12th Lancers).

Two squadrons Piedmontese Light Cavalry.

Four squadrons French Chasseurs d'Afrique (1st and 4th Regiments)

Four squadrons French Cuirassiers (2nd and 9th Regiments).

Two troops French Horse Artillery.

Major Brandling's troop Horse Artillery.

The coffin, covered with a black pall, fringed with white silk, and the union-jack, and surmounted by the late Field Marshal's cocked hat and sword, and a garland of "Immortelles," placed there by General Pelissier, was carried on a platform, fixed upon a 8-pounder gun, drawn by horses of Captain Thomas's troop Royal Horse Artillery.

At the wheels of the gun-carriage rode General Pelissier, Commander-in-Chief of the French Army, his Highness Omer Pacha, Commander-in-Chief of the Ottoman Army, General Della Marmora, Commander-in-Chief of the Sardinian Army, and Lieutenant-General Simpson, Commander-in-Chief of the English Army.

Charger of the late Field-Marshal, led by two mounted orderlies.

Relations and Personal staff of the late Field-Marshal.

Generals and other Officers of the French, Sardinian, and Turkish Armies—a large number of whom attended.

British Commissioners to Foreign Armies

British General Officers and their Staffs

Staff of Head-quarters

One Officer of each Regiment of Cavalry and Infantry, Royal Sappers and Miners, and Land Transport Corps; two from the Naval Brigade, Royal Marines, Medical and Commissariat Staff; and three from the Royal Artillery

Personal escorts of the Allied Commanders-in-Chief

The personal escort of the late Field Marshal (Captain Chetwode's troop of the 8th Hussars).

A field battery of the Royal Artillery

Two squadrons of British cavalry (4th Dragoon Guards).

Detachment of Mounted Staff corps.

The escort was under the command of Lieutenant Colonel Douglas, Royal Horse Artillery.

Two field batteries of the Royal Artillery, stationed on the hill opposite the house, fired a salute of nineteen guns when the process in moved off.

The united bands of the 3rd, 5th, and 63rd Regiments, stationed in the vineyard that surrounds the house, played the "Dead March."

The band of the Sardinian Grenadiers was stationed half way to the French head-quarters, and the band of the 14th Hussars on the left of the line.

The approach to the wharf at Kazatch Bay was lined by detachments of the Royal Marines and sailors.

The body was received on the wharf by Admiral Boat and Rear-Admiral Stewart, C.B., and a large number of officers of the combined fleets. The launch of the British flag-ship, towed by man-of-war boats, conveyed the coffin to the *Caradoc*, the boats of the combined fleets forming an escort; and the troop and battery of the Royal Artillery, included in the escort, formed upon the rising ground above the bay, and fired a salute of nineteen guns as the coffin left the shore.

Everything was well conducted, and no accident occurred.

Thus terminated the last honours that could be paid by his troops to their beloved Commander. His loss to us here is irreparable, and will, I am sure, be equally felt by his country at home. The sympathy of our allies is universal and sincere. His name and memory are all that remain to animate us in the difficulties and dangers through which we may be called.

I have, &c., JAMES SIMPSON,

The Lord Panmure, &c. Lieut.-General, Commanding.

P S I inclose the lists of casualties to the 5th inst.

DESTRUCTION OF FORT SVARTHOLM, WITH THE BARRACKS AND STORES OF LOVISA.

Admiralty, July 16, 1855.

Despatches, of which the following are copies or extracts, have been this day received from Rear-Admiral the Honourable R. S. Dundas, Commander-in-Chief of her Majesty's ships and vessels in the Baltic:—

Duke of Wellington, Tolbooken Lighthouse, July 7, 1855.

The *Magicienne* returned this morning from Lovisa, and I annex a report which I have received from Captain Yelverton, of her Majesty's ship *Arrogant*, who has been again successful in destroying a well-constructed fort at Svartholm, in the entrance of the Bay of Lovisa: but their Lordships will observe, with regret, that, notwithstanding the humane desire of that officer, the town of Lovisa was unfortunately destroyed by fire, which occurred accidentally on the night following the visit of her Majesty's ships. Captain Vansittart informs me that the authorities of the town have themselves admitted and explained the accidental origin of the fire.

I have, &c., Her Majesty's ship *Arrogant*, off Hogland, July 3

SIR,—I have the honour to inform you that I reached Lovisa on the afternoon of the 4th inst., and anchored the vessels close to Fort Svartholm.

The enemy must have had intelligence of our movements, and quitted the fort on our approach; for they had been at work but a few hours before unreeving the barracks and taking away stores. The guns and ammunition had been previously removed.

Svartholm was in good condition, and a work of great strength, entirely commanding the approaches to Lovisa. It has had important additions of late years, car. mount 122 guns, and had accommodation in casemated barracks for about 1000 men, with governor's house and garden, and excellent officers' quarters. I made immediate arrangements for blowing up the fort and completely destroying the barracks. These have since been fully carried out.

On the 5th I made a reconnaissance of the town of Lovisa, in the *Ruby*, accompanied by the boats of the *Arrogant* and *Magicienne*. A strong detachment of Cossacks was under the immediate command of [illegible] but they were dispersed by the fire from the boats, the rockets particularly throwing them into great confusion. On landing at Lovisa I sent for the authorities and explained the object of my visit; some demur was caused by our not having a flag of truce, which they had no right to ask for, as such a guarantee, as the respect due to it had been so grossly violated at Hango. I then proceeded to the barracks and Government stores within the town, which I destroyed, but did not set fire to them, as by doing so the town must have been burnt.

The precautions which I had considered necessary for the safety of her Majesty's ship *Harrier*, which lost a few days later to the destruction of a large amount of shipping, discovered afterwards in another anchorage near Nystad, as detailed in the enclosure to Captain Warden's report of the 3rd instant.

Harrier, off Little Washa, June 24.

SIR,—I have the honour to inform you that the boats under my command have destroyed 47 ships belonging to the enemy, varying from 700 tons to 50 tons, on the nights of the 23rd and 24th inst. On the first night the ships destroyed were one mile from the town of Nystad, and about three miles from the ship, and the second night one mile, or one and a half, or about four miles off with us. On the following morning the steam was got up, and we proceeded to sea, to anchor the prize off Ruskov Lighthouse. At five p.m., however, we steamed towards the land, and anchored at about 7.50 p.m., and at 8 p.m. the boats were again despatched. During the night and following day we discovered 42 ships, the whole of which were either burned or scuttled. I have the greatest pleasure in being able to state that these proceedings were successfully carried out without any casualty.

Owing to the distance we got away from the ship (10 or 11 miles) and the blowing weather, accompanied with rain, that came on during the morning, we were prevented from bringing any vessel out with us. We did not get back to the ship until after six o'clock in the afternoon, the men having been on their oars twenty-two hours. I think, Sir, I am only doing common justice to the men when I state how pleased I was to see the zeal and perseverance with which they worked for so many hours; neither can I omit stating my belief that this arose in a great measure from the good example of the officers, especially the senior Lieutenant, Mr. Annesley, from whom I have ever received the most active assistance.

I have, therefore, in the following nights and one day, destroyed the whole of the Nystad shipping (probably upwards of 20,000 tons), I trust these proceedings will meet with your [illegible]

I have, &c., [illegible] HENRY BRIEN, Commander.

Captain Warden, Senior Officer, her Majesty's ship *Apar*

THE EMPEROR OF RUSSIA AND HIS CADETS.—Letters from St. Petersburg, received by the last mail, the new Emperor journal published at Brussels, contain the following: "He has told me the Emperor has just inspected the Cadets, a corps of young Circassians being amongst them. The Emperor made up and down the rows, saluting the young officers, who replied in return in the most enthusiastic acclamations. The exercises over, the Emperor made the youths form a circle round him, and then expressed to them his satisfaction with their conduct, and his confidence in their devotion. His words were received with frantic applause, and when he was about to leave the circle crowded nearer to his person, and the cry was raised of 'Let your Majesty stay a little while amongst us; we shall not see you much more, for our glory and the glory of our country call us to arms!' Touched by these filial utterances, the Emperor remained more than a quarter of an hour with the young soldiers. On leaving, he saluted with much condescension these young warriors, so ardent to rank themselves amongst the heroes who defend the walls of Sebastopol against the attacks of four Allied Powers."

A SANITARIUM IN THE CRIMEA. It has been a subject of great surprise that the Sanitarium, which was commenced long ago, near the Monastery of St. George, has never been completed; and, judging from present appearances, it will continue to be a subject of surprise for another month or more. Some of the huts have been erected, but they are yet destitute of bedsteads, and all other provisions for the reception of convalescents. The advantages of the position, and convenience for sea-bathing, promised to render this a very valuable addition to the sanitary arrangements of the army. Timely removal to the site from the thickly-covered ground of the camps before Sebastopol, in many instances might have speedily restored health, and obviated the necessity of removal to a distance, and more lengthened periods of absence. But the summer is passing, and it is almost the only season when the sanitarium can be of use to the convalescents for whom it is destined. *Letter from the Camp.*

THE TWELFTH OF JULY IN THE NORTH OF IRELAND. Although the anniversary of the Battle of the Boyne has passed off this year without any party collisions unfortunately to be recorded, by an accident which it is feared will prove fatal. A number of youths in the vicinity of Portadown carried about an effigy of the Pope, at which some persons in the crowd around had been seen throwing with bad temper, and unfortunately, one more awkward than the rest lodged a bullet in the head of the young man who carried the effigy. It is said that his recovery is hopeless. A strong party of constabulary had been sent from Dublin to the north to assist, if necessary, in preserving the peace on the 12th; but their services were not required. The Orangemen in most places celebrated the anniversary by indoor festivities, at which they gave expression to their sentiments without offending their Roman Catholic fellow-subjects.

Mr. Arnaud, the Collector of Customs at Liverpool, who succeeded Mr. Swanson in that office upwards of thirty years ago, has just retired, it is stated, upon the large superannuation allowance of £2300 a year.

NOTES OF THE WEEK.

LORD JOHN RUSSELL'S confirmed habit of suddenly jumping out of office reminds the irreverent of the feat of one of the little spring frogs manufactured for the delectation of the rising generation. The creature is not exactly beautiful, and in its quiescent state is somewhat insignificant; but it is set, and a great force is working within it; and, all in a moment, our frog leaps high in air, turns over and over, and spasmodically elects itself from the circle of spectators. The performance is not very graceful, but it is singular, and a little startling. One is afraid to think how many times during the last four years Lord John has bounded from the Treasury bench, to be reattired there after a short interval. This last effort is decidedly the most desperate thing he has done yet; and people talk very properly and very indignantly about his having lost the confidence of the nation, and being politically ruined. No doubt, in any well-regulated society, the self-likings and the duplicity he has displayed would have excluded him from all further chance of doing mischief again. But—speaking my own individual opinion only—I believe that a statesman takes a great deal more ruining than people imagine. John Bull is the most long-placable person in the world, if not insulted. He has, in good truth, a great deal in him of the shopkeeping instinct with which he has been twitted. You may injure him, cheat him, swindle him, and somehow he makes allowances, accepts reparation, gives credit again, and is forgiving and trustful. Only, don't insult him. He remembers an insult long after he has forgotten an injury. Lord John Manners' not very wise or musical couplet about preferring that arts and commerce should "die" rather than "our old nobility"—Mr. Dundas's hasty nonsense about the "six-pounder"—will be recollected, *nec judicio*, when Lord John Russell's flagrant misconduct will have been condoned. I do not believe that Lord John is ruined, and I am perfectly certain that his Lordship does not believe so himself.

As for the union of the Colonies, which are now being tossed about to suit the convenience of Cabinet-makers at home, they will hardly have got over their first rapturous enthusiasm at learning that the great Viennese Plenipotentiary had condescended to superintend their fortunes, when they will be plunged into regret was at the news that he has thrown them over. Lord Elgin was first tasked of for the berth—Lord Palmerston naturally selecting another Lord but Sir William Molesworth is now "first favourite." This appointment will be an innovation of a grave kind, for Sir William labours under the disadvantage of understanding Colonial questions. Lord Canning speeds departs for India, and, as his predecessors have made themselves reputations by pulling down Infanticide and Suttceism, he may do the like by abolishing torture, a process which is now proved to be used in Madras for collecting the revenue—the screw is put on literally. Dick Turpin is recorded to have conducted an old lady to a seat on the fire, in order to induce her to reveal where her money was placed—*nemo repente fuit Turpinissimus*—but our collectors are stated to imitate, to a certain extent, the expedient of the highwayman. Lord Canning will doubtless interfere. By the way, this is the nobleman about whose having nearly shot the Prince of Wales a *rencard* went the round, some four Christmases back, but the story was made too good to be believed, because it was added that one of the Greys threw himself between the erring marksman and the Lope of England, and received small shot in the small of his back, or so.

Old Mr. Farren has taken his leave of the stage. There was a good deal of real and factitious excitement on the occasion, and a good deal of judicious criticism and undiscriminating eulogy has been printed in connection with the affair. For the due instruction of posterity, it may be as well to note what I conceive to be the real historical position of the extinct star. Mr. Farren was an artist whose elaborate and patient attention to the minutest details of his art enabled him to give his personations so exquisite a finish that the spectator himself was beguiled into following him, with kindred disregard to the general execution. In intellectual power Mr. Farren was deficient, and his comprehension of a character was attained *paullo post tum*, and by a very slow process of absorption of ideas; nor did his conception tend to the relative bearing and importance of his own part, for less of its value as a type in art. At the same time he had very distinct conception of the [illegible] and [illegible] his own personations into the strongest possible light, and of removing any thing likely to interfere with such complete illustration, and his notions on this subject were not unfrequently at variance with those of an author. Many anecdotes will be preserved by those who think such things worth preserving, touching the actor's complacent self assertion, which was too genuine, and founded on too sure a faith, to be irritating to those around him. It is recorded that during a Drury Lane season, when a leading tragedian was playing three times a week, and Mr Farren in the considering farce, every night, he entered the green-room, and observed to the tragedian himself (one of whose sights it was), "There's a splendid house to-night—last night we were quite empty. It's very strange, for I played in the same piece last night as to-night." The actor, self-appropriated, is known to all play-lovers. The farewell at the Haymarket crowded the house, and during the parting business Mr. Harley's emotions fairly threw him into Mr. Farren's arms, whereby all true and sensitive hearts must have been touched.

The Lord Mayor, Conservator of the River Thames, has been bestirring himself in regard to the bestirred river, but unhappily finds that he has little or no power to deal with the people who possess it. The City Solicitor suggests a short Act of Parliament why does he stop at suggestion—why was one not drafted in the small hours, and a member instructed to bring it in the next day? A supervision bill, or an indemnity bill, or anything that anybody is really interested about, can be rattled through in no time; and, in the present state of the popular mind, the House would give the Lord Mayor power to gibbet the Brentford Canal directors along the river, as used to be done with malefactors. The Lord Mayor deserves much credit for doing his utmost, but it is the business of his legal advisers to respond him. The Rotherhithe tragedy has given an awful warning, that in the present state of the river an epidemic in the course of a few weeks is as certain as the returning of the tide," and likely to be as fatal as that hour so sung by [illegible] and as Shakspeare remembered to have heard it was.

The letters of Mr. William Russell, the *Times* correspondent in the Crimea, are about to appear in a single volume, and unless printed so closely as to be unreadable, according to the unrighteous practice of too many publishers, will be the handbook of the war. Those who are interested in the welfare of a man who has done so much for us all will be glad to know that Mr. Russell is enjoying a respite at Therapia, in the society of a portion of his family. And [illegible] minds me that he was nearly deprived of this latter solace through the blundering carelessness of the electric telegraph people, who obstinately misread the perfectly legible and accurate address of the message of summons, and of course could not find the direction invented by their stupidity. A passage was all but lost thus. It is a matter of constant complaint that the persons who are appointed to manage the telegraph are, generally speaking, neither in intellect nor in manners, those whom the directors should select, if they desire the instrument to be generally used. The knowledge that a confidential or peculiar message is to be scanned, criticised, and probably blundered by a non-intelligent and possibly impertinent clerk frequently deters ladies and gentlemen from the Telegraph office, to which they would resort as a matter of course, if served respectfully by a quick-witted official. Stock-jobbers and horse-racers find nothing to complain of, but the wire should be a constant means of social intercourse, as in America.

I heard a story of Sir Charles Napier which, as "infernal machines" engage public attention just now, is not *mal-apropos*. When we were trying to take Boulogne in the last war Sir Charles was a middy. A boat was sent from the ship in which he served to affix one of the "infernals," then newly invented, to the side of a French vessel, and this boat was commanded by young Napier. A dark night was, of course, selected, and the boat duly pulled to the ship which had been pointed out as the intended victim. The gallant adventurers got close under her, and were screwing on the fatal invention, which was to blow her side in, and send her to the bottom, when they were hailed, in the plainest English, and with sundry adjurations, for an explanation of "what they were doing there," and they discovered that they had mistaken their course, and were making earnest preparations for annihilating one of his Majesty's own ships. After this lucky escape they made another attempt. Now, these "infernals" were worked by clockwork, which was wound up, and set going, and after a certain regulated time fired the fuse. The terrible machine was put into the boat, and the party struck off for the French vessel. In mid course one of the sailors addressed Mr. Napier. "Sir, your Honour, the beggar ticks." "Eh, what's that?" replied the young Commander. "Beggar ticks, Sir," said Jack, pulling away with the utmost composure. Napier rushed from his seat and listened, and found that by some means the clockwork had been set going, and that it might be five minutes or five seconds before the whole party, boat and all, went to pieces. So the machine was incontinently pitched overboard, and I believe the attempt was not renewed.

THE VIENNA CONFERENCES.

THE despatches recently laid before Parliament of what passed between the British Ministers and the Austrian Government, relative to Count Buol's proposal, consist of twenty-three documents, dating from the 3rd of April to the 18th of June, 1855. The first is a despatch from Lord Clarendon to Lord J. Russell, with reference to a communication from Count Buol, upon the subject of the knotty "third point." The Count observes that Russia having agreed in general terms to the proposal that her preponderance in the Black Sea should cease, the best mode of attaining the end in view would be by the limitation of her naval force in that sea; but he thought Russia might oppose such a solution of the question on the ground that her dignity and national honour would be affected. He desired to know, therefore, whether the belligerent Power would consider it necessary to continue the war in the event of such a refusal? With a view to obtain a practical solution of the question Count Buol thought recourse must be had to the system of counterpoise. Russia and Turkey each having an equal number of ships of war, Turkey having a right to call in the ships of friendly Powers when she found her self menaced. Lord Clarendon considered this system inadequate and impracticable. It would secure, in fact, the preponderance of Russia whose ships would always be better armed, manned, and conditioned than those of Turkey; and the proposal that other Powers should have a small number of ships in the Black Sea, to protect the navigation of the Danube, would be useless and inconvenient. As for the right given to Turkey of calling in foreign aid, Russia's naval force being unlimited she would always be in danger; and England and France to be on a footing of equality, would have to send a force as large as they now maintained there. On the other hand, Russia, instead of menacing Turkey, might establish the most friendly relation with her, might lull her into false security, and within three days after she had picked a quarrel with Turkey a Russian army might be in possession of Constantinople and could in fortifying the Bosphorus and the Dardanelles. And while the navies of England and France were upon a peace establishment a Russian fleet of 27 or 30 sail of the line might suddenly issue from the Baltic and sweep the British seas. Europe would then learn, but too late, the value of Turkey's defensive right which it was proposed to confer on Turkey of calling in her allies at the approach of danger. To a peace upon such terms the English Government could be no party.

In a second letter Lord Clarendon submits to Lord J. Russell two propositions, which were agreed to at a meeting in London, at which M. Drouyn de Lhuys was present. The first was a system of neutralisation by which it was provided that Russia and Turkey should have no ships of war in the Black Sea, except some small vessels for the purpose of repairs; that the ports of both Powers should be entirely closed against foreign Powers being allowed to have Consuls there. A second proposal, for limiting the power of Russia, provided that neither Power should maintain in the Black Sea and Sea of Azoff more than four sail of the line, four frigates, with a proportionate number of vessels for sea guard and unarmed transports, that England, France, and Austria should also be permitted to maintain that number of vessels, and that the contracting Powers should have Consuls at all the ports. Lord John having explained the two proposals to Austria, stating that England and France would prefer the first, Count Buol said Austria would also be glad to see it accepted, but he did not think it would go down at St. Petersburg. Russia would not let herself be disarmed in the Black Sea, while Turkey was armed in the Baltic. Lord J. [illegible] endeavoured to show Count Buol that the project of counterpoise was ineffectual, humiliating to Turkey, and unsafe for Europe, which would have to be continually prepared for war. He said the people of England considered that Austria was called upon to take a leading part in the defence of Turkey; that if now, after the treaty of the 2nd of December, she stopped her engagements by relying solely on the letter of that treaty, the nation against Austria in England would be very great; that it would be impossible to revive confidence, or to fasten upon the parts of a cable which had failed to hold. It was the decisive moment for an alliance which, if kept together, would accomplish a great object. This appeal did not appear greatly to affect the Count, who said Austria could no think of engaging in hostilities "for two ships more or less." Beside the plan of reducing the Russian power in the Black Sea was an idea, thought, adopted by Austria mainly to please her allies, and she was not prepared to go to war without a case of proved necessity. He positively declined to make Russia's refusal to either of the plans a *casus belli*. With regard to this decision Lord J. Russell says:—

[illegible] receive the policy of [illegible] otherwise [illegible] because Russia, after so many sacrifices of her pride and military [illegible] in the Principalities to peace Austria would open a [illegible] new war, and thereby secure the [illegible] so much desired, [illegible] sacrifices they have made, and are making, it is due to the [illegible] should not refuse from the Black Sea without [illegible] peace a secure special security against hostile [illegible] Russia [illegible] refusal in either case to limit her naval force in the Black Sea on the ground of her dignity and her greatness, or she must consent to make her limitation effectual for its object. In either case our position is good one. If this is rejected, we break off [illegible] a fresh reference to St. Petersburg is asked we intend to say that we can only consent to that reference on condition that the answer must be a decided yes or no.

On the 16th of April Lord J. Russell intimates that he is desirous of proposing the following plan, to which he says the French Minister is favourable:—

1. As the existence of an aggressive Russian fleet in the Black Sea would be an flagrant contradiction with the assurance so often given by Russia that she does not wish to impair the integrity of the Ottoman empire, [illegible]

(2.) That, with the exceptions stated in the following articles, the rules establishing the Dardanelles and Bosphorus, recognised by the act of 1841, shall be in force so long as the Russian naval force in the Black Sea shall not exceed four sail of the line, four frigates, and six smaller vessels.

(3.) That while the said rule limits two sail of the line, two frigates, and three smaller vessels of any Power which has no establishment in the Black Sea, and which is in amity with the Sultan may enter the Black Sea upon giving four days' notice to the Ottoman Government.

(4.) Upon any increase of the Russian naval forces beyond the number specified in Article 1, or on the existence of a larger Russian force being ascertained, a larger number of ships of war of the allies of the Sultan may pass through the straits into the Black Sea, in conformity with the desires of the Sultan, and in the proportions to be regulated from time to time by agreement with the Ottoman Porte: such increase not to form, at any time, a right matter subject of remonstrance on the part of Russia.

(5.) At no time shall any ships of foreign nations, beyond the small ships belonging to the Embassies admitted hitherto, anchor in the Golden Horn, nor shall any number of line-of-battle ships belonging to foreign Powers not having establishments in the Black Sea exceeding four pass at one time before the capital in their passage from the Dardanelles.

To which Lord Clarendon replied, April 18th:—

We think that the limitation of the Russian fleet should be absolute, and that it would be made too conditional by the plan you wish to propose. We must avoid as much as possible the system of counterpoise, the objections to which you have explained fully to the Austrian Government.

After a proposal by which the Russian fleet was to be limited to the same number as it had been before the war (!), which was, of course, opposed by Lord J. Russell and M. Drouyn de Lhuys, Count Buol, on the 18th of April, laid before them another "general understanding," to the effect that in the event of the failure of the London plan, and also of a proposal that Russia and Turkey should maintain each a force no larger than should remain to Russia at the end of the war, a basis of peace should be sought in the following conditions:—

A general engagement to respect the integrity of the Turkish empire: a provision that the closing of the Dardanelles and Bosphorus should continue to be the rule: consuls in the Russian ports: a treaty with Austria that, if Russia shall increase her naval force in the Black Sea beyond the number maintained by her in 1853, it shall be a *casus belli* for the contracting Powers.

Lord John, with reference to the last point, says:—

If this third system can be made an ultimatum by Austria, it ought to be accepted by the Western Powers. In saying this, I may appear to contradict my former opinions. But, in fact, I do not retract those opinions. The system of limitation I believe to be far better than that of counterpoise; but the question is between an imperfect security for Turkey and for Europe, and the continuance of the war. Should the Government of her Majesty, in concert with that of France, be of opinion that such a peace can be accepted, they will instruct Lord Westmoreland accordingly. If not, I hope to be allowed to be heard personally before a final decision is made.

In an interview with Count Colloredo, relative to this proposal, Lord Clarendon said:—

Her Majesty's Government could not attach much practical value to the engagement of Austria to make, at some future period, a *casus belli* of the increase of the Russian fleet beyond a given amount. She had already declared that it was beneath her dignity to discuss numbers, and she could not admit that the question of peace or war should turn upon eight or ten ships of the line. If such were the case now, when circumstances would enable Austria to go to war with advantage, what prospect would there be of her doing so some years hence, under circumstances likely to be far less favourable?

Her Majesty's Government were desirous to co-operate with Austria in obtaining peace, but, as the proposals were systematically rejected by the Russian Plenipotentiaries, little doubt could exist that Russia had not abandoned her designs against Turkey; and that, unless means were taken for curtailing her aggressive power, those designs would sooner or later be executed. It was time, therefore, for England and France to invite Austria to concert with them the measures for giving immediate effect to the Treaty of December 2nd.

At this period of the negotiations the French and English Ambassadors left Vienna, and although Count Buol forwarded another proposal for consideration, varying, however, little or nothing from the schemes previously rejected by Russia, Lord Clarendon said the Government could see no advantage in the continuance of the Conferences, at the same time expressing his regret to find Count Buol of opinion that, by making a proposal which England and France were unable to agree to, Austria had complied with the engagements of the Treaty of December 2nd.

Count Buol replies in a very wordy document, containing nothing new; and the Earl of Clarendon, in a despatch to the Earl of Westmoreland, dated June 3rd, expresses his regret that proposals to which the English Government could not possibly agree had been renewed by Austria. In a despatch, dated June 12th, from Lord Clarendon to the Earl of Westmoreland, after expressing his wish to avoid an irritating discussion upon the subject, his Lordship makes the following plain statement with reference to the conduct of Austria:—

Austria says Lord Clarendon has bound herself to [illegible] England and France for giving effect to the Treaty of the 2nd of December, peace was not made on certain [illegible] Count Buol [illegible] Powers named in that treaty, and the bases have been rejected by Russia; but the proposals of Austria would not have given effect to the bases, and would not have led to the preponderance of Russia in the Black Sea. England and France were, therefore, compelled to decline adhering to a proposition which, although it may be called an ultimatum, cannot be said to have involved immediate declaration of war, as there can be no doubt that the proposal would have been gladly accepted by Russia.

In a circular despatch, dated June 19th, addressed to her Majesty's Representatives at Foreign Courts, Lord Clarendon winds up the affair. In that document he refers to Count Nesselrode's circular, in which he tried to show that Russia was ready to accept reasonable conditions had they been offered. His Lordship in that despatch says:—

The interests of Europe required some valid security that Russia should no longer possess that overwhelming force and political influence in the Principalities which her preponderance in the Black Sea has heretofore enabled her to exercise, and that she should not, by a constant interference, especially in that sea, have the means of supporting by her fleet the menaces and advances of her army, and of thus striking a mortal blow at the heart of that empire of which the Principalities are only the dependent extremities.

The refusal of Russia to consent to any measures which would effectually put an end to her preponderance in the Black Sea was a warning which Europe could not with safety disregard. It plainly showed that Russia was not prepared to lay aside her long-cherished views of aggression on Turkey. As for the talk about national honour—

The dignity of Russia cannot require that she should keep up at time of peace, and on the immediate threshold of her weaker neighbour, a force wholly unnecessary for purposes of self-defence, but enabling her at the shortest notice to subvert the independence of that neighbour, and to change the territorial distribution of Europe. Yet such is the position which Russia has maintained in the Black Sea, and she has even now plainly avowed her determination not to renounce it.

Russia had alleged that the preponderance which she wishes to maintain in the Black Sea was essential for the security of the Turkish Empire against the Western Powers. There was no foundation for this. It was Russia alone that Turkey had to fear. The present war had been undertaken to provide securities against those ambitious designs of Russia which menaced the safety of Turkey and the future repose of Europe; and, in short, to quote the words of a recent Russian proclamation, to prevent, as far as Turkey is concerned, the accomplishment of the wills and the views of Peter, of Catherine, of Alexander, and of Nicholas.

Two schemes had been proposed by Russia, both of them were null. One of them was to open the Straits to all nations, Russia included—

[illegible] the effect of the scheme would have been, that Constantinople would at all times have been exposed to all the dangers which might have arisen from the sudden appearance before that city of an overwhelming Russian armament, while the tranquility of the Mediterranean, and all the great interests in that sea, would have been liable to disturbance by the action of a powerful Russian fleet sallying forth at any moment from the Black Sea.

To guard against this double danger, the Governments of England and France would have been compelled to maintain in the Mediterranean war establishments in time of peace, and permanently to station there armaments at a great distance from their arsenals and resources; so that a peace concluded on such conditions would have been nothing more than an armed truce, divested of the security which is the essence of peace, and unaccompanied by that cessation of expenditure which ought to follow the termination of a war.

The other plan was to close the Straits, and allow Russia to maintain an unlimited naval force in the Black Sea, which would have been attended with the same evils.

BURIAL-PLACE OF FRENCH SEAMEN.

WE have to thank Lieut. Foster, of the Royal Marine Artillery, for the accompanying Sketch of the burial-place of the French seamen, of his Imperial Majesty's ship *Napoléon*, who were killed in the action of September 17, 1854, at the head of Kamiesh Bay. The monument raised over the poor fellows is simply to bear the names of the men, a few of which were already cut when the Sketch was made. The tents in the foreground are for the men appointed to guard the stores on this side of the harbour. On the other side of the tents the ground is low and marshy for a short distance. The house beyond the marsh are the French grain stores; and immediately before these houses is a large pile of grain, covered with a tarpaulin. Upon the rising ground in the distance were encamped some of the French cavalry and a few Horse Artillery. To the right of this encampment lies the town of Kamiesh.

THE GRAVE OF CAPTAIN CHRISTIE.

CAPTAIN CHRISTIE died on the 2nd of May, at Kayach Bay, and was buried in the Officers' Cemetery on the shore on the 4th. A steamer came to the Officers' Cemetery on the shore on the 4th. A steamer came buried in the Officers' Cemetery on the shore on the 4th. A steamer came buried in the Officers' Cemetery on the shore on the 4th. A steamer came buried in

BURIAL-GROUND OF FRENCH SEAMEN AT KAMIESCH BAY.—(SEE PRECEDING PAGE.)

tervals on the walls. There are three more graves; but Christie's is distinguished by the cairn of stones placed over it, with wild juniper plants at the head and feet, and wild flowers.

RUSSIAN SUBMARINE INFERNAL MACHINES.

WE have already somewhat minutely described these formidable engines of war, the destructive power of which, however, is, happily for mankind, not so close a certainty as is generally imagined. We now engrave the scene on board the *Exmouth*, at the moment of the explosion of one of these Machines, while it was being examined by Admiral Seymour, and some of the officers. The seaman who held the machine miraculously escaped unhurt. Admiral Seymour, it was at first feared, would lose his sight through the catastrophe; but we are happy to learn by a late mail that the gallant Admiral's eyes are safe. Besides the Admiral, Captain Lewis, of the Royal Marines, Lieut. Piers, and a Cadet, with eight seamen, were injured by the explosion. It appears that Admiral Seymour was trying the spring of the machine with his fingers, and describing the *modus operandi* of the explosion, when the machine burst, injuring the Admiral severely, and throwing the seaman who held it from the poop on to the deck of the ship, but without seriously injuring him. The other persons who were standing around were also thrown down. The clothes of one were scorched off, and both sides of the deck were much blackened; one piece of the case of the machine struck half-way up the mainmast; and the poop, rail, and stanchions were much cut up.

We have illustrated one of these Infernal Machines in all its details: it is 20½ inches long, and has a partition around it, which gives a floating buoyancy to the depth required:—

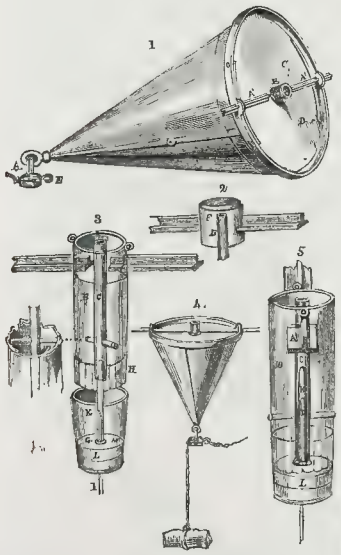

Fig. 1.—THE INFERNAL MACHINE, SIDE AND END
Fig. 2.—CAP OR COVER.
Fig. 3.—TUBE DISSECTED
Fig. 4.—THE MACHINE AS IT FLOATS THREE FEET BELOW THE SURFACE OF THE WATER.
Fig. 5.—TUBE PUT TOGETHER

A—A piece of leather, which doubles round a small iron bar inside of the block, and fastens to a thimble fixed to the end of the machine.
A/—A very slight touch on this thimble will cause explosion.
B—Large tube.
C—Brass tube or thimble fitting over the zinc tube below; it is suspended by a smaller cross-piece riveted to the side of the large tube, so that a very delicate touch would move it.
D—A delicate copper spring, which keeps the thimble or striker out.
E—The hook is supposed to be for the purpose of tying others to.
F—A cap or cover, which fits into the cylinder or tube B, and prevents explosion by not allowing the thimble to touch the tube B.
G—A small zinc band or hoop.
H—Flannel to fit into tube below
I—Glass tube among the combustibles.
K—A zinc tube with a solid conical top. The tube itself being hollow, and fitting over the glass tube.
L—Solid head, the top of which is covered with chlorate of potash, below which all is watertight.
M—The outside of this greased to make it watertight, and to fit on the lead.

GRAVE OF CAPT. CHRISTIE, OFFICERS' CEMETERY, BALACLAVA.

EXPLOSION OF A RUSSIAN INFERNAL MACHINE ON BOARD THE "EXMOUTH."

SKETCHES OF RUSSIAN LIFE.

ST. PETERSBURG.—QUAY ON THE VASSILI OSTROFF.—QVASS AND FRUIT SELLERS.

QVASS AND FRUIT SELLERS IN ST. PETERSBURG.

TOWARDS the end of April, or the beginning of May, according as the winter has been more or less severe, the guns from the fortress announce to the inhabitants of St. Petersburg that the ice has burst its bonds, and that the Neva, the glorious Neva, is free. Then the Commandant of the fortress comes over in his barge, steps upon shore welcomed by a delighted crowd, in which generals, princes, and moujiks are all jostled together, and proceeds to the Winter Palace, where he presents to the Emperor a cup of its delicious water; and in return receives a handsome present for his welcome draught, a draught which gives life and delight to all. That splendid river—which a few days before was one vast sheet of ice; over which sledges, with their fur-coated occupants, were swiftly hurrying—is now covered with gaily-painted barges, filled with joyous souls singing and rejoicing that summer, whose delights have been talked about for the last eight months has at last arrived. The moujiks rush about in a state or apparent delirium, congratulating and kissing each other even at the corners of the streets. "You may talk of your southern summers," says the boatman, as he plies his oars, "but surely nowhere is the sun so bright and warm, or the clouds so gorgeous, as those we now rejoice in." Itinerant moujiks, who all the winter through have been selling hot tea to the lavotschiks (hackney drivers), soldiers, and boteshniks (policemen), now drive a thriving trade by selling qvass, a compound of beer and molasses. Your moujik is at all times a thirsty soul, but this weather more thirsty than ever. The qvass merchant, with a huge glass jar or bottle, with a tap to it, a tumbler or two carried in his apron pocket, and a huge towel—it must be confessed, not always of the cleanest—hung over his arm for the purpose of wiping the glasses after each customer, drives a rival trade with the fruit merchant, who likewise is in great request for such fruits as are in season—chiefly apples and a kind of cranberry peculiar to Russia. They both vend ropes of cringles, or round biscuit, some powdered with sugar, and others with salt, and all strung together for convenience of carrying on the arm. These street merchants are generally very chatty and diverting, full of all the scandal of the neighbourhood. They not only sing away their own cares, but the passer-by is often taught a lesson of contentment at witnessing the kind feeling they display in frequently giving away a glass of qvass, or tchi (tea) to those who cannot pay.

A FAMILY OF RUSSIAN PEASANTS, OR MOUJIKS.

THE Sketch represents a group of Russian Peasants, or Moujiks, in their holiday attire. The old man (father, no doubt, of the three young girls) is a Dvornik, or lodge-keeper to one of the country villas; his business is to guard the house throughout the winter, during the absence of the family, and is not very burdensome. He has merely to attend to his own comfort and that of his dogs—of which he keeps several, as much for his

FETE COSTUME OF RUSSIAN PEASANTS, IN THE ENVIRONS OF ST. PETERSBURG.

own companionship as for the protection of his master's property. His costume is extremely picturesque and becoming, though very simple, consisting merely of striped linen or black velvet breeches, very full, and tucked into high boots, a red or any bright-coloured cotton shirt, fastened round the waist by a narrow girdle. A long blue cloth coat, reaching to the heels, is the height of his ambition for summer out-of door wear. In winter every Dvornik wears a sheepskin coat and hat, which is also very picturesque. All the men wear moustaches, cultivate long beards, and possess teeth that many a Court beauty might envy.

The women's attire is more showy and gaudy, consisting of a bright crimson, yellow, or green brocaded silk petticoat, a white linen chemise with full sleeves, and a kind of strap or braces across the shoulders of the same material as the petticoat; the *pocoiok*, or hood-dress, is composed of satin or velvet, and is gaily embroidered with gold or pearl beads; huge necklaces of amber, pearl, or some other showy beads, and immense earrings. The nurses in all wealthy houses—always chosen from the moujik class—are half smothered by the quantity of necklaces they wear, as the bright-coloured ones are thought to be pleasing to their infant charges When they go out, a pelisse of some bright-coloured cloth or damask trimmed with fur, completes their costume; and certainly the most showy and attractive people in the imperial city are the nurses and their handsome charges of St. Peter-burg on a winter's afternoon are the wet-nurses of the imperial family and those of the nobility. The female peasantry never become servants in any other capacity. Other domestic services are performed by French and German women.

The Russian peasant goes to work cheerfully and contentedly after a meagre breakfast of black bread and an onion, though certainly no one works harder than he does. His dinner and supper is about the same as his breakfast, perhaps a little enlivening for a change, on a holiday or Fête Day he thoroughly enjoys himself: in fact during the Carnival at Christmas and Easter he makes a complete toil of pleasure At such times on the Admiralty Plain there is held a fair. Booths for dramatic performances are erected; *Montagnes Russes*, swings, and merry-go-rounds, are among the chief amusements; and it certainly is a ludicrous sight to see a number of grey-bearded men, old women (who look as if they had risen from their graves, stalwart young men, and gaily dressed girls, all crowded together in carriages, or in boats, gravely going round by the hour together At such times the consumption of hard eggs, nuts, and vodki (brandy), is surprising, and if the latter is a little too strong for them, it must certainly be owned that a Russian, when drunk, is not only a harmless, but a very amusing person.

The Imperial family, the Court, and all the wealthier class, drive round the principal outside the booths, and seem to derive as much amusement from the strange doings outside them, as the visitors do in gazing at the Royalties, as the people themselves They are treated in a respectful way and this mixing up of the nobles and peasants seems perfectly natural to all.

THE POISONOUS STATE OF THE RIVER THAMES.

On Monday last the City Solicitor, having been sent for by the Lord Mayor, waited upon his Lordship, at the Mansion-house, upon the subject of the horrible condition in which the river Thames (of which his Lordship is Conservator) is stated to be by authorities whose judgment cannot be called in question.

If a Lord Mayor and Aldermen have sent for you, Mr. Solicitor, to request your assistance in a matter of paramount importance to the community. My attention has been called by several private communications, as well as by numerous paragraphs in the press, to the present state of the river Thames, and it is be in my power to do anything towards the correction of the very serious evil which is said to exist, I wish it to be known that it is my determination to take the proper steps to effect that object. I feel it to be my duty to call upon the City Solicitor, and the other principal officers of the Corporation, to take immediate measures to ascertain to what cause the exceedingly offensive condition of the river is attributable, and to make me acquainted with what to them appears to be the most expeditious and effectual means of diminishing the virulence and danger of the nuisance. I am desirous that no such measure of relief as shall be lost, and that, with the view to check the evil at once, all other matters in which the principal officers of the Corporation may be at present engaged stand over until the present inquiry has been disposed of. His Lordship was understood most particularly to allude to a statement made in the public press, to the effect that the proprietors of the Brent Canal had greatly increased the pollution of the river by throwing the mud and refuse of that canal into it

The City Solicitor said, the Lord Mayor's officers should immediately act upon his Lordship's directions, and, if it turned out to be as stated, that the proprietors of the Brent Canal had thrown the mud and refuse of the canal into the Thames, and that the present condition of the river was at all attributable to that cause, proceedings should be immediately taken to repress the evil and punish the offenders. No time should be lost in the present case Some doubt might exist whether the Archives of the City magistrates a summary jurisdiction could be appealable to the case in that part of the river. Brentford was within the conservancy jurisdiction of the Lord Mayor and Aldermen, but the process of that Court was dilatory and the remedy distant, and unless the existing Acts were sufficient to meet such a case by speedy redress, Parliament during the present Session might bring in a bill for that purpose. He (the City Solicitor) was aware of the cause of the fetid smell emitted from the river at the present time must be attributed to more extensive and more permanent causes than the clearing of the canal The river was not legalized now for the population of above 2,000,000. For centuries, while the metropolis was not one-half of its present size, and up to the year 1847, a system of cesspool drainage was in use throughout the metropolis, and the inhabitants were positively prohibited from connecting them with the sewers that had their outfalls into the Thames; but by recent Acts of Parliament, for sanitary reasons, cesspool drainage had been prohibited, and the inhabitants were compellable by law to pass their house refuse by means of the sewers into the Thames. At the time those Acts were passed Parliament had it in contemplation to enforce the construction of intercepting sewers, to convey the house drainage of both sides of the river into the Thames, sufficiently low down to prevent the tide from bringing back any portion of the polluted water. The proper order of proceeding had been inverted; the intercepting sewers were not even yet commenced, while, for the last three or four years, the pollution of the Thames water had been increasing.

It is expected that the City solicitor will speedily make a report upon the subject which has, especially within the last few weeks, become one of alarming interest with all who believe that pure air and pure water are essential to health.

On Tuesday Mr. Leach, the engineer, reported to the Lord Mayor the state of the river. One of his main causes is that the house sewerage of this vast metropolis is now drained into the Thames; formerly it remained in cesspools till it was removed at night soil. The extraordinary drought during the last eighteen months has caused an accumulation of all such matters of nuisance in the sewers, which the late rains and flushed into the river. Scarcely any winter passed without flooding the river, and thus these accumulations were taken down by the streams; a season of the year when no ill effects were experienced. Last winter there were no floods; and the nuisances ejected from the sewers, which had accumulated on the shores and bed of the river, were exposed to the heat of the summer sun, and subjected to the action of the sun, from which the stenches complained of were evolved. No power rests in the City until notice to provide a remedy for the evil.

THE DARVEL CALCULATING GIRL. The *Ayr Advertiser* has the account of a recent public examination at Beith of the little girl whose wonderful powers of calculation have attracted so much notice. The gentleman in charge of the child silenced any one present who proposed questions to her. Among the questions limited were:—How many times does a clock strike in the month of June? 4680 was the prompt reply; in a year? 56,940; in a [illegible] years? 4,270,800. She was now asked the value of 703,584 barrels of flour at 28s. 6d. per yard, and in 25 seconds she gave the answer, £1004 19s. 6d. Being requested to show the *modus operandi*, she began about with 313 times 3 makes 939—4 in 939, 234 and 9 over; and so of all the other denominations. She was then asked to cube 196 and give the amount of that product divided by 19. The product, 7529,536, and the quotient, 396,448.2263 11-19, were both correctly given. In the performance of this last heavy question her teacher begged in the child was to give her the square upon the board to assist her memory. She did not avail herself of it.

GLASGOW DRUNKEN STATISTICS.—At a meeting of the Glasgow Town-council the other day, Dr. M'Intyre asked why the returns on this subject would be had moved for some months ago, had not been produced. The Lord Provost said he had been told they could not produce those returns satisfactory either to themselves or to the citizens; and, after consulting with Councillors Smart, Dr. Strang, and others, he had thought it better not to have them, without some strong order—perhaps from Government. They would not give to public imperfect returns, calculated to bring the city into disgrace. Dr. M'Intyre said his object in moving for those returns was to test the working of Lord Seymour's Act, and he would not have attained the object of lessening drunkenness, for which it had been ostensibly intended. Had he got the returns, he had intended to put that he would have been able to show that this till had not only failed to do what it professed to do, but that, if a committee of the council were appointed to inquire into the working of the bill, it would find it at had given rise to very serious evils. One evil it had given was a large increase of drunkenness in private houses

At the Wool Fair dinner at Aylesbury, last week, Captain Hamilton intimated his intention of becoming a candidate for the representation of Aylesbury whenever a vacancy may occur

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

The Earl of ALBEMARLE, in presenting a petition from Madras, praying for a redress of grievances, and that the Government of the East Indies might be transferred to the Crown, commented at some length on the subject matter of the petition.

Earl GRANVILLE, in reply, explained some of the allegations. With respect to others, he said that they referred to matters well worthy the attention of Government, and he was sure that they would meet with the earnest consideration of his noble friend the new Governor-General.

HOUSE OF COMMONS. MONDAY.

Lord J. Russell entered the House about half-past four, and took his seat on the third Ministerial bench, next to Sir George Strickland.

NEWSPAPER POSTAGE.

In answer to Sir S. Northcote, Mr. WILSON explained the changes that had taken place in the postage of newspapers to the Colonies and foreign countries, the general effect of which was that the postage was higher now than it was before the passing of the recent Act.

THE HANGO PRISONERS.

In answer to Captain Pechell, Sir C. Wood said application had been made for the release of the prisoners at Hango, but no answer had been received at the departure of the mails. He understood, however, that the prisoners were favourably treated.

A SUBSIDY TO AUSTRIA.

Captain KNOX wished to ask if it was ever intended, in the course of the late negotiations, to grant a subsidy to the Austrian Government?

Lord J. RUSSELL said, he would answer that question when Government was on proceeding to the orders of the day,

LORD JOHN RUSSEL'S EXPLANATIONS

Lord J. RUSSELL rose, and stated to the House that on Thursday evening he intimated to his noble friend his wish to retire from the service of the Crown; and as her Majesty had accepted his resignation, he now only held office in consequence of certain circumstances with which he had lately been connected had been so perverted by the press, that he thought it right to give the House some account of them. It was not true that he had pressed to support the Austrian proposition, but it was true that he had promised to lay them before the Cabinet in the most favourable light. The opinion of the Cabinet was concurred in by M. Drouyn de Lhuys and the Turkish Foreign Minister He returned to London on the 29th of April, and a Cabinet Council was held on the 30th The propositions were not adopted by the Government, but circumstances arose in the course of these discussions which made it improper, in his mind, to urge those propositions further; and at the end of that week there was an unanimous agreement in the Cabinet to reject them. With respect to the Austrian propositions, he said that he agreed to them because he conceived Turkey to be in such imminent peril, and Russia to be so strong, that it was necessary to unite all the great Powers of Europe against her. This could only be done by accepting the Austrian terms The Emperor of Austria had proposed that, if those terms were accepted, he would enter into a defensive alliance with England and France for the security of Turkey; and such an alliance, he conceived, would be a greater security for Turkey than an entente England and France alone might secure. Lord Clarendon's despatch, rejecting those terms, was written, as he said, with his full concurrence, on the 8th of May. On the 9th Lord Westmoreland informed him that Austria made another proposition, which, if not accepted, she would break up the Conference. As it was certain that Russia would not accept that proposition, any more than the Allies, Lord Westmoreland was instructed to put an end to the Conferences This was his justification for remaining in the Cabinet after the proposals which he brought over were rejected. He remained in it because he thought

Committee, after solemnly inquiring into all the circumstances, had come to the conclusion that the whole Cabinet was included in their condemnation. He was now about to call upon the House to vindicate that Committee, and to say with the members of it that the whole Cabinet were guilty in the matters alluded to

THE ABERDEEN CABINET.

"Sir, I divide the Aberdeen Cabinet into three various and separate parts: first, those who were excluded by the resolution of this House—namely, Lord Aberdeen and the Duke of Newcastle; then I include in the second division what may be considered the important members of the Cabinet I mean the noble Lord at the head of the present Administration, the noble Lord the member for London, the right hon. member for Carlisle, the ex Chancellor of the Exchequer, and the right hon. member for Wilts; and as for the third part, containing the remainder of the Cabinet, I consider them as a mere herd (loud laughter), that followed where others led, and were like sheep walking in the track of one who went before them (Hear). But their insignificance ought not to shelter them. That they were insignificant I admit (loud laughter); but I say that insignificance is no plea against the condemnation of this House (Hear, hear). They lent the might of such authority as they had to the delusions of the Administration, and gave their voices when they could give nothing more (A laugh). That was what the Government expected from them. But I say, Sir, that the House should follow even these lowly ministers of wrong, to deal with them with the condemnation that has been already given to their superiors, and which should, like the lightning, strike impartially the high and the low. This being my case, I am not without an objection: it is said that the resolution which I propose to this House is of too sweeping a nature, and that its result would be a general ostracism of every man of mark on this side of the House. Is that my fault? Do I commit that wrong? or do I fall into the error? I only ask this House to administer a deserved punishment. I did not the wrong; and if there be any one to blame for having exercised every man of mark on this side of the House, it certainly is not me the blame must fall on the condemned themselves, and on them alone (Hear, hear). I acknowledge that the result will be something of the kind, and am sorry to say it is true that the arrow I discharge will strike many men of mark, but it is because nearly every man of mark on this side the House has been in error, and not because I direct the attention of the House to that fact which I ought not to direct it. There has been wrong done: I ask the House to punish that wrong, and the persons to blame are those who committed the error. I leave the House to judge between us."

His bill of indictment against the Aberdeen Administration consisted of six counts

1. That they, even when the war was imminent, made no preparation to meet inevitable contingencies
2. That after war was declared "they took no steps to provide a reserve force
3. That they entrusted the management of the war to incapable hands
4. That they ordered the expedition to the Crimea without sufficient information as to the resources of the country, or the strength of the Russian army
5. That for want of adequate provisions of necessaries the army was subjected to unparalleled hardships
6. That the medical arrangements were so incomplete and insufficient as to be a disgrace to every one whose duty it was to provide for the wants of the soldier.

By reference to the evidence given before the Committee, he brought home the various charges to the members of the late Cabinet, upon whom, he insisted, the whole responsibility lay.

THE NEGLECT OF THE CABINET.

"I say then on the Administration, and on the Administration alone, rests the responsibility that the army sent out was inadequate to the occasion, that it was sent to perform deeds totally beyond its powers, and that, instead of showing an anxious desire to supply the wants which their own conduct had created, that Administration never held a Cabinet Council from the rising of Parliament to the middle of October (Hear, hear). The noble Lord, the member for London, was in the meantime instructing the population of Gloucestershire, by way of lecture; the right honourable gentleman at the head of the Board of Works was starring in Scotland; and in fact, with the exception of the Duke of Newcastle, the Honourable Baronet the member for Wilts, and, I believe, Lord Aberdeen, the whole Cabinet was scattered over various parts of the country ("Hear, hear," and a voice, "Lord Clarendon."). I am not quite sure about Lord Clarendon, but the rest were certainly taking their pleasure from the rising of Parliament to the middle of October."

MR. GLADSTONE: That is quite untrue.

MR. ROEBUCK: There was no Cabinet Council during that time, but the Duke of Newcastle, and I believe the First Lord of the Admiralty, remained at their posts. They, however, are now out of office; they have received their punishment; while those upon whom I wish to fix my charge are still in office, although, while their colleagues were working, they were the rest enjoying themselves in the country, and wholly neglecting their duty ("Hear," and a laugh). The noble Lord now at the head of the Administration, where was he then? (Hear). The noble Lord the member for London, where was he? (Hear). Where was the Home Secretary? Where the Chief Commissioner of Works? (Hear, hear). I could go through the whole list; but I ask, were there not Ministers during that time absent from their post, the battle of the Alma had been fought, and the expedition to the Crimea had been determined on and executed. You may tell me that all that was to be done had been planned on before, but why were you not in London to receive intelligence?

THE SUFFERINGS OF THE ARMY.

"Why were you not at your posts when your army was dwindling away? Was cold, and hunger, and tempest had come upon them, you were not at your post to alleviate their sufferings? You were the cause to visit with its severe reprehension men who could forget their duty at such a crisis. It is evident that the sufferings in the army were not attributable to the men themselves, either to the private soldiers or to the officers or generals of the army (Opposition cheers); but, having taken place, there must have been some cause. What was the cause? Who was the cause? The cause was that the army was inadequately provided for the task they were set to perform, and the authors of the neglect were the members of the Administration (Hear, hear). They were thrown on the shores of the Crimea without the means of transport; and, although we had the command of the sea, and could bring to the shores of the Crimea everything that England or the whole world could offer, yet the troops died in thousands at the sides from the shore because there was not an adequate road provided even that short distance, by this great country for its army (Hear, hear). Can any one believe that had there been a man at the head of affairs, or in affairs, who had the spirit in him which this country is supposed to furnish to all its sons, such things would have happened? In this country, which prides itself on performing every thing that art or science can attain, can it be supposed that seven miles of road should stand between us and the most gallant army that ever left our shores (Hear, hear). We let them die of disease. They starved under single canvas; there was no means of taking out tents to cover them; and the cold, and rain, and tempest beat over their heads, while numbers of the Cabinet were indulging at their ease in various parts of the country (Hear, hear). And shall we stand here as representatives of the English people, and suffer such a dereliction of duty? I say it makes my blood boil to think that England should thus treat her army, and that she should send them forth to fight her battles, armed as they had been thirty years before, notwithstanding all that art and science had accomplished since that time. (Sir De L. Evans: "Scores had made rifles.") The Emperor of France behind me says some had modern arms. (General Evans: "All.") I am delighted to hear the correction of the gallant General, but I think evidence has been given before the Committee to the effect that 'Brown Bess' was really in the hands of many regiments (Dissent). Well, if even one man went to the Crimea without proper arms, I say it was a base fault in the Administration which sent him (Hear, hear). I say that these charges ought to lead this House to visit with its severe animadversion the men who could thus forget their duty (Hear, hear). But that was not all. We sent an army to the Crimea unprepared, even if they were in health, to perform the duty we had imposed on them; but before they left Varna the plague of cholera broke out among them, and then it was the duty of Government to provide every comfort that medical science could suggest. What was the description given before the Sebastopol Committee of the condition of our men? They were huddled together more than ten deep

THE LADIES' COLLEGE.

A SCHEME has been recently set on foot by an association of philanthropical gentlemen in the neighbourhood of Red-lion-square, which, if attended with the success it deserves, will go far to bring about a most desired reform in the social relations between the upper and lower classes, while it extends the sphere of social utility and raises the educational standard of the better half of mankind, through whose influence the work of progress is mainly to be effected. The chief promoter and promulgator of this scheme is the Rev. F. D. Maurice. In a pamphlet, entitled "A Plan for a Female College for the Help of the Rich and of the Poor," purporting to be the substance of a lecture delivered at the Working Men's College, 31, Red-lion-square, to a class of ladies, Mr. Maurice sets forth in what manner the project germinated, what fair blossoms, what nourishing fruit are expected from its development. So deeply interesting is the subject—so straightforward, simple, and unaffected the language in which it is clothed, that we would wish our space allowed us to reproduce the whole "substance" of the lecture rather than the mere shadow to which we must confine ourselves

The Working Men's College referred to above, Mr. Maurice informs us, was founded by a few persons of miscellaneous avocations—lawyers, doctors, clergymen, &c.—living in the neighbourhood, and while yet the scheme was in agitation the question presented itself whether it should include women. It was determined, however, to try the effect of the plan with men only. When the College was fairly started the members were called together, and the proposal of extending the advantages of the institution to women was submitted to them. This was considered a necessary precaution, as it was feared the men "might have some of those mean jealousies which are often found in what are called the better classes." Much to the credit of the plain manly sense of the working classes, however, the fear was at once dispelled—no weak horror of blue stockingism was found to exist among the men, no petty desire to swell their lordliness by a monopoly of useful knowledge, on the contrary, the result was a positive and unanimous call from them that their wives and daughters should drink as long and deeply at the Pierian spring as themselves. The council thus found themselves in a manner pledged to carry out this extension, and now came the question how to make the working women derive precisely the same advantages from the College as the men, for the object in founding it had not merely been to give instruction on certain subjects, but to establish the same sense of fellowship as exists between members of colleges and universities. The intervention of a body of ladies became an obvious necessity, especially as it was remembered that in the case of other female colleges in London positive failure would have resulted but for the co-operation of a number of active lady visitors. Moreover, it would be necessary that they should take a more direct part in the education than in the case alluded to; in fact, that the teaching and managing the institution should be almost entirely in the hands of ladies. The opinions of many ladies were canvassed, and concurred in this view. Nay more—it was thought that for any solid and permanent good some such body must be formed to conduct the education of the working women as had been established for the men. "But what kind of body could this be?" writes Mr. Maurice "The ladies whom I consulted thought it should be one in which they were taught to teach. Every one," they said, "fancies she can teach. It is really the hardest of all tasks—one in which those who have tried most feel that they want help."

There was evident truth in this. A female college had been set on foot by the Governesses Society on this conviction. Our men's college were originally designed to produce a class of teachers for the country and had degenerated only in so far as they had forgotten this. It was accordingly settled as the wisest and plainest solution of the difficulty that the proper foundation for the Working Women's College would be a college in which ladies should be taught to teach. Not, indeed, that they needed it more than men; on the contrary, women have a special aptitude for teaching far transcending that of men; and it manifestly could not be otherwise, seeing that the child's physical, intellectual, and moral development depend on the mother's fostering care. But this power may be neglected and undeveloped; may be wasted or perverted. To call it forth to increase it by exercise—to render it more practical and more extensive in its usefulness, would be one of the results at which this attempt would aim. But, in labouring at the achievement of one good, it might be reasonably hoped another would follow—one which it would be worth any amount of toil and sacrifice to attain. A way would be opened for a real living communion between the upper and lower classes—between the lady and the working woman. To accomplish this in London, where the gulf between the two extremes of the social scale seems most impassable would be fraught with consequences of unutterable good

Now came the question what was the work a woman to be taught—what consequently the ladies were to learn to teach them? It could not be the lore imparted to children at week-day and Sunday schools. They might, perhaps, even want that, but grown-up women could not be expected to exert themselves much to acquire it, unless it was connected with the duties and business of their lives. There must be some immediate practical end in view—the teaching must have its application perceptible at once, in the ordinary occasions of life the things which the working woman must do, if she is ever so ignorant. This necessity suggested the old distinction made by our ancestors between *arts* and *faculties* —the knowledge required by the mere scholar, and that which prepares a man for his profession in life. In the Ladies' College now projected, the *faculties* would be cultivated—that is to say, ladies would be fitted "to engage in certain tasks, which no other persons can perform equally well, or can be so helpful in teaching their country men how to perform." The study of *arts* would not be excluded, however, but rendered secondary and subservient to the main end.

It must not be thought that there is any int ention of following the American example, and having ladies graduate as physicians, for instance on the contrary, it is hoped that by healthfully directing and developing the faculties which belong peculiarly to women, they will be maintained in their true sphere and preserved from any such absurd cravings. By marking out clearly the specific work for which women are by their nature adapted, and making it a serious business to be pursued regularly and methodically, and not as a sentimental recreation, a safeguard will be erected against the growth of restless aspirations which lead some ladies to dream of the doctor's togs or the barrister's wig, and others to sigh for Romish sisterhoods. There are tasks which we know men cannot perform so well as women, and of late the whole nation has been forcibly impressed with the truth. "Englishmen," says Mr. Maurice, "would not have women-surgeons or physicians, they find they must have them as *nurses*." The faculty of nursing, however innate it may be, needs cultivating, like any other endowment. It is given in different degrees to different individuals; but, whether the gift be large or small, education cannot be superfluous. "They need education not only to show them what they can do, but what they cannot do, and should not attempt, to keep them from intruding upon the work which the surgeon or the medical student in nineteen cases out of twenty will perform more effectually."

Though, as it has been shown, the College was not projected with any original intention of forming and educating nurses, the natural connection which thus suggested itself between teaching and nursing led on progressively to the more complete development of the scheme by clearly pointing out who were to be combined in the formation of the society It was henceforth clear that the medical man must be one of its chief members. His knowledge must point out the path of instruction, and assign its limits. His experience likewise of the poor—of their peculiar sufferings—of the various influences, mental and physical, at work on them—fit him eminently as a guide to those who desire their exertions to be truly beneficial." But as the medical man knows he cannot stand alone that in labouring to improve the public health he has need to seek the aid of the lawyer, the economist, the statist, to clear away the practical difficulties of the subject—so also will these teachers be needful in the College. That this combined teaching, formidable in appearance, is, however, really necessary Mr. Maurice shows, we think convincingly, in a few words, which we will quote in conclusion of the subject. Speaking of the ladies for whose instruction the College is to be formed, he says: "Hundreds of questions occur to them, when they talk with any poor woman, and try to help her, through which they cannot see their way; questions concerning the operations of the pawnbroker's shop, of the friendly society, of the law of settlements; questions connected with the history of their country, and with its whole public policy They might be willing enough to leave these to their fathers or husbands or brothers. But they cannot They are forced upon them. They must take for granted some conclusion upon them in almost every act which they do. Their instincts may very often lead them right; but they may mix with those instincts judgments which are not right, which are hasty, and sometimes uncharitable both to rich and poor. It is all very well for gentlemen to express their dread of female lawyers or politicians. There is a kind of female politician whom every man and every woman has a right to denounce, because ignorance and presumption and party spirit are most offensive in those who should preserve us from them. But those who wish to prevent the growth of such a class should do all that in them lies to put ladies in possession of the wholesome knowledge which will make them cautious of uttering crude opinions, which will enable them to see how theories may differ, and yet how it is possible to be honest and firm in action. I am quite sure that there are men of experience and wisdom, on all subjects connected with the condition of the poorer classes, who will gain immensely themselves by communicating to ladies what will do them good. I am sure that they have felt thousands of times how many things there were which females might do, and which they cannot do; how often, on the other hand, women are trying to do what men can do much better: how needful it is to have mutual understandings and explanations, that they may co-operate with each other, and not hinder each other.

We trust we have not wearied our fair readers by this lengthy exposition, but that their interest will have been aroused in favour of a movement which certainly, from its intrinsic excellence, will, and, from the high names associated with it, all claim attention. A course of introductory lectures has already been commenced at the Working Men's College, in Queen-square, embracing such subjects as Dispensaries—Treatment of Surgical Patients Effects of Health on the Mind Household Economy Sanitary Laws Condition of Country Families, &c The Rev. Kingsley, Archdeacon Allen Stephen, Dr. Johnson, Mr. Tom Taylor, have already delivered lectures, and several more are to follow until the end of the month. The days on which the lectures are given are Tuesday, Thursday, and Saturday; and the hour is three o'clock p.m.

ON THE MODE OF DRAWING HORSES AT FULL GALLOP.

(To the Editor of the ILLUSTRATED LONDON NEWS.)

Now that the public are overwhelmed with pictures of battles it is a seasonable opportunity for pointing out to the artists the great error many of them commit in representing, or rather, attempting to represent, Horses at full gallop

The animal is generally depicted at his full stride with his hind feet on the ground in an impossible attitude in real life, as any observer of nature can satisfy himself. The artists who perpetrate this blunder are legion, but the two principal offenders in the exhibition of the Royal Academy this year are Mr. Jones, R.A., and Mr. Selous Rightly did Mr. Ruskin give the world to understand some time ago that, out of a thousand pictures on the walls of the Academy scarcely any were in true drawing

The horse's gallop consists of a rapid series of springs taken by all four feet, which meet on the ground under the animal's trunk, and when his legs are thrown out beyond the plane of his body, all his feet must be off the ground By this principle of bounds the horse and all other four-legged animals proceed at a gallop.

It may be laid down as a fact of nature that no quadruped in motion touches the ground with any foot propeted beyond the plane of his body Any drawing, therefore which represents the horse galloping, with his hind feet on the ground, shows him in an attitude in which he cannot possibly make any advance. The only mode in which such a creature could be made to move, would be by cutting it out in wood, fixing a weight at the end of a pole, and screwed to his belly, and then balancing the image on the edge of a table

I think we may safely assert that scarcely a single picture representing a battle-scene, painted during the last three centuries, is wholly free from the error I have ventured to point out, and which, as far as I am aware, has not been exposed and censured till now. Such is the force of routine in Art, which is almost as great as slavery as routine in Government administration.

I am, Sir, your obedient servant,
NEWTON CROSLAND.

3, Hyde-vale Cottages, Blackheath

THE PRUSSIAN ROYAL FAMILY. The King's health is now so far restored as to admit of his taking charge of air at Erdmansdorf, in Silesia, a Royal palace, which lies at the foot of the Giant Mountains, and is surrounded by woody scenery of considerable beauty. He left Potsdam on the morning of the 14th, accompanied by the Queen and the Princess Alexandrina, and, on arriving at Berlin, proceeded without alighting from the railway-carriage to the railway of communication that runs round the town to the Silesian Railway. In addition to the two Majesties of their Majesties, the Royal couple was attended by a very limited suite of ladies and gentlemen in waiting. It is expected that the King and Queen will return from Silesia in the early part of August; the King will also proceed to Gletz, in Silesia, while the Queen will visit the Court of Dresden, for a short time

MR. ROEBUCK, M.P., AND MR. URQUHART.—For the last fortnight Mr. David Urquhart has been addressing meetings at Leeds, Burnley, Bacup, Rochdale, Bradford, and manufacturing towns, endeavouring to make a party, in anticipation of supporting Mr Roebuck's motion of censure on the Aberdeen Government for the mismanagement of the war. At the Oldfield meeting Mr Urquhart stated that "he had all his life looked upon Mr Roebuck with suspicion;" but, believing he had been "started into honesty" by the awful facts disclosed before the Sebast pol Committee, he now gave his confidence and support to Mr. Roebuck. The petition adopted by the meeting having been forwarded by Mr A Booth (the chairman) to Mr. Roebuck for presentation to the House of Commons, the hon. member replied as follows: "5, Ashley-place, Pimlico, July 6.—Dear Sir,—The petition shall be presented to-night. I am very grateful to my constituents for the support which they thus give me. I cannot refrain, however, from remarking upon the observation of Mr Urquhart to you, that he takes upon himself to say that he looks upon me with a species of suspicion, and that because I have never put forth in the idle ravings in which he (Mr Urquhart) has so many years indulged. I had a good opportunity of judging of Mr. Urquhart's ability and judgment when he was a member of the House of Commons, and a more inefficient and weaker person I never saw there. He evinced great animosity and great credulity, uttering wild opinions always supported by weak arguments, damaging every cause he espoused, doing mischief even to the truth—if, by any strange accident, he was on the side of truth That such a person looks upon me with suspicion is, I think, a circumstance rather in my favour I remain, Sir, your obedient servant, J. A. ROEBUCK.—Mr. A Booth."

THE BARCELONA STRIKE A deputation from Barcelona has had several interviews with the Minister of Public Works. The operatives ask to have a law passed by the Cortes to organise labour, and that until such a measure be adopted the state of things which existed before the 23rd of June, when the associations of the workmen were dissolved by a proclamation of the Captain-General of Catalonia, should be restored. The Government, however, will not promise to make any concession until matters at Barcelona are brought to a normal state again. Among the persons lately expelled by General Zapatero was the Marchioness Milagro del Pino, who formerly belonged to the household of Queen Christina, and was residing at Granada. Some manufactories were opened at Barcelona on the 9th, but the operatives in general refused to work, and were awaiting news from Madrid. A person who quitted Barcelona on the evening of the 12th says that he left that city in a state of complete tranquillity; that the manufactories that are not at work are those only that await the return of the proprietors, and that all causes for alarm had disappeared. Should this prove true, the re-establishment of tranquillity in the turbulent capital of the principality will probably disheaten those who waited for a serious movement to raise the Carlist districts in the name of the Count of Montemolin, and the tranquillity of this part of Catalonia may have a corresponding effect on Navarre.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Queen Victoria has sent £50 to the Mayor of Southampton as a subscription towards restoring the chapel which contains the tombs of James II

The King and Queen of Prussia are to visit Dresden at the end of the month, after their return from their journey into Silesia

THE SILENT MEMBER.—(No. XXVI.)

THE great, or, rather the noisiest, event of the week has been the political demise of Lord John Russell; but, as his Lordship has, on previous occasions, undergone a similar decease, the affair has lost the attraction of novelty. It says something for the vitality of Lord John's character that it will bear the operation of destruction over and over again; or, perhaps, it says more for the good-nature of the public, that they can submit to see the process of resuscitation more than once performed. It is true that for some time the reputation of Lord John Russell has resembled the flickering flame of an expiring candle; and, though the breeze of general indignation has once blown out the Whig light, the act of puffing was employed to blow it in again. It has, however, finally sunk in the socket, and rendered necessary the employment of Sir Bulwer Lytton's threatened extinguisher, or the snuffers with which Mr. Disraeli has been long in the habit of snapping away at the luminaries more or less feeble —of the party in power.

It is rather hard that the time of the House of Commons should have been wasted in going through all the forms of killing an antagonist already dead, merely because the two great political gladiators were prepared to exhibit their skill in assaulting a foe who had resolved to succumb without a struggle. Sir Bulwer Lytton, having prepared a brilliant speech, was determined to let it off; and what would have been, for the legitimate purposes of attack, a very animated fire of telling shots, degenerated into a rather poor display of fireworks. I am sorry to accuse Mr. Roebuck of talking in vain, for he scarcely ever utters a word that has not some point in itself, or does not tend to the point in some way or other. By continuing his onslaught upon the Ministry that misconducted the war, he is only hitting men who are already down—and some of them so completely down, that there is not much chance of their very speedily getting up again. It is true that Lord Palmerston is still erect; and it may be also true that he should have insisted on a more vigorous prosecution of the war, as he was up to his eyes in smoke when at the Horse office, there may be some excuse for his having failed to evince his clear-sightedness. The public will hardly believe that there is much to be gained just now by upsetting Lord Palmerston, whose prostration would lead to considerable difficulty at a moment when no one seems to possess the requisite power of understanding to enable him to secure a firm footing in the Premiership. Mr. Roebuck's proposed resolution is true enough in its terms, but it can lead to no practical result, for the country has already pronounced the verdict of guilty, to which the House of Commons is asked to agree, and the accused parties have nearly all of them virtually admitted their offence, by resigning their places. The "severe reprehension" with which it is proposed to "visit" the parties is a very formal visit indeed, particularly as scarcely any of the parties are to be found at home, for the majority went out as soon as their delinquency became the subject of conversation. It is not quite consistent with the dignity of the Commons to shake an imaginary cane over the late Cabinet, and desire it to "consider itself horsewhipped: or, to fancy a picture which is still less dignified and unhappily nearer the truth, it is impolitic of the House to assume the attitude of an angry beadle brandishing a staff in the air after a party of runaways. It is not easy to get up any commiseration for the smaller fry of ex officials, who having held subordinate places in the Government at the time of Mr. Roebuck's motion for inquiry were compelled to resist it, but who, during since sought popularity by the expression of more liberal views, would naturally support Mr. Roebuck, if it were not that their former opposition to him would convict them of inconsistency. In such a category does Mr. Lowe find himself just now, for having, as a subordinate member of the Government, defended its feeble policy, he, as a would-be prominent member of the Reform party, feels that he can only hope to advance his position on the Liberal side of the House by joining in the censure Mr. Roebuck proposes to pass on "every member" of the late Cabinet. Mr. Lowe opposed the appointment of the Sebastopol Committee, because he was a party (though perhaps an insignificant one) to the mismanagement into which it was proposed to inquire; but, being now in opposition, he denies that he cannot meet by a direct negative the vote of censure on the Government he served under. It is undoubtedly difficult to say where the censure ought to fall, and whom it ought to exclude, for it is true enough that almost everybody had a share in the early mismanagement of the war, though the responsible rulers of the country are in the first instance liable. It is true that the House of Commons cannot very well censure the Government without some measure condemning it—for the House must, perhaps, placed too much confidence in the executive, which would have been spared a good deal of censure in the end if it had been somewhat more freely criticised in the beginning. Even the press and public opinion have been in some degree to blame, for the former talked too confidently, and the latter expressed itself somewhat too boastfully as to the issue of the war; and, indeed, we have all been guilty of overrating our own strength and under-estimating that of our enemies. Many people expected Cronstadt to fall as easily as the pasteboard battlements at Astley's; and even down to the bombast of the population who applauded the talking of Sebastopol on the stage—the whole English nation seemed to expect that a series of brilliant *coups de théâtre* would mark the progress of the war with Russia.

It will be seen that the Committee on the London writ have reported that Baron Rothschild has no Government contract "within the intent and meaning of the Act," though, to all intents and purposes, nobody doubts that he is a contractor with the Government. That a Committee of the House of Commons can decide a point of law is quite a new position, for, though the House of Lords is a court of judicature, the lower branch of the Legislature is not generally understood to act in that capacity. Whatever concerns its own privileges is undoubtedly within its own control; but few persons were aware that a committee of the House could by itself put any authorised interpretation on a statute made jointly by the three branches of the Legislature in unison. It is, however, quite competent for the House to decide that Baron Rothschild has not disqualified himself for sitting, and this perhaps is the point involved in the inquiry of the Committee, whose conclusion will have the concurrence of all the common sense of the community. It would, however, be better, as the *Times* proposes, that the Act should be repealed than that it should remain as a dead letter, from which the spirit has all been suffered to evaporate. It seems to be of little consequence whether Baron Rothschild is a Government contractor or not, as far as the representation of London is concerned; for it is as destined to be like the seat of *Banquo*, which, though apparently filled, is nevertheless unoccupied. If there should be at any time a proposal to diminish the number of members of the House of Commons, there need be no difficulty in discovering where one may be spared, for London can hardly have the face to ask for its full complement of four after having been satisfied with three for so long a period. If every other constituency could as easily forego one-fourth of its representation in the House of Commons, the business of the country might be done a little more speedily, and perhaps quite as effectually, by fewer hands, for there would, at all events, be fewer tongues to contribute to that great impediment to all Parliamentary work—the impediment of speech, which is so fatal to legislative progress.

The attention in the law of newspapers, which was to do infinite good, is found to be the cause of much inconvenience, and to cripple rather than to promote the circulation of intelligence. There seems to be so much difficulty in ascertaining how to send a newspaper abroad by the post, that an alarming amount of ignorance prevails with regard to the great circulating medium of knowledge, and the result is that many people lumber their houses with old newspapers, instead of sending them forth as they used to do, for the amusement and instruction of friends at a distance. A newspaper that used to be read by half a dozen families is now, in many cases, limited to the edification of one; and the attempt to provide the public with cheap newspapers is failing every day, from the fact that the existing newspaper press of the country was already so cheap as to make competition at a lower price a hopeless experiment. The abolition of the compulsory stamp may be all well enough, but an infringement on the long-existing facilities of transit is a retrograde step, which is at variance with the professed object of those who advocated the change in the law, on the ground that it would remove all obstructions to the spread of intelligence. The cheap papers are already beginning to die away without having succeeded in acting as instructors to any but their uniform rate proprietors, who have been taught a lesson at a price that they will probably think rather a heavy one.

CHESS.

TO CORRESPONDENTS.

W. T. N.—The term *gnocco à monte* was used by the old Italian players to express the re-tracting moves made after some inequality. Thus, for example, if a player had moved a piece erroneously, and the mistake was not discovered until other moves had been played on either side, the playing back these moves to the point before the error occurred was called *gnocco à monte*.

SPECTATOR, Manchester. We have received a few of the games played in the return match between the clubs of Liverpool and Manchester, and intend to publish the best of them whenever we can find room.

LEAMINGTON CHESS MEETING.—In our notice of this assemblage, we stated that in the consultation matches the club of Nottingham proved victorious over that of Kidderminster. This was a mistake. One game only was decided, and this was scored to Nottingham, not by play, but through an inadvertence on the part of the Kidderminster Secretary in noting a move. The match, which is to consist of a number of three games, is still pending.

F. G., Paddington.—The moves made are both of them recommended. If Your letter contained no Solution.

C. M. B.—It shall be reported on next week.

J. K., Falkirk.—The mate is curious as an occurrence in real play; but it is so obvious that we are surprised your club should have been puzzled by it.

G. K. B., Amateur, Novice, R. D. V., Subscriber. All must too easy.

SIGNOR F., Florence.—Your long wished for packet has reached us safely, and shall be acknowledged immediately by letter—meanwhile, accept our cordial thanks.

SOLUTION OF PROBLEM No. 591, by F. R. of Norwich, A. D., L. T. J. of Hanworth, Philip Gregory, Milan, T. M., G. P., Ernest, P. S., True Blue, Omega, W. H., Newton, H. F. L., W. T. F., D. D., M. P., S. P. Q. R., Signor T., Major, An Old Salt, H. F. G., Rugby-boy, Henry, Sancho, Alexander, Bullough, F. A. B., Mangion, are correct. All others are wrong.

SOLUTIONS OF PROBLEM No. 595, by Juniper, Paracelsus, O. P. Q., D. D., Ernest, Merlin, S. T. W., J. P., G. P., W. M., Œdipus, Subscriber, Senex, Louis d'Or, Albert, R. L., P. S. N., Dido, M. P., Pawn, D. M., P. K. S., Argus, Dreghedi, Robin Goodfellow, Miles, Omicron, Philip, are correct. All others are wrong.

PROBLEM No. 593

We shall withhold the Solution of this difficult Stratagem a few days longer.

WHITE.	BLACK.	WHITE.

17 Q B to K sq	K B to K R 4th	34. Kt to K 3rd	

White resigned.

(a) It was a grave error, the principal cause of all White's difficulties. Had they, as Mr. Staunton subsequently advised, played out this Bishop to Q B 4th, their opening would have been a move or two at least as good as their opponent's.

(b) Well played.

The present game is a striking example illustration of the truth of Lord Lyttleton's strictures on modern play and practice, and especially those in his celebrated letter addressed to the writer. It is a short game. It is utterly deficient in interest of any kind; there is not a combination in it which would do credit to a sixth-rate player; and yet this brief, lifeless, and ventive affair, over and over excellent players more hours than hundreds of

BETWEEN THE SAME COMPETITORS.

24. P to K B 6th (m)	P to Q 4th	54. P to K R 4th	P takes P
25. Q to K Bsq	K to K Kt sq	55. P takes P (x)	Q to her R 2nd (ch)
26. Q to K B 2nd	P to Q 5th		
27. Q R to K B sq (n)	P to K Kt 4th	56. K to R sq	Q to her R sq (ch)
28. K R to K Kt 3rd	P takes P	57. Q to K B 3rd	Q takes Q (ch)
29. K R takes P	P to K R 4th	58. K takes Q	R to Q sq
30. B to Q B 5th (o)	P to K R 5th	59. K to K B 5th	K to Kt 3rd
31 P to Q 3rd	Q R to Q sq		

And in a few more moves the game was resigned as a drawn battle.

(c) Avoid or close opening. How much more suitable for such an occasion would have been some dashing gambit.

(d) Better to have taken it as Kt we believe.

(e) Intending to play afterwards, the Q Kt to Kt 5th, but which upon second thoughts they declined to do.

(f) They dared not move P to Q R 3rd, lest Black should answer with Q Kt to Q B 4th, &c.

(g) This was not only useless but positively bad since it afforded the enemy golden time to mature their plan of operations.

(h) *Id est*, the Kt from Q B 3rd to K 4th. Maugre all the constraint of their opening, White have now the best of the situation. This is mainly owing to the last two moves of their adversaries' which were sadly deficient in force and purpose.

(i) Had they played the move anticipated—P to K B 4th—White would have got a splendid position of attack by replying with Kt to K Kt 5th, &c.

(k) A good move; the intention being to force the Queen still further out of play.

(l) This was suggested, and fortunately parried, by Mr. Staunton; instead of it Mr. Wyvill proposed K R to K B 3rd—a move of great ingenuity, but the consequences of which we think, are neither so immediately nor so certainly advantageous to the White game as Kt to K B 5th. Let us suppose, for example

29 K Rto K B 3rd	P to K Kt 5th
30 Kt takes P	Q to K R 4th
31 Kt to K B 5th	Q to K R 4th

(*k*) Imperative, as White threatened next move to give chess with their Queen, and then to win the Queen's Pawn.

(*l*) Messrs. Wyvill and Kennedy were only advocated this move, which certainly looks promising. Mr. Staunton was opposed to it, and recommended the taking Pawn with Pawn, and then driving the Queen out of play, by moving Q R to Q B 4th, or throwing forward P to Q B 3rd. As the point is a nice one, it may not be unprofitable to examine the probable consequences of the rejected line of play. Suppose, then

29	Q P takes P (best)
IN THE FIRST PLACE—	IN THE SECOND PLACE—
29 R to Q B 4th	Q to K R 3rd
30 P to Q 4th	P takes P (best.
31 K to K B 4th	Q to K 3rd
32 R to K 4th	Q to K 2nd

(They might also take the Pawn with Pawn, in perfect safety, but this, as threatening to win the adverse Queen or to give Mate, is perhaps stronger.)

33.	K to Kt sq (best)
34. P takes P	Q to Q Kt (best)
35. Q R to K sq	P to K R 3rd (best)
36. Q to K B 5th	And Black cannot save the game

(*m*) The only way to prevent the Black Queen getting into play anew.

(*n*) On this important move, as on too many others, the English allies were not agreed: Messrs. Wyvill and Kennedy being resolutely in favour of Q R to K B sq, while their colleague was bent on first dislodging the Queen, and then taking the K Kt P with Pawn, checking. The position is one of so much difficulty that we hardly would advise should have been a stiff course of others as to the best course of proceeding. The following variations seem to prove that Mr. Staunton's plan of action would at least have greatly harassed the enemy, and neglected them to a long and troublesome defence.

27 P to K B 3rd	Q to K Kt 4th or 8
28 P takes Q P	K P takes P
29 Q to Q B 5th	Q to K B 5th

(Any other move would be fatal to them)

30 Q R to K B sq	P takes P

(If they take this Pawn with their Queen, White Q takes Q B 5th, and win easily)

29. Q R takes R	Kt takes R
30 Q takes Q P	Q R to Q sq

And we doubt if White can save the game

27.	Q R to K B sq
28 P takes P (ch)	K R takes P
29 Q to K B 5th	An Black must lose.

(*o*) A very clever move, the merit of which is due to Mr. Wyvill.

(*p*) Instead of this extraordinary measure, by which he abandoned the key of their position and ought to have lost the game, Mr. Staunton urged the advance of the Q Pawn or the doubling the Rooks to the Q Kt's file, either of which would have given White a winning advantage. The game from this point was carried on by Mr. Wyvill and Captain Kennedy alone.

(*q*) The energy of desperation.

(*r*) Well played. To a credit of this opponents are also belongs to Mr. Thwaite.

(*s*) It is hardly necessary to say that if White had taken the Rook, they would have lost the game.

(*t*) A bolder attack as fragrant as that of White's at their 33rd move. Mr. De Rivière discerned from the first the weak point of the playing of Rook to Q Kt sq., which would most probably have saved the game.

(*u*) By this and next move for the ingenuity and boldness of conception of Wyvill and Kennedy are entitled to the highest praise. Had the latter gentleman carried out White's game in a more [illegible]

(*v*) Fancy player—P to K B 7th—and offers 1 Pawn, Black draw the Game

(*w*) Purposing to play the Rook to K B 8th.

(*x*) Once more again, when—day was for your own, the good genius of White's served them. If they had only played the Queen to K B 3rd, their opponents must have struck their flag in a few more moves.

MEETING OF THE BRITISH ASSOCIATION IN GLASGOW.—Some of the arrangementation for the meeting of the association in Glasgow in September next have been reported to a meeting of the local committee. The funds for the expenses of the meeting were stated to be ample; several *conversaziones* and excursions were named, and among other objects of interest it was mentioned that a local geological museum would be formed, with collections of the chemical minerals, and ores of the west of Scotland. It was also intended to have a photographic exhibition, and one or two salt-water vivaria, exhibiting the marine inhabitants of the Firth of Clyde. A letter was read from Sir Roderick Murchison, expressing his opinion that the meeting at Glasgow would be the most successful ever held in Great Britain.

SPANISH FINANCE.—The Cortes having adopted and definitively passed the project of law by which the Government are authorised to raise a voluntary loan of 250,000,000 reals, to meet the deficit of the present year, and to convert it into a forced loan if not subscribed within a month, the most urgent wants of the Government will be provided for; and it is expected that the Cortes will have been adding for eight months will assign other labours in a day or two until September next. In fact, if not suspended by a deliberate vote of it at body, the sittings will soon be suspended, owing to the impossibility of collecting a sufficient number of members to make a house, as some deputies are now leaving for the provinces every day.

THE FATE LORD RAGLAN. At four o'clock of the day of Lord Raglan's decease, Colonel Steffi was about to go for their usual ride, they were informed that he was much worse. They immediately repaired to where he was lying. He seemed surprised at seeing them all, and inquired the reason, which they stated as decent as possible. He said, when with a most amiable smile, he replied that he was much better, and in a day or two would be able to [illegible] They relieved, and went for a ride, leaving him in the [illegible] himself in bed, and called some of them. "Fitzroy, I shall [illegible]" (meaning Lord Raglan), turned round, and so died, with a [illegible] and most expressive [illegible]

Letter from the Crimea

THE RUSSIAN AGENT AT DOVER.—Dr. Talamanich Rehinoski, who described himself as a Polish Jew, but who, it was discovered from his papers, was a Russian, was brought up at the Dover Police-court, on Friday, before Mr. Cocke, Mr. Williams, and Mr. Elsted, on a charge of endeavouring to induce soldiers to desert from the Belgian Swiss Legion. It is supposed that the defendant is one of the numerous agents of the Russian Government known to be in this country. The charge was taken under the 37th section of the Mutiny Act. Johannes Sand said, through an interpreter—I am a private in the 1st Regiment of the British Swiss Legion, stationed at the Western Heights, Dover. On the evening of the day before yesterday the defendant came up to me in the street, and asked me to speak to him in a public house. Having complied with his request, he asked me if I was satisfied with my legion, and offered to take me to France or the Brazils (sic). Recollects if I became a soldier I should get 2*d.* per day. He said that if I liked to desert he would secrete me in a house on the following night, when he would engage to take me to Antwerp, and there I should be remunerated. He also said that I should be made an officer of [illegible] He also said that some promises were made me at the same time, and he made the same proposals to them. I reported these circumstances on the same night, to the sergeant-major. On the following morning I, in company with another soldier, went to the house pointed out by the defendant as his home, which is situated in Adrian street, where, after a time delay, we saw the defendant, who told us to go to a public-house opposite and wait there until he came to us. An officer of the regiment, who had come down with us, then came forward, and ordered that the defendant should be taken into custody. By the Bench. The defendant said we could be engaged in the French service, and that we should be made officers. Joseph Sand, 1st Regiment of the British Swiss Legion, corroborated this statement, and said that the defendant offered to engage him in the same terms as many of their comrades had already [illegible] He drew a map with [illegible] In defence, the defendant said he did not [illegible] question, nor had he at any time [illegible] The defendant was fully committed for trial at the [illegible]

THE PARIS EXHIBITION.—FINE ARTS DEPARTMENT.

We have engraved on [illegible] page one of the most striking works of French Art in the Exhibition, the painting of a "Sheep," by Mdlle Rose Bonheur, who also drew the picture upon the wood for the engraver. Mdlle Bonheur was the [illegible] father, Raymond Bonheur, and of Leon Cogniet. She was [illegible] pupil of the age of seventeen, and since then has [illegible] from the Salons, in 1841. Her works have always attracted purchasers, and increasing admiration. In 1848 she received a first class medal "for Landscape and Animals." She has also executed some admirable bronzes of animals. One of her most popular works is a picture of six Virgins [illegible] in the Luxembourg Gallery. Her style of execution is vigorous, one might almost say masculine, and remarkably true to nature.

Some of Mdlle Bonheur's pictures are now being exhibited at the Gallery of French Painters, in Pall-mall, where, on Tuesday evening, a sort of artistic fête was held. Mdlle. Bonheur, whose small picture of the "Charcoal Burners" is looked upon as one of the most interesting works in the collection now exhibited, has sent another picture, on a much larger scale, entitled the "Horse Fair," combining the merits of an admirable study of animal life, with those of an elaborate pictorial composition. The picture was hung on Tuesday morning; and, by the strong nature of the figures, the force of the colouring, and the vigorous conception which lies at the base of the whole, has elicited the general admiration of the connoisseurs, which is heightened into positive wonder by the fact that so masculine a work is the production of a feminine hand. However, Mdlle. Bonheur has not only contributed her picture, but she has brought herself to London likewise; and, in honour of her arrival, a soirée was held in the evening, which was attended by some of the chief representatives of English art, who were anxious to pay their respects to the "female Landseer," newly sprung into celebrity on the other side of the Channel.

"SHEEP." DRAWN BY ROSA BONHEUR.—(SEE PREVIOUS PAGE.)

"THE HARVEST-MOON."—PAINTED BY EDWARD DUNCAN. FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS.—(SEE NEXT PAGE.)

"THE GOW CHROM AND LOUISE."—PAINTED BY R. S. LAUDER.—FROM THE EXHIBITION OF THE NATIONAL INSTITUTION OF THE FINE ARTS.

"THE GRANDFATHER'S WATCH."—PAINTED BY WILLIAM GOODALL.—FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS.

"THE HARVEST-MOON."—BY EDWARD DUNCAN.

No. 10 OF THE OLD WATER-COLOUR SOCIETY'S EXHIBITION.

Mr. Edward Duncan is an artist who delights in having in the words of the old song "One foot on sea and one on shore." But unlike the after illustration which the song affords, "to one thing constant never," Mr. Duncan is constant both to sea and land, and represents them on paper with an eye exquisitely alive to the beauties of nature. Of his skill in depicting the sea and the sea-shore our pages have contained several illustrations which many of our readers will doubtless remember. Of his skill in rendering inland scenery, his "Harvest-Moon," on the walls of the Exhibition of the Old Water-Colour Society this year, and engraved in our present Number, is in every respect a very pleasing illustration.

Mr. Duncan has been lately in Guernsey, as we learn from his Seaweed Gatherers" (No. 197), and his "Sunset on the Sand" (No. 237).

"THE GOW CHROM AND LOUISE." BY R. S. LAUDER.

We have this week taken one of our illustrations of the Art Exhibitions of the London season from a picture by Mr. R. S. Lauder, entitled "The Gow Chrom and Louise"—one of the leading attractions of the National Institution of the Fine Arts, which has its yearly exhibition in Regent-street, over against the Polytechnic. Mr. Lauder is the President and Treasurer of the Institution, and has long been more than favourably known for his skill as a painter and his temperate dislike to the Royal Academy.

Mr. Lauder has found the subject of his best picture of this year in the fertile pages of the Waverley Novels. Harry Wynd and the Glee Maiden are favourites with every reader of the "Fair Maid of Perth." Nor is there any single scene in the whole novel better suited to a painter than that of the stout smith and the gentle minstrel maiden on their way to the Gow Chrom's house in one of the narrow wynds of Perth. The flight of the maiden with her favourite dog through the chapel of Holy St. Madox is well told by Mr. R. S. Lauder.

The Scottish school of art, of which Mr. Lauder is a well known scholar in particularly distinguished for its skill in colour. The works of Wilkie, Raeburn, Burnet, Watson Gordon, Frank Grant, William Simson, Alexander Fraser, Mr. Faed, Mr. Johnston, and Mr. Lauder himself exhibit a fine appreciation of the rich resources of the pallet. The only exception that we call to mind in the Scottish school is the late Sir William Allan, who was apt to become chalky and hard.

"THE GRANDFATHER'S WATCH." BY WALTER GOODALL.

No. 12 OF THE OLD WATER-COLOUR SOCIETY'S EXHIBITION.

Mr. Walter Goodall is one of the best known of the young Associates of the Old Society of Painters in Water-Colours. He is not a prolific but he is a careful painter. This year his subjects are four in number:—1. The Grandfather's Watch. 2. The Careful Nurse. 3 The Milking Shed. 4 The Old Willow. His class subject is not very high, nor is his range extensive; but what he attempts he generally performs satisfactorily. His "Grandfather's Watch," engraved for our paper of this week, is one of the best pictures of its kind (and the kind is good) to be seen on the the walls of the London Exhibitions of the present season.

There are few things with which children are more delighted than with the ticking of a watch, or the inward murmuring of a clock. Mr. Goodall has painted the former subject and told his little incident with great picturesqueness. The shell subject has occasioned three celebrated descriptions in verse by Landor, Wordsworth, and Lord Byron, of which the first in point of time (Mr. Landor's) is said to be the best, but even on this point the critics are divided.

Mr. Walter Goodall belongs to a family of artists. Mr. Edward Goodall—one of the best of our landscape engravers in the line manner—has done much to extend the reputation of Mr. Turner, and Mr. F. Goodall (the son of the engraver) is one of the most promising of the Associates of the Royal Academy. The painter of "The Grandfather's Watch" is another son of the same eminent engraver.

MUSIC.

THE captivating Madame Gassier took leave, for the present, of the English public on Wednesday (last week), when she had her benefit at Drury Lane. She appeared as *Rosina* in the "Barbiere di Siviglia"—a part not less charming from the grace and animation of her action, than from her brilliant and beautiful execution of the music. There was an overflowing audience, who received the fair vocalist with unbounded enthusiasm. In the course of the evening a piece of plate, stated to have been subscribed for by Madame Gassier's friends and admirers and her brother and sister artists, was presented to her on the stage by Mr. Smith and several gentlemen, as representing the subscribers. We question the good taste of the factitious "ovations" got up in the presence of the public. They seem calculated to glorify the giver as much as the receiver. The fashion is a French one, as much as the custom (very recently introduced into English theatres) of throwing bouquets from the side boxes upon the stage. These bouquets, nine times out of ten, are thrown by "confederates" stationed there on purpose; and when some fair prima donna picks them up with a grateful curtsey to the audience, her acknowledgment is as much a mockery as the compliment. It is the same thing with ceremonies on the stage—crowning of a performer, or (his or her) benefit, presentations of plate, and so forth: these are got up, in the name of the public, by persons of whom for the most part the public know nothing, and to none of whom have the public given any authority to represent them in the expression of their feelings. We greatly admire Madame Gassier, and have heartily joined in the best tribute she can receive from the public—the applause which her beautiful performances so well deserve; but we confess we had no pleasure in seeing her taking part in a piece of mummery with which the public had nothing to do. No doubt Mr. Smith must feel obliged to Madame Gassier for having filled his theatre and his coffers so well; but he could have shown his gratitude by a present, or in some other way, without turning it into a piece of ostentation. While, however, we make these remarks, we say that Mr. Smith deserves well of the public for having introduced Madame Gassier to their acquaintance—an acquaintance, we trust, which will not soon terminate.

A CONCERT of a very interesting character took place on Tuesday morning, at the mansion of the Marquis of Breadalbane, the President of the Literary Association of the Friends of Poland. The Princess Marcelline Czartoryska, the wife by marriage of the venerable head of the family, Prince Adam Czartoryski, herself a scion of the illustrious family of Radzivil came from Paris for the express purpose of giving this concert for the purpose of aiding her distressed countrymen who have found a refuge in England. A great number of the nobility, including the Marchioness of Breadalbane, officiated as patronesses, and exerted themselves for the success of the concert. A crowded and splendid assemblage was the result, and the company enjoyed a musical treat of no ordinary description. The Princess Czartoryska was herself the principal performer. She is very beautiful, and distinguished in the highest circles of Paris and London for her graces and accomplishments, one of which is music. She was the favourite pupil of Chopin, and is one of the most exquisite pianists of the day. On this occasion she played Beethoven's trio in C minor, accompanied on the violin by Herr Eller (an excellent performer newly arrived in England) and Signor Piatti; Mozart's sonata in A major for the pianoforte and violin, and several solos composed by her celebrated instructor. A more tasteful selection of pieces could not have been made, nor could it have been performed with greater brilliancy, finish, and expression. The rest of the concert was made up of performances by eminent artists who gave their gratuitous services. These were Mdme. Anichini (soprano), Mdme. de Villar, Mdme. Rudersdorff, Signor Ciabatta, and Signor Belletti—Herr Eller, in the performance of several solos—one of them a *valse ritmi-dique*—showed great powers and delicacy of execution which reminded us of Paganini. The vocal part M. Leveson gave two of his amusing comic songs. The vocal music was accompanied by Mr. Lindsay Sloper

After the concert, the Marquis of Breadalbane presented to the Princess Czartoryska an address of thanks from the members of the Literary Association of the Friends of Poland. It was in the following terms —

Madame,—We are requested by the Council of this Association to express your Highness of the gratitude and admiration with which they have seen your Highness, at a moment when the aged and sick amongst your countrymen stood eminently in need of such assistance, devoting, at great personal inconvenience, to their service the brilliant talents by which your Highness is distinguished. But the Council, much as they rejoice at the alleviation of individual suffering which the generosity of your Highness will bring back upon them as possessing a yet higher and more lasting value. At the present day, the enemies of mankind, confidence and constitutional freedom seek to effect their disastrous objects by setting against each other the various classes of which society is composed. There is no surer, no more effectual way for the abettors of despotism or the favourers of anarchy, as they may be termed, from their birth and position, the natural leaders of the people, endeavoring to themselves, by their conduct, the place which Providence has assigned to them. A nation, which has always been powerful more in action than in actions, may, indeed, for a time be overcome by the force or the fraud of its adversaries; but we are assured that at no distant hour it will resume and assume the place to which its virtues entitle it.

MISS ARABELLA GODDARD is now running the same brilliant career in Italy which she has already done in Germany. She lately gave a concert in Florence, at the sala Musicale dell' Arte, and her performance roused the excitable Florentines to the utmost enthusiasm. The Italian journals are quite rapturous in her praise, and say (most truly) that England should be proud of possessing such an artist

THE THEATRES.

PRINCESS'.—A laughable little piece, taken from the French, under the title of "How Stout You're Getting," was produced on Monday, with unequivocal success. The performance was confided to Mr. David Fisher, whose personation of the stout husband consisted of a series of personal efforts that exhausted the physical energy of the performer. In such a character this actor, who may be regarded as the English *Arnal*, appears especially to delight. His perpetual capacity for practical joking never had more opportunity. Among the amusing incidents was the introduction of a weighing machine, the results of which increase his alarm. Manifestly he is getting too bulky and too heavy, and approaching the limit that separates a healthy man from a human porpkin. To increase his alarm, his double appears on the scene a fencing and dancing master, not a little irascible; and with him he picks a quarrel, merely for the sake of exercise, and to reduce his weight within proper bounds. An artificial alarm is also raised by his uncommon is also raised by his uncommon force of his gravity, by loading his pockets with certain bags of silver, just received in payment. The fun and humour of all this stimulated the merriment of the audience. The original of this odd affair is a vaudeville produced at the Théâtre des Variétés last year by MM. Labiche and Marc Michel, and called "Un Mari qui prend du Ventre." The farce was succeeded by "Henry VIII.," which, with its rich illustrative accessories, continues to attract.

ADELPHI.—An adaptation of a recent occasional piece, called "Zigzag," has been put together for this theatre, as a military spectacle, under the title of "Fraternization, or Brothers in Arms," for the purpose of introducing a panoramic view of Sebastopol, and M. Blondelet, buffo-singer and tambour professeur, whose inimitable performances on the drum are really astounding. The manner in which he described the battle of Inkerman by playing on an arrangement of drums, constituting one organon for the purpose, was startling, skilful, and indescribably effective. M. Blondelet will prove an attraction.

HAYMARKET.—Mr. Farren, as we had announced, took his farewell benefit on Monday, and the occasion was honoured by a house magnificently crowded. A great variety of entertainments was provided, and, indeed, it was near two o'clock before they terminated. Mr Farren himself took but a small part in the performance—one single scene of "The Clandestine Marriage," in which *Lord Ogleby*, assisted by *Canton*, arranges his toilet. We all recollect how Mr. Farren used to realise such parts. To him—until of late years his growing infirmities precluded the possibility of complete execution—belonged the theatrical domain of the "Old Man" of the last generation. To this character he brought not only the form and manner, but the mind, and in every instance gave demonstration that the delineation was regulated by an *ideal*, the perfect type of his own intelligence, which placed completion out of the question. His great part was *Sir Peter Teazle*, which, in 1838, was the delight of the *habitues* of Covent Garden. An immense number of similar parts has since been prepared for him, and the *repertoires* of the French theatre exhausted for translations adapted to Mr. Farren's genius. Not the least element of the great actor's success was the excessive care that he always displayed in what is technically called "making up." Comic parts are sometimes mainly dependent on the way in which they are dressed. The tailor is in much the maker of the artificial man, and the clothes are the exponent of the individual—sometimes the principal items of his characteristic development. How this might be most effectively done was intuitively known to Mr. Farren; and all outward appliances, in aid of the grand impression, were immediately under his control. Thus he had not only conceived the *beau ideal* of a gentleman in his mind, but presented it in his personal appearance and demeanour, as well as in his professional acting. Those who have only seen Mr Farren of late years can have no notion of the man as he was. The curtain has now been formally permitted to descend on his life-long career. The account is closed between the great actor and the public; and it remains to the dramatic biographer hereafter to dilate with eloquence on the indisputable merits of Mr. William Farren—the most eminent comedian of his day.

The NEW PLAY, as underlined for production, next Monday, at the Haymarket, is entitled "Wife, or No Wife." It is from the pen of Mr. John A. Heraud, and the heroine will be personated by the daughter of the author.

ON A BROKEN HARP STRING.*

BY THE LATE MRS. FITZWILLIAM.

Thy life of harmony is o'er,
Thy tone can now delight no more,
Nor e'er again my touch restore
Thy soulfelt inspiration.
No more to song of olden time,
Nor modern lay, nor hymn sublime,
Nor melody of foreign clime,
Shall thrill thy sweet vibration.

Unheeded, will thy fragments lay,
If noticed, but to throw away,
And thus, when part their better day,
Most things are soon forgot!
Another too can fill thy place,
A common usage no disgrace
It ranks you with the human race;
Then think not hard thy lot.

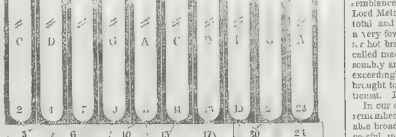
Yet 'mong the worldly feelings shown,
To those who meet but fortune's frown,
Some kinder spirit may be known
Some friend our fate to cherish;
So shall this tribute of my muse
Recall the sweet and long-tried use,
Preserve thy relics from abuse,
And ne'er in mem'ry perish.

* The last bass string, which had stood for many years

MESSRS. HUGHES AND DENHAM'S PATENT PIANOFORTE.

THE instrument was lately exhibited at the Polytechnic Institution, in the presence of a number of musical persons, who were much gratified by its ingenuity, and satisfied that it possesses several important advantages.

The improvement lies in the key-board, and its nature will be more distinctly perceived from the annexed diagram than from any description in words. The diagram, it will be seen, embraces two octaves of the key board, and each single key being of the same width as on the ordinary pianoforte, they are so arranged that the player's hand can stretch *two octaves* easily as one octave on the common instrument; all the intermediate notes of the chromatic scale being at the same time brought under the hand. The *notes at scale*, instead of being in one continuous row of white keys, is arranged in *two* rows, as shown in the diagram, in such a way that the contiguous keys in each row form intervals of thirds;—the first row C. E. G. B. &c.—the second row, D, F, A, C, &c. The third row gives the sharps and flats in the same manner as on the ordinary instrument.



From the disposition of the key board it is evident that various remarkable consequences must follow. The volume of sound and fullness of harmony may be greatly increased. Where great power is wanted in octave passages, the player on the common instrument, by stretching an octave with each hand, can produce four sounds; on the new instrument, by stretching two octaves with each hand, and putting the middle fingers on the intermediate octaves, he can produce *six sounds*, all in octaves! And it must also be apparent, that, while each hand has thus within its grasp double the extent of scale which it has on the common pianoforte, the player is enabled, by the use of all his fingers, to produce great masses of harmony which on the ordinary instrument are quite impracticable. Moreover, this new disposition of the key board affords great facilities for the execution of many kinds of passages, particularly those rich and sounding trains of *arpeggios* which form one of the greatest beauties of pianoforte playing.

But there are some considerations of an opposite kind, which cannot be overlooked. Many passages must be rendered more difficult by the new method of fingering. This must be the case, in particular, with scale passages, of which the bulk of all music consists. On the ordinary instrument these are played by running the fingers along one row of keys, merely touching the black keys occasionally. On the new instrument, the very simplest scale passage requires two rows of keys, the fingers passing rapidly from the one to the other, an embarrassing task, which, even for simple music, must require great practice. But that this and other difficulties are not insurmountable was shown by the able performer who played on this instrument at the Polytechnic Institution; for he executed, with clearness and apparent facility, every variety of passage found in pianoforte music, besides producing many striking effects of which the instrument has hitherto been incapable. It thus appears that a pianist, who has learned to play in the old way, may master this new mode of fingering without any enormous difficulty; and the question comes to be, whether the advantages of this new instrument are sufficient to make its study and practice worth the performer's while. Our present impressions would lead us to answer in the affirmative. But the question must be determined by experience; and we think that this very ingenious invention deserves the attention of our most distinguished professors of the pianoforte.

MDLLE. RACHEL. It is definitively settled that this eminent *tragedienne* will leave Europe for America early in August, but before her departure she will give four performances at the St. James's Theatre, commencing on the 28th and 30th inst

A SPECIMEN of that rare bird, the pectoral sandpiper (*Tringa pectoralis* of C. L. Bonaparte) was shot on the 27th ult., on Whitley Sands, on the coast of Northumberland, by Mr. Robert Duncan, jun., animal-preserver, Newcastle-on-Tyne. The specimen is a mature female, in perfect summer plumage.

An interesting discovery of part of the old Roman wall has been made in Northumberland—a piece has been found, with various traces of the great nation who left such deep footprints wherever they once trod.

THE SUICIDAL POLICY OF THE PEACE PARTY.

(From the "People's Times.")

TO JOHN BRIGHT, ESQ., M.P.

DEAR SIR,—Several of our old fellow agitators in the Free-trade cause, who hold the same opinions as I do regarding the real conduct of the war, and the misrepresentation of Manchester, are anxious that I should deliver a lecture on those topics to the electors of that borough, with a view to prepare them for the proper exercise of the franchise before next general election. As they were my constituents before they became yours—the Lancashire always precedes a member of Parliament in a town like Manchester—I would willingly have complied with their request but for want of time. By way of substitute, however, I propose to send them a few letters on the great question of the day, and these I shall take the liberty of addressing to you partly because what I have to say relates to you and your colleagues, partly because I wish to give you an opportunity of explaining your policy on various points, should you think proper to do so.

I wish to show that, in defending the utterly untenable position into which you have been betrayed by your alliance with Mr. Cobden, and your sectarian education and sympathies, you have been false to your own political principles. In your eagerness to obtain peace at ever so great a sacrifice of national honour or well-being, you speak as if our being speedily involved in a far more costly and dangerous war than we are now waging, you have, both in Parliament and at Lobe-and-corner meetings in Manchester, given your best aid to Russia, have grossly misrepresented the state of public feeling in this country; and, by doing all in your power to prevent the public voice from having its due weight in the discussion of our foreign policy, have materially assisted the Austro-Russian section of the Cabinet in their mischievous schemes.

In what I mean to say I do not intend to use diplomatic phraseology. It seems to me that many of the evils and reverses which have befallen us during the last two years have arisen from the want of that speaking out openly, and calling the world by their right names, for which you were so distinguished at one time, and which I regret to say you have too much abandoned of late years. In our Ministers had spoken outplainly to the Emperor of Russia in 1853, and warned him, in unmistakable terms, that he crossed the Pruth he must take the consequences, the present war might have been averted. Your very well meant but most unwise interference to prevent Mr. Layard from bringing forward his motion on the Eastern Question, in the summer of 1853, was also a great discouragement to those of us who were desirous to see that question forward, the leader of the Radical party, in support of Ministers, and urged the member for Aylesbury to postpone his motion, on the official ground that a debate on the Russian aggression at that critical moment might cause great excitement, and be injurious to the public service. As there was much anxiety at that time regarding the course which Ministers intended to take, you were pleased to add that the negotiations were in the hands of the Earl of Aberdeen, in whom you had the utmost confidence. Unfortunately you gained your object. The threatened discussion, which would have enabled the House of Commons to speak out in a tone that must have been heard at St. Petersburg, was quashed by your opportune assistance, and the result was, that we "drifted into war," without Parliament having ever had an opportunity of uttering an opinion on the subject.

Now, considering your vehement expression of democratic principles, your distrust of the aristocracy, and your violent abhorrence of secret diplomacy as the cause of all our wars, I think your conduct in that affair requires explanation. That you, above all men, should have used all the influence you possessed as leader of the Manchester party to transfer all control of the foreign policy of Great Britain from Parliament to the Premier, in what few of your colleagues could have anticipated, I can account for but on the supposition that you were only supposing that you entered not so high an opinion of your own intelligence as to deem yourself justified in ignoring your democratic principles for the nonce, in order to assist the diplomatic jugglery of the Foreign Office. There being a scheme on foot at that time to arrange the affair in such a way as would satisfy Russia. If you could only have preserved peace, even at a temporary sacrifice of principle on your part, and at the loss of any amount of honour and independence on the part of the nation, you would have consoled yourself with the reflection that the end ought to justify the means.

The secret understanding between the Peelites and the Manchester party for letting Russia have her own way in the Black Sea, and any one might have foreseen who knew the temper of the people. If you had not shut your eyes in the most obstinate manner against such evidence, you must have known, that no attempt to juggle the nation in the manner referred to could pass by be successful. That the public would not allow, in the case of a great nation, you would have consoled yourself with the reflection that the end ought to justify the means.

THE ILLUSTRATED LONDON NEWS.

No. 754.—VOL. XXVII.] SATURDAY, JULY 28, 1855. [TWO SHEETS, FIVEPENCE. STAMPED (POST FREE), 6d.

PUBLIC DISQUIETUDE.

A SENSE of disquietude pervades all classes. The symptoms of it are evident on every side. We may well ask, however, why this should be? The people are almost unanimous on the subject of the Great War in which we are involved; the Parliament, divided and subdivided, as it is, into parties and factions—or into amorphous and acephalous remnants of both—is yet sufficiently united to begrudge no money that the Government can ask to carry on the struggle, and sufficiently patriotic to support any Ministry that will pledge itself to uphold to the last gasp the national honour in the Crimea, and dictate peace to insolent and overbearing Russia at the cannon's mouth. The press—which Lord John Russell, a disappointed and effete statesman, calls "ribald," because it exposes his incapacity; and which Mr. Bright, a quondam demagogue, brands as 'profligate," because it denounces his Russian sympathies as alike cowardly, unsafe, and dishonourable—keeps up the popular enthusiasm, because it feels the war to be just and necessary, and because it knows that a defeat, or a hasty and baseless peace, would imperil the national safety. In all this it exhibits a zeal, an ability, a courage, and a patriotism which we look for in vain among the more recognised powers of Government. If disasters have in any way befallen us, we have not incurred defeat, or even humiliation. We have destroyed the trade, imprisoned the fleets, invaded the soil, and demolished the fortresses of our enemies. Victory is almost within our grasp, and every day promises to secure it for us; but, notwithstanding all these and a thousand other favourable circumstances;—notwithstanding the unparalleled unanimity of Parliament, People, and Press—there is almost as much dissatisfaction with the prospects of the war and the conduct of the Government, as if some great calamity were impending, or English honour had received a taint from our own hands or those of our adversaries.

The causes of this disquietude are not to be found, as some allege, in the impatience of the people, who, having expected victory at an early period, are disappointed at inevitable delay, and ignorant of the magnitude of the conflict. They are not to be found in any mistrust which the people may entertain of themselves, of the justice of their cause, of the bravery of their fleets and armies, or of the cordial and unwearying support of their friends and allies; for no such mistrust exists Neither are they to be found in their disgust at Austrian treachery or their contempt for German stolidity, although both of these feelings are universal. Where, then, shall we look for them? and how shall we explain a state of things so unsatisfactory and ominous? If the Parliament—with all its faults, dissensions, and antagonisms—be sound on this question, as all its votes in support of the war have shown it to be; and if the People and Press be still more enthusiastic in demanding victory, and unflinching in their readiness to pay the price for it; why should

THE COMMISSARIAT CAMP IN THE CRIMEA, 3RD DIVISION.—(SEE NEXT PAGE.)

there be disquietude? Is Russia too strong for us? Should we not be her match single-handed? Are we not more than her match, with France at our side? And could not France and England defy and conquer not only Russia, but Russia, Austria, and all Germany to boot? The people of France and England believe so, and such a faith is half the battle; even had they no allies in the public sentiment of every civilised nation in Europe, and in the nationalities of Hungary, Poland, and Italy.

The true reason of the existing apprehension is, that the people are suspicious of the governing classes. With an unerring instinct superior to logic, they dread Russian influence in high places, and discover a desire on the part of too many influential persons to end the war, merely because it is inconvenient, and because it agitates in its progress many questions which they would rather let sleep. And not only this: they are afraid that, even if the governing classes are not treacherous, they are either incapable or corrupt, and ready to sacrifice efficiency to nepotism and favour. When they look to the causes of the gross mismanagement in the Crimea during the past winter—when they see the dangerous favouritism displayed in every branch of both services—they feel indignant and dismayed. The glaring case of Sir James Graham's youthful son, promoted by Sir Edmund Lyons over the heads of old and meritorious officers, not because he was pre-eminently deserving above all his compeers and seniors, but because he was the son of Sir James Graham; and the instance, still more recent, of the good-service pension and military honours bestowed upon Lord George Paget, who, having left the Crimea last winter, was to be found in London clubs, and not in Balaclava encampments in the hour of peril and suffering, mainly because he is a Lord, and the brother of a Marquis, and has Court and aristocratic influence to back him, disgust not only the army and navy, but every impartial and sensible man. Things like these force the people to the conclusion that, although our soldiers are brave, and our officers as valiant and high-spirited as those whom they command their bravery and skill are compromised by a bad system. They see, also, that our Generals have not been equal to their duty; that they have been timid when they ought to have been daring; that they have allowed golden opportunities to slip away; and that a bungling, unworkable, incoherent system of administration has rendered useless the bravery of our bravest men, procrastinated victory, and invited defeat. Though the war has not destroyed Sebastopol or Cronstadt, as it might have done, it has destroyed what the nation would have been glad to retain—its confidence in the principal public men who hold, or aspire to, the privilege of governing it. The notabilities of all parties are under a cloud of mistrust. The honest incapacity of Aberdeen and Newcastle, the exposure of which was followed so soon by the defection from the cause which the nation has at heart of men once so trusted and admired as Lord John Russell, Sir James Graham, and Mr. Gladstone, and the evident advances which these men are making to the Peace-at-all-price party, of which Mr. Bright is the spokesman and the leader, have shaken public faith in the whole Ministry. People ask who is to be the next defaulter? and, what is still more dangerous to the public tranquility, they come to the sorrowful, if not the exasperating, conclusion that the war, which might have been long ere this rewarded with one, if not many a splendid victory, may linger for years in unsatisfactory agony, because a great time has not produced great men, and because pigmy statesmen have had the charge of mighty interests which they either lacked the common sense to understand, or the proper spirit to defend.

How long is such a state of things to last? Should we by any of the casualties of war be driven from the Crimea—should disgrace befall us before Sebastopol in consequence of incapacity, or delay—or even of inevitable misfortune do our statesmen think they would have an easy task to govern the British people? Much as the nation desires victory, we should think our governing classes, of all parties and ranks, should desire it still more ardently. If, by any perversity or dilatoriness on their part, a defeat—or even a great reverse—should befall us, instead of a victory, there will come a time of reckoning, which every well-wisher of his country would desire to see averted.

We are glad to see, however, where we least expected to find it a warlike spirit, and a sense of honour under provocation, which shows that a man of theory has human feelings like the rest of us. Mr. Bright—who is by no means of so peaceful a nature as his sectarian education persuades him to believe—resents the imputation of being one of "the mean sneaking cowards" to whom "people out of doors write lectures in the public press." But were it not for the press there would be many sneaking cowards, even in Parliament, although Mr. Bright may not be one of them. The member for Manchester fights valiantly with his tongue in defence of his own honour whenever he imagines it to be assailed; and if nations could fight their battles with the same weapon, and no other, it would perhaps be a happy circumstance. But fighting with the tongue, if long persisted in, generally leads to fighting with swords and guns; and we only notice Mr. Bright's lapsus in this respect to show that in his heart he has warlike tendencies like other people, and does not scruple to indulge in them. But, not being a coward or a sneak himself, he should pause before he advocates, on the part of the great nation of which he is a unit, a policy which in his individual concerns he would blush to adopt. The Parliament will keep or be kept up to the mark, and in acting upon it in this sense the press has manfully done its duty. It will continue to do it, heedless of the attacks which wounded vanity may direct against it. Its "ribaldry" exists nowhere but in Lord John Russell's vindictiveness; and its "profligacy" is a creature born of the warlike sentiment of John Bright, and is non-existent, save in his excited imagination. He may complain as he will of "browbeating" by the organs of public opinion; but we trust the press will pursue the system of vigilant honesty which Mr. Bright designates by that name; and to which we are already indebted for the improved management of affairs in the Crimea—for the appointment of such men as Sir William Molesworth to the very post which he, of all men, is most qualified, by his antecedents and the course of his political studies, to occupy efficiently and worthily; and to which we shall hereafter be indebted, we earnestly hope, for sufficient energy and zeal in high places to organise victory, and thereby to secure it.

THE COMMISSARIAT CAMP IN THE CRIMEA.

Our Artist's Sketch engraved upon the preceding page is accompanied by the following interesting details collected upon the spot:—

The Third Division of the army in the Crimea, under the command of Sir Richard England, consists of the undermentioned staff, regiments, &c., to whom rations of provisions, forage, and fuel, are issued daily:—

Staff and Departments, strength	...	...	...	165
Royal Artillery and Engineers	...	...	...	432
Land Transport Corps	...	...	...	169
1st Royals	...	...	...	514
4th Regiment	...	...	...	662
9th "	...	...	...	460
14th "	...	...	...	691
18th "	...	...	...	618
28th "	...	...	...	372
38th "	...	...	...	843
39th "	...	...	...	747
44th "	...	...	...	536
50th "	...	...	...	373
89th "	...	...	...	555
Total strength	...	...	...	7207

The daily rations per man consist of 1½ lb. of bread or 1 lb. biscuit, 1 lb. fresh meat or 1 lb. salt meat, 2 oz sugar, 1 oz. coffee or 1 oz. cocoa, or ½ oz. tea, 2 oz. rice, ½ oz. salt; ½ oz. of pepper per every 8 men; 1 oz. of lime juice, 1 gill of rum, or porter in lieu at the rate of 2 quarts for every 3 men; together with a sufficiency of charcoal and wood for cooking purposes.

The daily issue of forage in the Division—Barley, 14,000 lb.; hay, 5000 lb.; chopped straw, 5000 lb.

The Commissariat, both in the Crimea and at Constantinople (states the *Times* Correspondent), is making laudable preparations for a regular supply of provisions during the forthcoming winter. Depots are to be established at Izmid and Sinope, and a regular transport service will be organised between the various places on the coast and the port of Balaclava. Sheds for 4000 cattle will be constructed near the Camp.

NAVAL AND MILITARY INTELLIGENCE.

HER MAJESTY has shown her solicitude for the comfort of the invalids from the sea of war at present inmates of the General Military Hospital, Portsmouth, by sending for distribution, among upwards of thirty selected sick and wounded soldiers, a number of silk pocket and neck kerchiefs and check-ties, hemmed by herself and the ladies of the Court, together with arm-slings, &c. These were distributed on Tuesday by the Commandant of the garrison, who expressed the Queen's sympathies with the distress of the wounded. Of the handkerchiefs hemmed by the Queen six were presented to Sergeants Aldridge, Gilbert, Whettam, Herbert, Armstrong, and Tatham; the other recipients were all selected good-conduct men. There are about sixty-two patients in the hospital.

It is stated that the great boon for which the Assistant-Surgeons of her Majesty's Navy have been so long struggling has been granted, and they will all henceforth take up their position as ward-room officers.

LAST week proof was made at Woolwich of a large brass gun completely enveloped in copper wire. The experiment of the invention proved a complete failure, as the gun burst at the breech.

ABOUT 300 men employed in the Lancaster shell factory of Woolwich Arsenal last week refused to continue their work at a reduced salary offered them by the superintendent, and were consequently dismissed. Circulars have been issued by these men, addressed to persons connected with the iron trade, to dissuade them from accepting employment there.

THE FLOATING BATTERIES.—The artificers of Sheerness were busily engaged on Saturday caulking in and making secure all the main-deck ports of the floating batteries, *Glutton* and *Meteor*. They have not yet commenced taking their guns on board. The Hon Maurice Frederick Fitzhardinge Berkeley, one of the Lords of the Admiralty, arrived at Sheerness on Saturday, and inspected both the *Glutton* and the *Meteor*. Their destination is at present uncertain. It is rumoured they are to proceed, assisted by powerful screw-ships, for the Black Sea.

MORE BLUNDERING.—The Government troop-ship *Resolute*, in her first trip to Balaclava, arrived out on the 18th of June, after a remarkably quick run. Having landed the whole of the horses without an accident, she was ordered to be cleaned and made ready to return. In a very short time she re-entered the port, having ample accommodation for a large number of men, and with provisions for six months. Notwithstanding, however, that there were numerous invalids who required removal, she was ordered to proceed to England with great dispatch, calling at Constantinople. At that port the order for immediate departure was renewed, and she arrived in the Mersey without a passenger or a single package on board. She has been in port about a week, and is yet waiting for troops and horses.

AN additional camp is now being formed on Woolwich-common. Workmen are employed in cutting out and laying the foundations for the erection of wooden huts. The officers' huts are to be in front, and the rank and file in the rear. Each compartment will hold 24 men. Huts are to be put up to accommodate 1008 rank and file.

IT is in contemplation to establish camps of instruction on Barham Downs, within a few miles of Canterbury, and on Penenden-heath, near Maidstone. The camp on Barham Downs is intended to accommodate about 4000 troops—cavalry, infantry, and artillery; and that on Penenden heath, 2000. The cavalry will be from the neighbouring depôts, and the infantry principally militia regiments.

THE 2nd Life Guards, under the command of Colonel Williams, was reviewed at Windsor on Monday, by Major-General the Earl of Cardigan. The regiment marched into Windsor Great Park at nine o'clock in the morning, and after being formed into review order by Lord Cardigan, the general salute. He arrived on the ground at ten o'clock, attended by Colonel Cotton, Brigade Major; and Major Maxse, Aide-de-Camp. His Lordship expressed his satisfaction at everything he had witnessed. He rode his light bay charger which carried him in the memorable charge at Balaclava.

EMBARKATION OF CAVALRY FOR THE SEAT OF WAR.—The embarkation of the 124 men and 7 officers of the 8th Hussars, 1st Dragoon Guards, and 4th Light Dragoons, took place on Monday, at Liverpool—the *Arabia* being brought alongside the great Landing Stage for the purpose. The *Himalaya* steamer, after receiving on board the 12th Lancers at Southampton, will embark 276 men and 12 officers of the 1st Dragoon Guards, and 154 horses; and 16 men of the 2nd Dragoon Guards, and 40 horses, at Liverpool.

THE attempt to induce the men of the Dublin Police to volunteer their services to the brigade of Fort Guards has proved a failure. The inducements held out, it appears, were not sufficient to warrant the exchange from a higher to a lower scale of payment, the emoluments of a police-constable of the lowest class being nearly double the pay of a private in the Guards.

PRESENTATION OF COLOURS TO THE QUEEN'S OWN LIGHT INFANTRY.—The ceremony of presenting new colours to the Queen's Own Light Infantry, or 2nd Regiment of Tower Hamlets Militia, took place on Wednesday, on Woolwich-common, where the regiment is now encamped. About twelve o'clock Major-General Whinyates, commandant of the garrison, arrived upon the ground with his staff, and proceeded to inspect the regiment, which is now 700 strong. Shortly afterwards the Earl of Wilton, G.C.H., the colonel of the regiment, arrived upon the ground, accompanied by the Countess of Wilton, Lady Catherine Egerton, and other members of his Lordship's family. The regiment, having been drawn up in line, received the noble and gallant Colonel with the honours due to his rank, and was then ordered by Lieutenant-Colonel Dickson to form three sides of a square. A military altar having been made of the drums of the regiment, the colours were placed upon it, and, after a strain of solemn music by the band, the rev. Chaplain of the garrison advanced and consecrated the colours in an appropriate prayer. The old colours, which, it is believed, are as old as the regiment itself, and which presented a most tattered appearance, were brought up by the two ensigns, and the ceremony of presenting the new colours was performed by Lady Catherine Egerton, who expressed her confidence that, under all circumstances, whether at home or abroad, the regiment would ever act as loyal men. The Ensigns, kneeling, received the colours from her Ladyship's hands; and Lieutenant-Colonel Dickson addressed her Ladyship in a suitable speech. After the presentation of the colours, the officers of the Queen's Own Light Infantry gave a *déjeûner* to the officers of the Royal Artillery, the officers of the Royal Bucks Militia, which regiment is also stationed at Woolwich, and a brilliant assemblage of ladies. The *déjeûner* was given in the spacious and beautiful dining-hall of the Royal Artillery, and was remarkable for the lavish provision of the choicest delicacies and wines. After the repast the company returned to the camp, where the soldiers of the regiment, who had partaken of an excellent dinner, were amusing themselves with climbing a pole for a leg of mutton, and other sports. The arrival upon the ground of the band of the Royal Bucks and that of the Queen's Own suggested the propriety of an *al fresco* ball, and officers and ladies soon threw themselves into the gay whirl of waltz and polka.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(*From our own Correspondent.*)

PARIS, Thursday.

Contrary to the report mentioned in our last, it appears that many decorations, civil as well as military, will be accorded on the 15th, the fête of the Emperor. The origin of the rumour was the decision of his Majesty that no public rejoicings should take place on that day, in order that the money usually devoted to the fêtes and decorations should be bestowed on the families of the soldiers who had fallen in the Crimea. This resolution is to be rigorously observed; for not only are there to be no public demonstrations in the capital on the occasion, but the Préfets and other public functionaries have received orders not to give balls, as has hitherto been the custom observed, and to devote the sums these would employ to the general fund.

In addition to the magnificent fête to take place at Versailles in honour of our Queen, there is to be a splendid ball at the Tuileries and another at the Hôtel de Ville. It is said, also, that there will be three grand *soirées de spectacle*—one at the Grand Opéra, for the first representation of the work of Prince Ernest de Saxe-Gotha; the second, at the Théâtre Français, for which occasion Mdlle. Rachel will defer her departure to America; and a third at the Opéra Comique, on which occasion "Haydée" will be performed. It is believed that the Empress will proceed for a few days to the Imperial residence at Biarritz before returning to Paris, where she is expected early in August. Her Majesty purposes superintending in person the conclusion of the preparations for the visit of Queen Victoria, which are already well advanced.

The Government loan is the great excitement of the day. Such are the crowds that flock to obtain the numbers that some remain not only all day from seven o'clock in the morning, but others actually come with a chair and a candle, and quietly dispose themselves *to pass the night*, in order to be first at the opening of the bureaux!

There is a very perceptible diminution among the visitors to the Exposition. On the five-franc day (Friday) the place is almost wholly deserted, except by those who have season tickets. In order to attract visitors, it has been arranged that on that day the band of one of the regiments of Guards shall play until five o'clock. Under the direction of the Prince Napoléon and the Commission of the Exhibition, a number of trains, at reduced prices, have been established on the various railway lines, to enable the working classes of the country to visit the Exhibition. The Palais des Beaux Arts is almost deserted; and yet this collection is certainly the finest assemblage of modern pictures in Europe. We cannot but think the neglect is, in a very great degree, owing to the situation of the building and to the total absence of any direct mode of conveyance to it. Placed at the very end of the retired Allée des Veuves, out of sight and out of the line of all general communication, it is a positive fact that, up to this day, many persons are not acquainted with its position, and there is no set of omnibuses or other public carriages especially employed to convey visitors thither, or even to afford them any facility or convenience. The natural result is that few but those who are really amateurs take the trouble to put themselves out of the way to pay the building a second visit; and, in a first, nothing but a general impression of acres of wall, covered with yards of painted canvas, can remain. Reader, if you go, let us especially recommend the Belgian Gallery to your notice. There are, among many good and more mediocre productions, certain landscapes (two especially, "Moorish Ruins," and "The Entrance to a Forest," by Bossuet) that belong to a new era in painting. Nothing that we know in any other modern school presents the same reality, the same vigour and relief: it is nature taken in the fact.

Last week took place at Rueil, near the Malmaison, the residence of the Queen Marie Christine, the melancholy ceremony of the interment of the young Duc de Tarancon, eldest son of the Queen, who expired after a severe illness.

The Italian Opera here has been taken by a M. Calzado, who, wisely considering that the possession of some millions of francs is not in itself a sufficient guarantee for success in such an undertaking, has engaged the services of M. Salvi, a tenor of considerable merit, and a man fully versed in the mysteries of management, to superintend the operation of affairs. M. Regnal, in resigning his functions, has handed over to his successor his engagements, on the list of which stand Graziani, Lucchesi, Rossi, and Madame Borghi Mamo; to these are to be added Madame Tedesco and perhaps Frezzolini; Madame Boccabadati, and several other new aspirants for public favour. "La Ristori" has obtained the authorisation to organise a *troupe* of her compatriots, who are to play here, under her direction, three times a week, at the Italian Opera, alternately with that of M. Calzado, during the months of February, March, and April. Moreover, the great tragedian is to perform in February, at the Théâtre Français, a *rôle* especially created for her, *Catharine de Medici*; and, with the liberality and amiability that so peculiarly distinguish her, she has proposed to perform at this theatre one night a week gratis. These *procédés* might afford a useful hint to more than one other of the stage celebrities who take excellent care that not a tone or a gesture shall profit the public but what the public shall pay largely for. Mdme. Ristori, however, is a great artist in the high and true acceptation of the term; with her it is art for art's sake, not for money's worth. The grand *grandissime* piece at the Porte St. Martin, Paris, is the most magnificent *pièce de spectacle* it has ever been our lot to witness. Some of the scenes are dazzling; nothing that decoration, *mise en scène*, costume, or number of performers can produce, is spared, and some of the parts are remarkably well sustained by Bocage, Luguet, and Mdmes. Luna Mabire, Guyon, and Laurent.

THE POPE AND THE SPANISH GOVERNMENT

The most important event of the present moment at Madrid is the rupture of the relations between the Spanish Government and the Pope. The Nuncio, Monsignor Franchi, has not only left Madrid in consequence of express orders received from Rome, but his secretary and the other members of his legation have also left with him. The Spanish Government glorifies itself with the title of being exclusively "Catholic," and as one of the consequences of that honour it pays the salary of the Envoy whom his Holiness the Pope thinks proper to send as his representative, and Monsignor Franchi did not forget to send to the Treasury for his salary up to the very day of his departure, and the money was duly paid to his agent, the Council of Ministers having previously taken a resolution to that effect.

News arrived at Madrid on the 21st inst., that the Infante Don Sebastian, with Estartus and other Carlist chiefs, had entered the Spanish territory from France, but was defeated by the Queen's troops, and obliged to regain the frontier.

AMERICA.

The steamship *Baltic*, which left New York on the 11th inst., arrived at Liverpool on Sunday.

President Pierce had returned to Washington. In political circles the Spanish question, which had been revived in the State Department by a speech of Mr. Jefferson Davis, in Mississippi, was the all-engrossing one. This gentleman is stated to have observed that he would, on the first pretext, raise the standard of the United States in Cuba, and to have expressed an opinion that while all the Powers of Europe were at war was the moment for the work. It is said that, although Mr. Marcy had prepared all the documents for settling the relations amicably, the President was in doubt whether to go with him and the North or with Davis and the South. Captain James Smith, who was tried and found guilty in the United States Circuit Court of trafficking in slaves, had been sentenced by Judge Ingersoll to pay a fine of 1000 dols., and to be imprisoned for twenty-one months.

By the arrival at New York of the steam ship *Northern Light* with 823,972 dollars in gold dust on freight, and the steam-ship *Illinois*, from Aspinwall, with 839,613 dollars in gold dust on freight, advices have

been received from California to the 16th of June. The prosperous mining town of Auburn had been almost entirely swept away by fire. The loss was estimated at £250,000. A fire had also occurred at San Francisco, which destroyed property to the amount of 45,000 dollars. The mines are reported as yielding plenty of gold to the diggers in every part of the State, and all classes of mines are doing better than they have ever before done in any period. In California business was far from being brisk or prosperous, but, in consequence of the reported prosperity of the mines, a better feeling prevailed among the merchants.

At Cuba nothing new of a political nature had occurred. The public mind was entirely tranquil respecting Filibuster movements. Reinforcements of troops had arrived at Havannah.

From Mexico we learn that Santa Anna and the whole of the capital were in a state of gloom. One writer ascribes the speedy fall of the Dictator. Advices from Brownsville (Texas), dated the 24th June, confirm the report that a revolution against Santa Anna had become truly formidable, and it was confidently expected that his resources could not long uphold him against the patriotic efforts for liberation which were commenced in Monterey. The Government troops stationed at Mier and Guerrero had abandoned both places to General Carvajal, who had crossed over from Texas, and was followed by General Garza and other leaders, Major Potter, commanding at Fort Brown, had rendered the most powerful effort to capture some of the insurgents. Two thousand men had been left to garrison Monterey, and a detachment was sent out to occupy the mountain passes, and attack any of the Government troops they could find near. Cardenas, one of Santa Anna's commanders, had broken his parole, and associated himself with the Seminole Chief "Wild Cat." General Woll still resided at Matamoras. It was rumoured that Tampico had revolted against the Dictator

In Peru the approaching meeting of the Constituent Assembly engaged public attention. It was dreaded that a political rupture would soon take place between Castilla and Elias. General Castilla had issued a decree regulating the standard of the currency. Bolivia has maintained a more active trade with Peru. Senor Lenares stood a fair chance of gaining the Presidential election.

Advices from New Granada to June 30 state that the working of the new Constitution was anxiously watched, and the papers advocated the right of foreigners to a full participation in its benefit.

From Central America we learn that affairs still continue in a disordered state. Colonel Walker and his party, from San Francisco, landed at Realejo, and, after a severe struggle, overpowered the Castellian forces, who added 200 men to his force, it is stated that on the following night he took San Juan del Sur without resistance. Another report states that Colonel Walker had been defeated. The British ship-of-war *Buccoret* was at San Juan, or Greytown, protecting the Mosquito flag.

Advices from Hayti to the 29th of June state that a very favourable change had taken place in the islands since the departure of General Count de Dalmarie, who had aspired to the succession of the empire of Soulouque, and with a view to the object had excited a revolutionary movement among the mountaineers. The feeling of the towns, however, is so strong in favour of Soulouque, that the demonstration failed, except so far that it produced a total stoppage of trade, which we are glad to say is now fast reviving. It is generally reported in Port-au-Prince that amicable arrangements will speedily be made with the Spanish part of the island, the effect of which will be to unite the whole under the flag of the Emperor Soulouque.

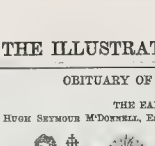
THE HYDE-PARK RIOTS.—COMMISSION OF INQUIRY. Last week we gave a portion of the evidence in this important inquiry, from which it appeared that all the witnesses were agreed as to the violent conduct of the police. Up till Tuesday the evidence was of the same description. A number of the witnesses were highly respectable, and their general testimony was that the police had acted in a very shameful manner. On Tuesday Sir Richard Mayne was examined at length. He said he had received no written orders from the Government. He had communicated with him, but there was nothing particular in the conversations beyond the orders for issuing the notice. The orders were not conveyed to him in writing, as it was not the usual practice to do so. He received no special instructions, except in reference to issuing the notice, cautioning persons from attending the meeting. No other precautions were given to prevent carriages from going into the Park. Arrangements were made on the 30th of June to prevent a meeting from taking place, and on his return from Dyrne service on the 24th of June he was surprised to see the turn things had taken, by the people hooting at the carriages as they passed—a demonstration that he considered to be most disgraceful. No orders had been given to stop carriages going into the Park. The only object was to stop a meeting. Noisy conduct continued for two hours and a half on the 24th of June. It was a most tumultuous concourse of people. Within three hours he could have brought in 3000 policemen, but at a shorter notice he could not have brought them in. He could have brought in two or three hours 2000 men. He thought it right to go into the disgraceful proceedings on the Sunday, but had not a sufficient force at hand to do so, as the men were from home taking their amusements. He had power to send for 400 or 500 policemen, but did not do so under the circumstances. With reference to the charge brought against the police, that they had made sorties against the peaceable crowd, Sir Richard Mayne said if forty police were order'd to make a rush on a crowd of people, he had nothing to do with it: the responsibility would rest on the superintendent on the ground who gave the order. He had examined the ground on Monday, on the north side, and he felt sure the ground was such that a crowd could not run, and could not walk up, but must make a rush together to the top (Disapprobation). Mr. Mitchell. But if it was difficult for the police to get up, must it not have been equally difficult for the people to get away. Sir R. Mayne said that was not so, as the people were on the top of the ascent. (Hisses and disapprobation). The police could not get up these places without making a rush to do so, and could not walk up quietly. Before a rush was made on a body of people it was best to give them warning, which should be done quietly. He would never tell policemen to rush among a crowd, as any rational man could do that. He thought it very injudicious on the part of a superintendent to answer any impertinent observation. He thought it highly improper for a superintendent to whip ladies, or to swear while giving his orders, but he did not admit that either had been done. A number of respectable witnesses were afterwards examined in justification of the police. Their evidence was to the effect that the crowd is very much inclined to quarrel with the police, and that no undue violence had been used by the latter in maintaining order

PERILOUS FLOOD IN THE FLEET SEWER.—About two o'clock on Wednesday, a torrent of water broke suddenly into the works now in progress for deepening and rebuilding the Fleet sewer, opposite Clarkenwell. The ruins of the present work had swollen the ancient Fleet rivulet, but up to the instant of peril no danger was apprehended. Either an unusual discharge from the Hampstead Highgate, or other reservoirs, or heavier rains than fell about Clerkenwell, had taken within the area of the north-west drainage, and sent down an unexpected flood. From thirty to forty regular labourers, were at work in the dry channel,—no means of escape but by one or two narrow ladders—when suddenly the labourers highest on the planks cried out that the flood had risen above the waist. The men rushed to the ladders, leaped upon the fresh and frail walls, or clung to planks, helping one another, or crying frantically for help. The open archway was within a few yards, and the next order was to let the Thames, the mother of a mischief, take care. The torrent dashed underneath the clinging workmen into the black throat of this sewer, and every man knew that should the weir give way, and the pent up water, which were lodged backward towards King's-cross fields, fall, they would be swept with all they clung to irrecoverably to destruction. Fortunately the weir did not give way. The men above assisted the men below, and they stood in safety with many strangers, attracted by their cries for help, to see the flood washing away the new brickwork, but otherwise doing no harm.

THE WINTER CAMPAIGN IN THE EAST. The Commissariat, both in the Crimea and at Constantinople, is making laudable preparations for the severity of provisions during the coming winter. Depots are to be formed both at Scutari and Scrapa, and a regular transport service will be organised between various places on the coast and the port of Balaklava. Sheds for 4000 cattle will be constructed near the Camp. The chief difficulty will be in the hard transport, which will require all the care of the authorities to render it complete when the season of mud and rain sets in. The railway is not as family had as could be wished. The late rains have thrashed away in several places, the sleepers being merely placed on the soft, yielding soil, which after the heavy rains of November becomes a mass in which horses' hoofs soon sink from the knee to the fetlock or in inches. A Commissariat should have its own transport at its own command; but under the actual system requisitions must be made on the Land Transport Corps, who even in the present summer weather often cannot supply mules, other requisitions having been made on them for carrying up ammunition. Some persons go so far as to prophesy for the army as great an amount of suffering in provisioning as was the case during the past calamitous winter; but the very fact that these dangers are foreseen and discussed is a warrant that they will not recur. At any rate, the crushing burden of overwork will not press on our men; for we have the French on all sides of us to take part of the labour of the trenches. A singular fact elicited by Sir J Macneil, but known to all acquainted with the army, is—that during the winter every man cooked his own food. The cold and weary soldier, creeping back from the trenches, found his junk of salt meat, which he must light a fire to cook, often with wet wood, probably the work of more than an hour. The consequence was that he often devoured the food in its raw state, or contented himself merely with rum and biscuit. A better system has begun to prevail with regard to cooking, which, it is to be hoped, will be developed and perfected before the return of inclement weather.—*Letter from the Camp, July 10.*

OBITUARY OF EMINENT PERSONS.

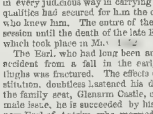
THE EARL OF ANTRIM.



HUGH SEYMOUR M'DONNELL, Earl of Antrim and Viscount Dunluce, in the peerage of Ireland, was the second son of Charlotte (in her own right) Countess of Antrim, and her husband Rear-Admiral Lord Mark Robert Kerr, and was born the 7th August, 1812. He succeeded his mother on the 25th October, 1835; he married, the 3rd May, 1836, Laura Cecilia, fifth daughter of Thomas, third Earl of Macclesfield, by whom, who survives him, he leaves issue a daughter, the Lady Helen Mara. The Earl of Antrim never took an active part in public affairs; and the portion of his life which he spent in Ireland was passed in comparative retirement. He had travelled much upon the Continent, and was resident there, particularly in Germany, for considerable intervals. Since his accession to the title and estates he had shown, upon many occasions, that he had descended into worthy hands. As a landlord, he not only effected considerable improvements on his property from his own means, but at all times evinced a willingness and anxiety to foster a spirit of progress among his tenantry, and to assist them in every judicious way in carrying it into practice. These and other excellent qualities had secured for him the cordial affection and warm attachment of all who knew him. The estate of the family estates did not come into his possession until the death of the late Edmund M'Donnell, Esq., of Glenarm Castle, which took place in May 1852.

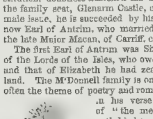
The Earl, who had long been an invalid, unfortunately met with a serious accident from a fall in the early part of last spring, by which one of his thighs was fractured. The effects of this casualty, acting upon a delicate constitution, doubtless hastened his death, which occurred on the 18th inst., at the family seat, Glenarm Castle, county Antrim. As his Lordship leaves no male issue, he is succeeded by his next brother, Mark, a Commander R.N now Earl of Antrim, who married, in 1849, Jane Emma Harriet, daughter of the late Major Macan, of Carriff, county Armagh, and has issue

The first Earl of Antrim was Sir Randal M'Sorley M'Donnell, a descendant of the Lords of the Isles, who owed his elevation to James I., in whose reign and that of Elizabeth he had zealously promoted the Royal interests in Ireland. The M'Donnell family is one of great antiquity, whose deeds have been often the theme of poetry and romance. Sir Walter Scott has mentioned them



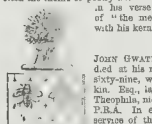
in his verse; and Shakespeare, in "Macbeth," speaks of "the merciless M'Donnell from the western isles, with his kerne and galloglasses."

JOHN GWATKIN, ESQ

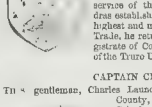


JOHN GWATKIN, Esq., of Parc Behan, Cornwall, who died at his residence, on Tuesday, the 10th inst., aged sixty-nine, was the second son of Robert Lovell Gwatkin, Esq., late of Kilkow, Cornwall, by his wife, Theophila, niece of the celebrated Sir Joshua Reynolds, P.R.A. In early life Mr. John Gwatkin entered the civil service of the Hon. East India Company, on the Madras establishment; in which sphere, after attaining one of the highest and most responsible positions at the Board of Trade, he returned to his native country. He was a magistrate of Cornwall, Chairman of the Board of Guardians of the Truro Union, and a Director of the Cornish Railway.

CAPTAIN CHARLES L. SANDES



THE gentleman, Charles Launcelot Sandes, Esq., of Indiaville, Queen's County, was born in May, 1791. Having entered the British Army, he was formerly of the Scots Fusilier Guards, and served with his regiment in the Peninsular War from 1811 to 1814, and he was present at the seven sieges and several actions, for which he had a medal and six clasps—for Salamanca, Vittoria, Nive, Nivelle, St. Sebastian, and Ciudad Rodrigo He acted as Adjutant for several years. At the peace in 1815 he retired from the service, and from that time till his death managed the immense estates of his brother-in-law, Sir C. H. Coote, Bart., M.P., by whose tenantry he was lately presented with addresses, and splendid pieces of plate, to the value of several hundred pounds. Captain Sandes was the eldest son of the late Brigade Major Lancelot Charles Sandes, of Kilravin, Queen's Co., from whom he inherited the ancient family estates in Limerick and Kerry. The gallant Captain, whose death has recently occurred, leaves a widow, Mary, only sister of Sir Charles H. Coote, Bart., two sons and two daughters. The daughters are Mrs. Trench and Mrs. Moore, of Cremorgan



WILLS, PERSONALTY, AND CHARITABLE BEQUESTS.—The will of the Right Hon. David Montague, Baron Erskine, has just been proved in London. The Right Hon. Percy Clinton Sydney, Viscount Strangford in Ireland, and Baron Penshurst in England, G.C.B., G.C.H., K.T.S., F.S., personalty in England, £6000. Lieut.-Colonel John Bradish, £14,000 Stephen Brown, Esq., Marlborough, £70,000. Henry Wilkinson, Esq., Enfield, and Clapham commons, £120,000 W. Colquhoun, Esq., Sunbury, £35,000. Thomas Wood, Esq. (ex-Alderman), Guildhall, Jamaica-room, £3000 personalty The late William Bennett, Esq., of Newport, died possessed of £120,000 personalty, and has bequeathed £2400 to charities:—The Commissioners' Benevolent Society, £1000; Free Hospital Grey's-inn-road, £100; St Bartholomew's, £500; Parish-school St. Andrew's, Holborn, £300; Deaf and Dumb Asylum, £500; Blind Asylum, £500; and £1000 to the Churchwardens of Newport, the interest to be given to five old men and five old women as are deserving The late Arthur Guinness, of Dublin, besides his large estates in Ireland, has left £3000 personalty in England, and bequeathed £200 to each the following institutions:—The Belgrade Female Orphan School, Meath Hospital, Long-lane, the Retreat, Drumcondra-road, Dorset Nourishment Dispensary, St. Catherine's Almshouses, Jackson's-alley, and St. Catherine's Parochial-school

FRENCH MILITARY DECORATIONS. The *Moniteur* of Sunday filled nearly six columns with names of non-commissioned officers and privates of the army of the Crimea whose gallant conduct entitles them to the Cross of the Legion of Honour, which indicates, or is presumed to indicate, the possession of merit, civil or military, is regarded with justifiable pride by the wearer, to whatever nation he belongs. It is not to be found among those who, [illegible] are ashamed of their country, and not to be surprised that it should be otherwise; and I fear that some of those who affect to regard it as a puerile weakness would not do so if they had the same distinction. I am not certain that the decoration of the Bath would be set at all weakened by private soldiers and non-commissioned officers sharing more largely in these honours, or that if the name of the drummer who, amid a shower of balls, and with death almost [illegible] the ranks, was conferred in the *London Gazette* as in the *Moniteur* of Sunday, that it would be followed by universal anarchy would necessarily follow. It is argued that there is some merit in proposing that [illegible] decoration for the brave shall be open to English military men in the Crimea, as it [illegible] to French [illegible]. It would not be the least effectual means of cementing the union and exciting a glorious emulation between the armies.—*Paris Correspondent of the Times.*

Two atrocious wife-murders have been perpetrated in the county of Donegal within the last few days. In both cases the brutal husbands were under the influence of drink.

THE KING OF PORTUGAL AT NAPLES.

(From a Correspondent.)

On Wednesday, July 4, his Majesty the young King of Portugal, accompanied by his brother, the Duke of Oporto, arrived in Naples, on his long-expected visit to his Majesty of the Two Sicilies. The day being most brilliant, nothing could exceed the beauty of the scene. To all the attractions of the most lovely nature were added the graceful decorations of Italian art: and the immense crowds who were there assembled greatly added to the effect of the *coup-d'œil*—an effect which was vastly increased by the evident sympathy with which they regarded the youthful Sovereign. In the Illustration, on the left, is the singular old building known in Naples indifferently as "Fanata" or the "Pancaolatella": whilst close by it is the elegant Pavilion which was erected close to the place of landing. On the top floated the Royal Standard and Neapolitan and Portuguese banners; and flowers and rich hangings all contributed to the decoration of this fairy scene. On the right is the port, all the shipping in which were set out in holiday trim—flags flying, and the yards manned with the sailors. At the entrance to the port is *La Reine Hortense*, the elegant steam-yacht of the Empress of the French, which she has lent to the young King of Portugal for the completion of his summer trips. In the distance rises up Vesuvius, which still smokes, as if anxious to remind the oblivious people on his sides of his existence, whilst the lovely coast of Castellamare and Sorrento stretch away till lost from view. Shortly before midday the Coast of Aquila, with other distinguished personages, went on board the Imperial steamer in a Royal barge, and, after complimenting his Majesty on his arrival, conducted him to land. On ascending the steps of the Pavilion, which were richly carpeted, he was met and welcomed by his Majesty of the Sicilies, and the Duke of Calabria, the hereditary Prince, attended by their respective suites. After a delay of a few minutes, the two Sovereigns left for the royal palace in a carriage drawn by six horses, as did also the hereditary Prince and the Duke of Oporto. The carriages were surrounded by the Cavalry of Body-Guard, whilst a battalion of Royal Guards, with their band, and a squadron of Hussars lined the Strada Pilliero to the landing-place. Altogether, the scene was as fair as any we recollect to have seen in Naples, and, lighted up as it was with the bright sun of Italy, amidst the music of military bands, and the firing of cannon, and banners floating in all directions, and in joyousness of thousands who thronged the streets or else covered the sea in their tended barks, it made an impression on our imagination which we can ill describe.

The young Sovereign has scarcely been announced at this Court with high honours, and persons are speculating as to the probability of a marriage between his Majesty and the eldest daughter of King Ferdinand. The programme for the entertainment of his Majesty was of a most interesting character, and has been carried out to the letter. The first day of his arrival was devoted to receiving visits, whilst the evening was spent in driving on the lovely road by Posilippo, followed by a *dîner en famille*. On Thursday, 5th, his Majesty visited the Monastery and Church of St. Martin, the Cathedral Church of St. Gennaro, and the Museo-Borbonico. In the evening there was a grand diplomatic dinner at the Royal Palace, after which the Royal party adjourned to the Theatre of San Carlo, which was most brilliantly illuminated on the occasion. Friday was devoted to visiting the Royal establishment for making machinery, called the Pietrensa, as also Ercolano and Pompeii. The Royal party dined strictly in private, and in the evening visited the Teatro Fondo. On Saturday the two Sovereigns, with other Royal and distinguished personages, visited the Blue Grotto in the island of Capri, and having gone half round it, in order to see the picturesque and magnificent scenery, coasted along to Castellamare, whence they returned to Naples by railway. In the evening there was a grand State Ball at the Royal Palace, after which the King left for Caserta. On Monday, 9th, July, there was a grand review; and on Tuesday his Majesty of Portugal and his brother left in the *Reine Hortense* for Palermo; whilst at the same time King Ferdinand left for his retreat in Gaeta.

H. W.

MR. W. FARREN.

MR. WILLIAM FARREN, whose ultimate triumph we last week recorded, was, like most great artists on the stage, a scion of a theatrical family His father was a tragic performer, who acted with Garrick at Drury Lane, and under Mr. Harris at Covent Garden. His elder brother was also upon the boards, and held the office of stage manager at the Haymarket. Mr. Farren was born in 1787, and, it is said, inherited a fortune of several thousand pounds, which, however, did not prevent him from working in the mines at Newbridge, in Glamorganshire, as a mineralogist. Thence we find him in 1808, at Plymouth, supporting the characters of *Lovegold* and *Sir Adam Contest*. It would thus appear that Mr. Farren had discovered his especial *forte* from the beginning; and, indeed, he soon after secured an engagement at the Haymarket, the theatre of First Old Men.

The class of characters included in this category is more numerous and various than that which Mr. Farren ultimately adopted. Old Man was too wide and generic a term for his peculiar talent; a species of the kind implied something less sanctified and more worldly. Not the rough man of nature, in all his varieties, but the artificial man of society, in his gentlemanly and aristocratic relations—this was the peculiar individuality for which Mr. Farren was eminently perhaps, as some have thought, exclusively—fitted. The public soon began to see clearly and discovered his fitness. At this time, too, he had evidently shown his artistic qualifications, for we find him at once elevated to the rank of stage-manager in the theatre

A natural aptitude for histrionic representation is one thing; a capacity to apply it as an art is another. The artist is not a mere mimic, nor a mere enthusiast; but one who has his feelings under control, and imposes on them a form originating in an idea, poetical in its essence, as the product of an individual mind, whether comic or tragic in its manifestation. This form sometimes begets an obvious mannerism, which in all cases is the boundary limit of self-defined genius, and is what we call the artist's style. There is nothing an artist is more blamed for than this; yet there is nothing for which he is more frequently praised. Mr. Farren has not escaped this especial censure. Mr. Oxberry charges him with being "a confined actor;" adding, "the *John Bulls* simile of *the red lion* was very appropriate;" since the actor was "always contracting features of one performance," and was "one of the many who never dream of fitting themselves to a character, but are content with fitting a character to themselves. His *Sir Pryer Oldcrowart*, *Sir Bashful Constant*, *Sir Adam Contest*, *Sir Fretful*, &c., were only so many modifications of the *Lord Ogleby*." The truth on this is, that all, including *Lord Ogleby*, were modifications of one and the same ideal of the *Old Gentleman*, which formed so essential a portion of Mr. Farren's genial idiosyncrasy as an individual. In this he stigmatised from Bartly, Dowton, and Munden, who, in characters fitted for them, were as superior as they were inferior to him in *Oglehy*, *Sir Peter Teazle*, *Sir Anthony Absolute*, and the *Beau Shatterley*. Among his successful assumptions may also be mentioned that of *Frederick the Great*, a character part, which showed that it was possible for him occasionally to extend his sphere; but at other times, as when he attempted *Shylock*, it was evident that nature and taste had assigned him a place which he could not quit with impunity.

Mr. Farren was long the contemporary of our greatest modern actors —Kean, Young, Macready, Harley, T. P. Cooke, and Mrs. Glover; and must, in his line, be regarded as their equal, and nothing less. His history, too, is the history of the stage for the last forty years; and his connection with it embraces a point of transition in its fortunes not a little remarkable. When it became evident that the two patent houses could no longer maintain their exclusive possession of the legitimate drama, Mr. Farren, it is said, was suddenly illuminated with an idea for which he has been greatly condemned, but which is nevertheless the only true one in relation to theatrical management. He felt that what those houses wanted, in order to the continuance of their influence, was a new and successful drama The notion was received with derision; but to its plumbers may Se attributed the ruin of our two great houses. Mr. Farren subsequently became manager of the Strand and the Olympic, where he had an opportunity of carrying out his favourite project, and where he produced a large number of new pieces—to which the present prosperity of those houses is in no inconsiderable measure indebted, inasmuch as the former laid the basis of the reputation which the latter now enjoy.

During his management of those theatres, Mr. Farren produced an infinite number of translations from the French, and increased thereby his own *repertoire* of characters. Mr. Farren had a liking for new parts, which is always a good sign in an actor, and throughout his career there were dramatists who were delighted to suit him, and were well rewarded for their devotion; for never did any actor take greater pains to attain the perfection of finish in the embodiment of a dramatic conception. A contemporary has summed up a few of these in a pregnant sentence:—"*Squire Broadlands*, the type of a hale, hearty, prejudiced, domineering, good humoured lord of the soil; *Michael Perrin*, the representative of unsophisticated goodness, in the person of a French curé; *Uncle John*, rejoicing in the belief of his own vigour, and therefore in a good-humour with the world around him; *Nicholas Flam*, the wily, plausible lawyer; and *Uncle Foozle*, the decidedly

ARRIVAL AT NAPLES OF THE KING OF PORTUGAL.—(SEE PRECEDING PAGE.)

old man, prone to drop asleep, and garrulous when waking"—in all these Mr Farren was inimitable.

In the readiness which Mr. Farren manifested to suit himself to the requisitions of a new era, he gave proofs of a practical wisdom that surprised not a few of his theatrical acquaintance. The drama is a living emanation from the mind of the age, and in every age, where full liberty is permitted to its production, will put forth new phases more and more fresh and vigorous. What is old, however excellent, must in turn be obsolete; hence the Greek and Roman drama, notwithstanding its high claims to immortality, can find no footing on the modern boards, save as an archæological curiosity. The simple and natural relations of the elder drama are exchanged, with those of social life, for the more intricate and artificial modes which perplex and embarrass civilised man at the advanced periods of his progress. Our sorrows and joys become more refined and ideal, more subtle and metaphysical, as the outward obstructions, which made the adventures of the past, are removed, and the nicer and more domestic complications of the highly educated succeed. Hence the

MR. W. FARREN.—FROM A DAGUERREOTYPE BY MAYALL.

tendency to subjectivity which beset modern poetry and the drama, and deprives both of the bustle and interest of action.

There is, however, an action of a deeply-interesting and soul-stirring nature to which the true dramatist will penetrate; and a state of manners, not yet exhibited, which will hereafter be productive of novel species of stage effect. The poet of genius, whether he write in prose or verse, in one act or nine, will bring forth this action, will array these manners, in the works of dramatic art which will assert their originality by being essentially modern both in their spirit and form; and will secure their permanent success by appealing to the living public in the language that it most easily understands.

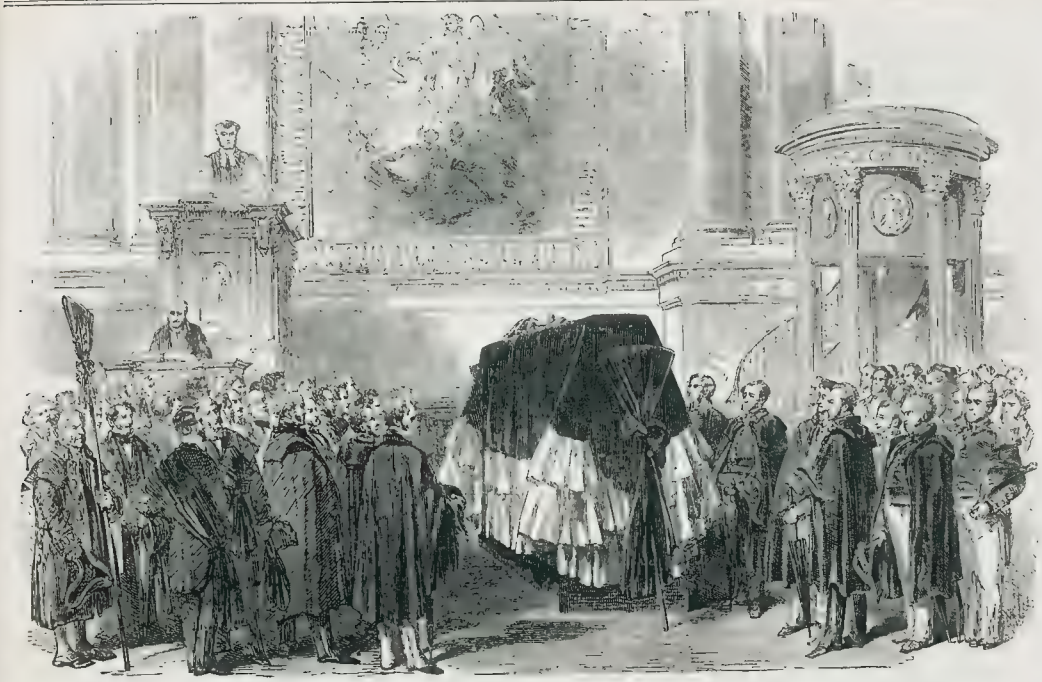
During Mr Farren's career Time rung many changes in his great watch-tower, in regard to plays, players, and playhouses. There were the classicality of the Kemble school, the indefiniteness of Kean, the romanticism of Macready, and the colloquialism of Mathews. Mr. Farren, we believe, at last, was an advocate and disciple of the latter. During the Vestris management at Covent Garden he performed the *Spanish Curate* of Beaumont and Fletcher with exquisite judgment and taste. The change in the law, and the surprising turn consequently taken in the fortunes of the drama, as manifested by the spectacular revivals at Sadler's Wells and the Princess', were not permitted by Mr. Farren to interrupt the even tenor of his way. He proceeded to produce new pieces, and to illustrate them with sufficient appointments, but made no attempt to sacrifice the dramatic to the pictorial. He depended on interesting plays and competent players, and as he had risen by the art of acting himself, so he was proud to cherish it in his own theatre as a manager, and made his stage rather dependent on the performer than the scene-painter. This still continues the plan on which the Olympic is conducted; and this also appears to be the aim of Mr. Buckstone at the Haymarket. The progress of reform in theatrical matters has been rapid and decided.

BOMBARDMENT OF MALLAGHEA.

IN the ILLUSTRATED LONDON NEWS of last week we detailed this disastrous expedition. A Correspondent, who writes from Freetown, has sketched the return of the remainder of a company of the 3rd West India Regiment, after the melancholy disaster which took place on the 23rd of May, at Mallaghea, in the Mellicouri River. Our Correspondent attributes the failure to the folly of dispatching a very small steamer, with only 150 men, at a few hours' notice, to fight from 4000 to 6000 armed natives. This was done by the Acting Governor without taking advice from his Council. It will be remembered, that in November, last year, an expedition was sent to the same place, consisting of two of H.M. steamers, and one sloop of war, and about 450 or 500, simply to intimidate the King, or Chief, and exact an indemnification from him for losses sustained by the traders in the river Mellicouri. Upon that occasion, H.M.'s steamer *Prometheus*, was damaged and is now in England repairing. On this present occasion H.M.'s steamer *Teazer* was much damaged, and has been sent to Ascension to be repaired. The men are mostly troubled with fever from being up the river. The town was partially burnt; but the rockets which were sent with the *Teazer* were merely signal rockets, and could not do much execution. The soldiers had actually to land and fire the place with lucifer matches! The advanced party was surprised, and had to retire; and our informant believes that of the forty-five men who were in the advanced party, only five returned. The covering party, after having fired a volley, was surrounded, and the remainder had to fly. By this time the natives had reached the beach, and as our men were re-embarking they were shot in the water; many had to swim for their lives; a few who were in the water came out and begged for mercy, but they were immediately tied with their hands to their backs and then thrown into the river. One man (an Irishman) fought nobly, and while he was dying he beckoned his men on to the attack. This brave fellow was Sergeant-Major Scanlan, whose three brothers are fighting in the Crimea. The men are said to have behaved nobly, and fought well while they had ammunition, with which they were badly supplied. We lost about ninety in killed and missing. We have had eleven prisoners given up to us, and nine muskets. One prisoner, by name Firth, who was Deputy-Commissariat officer, had been brutally murdered, as well as some of the other prisoners. The militia was called out, but nothing further took place. It is said that the enemy lost about 400 or 500; but they concealed their dead.

The company represented in the Sketch, was under command of Lieut Kerr, of the 3rd West India Regiment.

THE LATE DISASTER AT MALLAGHEA.—RETURN OF PART OF THE 3RD WEST INDIA REGIMENT TO FREETOWN.



FUNERAL OF THE LATE SIR EDWARD PARRY, IN THE CHAPEL OF GREENWICH HOSPITAL.

FUNERAL OF THE LATE SIR EDWARD PARRY.

THE funeral of Sir Edward Parry, the late Lieut.-Governor of Greenwich Hospital, and whose services entitle him to a prominent position in the annals of Arctic discovery, took place on Thursday the 19th inst., at the Royal Hospital, Greenwich. Sir Edward had long been suffering from a painful disorder, which terminated fatally whilst he was staying at Ems, to which place he had not long removed for the benefit of his health. By the death of Sir Edward Parry the Naval service has lost one of its most distinguished officers, and mankind one of its great benefactors. In all relations of life Sir Edward was admired and beloved. His funeral was attended by the whole of the officers of the establishment in full uniform, six of whom acted as pall-bearers. The coffin, which was borne on the shoulders of six men, was preceded to the cemetery by a long procession of the old Greenwich pensioners, who were also drawn up under the Colonnade. It was followed by the immediate relatives and a few friends, and by several of the Arctic officers, amongst whom were Captain Austin, C.B.; Captain Collinson, C.B.; Captain M'Clure, Dr. Rae, Captain Kellett, C.B. Captain Washington, R.N., the Hydrographer of the Admiralty, and Mr. Barrow also attended to pay the last mark of respect to this great and good man.

The annexed illustration shows the Funeral in the Chapel of Greenwich Hospital.

A brief Memoir of the life and distinguished services of the late Sir Edward Parry appeared in the ILLUSTRATED LONDON NEWS for July 14, 1855.

AGRICULTURAL CHEMISTRY.—THE LAWES TESTIMONIAL.

A DEMONSTRATION of an interesting character, in connection with the agricultural pre-eminence of Hertfordshire, took place on Thursday week, in that county, when Mr. J. B. Lawes, of Rothamsted Park, was presented with a public acknowledgment of the valuable services he has rendered to agriculture by his varied and extensive experiments, by the results of which the farmer may profit, without incurring the expense and risk of experimenting for himself. The Testimonial originated about eighteen months since, with some farmers and others resident in the neighbourhood of Harpenden; a public meeting was held at the Town-hall, St. Albans, a committee was formed, when the movement extended from a local to a national object, in which the leading agriculturists of the various counties of the kingdom have contributed their aid. It was then decided, on the suggestion of the Kentish Committee, that the Testimonial should consist of a piece of plate, as an heirloom; and of a new laboratory for the further prosecution of the scientific investigations which Mr. Lawes had undertaken. Subscriptions were opened for the purpose; and in July (last year) the first stone of the new laboratory was laid by Master C. B. Lawes. The building, which is placed on the grounds of Mr. Lawes, immediately facing Harpenden-common, and almost adjoining the high road, has been completed, at the cost of nearly £1000. The design (by Mr. J. H. Gilbert, architect, of Nottingham) contains a laboratory and museum; a back laboratory; a private laboratory; and store-room, balance-room, furnace-room, private room, &c. The "heirloom" is a handsome silver Candelabrum, of characteristic design, by Hunt and Roskell, bearing the following inscription:—"Presented to John Bennet Lawes, Esq., as an heirloom; at the same time with a Laboratory at Rothamsted, Herts, in acknowledgment of the eminent services he has rendered to the science and practice of agriculture. July 18, 1855."

THE LAWES TESTIMONIAL, LABORATORY, ROTHAMSTED, HERTFORDSHIRE

We have engraved the new Laboratory wherein Mr. Lawes will hereafter conduct his experiments, in place of the old building, "perhaps the only barn in the world ever devoted to such scientific pursuits."

The presentation took place on Thursday week, at a public dinner given to Mr. Lawes, by the subscribers to the Testimonial. Before the company sat down a large number of gentlemen inspected the experimental crops on the Rothamsted estate, when Dr. Gilbert, the conductor of the chemical experiments at the laboratory, explained to the company the various processes adopted, and the results, in the several fields visited. The fields under experiment are divided into plots, which are unmanured, or manured with farmyard manure, or cultivated with various artificial manures. The crops, which showed the results of the different modes adopted, were very clean and luxuriant. The dinner, which was supplied by Mr. Fuller, of the Bull Inn, took place in a marquee in the rear of the new laboratory. The Earl of Chichester presided; the guests numbered 160; and, after dinner, a large number of the ladies of the neighbourhood entered the marquee, and occupied seats which had been set apart for them.

The after-dinner proceedings were unusually interesting. The customary loyal toasts having been drunk, the Earl of Chichester presented the plate to Mr. Lawes, in an able address, wherein his Lordship remarked upon the great services which Mr. Lawes has rendered to agriculturists; the noble chairman adding that, as one of the oldest and most zealous members of the Royal Agricultural Society, he had watched with interest the progress of Mr. Lawes' experiments, and had read with delight those able papers which he had contributed to the society's journal. The Earl of Chichester concluded by formally presenting the Laboratory and the Candelabrum, which may be regarded specially as the testimony of the most experienced practical farmers of Hertfordshire, who have watched and appreciated Mr. Lawes' labours

Mr. Lawes, in thanking the company for the handsome gifts, referred to the insufficiency of the old laboratory, adding that it was the only place he had for the purpose, except the bed-room in his house, which he had hitherto used. Mr. Lawes then reverted to the neglect of the study of chemistry in our schools and universities. He then took a rapid view of the progress of agricultural chemistry; characterising Sir Humphry Davy's book as productive of scarcely any improvement in the practice of the day; and tracing the most important results to the publication of Baron Liebig's work in 1840. Mr. Lawes then drew a comparison between the respective benefits of science to manufactures and agriculture, in which he showed the disadvantageous position of the latter; and, in conclusion, Mr. Lawes spoke in high terms of the valable services of Dr Gilbert.

Several toasts were drunk, including "the Science and Practice of Agriculture"—proposed by the Rev. Mr. Huxtable, and replied to by Dr. Gilbert, who explained at some length, the mode of operation pursued by Mr. Lawes in the experiments which he conducted. He also referred to the importance to agriculturists of accurate and careful scientific experiments, as a means of placing the practice of agriculture on a foundation of fixed principles. Mr. F. Woodward, from Worcester, in proposing the

THE WATFORD HORTICULTURAL AND FLORICULTURAL SHOW, IN CASSIOBURY PARK.—(SEE NEXT PAGE.)

health of the Acting Committee, stated that he had profited to the extent of some hundreds of pounds, and had no doubt that many agriculturists had profited to the extent of some thousands, by the experiments of Mr. Lawes. The party broke up at seven o'clock.

We should add, that the festival was kept as a rural holiday in the village of Harpenden; a triumphal arch was erected in honour of Mr. Lawes; and after the dinner an ode, composed by a lady of the village, was sung by Mr. Fielding.

WATFORD HORTICULTURAL AND FLORICULTURAL SOCIETY.

EXHIBITIONS of flowers, fruit, and miscellaneous plants have, through the extensive application of scientific principles to the various departments of gardening, become every-day sights at this season. Nevertheless, a "flower show" is a somewhat formal scene of trim nature, especially when the specimens exhibited are ranged in rows beneath tents, from which the visitors often pass to their carriages—and the fête is over. A flower show in a picturesque park is, however, a much more enjoyable scene. Of this advantage the Londoners lately witnessed a specimen in the grand Floricultural display at the Crystal Palace at Sydenham; the park of which is, however, in all its grandeur, a much less delightful place for a flower show than the beautiful domain of Cassiobury, celebrated for its pic-nic parties, its stately avenues, its majestic trees, and delightful bosoages, its retired glades animated by herds of deer and cattle; and its congregated attractions of wood and water, and picturesque building, from the castellated mansion to its numerous lodges and cool retreats, in their rusticated designs, harmonising most happily with the natural beauty of the entire domain. Here, by the kind permission of the Earl of Essex, the Watford Horticultural and Floricultural Society held their annual exhibition, on Wednesday week. The Hon. Artillery Company had also obtained permission for a field-day in the park; and the combined attractions of Flora, Pomona, and Mars, drew to the exhibition a larger company than is often assembled in the private park of a nobleman.

The Show took place under a tent erected near the mansion. The display of plants was magnificent; and the fruit was very rich for a provincial exhibition. From one o'clock until five the Show was open to subscribers, and from five o'clock until seven to the public, on payment of a shilling; and during the whole time the tent and park were thronged. An excellent band performed a selection of music during the afternoon alternately with the band of the Hon. Artillery Company.

The arrangements for the Show were excellent. The shops in the town of Watford were closed in the afternoon, and the festival was the occasion of a general holiday.

During the day two companies of the Hon. Artillery, under the command of Major Reed, formed in the park, in front of the Flower Show tent. Their military operations comprised attacks on advanced posts; skirmishing parties were thrown out, and a brisk fire was commenced; alternate retreats and advances were made; bridges were stormed and taken; but the grand assault was upon the lock-keeper's house, on the Grand Junction Canal.

CALENDAR FOR THE WEEK.

SUNDAY, July 29.—8th Sunday after Trinity.
MONDAY, 30.—Charles X. dethroned, 1830. Penn died, 1718.
TUESDAY, 31.—Loyola, founder of the order of Jesuits, died, 1556.
WEDNESDAY, Aug. 1.—Lammas-day
THURSDAY, 2. Battle of Blenheim, 1704.
FRIDAY, 3.—Eddystone Lighthouse commenced, 1756.
SATURDAY, 4.—East India Docks opened, 1806.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING AUGUST 4, 1855.

COMPLETION OF THE GREAT EXHIBITION IN FRANCE.

THE Subscribers to the ILLUSTRATED LONDON NEWS are respectfully informed that every arrangement has been made to ensure correct and splendid Illustrations of the above interesting events. All the best Artists in London and Paris are specially engaged for the occasion. Already immense preparations are in progress for the reception of the Queen at the Palace of Versailles, the Palace of Fontainebleau, the Palace of St. Cloud, the Elysée Bourbon, the Palace of the Tuileries, the Hôtel de Ville, the Louvre, the Great Exhibition at Paris, &c.

The Illustrations will include a Large Engraving of the

GRAND NIGHT FETE

AND ILLUMINATIONS IN THE GARDEN OF VERSAILLES,

such as have not been given since the time of Louis XIV.

The Reception of her Majesty at Calais, the Arrival in Paris, the Decorations and Triumphal Arches in the Streets of Paris, the State Visit to the Great Exhibition, splendid new and original Portraits of the Queen and Prince Albert; the Emperor and Empress of the French; the Prince of Wales, and the other younger branches of the Royal Family visiting France; will also be comprised in the Series of Illustrations.

Next week, August 4th, will be given Engravings of the Preparations for the Royal Visit in Paris. On August 11th, splendid Views connected with the Royal Visit, and Views of the Great Exhibition. On August the 18th, her Majesty's Arrival on the Shores of France. And, on August, the 25th,

PICTURES OF THE GRAND ROYAL VISIT TO PARIS.

In the ILLUSTRATED LONDON NEWS for Sept. 1st will appear further splendid Views of the Fêtes; on Sept. 8th, completion of the Illustrations, with Views of the Queen's Return to England; and on Sept. 15th to this series of magnificent Pictures will be added the best specimens of Pictures from the Fine Arts department of the Paris Exhibition.

Persons wishing to subscribe to this series must order immediately, as the demand is sure to exceed the supply. Subscribers giving their orders to the various newsmen will be supplied in rotation as received.

There will be one Extra Number on August the 25th. All the other weeks TWO LARGE SHEETS—price only TWOPENCE; Stamped copies for post, SIXPENCE. It will be necessary to specify if stamped copies are required.

ILLUSTRATED LONDON NEWS OFFICE, 198, Strand.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 28, 1855.

WE still know little more in regard to the siege than that the Allies are persevering in their preparations; and the natural inference from the protracted delay is that they have determined to save blood by the expenditure of powder up to the last moment, and that their bombardment shall be so destructive that one brief fierce grapple will place the assailed works in our hands. A written despatch from General Simpson, dated on the 10th, and received thirteen days later, expresses the Commander's regret at the casualties he has to communicate, with the significant additional observation, that the nearer the defences are approached, the greater the number of such casualties that must be expected. On the morning on which that despatch was dated a heavy fire was opened upon the Redan. A telegraphic despatch from General Pelissier, dated the 23rd, reports that the enemy had on the preceding night opened fire on the right and left of the lines of the Allied attack, and that our batteries had replied with success. We learn from another source that the Allies are making preparations to render permanent the blockade of the Russian ports, and that camps are to be established at Constantinople and on the Danube.

Not even the detestation in which good men must hold the policy which induced Russia to begin this fearful war—not even the horror which is felt at the barbarous acts with which her soldiery have marked it, acts rendered still more atrocious by the cold-blooded approbation with which (as in the Hango case) the authorities have received them not even these feelings should render us unwilling to testify to the admirable defence which the Russian Generals, and especially their Engineers, are offering.* It may be that the Russians are good only behind walls—it is certain that at the Alma we drove them from one of the most splendid positions ever occupied by an army; and that at Inkerman their overwhelming numbers, with all the *prestige* of attack, were unavailing, and that they were routed and slaughtered by men who could not number a fourth of their force. But in the Sebastopol defence they have shown themselves dauntless and skilful, patient to bear, rapid to repair, and singularly adroit at adapting themselves to the varying requisitions of the siege. Without in any way undervaluing our own engineers, who have had to deal with appalling difficulties, and who have dealt with them nobly, the journal of the siege offers sufficient evidence to prove that, as practical men who know how to avail themselves of every advantage, natural and artificial, the Russian engineers take the honours of the campaign hitherto. There are numerous reasons why this should be the case; but we now speak of facts only; and it will be no small addition to the scientific reputation of our artillery and engineering officers should the masterly defences of Sebastopol finally yield to their improving skill, and not to some daring feat of desperate courage. The Russian account of the later portion of the struggle, though framed in accordance with the traditionary deceptive policy of St. Petersburg—as, for instance, where the loss of the Allies on the Redan and Malakoff day is stated at 10,000, while roll-call and return show it to have been under 4000—does not speak too highly of the courage and perseverance of the men whom, with the blessing of Providence, we are about to drive from their stronghold. In everything but humanity and honour they are foemen worthy of our steel.

The war is telling fearfully upon the internal condition of Russia; and it is well that the people of England, who, standing up for the right, have courageously resolved to measure their strength, active and passive, against that of the wrongdoer, should know that he is suffering heavily. We, it is true, have our burdens; but the world is open to our commerce, and our gigantic resources have been scarcely called into action. Our merchant-fleets sweep the seas, our ports are alive with labour, and, although a certain discouragement and stagnation prevails in many branches of trade, our affairs are, on the whole, in a flourishing state; and our abundant harvest is rapidly ripening for the sickle. But with Russia the case is different. Her ports are sealed by the war-ships of France and England, and her best trades, which were dependent on Western workers and Western money for their existence, find their resources cut off, and are starving. Those who have travelled in Russia, and have noticed that wherever there was an establishment in which steam-machinery was employed you were certain to find a British brain directing the willing but helpless native industry, can best comprehend the effect of withdrawing that superintendence. From the manufactories at St. Petersburg to the dredging-vessel kept to cheat Europe at the Sulineh mouth of the Danube, English engineers were the presiding intelligences; and though the Russian may not imitate the Turk, who sits down before his halting machine, and prays and smokes until Allah pleases to send somebody who can assist him, he is not much better off in such matters. The contrast between the self-relying, highly-educated military engineers of Russia and the civil departments, accustomed to depend on purchaseable assistance, shows how far more in earnest the Czars have been in their schemes of ambition than in those of civilisation. Russia is at this moment writhing under the terrible lesson taught her, less by her enemy than by her own rulers. Heavy taxes, a cruel levy, and crushed trade are the outward signs of her present condition—a crippled noblesse, bankrupt merchants, and a hungry and discontented populace will, if the war lasts, be the next illustration of the results of unprincipled ambition.

It behoves us all, at these intervals of the war, when there are no tidings of splendid success to call forth exaltation, and when the reaction which follows excitement has a tendency to a deleterious and discouraging influence, to recollect that we are engaged in the noblest of enterprises—in battle for liberty and civilisation—that we have been victorious, in spite of the most appalling difficulties; and that we are gradually drawing nearer to the accomplishment of one of the most marvellous triumphs to be found in the history of war. We may dispute whether the campaign was begun wisely; and unhappily there is no doubt that in many respects it was carried on foolishly, though a soldierly system has now taken the place of a blundering administrative. But history will reck little of this, but will dwell on the grand truth, that the two great Christian Powers, arousing to chastise the Northern Barbarian, scorned timid or sidelong approach, and, fitting out a noble armament, threw it at once upon his last and most cherished conquest, scattered to pieces an army that sought to bar their way, and, marching down upon the strongest fortress in the world, aft a fierce struggle, in which they never relaxed their hold, wrench Sebastopol from him, and proclaimed the freedom of the southe seas of Europe.

* Our Correspondent in the Camp informs us in a private letter that the most celebrated of these engineers, who was raised to the rank of Lieutenant-General in testimony of his brilliant services, is dead. The mode of his death is not stated.

THIS great, mighty, and generous nation is "hard up." Let it known in St. Petersburg—let it be whispered in the ear of Cou Buol, as an additional incentive for sneaking out of the engag ments which he, on the part of Austria, so solemnly contracted—l it be told to the King of Prussia when he inclines to the Engli and French alliance that he may be induced to sway over to the oth side—let it be repeated among our foes, if we have any, other parts of the world, that they may combine together to ma a final kick at the dying lion—Great Britain is too poor to pr secute the war. The nation has positively not the cash. The w has so crippled us, and drained us, and exhausted us, that even insignificant a sum as £1000 is a matter of such high co sequence and importance that it cannot be spared from S bastopol. The value of two hundred bombshells, price £5 ea or the annual cost of ten grenadiers, or perhaps one Colo in the Crimea, is of such essential consequence to us, and difficult to be procured by the used-up and bankrupt Engli people, that the Government, sorely pressed, and greatly bew dered what to do, has been reluctantly compelled to lay unhallow hands upon a fund amounting to the value of two hundred bom shells, or ten soldiers, or one colonel, or thereabouts, which many years past has been annually voted to the Royal Socie Science and War cannot, it appears, be prosecuted together. Engla cannot afford the luxury of Science when she has the Russians conquer in the Crimea. The thousand pounds are of such mom to her that she commits an ungenerous, impolitic, and mean acti to save herself that sum. There is not a man in the Ministry w will save his country by foregoing the amount out of his sala not a sinecurist anywhere, not a discoverable patriot, who w provide the poor pittance, and rescue Science, without at t same time damaging our arms and rendering us unfit to co with, and make head against, that mighty giant, Prin Gortschakoff. We were a rich nation a little while ago, a paid, or undertook to pay, which is all the same thing, more th a quarter of a million for a new steamer for the Queen; but th days are gone by. We are no more what we were than are John Dean Paul, and his partners, Strahan and Bates. The f is scarcely credible, but it is true, nevertheless, that the sum question has been withdrawn from the Royal Society on the plea the governmental and national poverty created by the war. have been informed of the fact from too many sources to allow us doubt of its accuracy. But what will the people say of t motives of a Government which can have committed such a sca dal? They will doubtless ask whether it be part of a plan create disgust with the war, and to array all the scientific men of t nation in the same peaceful ranks with Mr. Gladstone and Bright? They will also ask—or we are much mistaken—whet the disgust which it seeks to extend is a feeling in which it p ticipates? What answer the Government will make we can of course, say; but we think the sooner it is compelled to something on the subject the better for its credit. A thous pounds! Will not two or three true-hearted Englishmen comb together and raise the money for the Royal Society, and so sha the Government, if, after such an act of meanness, it have shame left?

THE COURT.

The King of the Belgians, accompanied by the Count of Fland and the Princess Charlotte of Belgium, left Osborne on Monday mo ing, on their return to the Continent. Her Majesty and his Ro Highness Prince Albert embarked in the *Fairy* with the King, and companied his Majesty to Portsmouth, where a special train was waiting to convey his Majesty by the Brighton and South Coast line Dover.

On Saturday last the Queen held a Privy Council at Osborne. L John Russell had an audience of her Majesty, and resigned his se of office, as one of her Majesty's principal Secretaries of State. Sir W liam Molesworth, Bart., was sworn one of the Queen's principal Sec taries of State, and received from her Majesty his seals of office. William Monk, Knt., was, by command of the Queen, sworn one of Majesty's Most Honourable Privy Council. Lord Palmerston, E Granville, the Lord Chancellor, and Sir Charles Wood had a dien of the Queen. The whole of the above noblemen and gentlemen turned to London, with the exception of Lord Panmure, who remai on a visit to her Majesty.

On Sunday the Queen and Prince, the King of the Belgians, the Pri of Wales, Prince Alfred, the Princess Royal, and the Duchess of K attended morning service at Whippingham Church. The Rev. Geo Prothero officiated.

On Monday the Queen, accompanied by the Duchess of Kent, Princess Royal, and Princess Helena, drove out in a carriage and fo Prince Albert rode on horseback. The Prince of Wales and Pri Alfred went out sailing, attended by Mr. Gibbs. The Duchess of Ke attended by Lady Fanny Howard, left Osborne, and crossed o to Southampton in the Royal yacht *Fairy*.

On Tuesday the Queen and Prince embarked in the *Victoria and Alb* and cruised to the Needles. Sir John M'Neill arrived from London visit, and had the honour of dining with Her Majesty.

On Wednesday the Queen and the Prince again embarked in the *Victo and Albert*, and enjoyed a cruise for several hours. Her Royal Highn the Princess Alice has been attacked with scarlatina: her Royal Hi ess is going on very favourably. Prince Arthur, Prince Leopold, Princess Louisa are convalescent.

The Hon. Beatrice Byng has succeeded the Hon. Flora Macdonald Maid of Honour in Waiting.

Her Royal Highness the Duchess of Gloucester left Gloucest house, Piccadilly, on Wednesday, for the Ranger's Lodge, Richmo park, for the summer. Her Royal Highness is in remarkably good heal

The Duke and Duchess of Norfolk and Lady Adeliza Fitza lloy and have left Norfolk-house for Arundel Castle. The unsett health of his Grace has precluded the customary hospitalities this sea at Norfolk House.

The Earl of Lincoln has taken his departure on a Continen tour. It is understood his Lordship will extend his travels as far Constantinople and Egypt.

The Earl of Yarborough is still unable to attend to his Parl mentary duties, in consequence of his continued indisposition.

Viscount and Viscountess Mandeville have left town on a Con nental tour.

Lady Peel and Miss Peel have gone on a tour in France. Th have already reached Paris.

THE LORD MAYOR'S JOURNEY TO OXFORD.—At a Court of Ald men on Wednesday, it was moved by Alderman Wilson, that the L Mayor be requested to take the usual septennial view of the river Tham and that a sum not exceeding £700 be drawn from the Chamber on accou of the expenses. The motion was opposed as ill-timed and injudicio under the circumstances in which the Corporation were placed with Government as to the conservancy of the Thames. The idea of going Oxford was absurd, and the last survey had not in the slightest deg tended to the benefit of the river. The previous question was carried a large majority.

LATEST INTELLIGENCE.

THE WAR IN THE CRIMEA.

The *Moniteur* of Friday (yesterday) announces that the Minister of War has received the following despatch from the Crimea, dated July 25, three a.m.:—

After a brisk cannonade the Russians made a sortie, about midnight, on the left of the Lutle Redan. As we are now quite close to them, it did not take the enemy one minute to reach our gabionnades. They were vigorously received by the Chasseurs-à-pied of the Imperial Guard, and by some companies of the 10th Regiment of Infantry of the Line. The Russians beat a hasty retreat, leaving some wounded and dead men on the ground between our ditch and the fosse of the place. A very dark night enabled them to carry off the others. This affair does honour to Lieutenant-Colonel de Texis, of the Infantry, and to Captain Lecocq, of the Engineers. General Bisson was on duty in the trenches.

Letters from Odessa confirm the fact of General Todleben's death, and announce that General Melnikoff has been appointed in his room to take charge of the internal defence of Sebastopol.

The Paris correspondent of the *Times* alludes to a rumour that the great activity among the Allied squadron in the Black Sea portends not an attack upon Odessa, as some anticipate, but a gigantic expedition against the rear of Sebastopol. The rumour adds, moreover, that a bold and desperate attempt will be made by one hundred vessels of every kind, with 40,000 men, to force the passage, land in the midst of the place, while a simultaneous attack on land will be made, and that its success is hardly doubted.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, JULY 26.

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Thermometer. Highest Reading.	Thermometer. Lowest Reading.	Mean Temperature of the Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.
	Inches	°	°	°	°	°		Inches.
July 20	29.704	71°0	44·1	58·1	— 3·6	82	W.N.W.	0·20
„ 21	30.084	73°0	47·8	59·6	— 2·2	86	W	0·10
„ 22	30.226	75°5	52·0	63·0	+ 1·2	87	S.W.	0·00
„ 23	29.974	78°2	51·2	64·1	+ 2·3	90	S.W.	0·00
„ 24	29.852	70°6	57·2	61·4	— 0·5	97	S.W.	0·42
„ 25	29.665	67°3	52·0	55·5	— 5·4	95	W. & S.W.	0·20
„ 26	29.753	69°5	50·2	55·2	— 5·6	98	S	0·38

NOTE.—The sign — denotes below the average and the sign + above the average.

The reading of the barometer increased from 29.70 in. at the beginning of the week to 30.23 in. by the 22nd; decreased to 29.62 in. by the 24th; and increased to 29.75 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.857 inches.

The mean temperature of the week was 59°6—being 2·3° below the average.

The range of temperature during the week was 30½°, being the difference between the highest reading of the thermometer on the 23rd, and the lowest on the 21st.

The mean daily range of temperature during the week was 20·2°. The greatest was 27°, on the 23rd; and the least, 12½°, on the 24th.

Rain fell during the week to the depth of one inch and a half.

The Weather during the week was dull and changeable, the sky nearly overcast, and rain fell frequently.

Lewisham, 27th July, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending last Saturday, July 21, the births of 1022 children were registered within the metropolitan districts—namely, 738 boys and 724 girls. The average numbers for the twenty-ninth week of the year, as found from the registers of the preceding ten years, were 684 boys and 644 girls. Within the same limits of space and time 915 deaths were registered—namely, 476 males and 439 females. These numbers are together above 100 less than the calculated number for the week, from previous returns. The number of deaths weekly in London during the last three weeks has been about 150 less than in the month of June, and indicates a great improvement in the public health.

STATE OF THE THAMES.—On Saturday an influential deputation from the inhabitant householders of Walworth and the district supplied with water by the Southwark and Vauxhall Water Company waited upon Sir Benjamin Hall, Bart., President of the Board of Health, for the purpose of seeking his intervention with reference to the disgusting and unwholesome water supplied by the Southwark and Vauxhall Water Company to the inhabitants of Walworth, and drawn from the Thames at Battersea. The deputation having stated their case, and exhibited various specimens of water from their own and neighbours' cisterns, Sir Benjamin Hall, in the course of a lengthened observation, said, under his bill the Lord Mayor, President of the Metropolis," one of the first acts the Metropolitan Board of Works would be called on to perform would be to carry out two main drainage schemes, one on each side of the river Thames, so that there would be no excuse if the river was not speedily relieved from the sewage. An Act, passed in 1852, would also come into operation on the 31st of August, compelling the Metropolitan water companies deriving their supply from the Thames to take that supply from above Teddington Lock, and beyond the tidal influence. The Government would take steps to have the Act enforced. That was all he could do at present.

OPEN-AIR PREACHING.—For several weeks past the Rev. Newman Hall, of Surrey Chapel, has delivered open-air addresses to working men, on Monday and Thursday evenings, at the Obelisk, in Blackfriars-road. A police-sergeant having recently obliged the rev. gentleman to desist, Lord Shaftesbury interested himself in the case, and has since written to Mr. Hall as follows:—"I saw Sir R. Mayne on Saturday. He spoke in high terms of open-air preaching, and gave orders that you should not be interrupted by the police in any way. You may safely resume your station and your work, and may God be with you in preaching the Gospel to the poor."

ADMINISTRATIVE REFORM ASSOCIATION.—A meeting of the committee of this association was held at the offices, King William-street, City, on Monday, Mr. S. Morley in the chair, when the following resolution was adopted:—"That in the opinion of this committee the appointment of the Right. Hon. Sir William Molesworth, Bart., M. P., to the office of her Majesty's Secretary of State for the Colonies, is an acknowledgment of the principle of Administrative Reform, which seeks to have the right men in the right places in the Cabinet, as well as in every office of the Government: and that the committee trust Sir William Molesworth will in office not fail to carry out those measures of colonial reform by the able advocacy of which as an independent member of Parliament he established in public opinion his fitness for the high office to which he has been nominated."

CITY STATUE OF SIR ROBERT PEEL. This statue having been finally adjusted on its pedestal, at the west end of Cheapside, by the sculptor (Mr. Behnes), was uncovered and inaugurated at eleven o'clock on Saturday morning last.

SIR J. D. PAUL'S CHAPEL AT CHELSEA. Park Chapel, Chelsea, the property of Sir John Dean Paul, is to be sold by auction, by Alderman Farebrother, in the course of next month. It is stated to contain 1104 pews and 240 free sittings, and to be capable of accommodating 1500 to 1600 persons. The subscription or rent for pews is voluntary, and produces, under the ministry of the present incumbent (the Rev. Charles Goodhart) from £600 to £900 per annum. The chapel is in Park-walk between the King's-road and Fulham-road.

CASE OF STRAHAN, PAUL, AND BATES.—Sir J. D. Paul, and Messrs. Strahan and Bates were brought up at the Bow-street policecourt on Wednesday, and formally remanded another week, upon the charge of having appropriated the securities of Dr. Griffith. In conformity with the arrangement of the previous week, no further progress was made with the case, and the defendants, who were conveyed to and from the House at their pleasure, left the police-court at the court above five minutes. The examination will be resumed on Wednesday next, at twelve.

THE COMPOSITORS' NEWS-ROOMS AND LIBRARY.—About four months since the compositors of London resolved upon founding a newsroom and library, and appointed a committee to lease premises, purchase books, &c. On Wednesday evening a meeting was held to receive a report of the proceedings up to the present time. The report was read by the secretary, showed that £150 had been expended in furnishing and fitting up the premises in Raquet-court, Fleet-street, and that £130 had been laid out in the purchase of books, maps, &c., amongst which were mentioned many valuable books of reference, and some of the best standard editions of historical and scientific works, which shows the earnest desire of this important and intellectual body of men to command the higher branches of knowledge which they deem most useful in their profession. The propriety of admitting all in connection with the printing business to the use of the library and news-rooms was mooted and discussed; but, owing to the incompleteness of their present arrangements, it was resolved to defer any decision on the subject till next meeting.

IMPERIAL PARLIAMENT.

(Continued from page 119.)

HOUSE OF LORDS. THURSDAY.

The Merchant Shipping Act Amendment Bill, and the Lunatic Asylums (Ireland) Bill, were read a third time and passed.

The Dissenters' Marriages Bill; State Carriage Duties, &c., Bill; Convention with the United States Bill; Ecclesiastical Jurisdiction Continuance Bill; Militia Officers' Qualifications Bill; and several other bills were passed through Committee.

HOUSE OF COMMONS.—THURSDAY.

The House met at twelve o'clock.

LIMITED LIABILITY BILL.

On the order of the day for going into Committee upon this bill,

MR MUNTZ expressed strong opinions against the policy of the measure, and moved that the Committee be deferred for three months.

A lengthened discussion then took place, in the course of which

Lord PALMERSTON charged the opponents of the bill with wasting the time of the House for the purpose of casting obstructions in the way of a measure which it was the fixed determination of the Government to pass, with the assistance of the great majority of that House, even though they should be compelled to sit from day to day until September. He believed that this measure and the Partnership Bill were much desired by the country generally, and would furnish facilities for the safe employment of small capitals.

Upon a division Mr. Muntz's amendment was negatived by a majority of 121 to 40.

The House then went into Committee, but, as it was approaching four o'clock, the Chairman reported progress, and obtained leave to sit again at twelve o'clock the next day.

Several clauses in the Passengers Act Amendment Bill were agreed to in Committee, and the House adjourned until six o'clock.

At the evening sitting, Lord ERSKINGTON gave notice of a motion for next session for the opening of the British Museum, the Crystal Palace, and several similar places, on Sunday.

THE BEER BILL.

MR. H. BERKELEY gave notice of his intention to ask leave on Monday for the introduction of a bill to amend the Sunday Beer Bill.

MAJOR REED asked whether, in the event of circumstances arising during the recess calculated to put an end to the hostilities, Parliament would be called together before the terms of peace were ratified?

Lord PALMERSTON, amid much laughter, said, that if, during the recess, her Majesty's Government thought it desirable to call Parliament together before the usual time, they would do so.

Sir C. WOOD, in reply to Sir H. Willoughby, said that the Russian authorities had refused to give up the prisoners taken at Kamgro.

MR. LAING, in answer to Mr. Layard, stated that it had been arranged that the discussion on the papers recently laid on the table relative to the Vienna Conference should come on on Friday in the next week.

THE TURKISH LOAN BILL.

This bill was read a second time without a word having been said for or against it.

SUPPLY—EDUCATION.

The House having gone in Committee of Supply, a vote of £396,621 was proposed for educational purposes in England and Scotland, which was an increase of £58,000 on the vote for similar purposes in previous years.

MR. BARNES remarked that the grant involved great injustice to a large portion of the community who paid for the education of their children from their own means, and derived no advantage from the public money. He regarded the vote as an insidious way of getting rid of the decision of the House on the question of national education. It also violated the principle of religious liberty, inasmuch as tests had been restored. He moved that the vote be reduced to £263,000, the amount of last year's grant.

A lengthened discussion took place, in the course of which

Sir G. GREY said, that the system of Research of Parliament it was intended to appoint a Minister of Education, who would have the superintendence of many of the details connected with national education, but of all other matters connected with science and art.

MR BARNES ultimately withdrew his amendment; and the vote was agreed to.

Several other votes were also agreed to.

HOUSE OF LORDS.—FRIDAY.

Lord BROUGHAM brought in a bill for the abolition of such statutes as tended to abridge the exercise of private judgment in matters of religion. The bill was read a first time.

The State Carriage Duties, &c., Bill, the Convention with United States Bill, the Ecclesiastical Jurisdiction Continuance Bill, the Treasurers of Counties (Ireland) Bill, and the Crown Suits Bill, were severally read a third time and passed.

HOUSE OF COMMONS.—FRIDAY.

The Speaker took the chair at twelve o'clock.

THE TURKISH LOAN BILL.

The House having gone into Committee upon this bill,

On clause one being proposed, MR. GLADSTONE addressed the Committee at some length. He did not oppose the principle of the bill, but he raised several objections to its provisions, contending that they were inconsistent with the terms of the convention itself and with the principle of a joint guarantee with France. He predicted the most mischievous consequences from the measure, and called upon the law officers of the Crown to express their opinions upon its details.

Lord PALMERSTON deprecated any discussion upon a subject of such importance at a time arranged to be given up to the Limited Liability Bill. He thought that there was an understanding not to discuss the subject at that stage of the bill.

It was then agreed upon that the Chairman should report progress, and that the bill should be taken as the first order at the evening sitting, with a view of affording an opportunity for the discussion commenced by Mr. Gladstone.

LIMITED LIABILITY BILL.

The House then went into Committee upon this bill, and a discussion upon the first clause occupied the attention of the members until nearly four o'clock, when they adjourned for the evening sitting. Although an amendment moved by Lord Goderich, to strike out the words limiting the amount of capital, was asserted to be by the Government, the clause itself had not been agreed to at the time of the adjournment.

At the evening sitting, Lord PALMERSTON, in reply to Lord Elcho, said that the new Order of Merit would be shortly instituted. The delay had been caused by the necessity of a careful consideration of the details, which had been found much more difficult than was anticipated.

Lord PALMERSTON, in reply to MR. V. Scully, paid a high compliment to the gallantry of the Irish regiments, but said it was not contemplated to constitute a regiment of Royal Irish Guards.

MR. V. SCULLY then gave notice that he would take an early opportunity of bringing the subject under the consideration of the House.

Lord PALMERSTON, in reply to Sir John Pakington, said there was no authority for the report that Lacha had resigned the chief command of the Turkish army in the Crimea.

THE TURKISH LOAN BILL.

The other orders of the day having been postponed, the House went into Committee upon the Turkish Loan Bill.

The CHANCELLOR OF THE EXCHEQUER then proceeded to reply to the objections made by Mr. Gladstone at the morning sitting, and remarked that the course which the right hon. gentleman proposed offered obstacles and difficulties which were wholly insurmountable.

RUSSIAN PREPONDERANCE IN THE BALTIC.—What matters it to Sweden that the Bosphorus is closed while the Baltic is under Russian domination, and the port of Cronstadt contains a formidable and increasing fleet? Though the nation is warlike, yet a dreary approach of the King's conduct pervades all classes. We fully appreciate the line he has taken up, namely, to maintain a strict neutrality until the Governments of England and France shall have given positive proof that they mean to oppose a boundary to the encroachments of Russia in the north as well as in the south. The future of Scandinavia should most particularly interest England, for if Russia succeeds in obtaining the mastery of the Sound, she will be as powerful in the German Ocean as to be able to set Europe at defiance. Both the coasts of Sweden and Norway possess deep and spacious ports, wholly free from ice, freezing only for a couple of months in the severest winter. The principal are Carlscrona, Landscrona, Carlsten, Norten (on the bay of Christiania), Christiansand, Bergen, Trondheim, and the bay of Varangen; the last-mentioned has already excited the grasping spirit of our neighbour. Any one of these ports is capable of growing into another Sebastopol, within a hundred geographical miles of the British coast. Our forests afford inexhaustible materials for ship-building; the inhabitants are either skilful carpenters or fearless mariners. The population of these coasts furnishes at least 100,000 fishermen, or pilots, inured to hardships, and familiar from their childhood with all the details of navigation in these difficult seas. It is easy to draw a conclusion from this simple array of facts.—*Letter from Stockholm, July 20.*

STATE REFORM ASSOCIATION.

THE second meeting of the association formed for the purpose of promoting efficient reforms in the various departments of the State was held on Wednesday evening, at Freemasons'-hall, and the crowded state of the room evinced the rapidly increasing interest felt by the public in the proceedings of the association. The chair was taken by J. Duncan, Esq.

The Chairman in opening the proceedings said that at the past meeting of the association a promise was made by those who had founded it that another meeting would be called within a fortnight to discuss the question of parliamentary reform. That promise was now redeemed, and the present evening would be devoted to the discussion of that all-important question (Hear, hear). He was very well aware that a large portion of the people of this country had fully made up their minds on the policy of a movement in that direction, and therefore it would be useless on his part to address to them any reasoning on the subject, which could only have the effect of confirming their preconceived opinions. The course he should take, then, would be to address those who were apprehensive that, if such a principle were recognised, it would be destructive of the best interests of the country. He hoped that the question would not evoke any violent collision of opinions, and his intention was to appeal calmly to the facts disclosed in the history of our constitution, and to show how the beneficial changes successively effected in that constitution had been perverted by the machinations of bad and cunning minds (Hear, hear). The speaker then succinctly detailed the principal events in English history as bearing upon the question, from the restoration of Charles II. to the French revolutionary wars, and downwards to the introduction of the Reform Bill by the late Earl Grey; and showed that there had been silent and open revolutions going on in this country, from epoch to epoch, from the times of Magna Charta down to the present day, the fact being that as men's minds were opened and instructed they gradually progressed in the vindication of the rights of the common humanity (Cheers). Had those revolutions destroyed or strengthened the nation? He believed they must say that each had given strength to very large classes of the community, and thus showed that the system of peaceful revolution worked well for the people's privileges (Loud cheers). Why not, then, work as well for the working as they had for the privileged classes? (Loud and continued cheering.) Such were the objects this association had in view, and they proposed to discuss the questions to be raised patiently but firmly—doing as little as they could to raise opposition, doing as much as they could to conciliate opinion (Cheers). There were thousands of men in this country, of wealth and education, who firmly considered that the people ought to have manhood suffrage, and who were perfectly willing to assist the present movement provided it was carried on with the prudence which was essential to success (Hear, hear). The members of the association had thought it right to proclaim what they would commence by advocating manhoood suffrage throughout the United Kingdom (Loud cheers). And next, and only inferior to it, it inferior at all, they put popular education (Continued cheering). Their principles were simply these—suffrage to men, knowledge to children. And these two points were most intimately connected: for it was essential that, if the suffrage were to be universal, education should be universal also (Hear).

A gentleman, whose name was not given, asked whether it was intended to adopt a petition to the Queen to dissolve Parliament?

The Chairman: No; the business of the evening is confined to parliamentary reform (Hear, hear).

Mr. Hamilton moved—That as it is unjust and unsafe in any one to withhold a right from others which he claims for himself, and as the elective franchise is the inherent right of every man, this meeting proclaims its adherence to the principle of manhood suffrage, and pledges itself to use all lawful means to secure a vote for every male adult of twenty-one years, of sound mind, and who has not undergone punishment for crime" (Loud cheers).

Mr. W. Jones rose with great pleasure to second the resolution, which involved merely a measure of political justice, and had strong claims even as a measure of public utility, in the present circumstances of the country (Hear, hear). Not only as a working man, anxious to promote the emancipation of his class, but as an Englishman anxious for the general welfare of the country, he felt that the question of manhood suffrage was one to which he was bound to give his strenuous support (Hear, hear). There was a general if not a universal feeling in the country that the present Ministry had failed in their duty in the crisis that had lately arisen in the national affairs, and there was a strong feeling of discontent rankling in the public mind that this country was drifting to the discomfiture and dishonour, through the treachery or incapacity of its aristocracy (Cheers). It was said further, that when not injured by the incapacity of the aristocracy we had been betrayed by the secret influence of our rulers (Cheers). But, after all, it was not Ministers but Parliament that was to blame; constant majorities having aided Ministers in their projects, or screened them in their blunders or disasters. But did the House of Commons know what it pretended to be? Could they have dismissed these Ministers with the disgrace which they so richly merited; but, although continually making pretences of patriotic zeal, they had only, with all their committees, made the wonderful discovery that everything had gone wrong, but that nobody was to blame for it (Hear). The fact was that, unless the House of Commons were strengthened by a strong infusion of democratic blood, it would be only the most absolute mockery of a representative institution (Hear). There was a cry which had recently arisen in the City of "The right man on the right place"—an excellent cry if rightly understood, but, as used by the persons who had started it, it meant merely places for themselves whenever they chose to accept them (Laughter). The speaker proceeded to say that it was objected that the working classes of this country had not intelligence enough to exercise a manhood franchise with safety to the community; but he, having had many years' intercourse with the working classes of other countries, especially those of France and America, could vouch for the fact that our own working classes could bear a comparison either in intelligence or patriotism with any working people in the world (Loud cheers). In conclusion he had only to say that he looked at the present meeting as affording an opportunity for reformers of all grades to join for one common object. He had for sixteen years belonged to an influential political body, the Chartists; that sought for a far larger measure of reform than universal suffrage; but, if the present association could obtain universal suffrage, it would be a broad platform from which they could extend their exertions to the obtaining of further reforms (Hear, hear).

Mr. E. Jones, who was received with immense cheering, eloquently supported the resolution. He believed, he said, the extent of the franchise to be the surest test of the civilisation of a country. Show him how many electors a country had, and he would tell you how civilised were its people Russia had none—England had a million (Hear, hear). Tell him how many electors a country had, and he would tell you how happy were the people. England had a million—America had her entire population; and America was the admiration of the world. If they wanted civilisation, good order, happiness, or aspirational progress in the country, they must extend the suffrage; for in that lay the foundation of the real elevation of the people (Cheers).

The Chairman then put the resolution, which was carried by acclamation.

Mr. Kit moved the second resolution, which pledged the meeting to support the objects of the association, and congratulated the meeting on the gratifying spectacle it exhibited of the gradual approximation amongst all classes of reformers. There was, no doubt, amongst them various views or opinions; but, yielding a little of each, they would soon get all their forces into line, and thus gradually and successively achieve their objects. There were then present some of the working, some of the trading, and some of the professional classes, who believed all were united on one point, namely, that the privilege of the franchise should be coextensive with the population. For his part, he called it a right, and not a privilege, but a right (Hear, hear). He urged support this association, which would give the popular cause strength both in and out of Parliament. In Parliament, he could assure them, there were many members who wanted support from without to counteract the clamour of the day. He had recently been one of a deputation to wait on a member relative to a subject connected with the move, but he said that if O'Brien attempted, as a young member, to address the House in any way opposed to the general feeling, it would be met by derisive shouts and he must wait patiently until his time came for catching the ear of the House. What they wanted in the House was men who would fearlessly represent their constituents, without favour to Ministers or fear of derisive shouts, and such they could only obtain by means of an association like the present, which, having elected the right men, would give them the moral support that was necessary to sustain them in the House. Mr. Kit concluded by moving the resolution.

Mr. Lockhart, in seconding it, expressed the great pleasure he felt at the formation of the association, for something was necessary to reform the present House of Commons. There was a great man in this country who had said, "Take away that bauble!" and at once cleared the House. He (Mr. Lockhart) was not at all sure that some such step would not be highly beneficial at the present moment (Laughter). He had recently taken the trouble to analyse its contents, with a view to ascertain in how far the democratic element in our population was represented, and he found that there were in the House of Commons 124 members who were either Lords or Honourables, 50 who held warlike titles either in the Army or Navy, 60 who were Baronets or Knights, and 105 who were county members, making in all 339 within one of an absolute majority of the House against all measures in the direction of progress (Hear, hear). As he should have another opportunity of addressing them, he should not detain them further on the present occasion than by heartily supporting the motion.

While the Chairman was putting the resolution one or two persons attempted to disturb the harmony of the proceedings, but the general feeling was too strong and unanimous to render any attempt at disturbance successful, and they were consequently soon obliged to retire.

The resolution was then put and carried by acclamation; and, thanks having been voted to the Chairman, the proceedings terminated.

FUNERAL OF THE LATE LORD RAGLAN.—THE PROCESSION LEAVING

FUNERAL OF THE LATE LORD RAGLAN.—ARRIVAL OF THE RE

E TRAKTIR INN, BEFORE SEBASTOPOL.—FROM A SKETCH BY C. GUYS.

S AT KAZATCH BAY.—FROM A SKETCH BY E. A. GOODALL. (SEE NEXT PAGE.)

THE FUNERAL OF THE LATE LORD RAGLAN.

THE letter of our Artist and Special Correspondent, in the ILLUSTRATED LONDON NEWS of last week, detailed the mournful ceremony of the removal of the mortal remains of the lamented Commander-in Chief, on July 3, from the head-quarters before Sebastopol, to the Kazatch Bay, for embarkation. We now engrave two Views of the funeral procession at these points. In the first scene, the cortège has just left the Traktir Inn, where the deceased Field Marshal lay. We shall not repeat the details from the letter of last week, but describe the principal portion of the procession which occupies the foreground of our Artist's View. The funeral car is a 32-pounder, surmounted by a platform, upon which is placed the coffin, covered with a pall, and the regimental colours; upon which are placed the Field Marshal's hat, sword, and epaulettes, and a wreath of *immortelles*—placed there, it is said, by the French Commander-in-Chief. The usual seat for the gunners is occupied by two artillerymen; and the car is drawn by ten horses: and in advance are two batteries of Horse Artillery. The line on both sides of the road was formed by infantry. At the points of the car are General La Marmora and General Simpson; and General Pelissier and Omer Pasha. Beyond the Staff of the latter is seen a long train of General Officers, Staff, &c.; and at a short distance is the band of the Foot Guards.

A contemporary thus describes the scene :—

It would be impossible to conceive anything more picturesque or striking than was the appearance of the procession as it wound along the circuit, passing by a small French encampment, the mighty ocean of spectators, and the hay depôts of the French army; and also as it ascended the heights of Kazatch, and halted on the left side of the pretty bay covered with British transports and men-of-war's boats. Along the pier called Victoria Pier were stationed the marines and sailors of several of our vessels; and at the end of it was the long-boat destined to convey to the war-steamer the remains of the late Commander-in-Chief.

As the procession wound round the circuitous valley on the road leading from head-quarters to Kazatch, salute upon salute met the ear, with the occasional dun of the muffled drums, as the mournful procession proceeded on the line of road. The procession reached its destination at about half-past six o'clock, when the body was removed from the carriage which conveyed it thither, and placed on board the *Caradoc*, preparatory to its departure for England.

ARRIVAL OF THE BODY IN ENGLAND.

Wednesday morning was ushered in by the firing, from many parts of Bristol, of minute guns and by the peals of muffled bells. The body of the lamented General was transhipped from the *Caradoc* to the *Star* as early as six o'clock in the morning, and was placed on a bier covered with black cloth and crape, and surmounted by a catafalque of the same materials, on the deck of that vessel.

The coffin was placed amidships under a temporary canopy, having the deceased Field Marshal's coronet resting on it, and around a guard, consisting of fifteen artillerymen, and a party of seamen from the *Caradoc*. On the quarter-deck stood the personal staff of the late Field Marshal, accompanied by Colonel Bagot, Lord Calthorpe, and other near relatives. Captain Derriman was also present; and Captain Pryce, as chief naval officer of the port, was in charge of the steamer. As she moved slowly up the harbour, a double line of fifty row-boats, all placed in mourning, and manned with crews in uniform, followed in solemn procession. This part of the programme was managed with the greatest regularity and effectiveness, and, coupled with the masses of spectators congregated on every commanding point of view, the heavy booms of minute guns, and the solemn pal of muffled bells from tower and steeple, was well calculated to exercise a powerful influence upon the minds of those who witnessed the scene. At the Quay-head, Prince's-street, the Mayor and Corporation were drawn up in great pomp, ready to receive the body, and to convey it with every mark of honour and respect through the city.

First came a small party of the local police, clearing the way; then a few men, apparently from the neighbourhood, who had served in the Crimea, and behind them the two Volunteers of No. 8 battery. To these succeeded the band of the 15th Hussars, playing the "Dead March in Saul," and then the advanced guard of the escort of Blues. Immediately around the hearse the procession was marshalled with the usual funeral pomp observed on such occasions, the plumed canopy being borne in front, and also the coronet of the deceased, carried by his servant on horseback. A special guard of artillerymen walked on each side of the hearse, and close behind came the remainder of the escort of Blues. They were followed by the mourning-coaches, conveying the staff and relatives of the deceased; and to these succeeded the rest of the military—the Land Transport Corps being first, then the Artillery, then the Pensioners, after them the squadron of the 15th Hussars, and, closing the rear of this portion, the four guns of the field-battery, the latter of which have already been mentioned as placed in advance. The civil part of the procession now followed—the Mayor and Corporation, in twenty-four carriages; then the Society of Merchant Venturers, also in carriages, with their banner in front, borne by a party of seamen; after these the Corporation of the Poor; then the clergy; and, closing all, a long column of citizens, formed six deep, and for the most part either "Odd Fellows," or "Foresters." At the Hotwells the funeral procession terminated, and the hearse, attended only by the mourning-coaches, proceeded to Badminton. There the body of the late Lord Raglan was interred on Thursday, at two o'clock, in strict privacy, the immediate relatives of the deceased being alone present to witness the ceremony.

THE VIENNA CONFERENCES.

ALTHOUGH Lord Palmerston would not promise to lay the instructions to Lord John Russell upon his proceeding as British Plenipotentiary to Vienna before Parliament *in extenso*, he has given enough of them to show the position that our Government took up, and to prove that that position was commensurate with the dignity of the nation and the expressed wishes of the English people. In the outset the document says :—

It is her Majesty's most earnest desire to see the Great Powers of Europe arrayed in a combined effort against the spirit of encroachment and wrong by which the councils of Russia have been animated; not only because such a league would most probably lead to an early termination of the existing contest, but because an assurance would be obtained that the termination of the war would place on a solid and secure basis the general interests of all Europe.

As regards the subjects to come under the consideration of the Conference, her Majesty's Government are of opinion that they must be taken in the order in which they have hitherto stood, notwithstanding that the Third basis is the one the satisfactory development of which is likely to meet the greatest obstructions; but it will be in vain to stipulate that the Danube mouths shall be withdrawn from the exclusive protectorate of Russia, or that the navigation of the Danube shall be set free from the obstructions which impede it, unless effectual precautions are taken to render the Turkish Empire an integral part of the European system, and sufficient restraint be imposed upon the military and naval power heretofore exercised by Russia in the Black Sea, and the overbearing influence which, by reason of that power, she has acquired over the councils of the Porte.

The great object to be accomplished was "the abrogation of Russian supremacy in the Black Sea." The grand problem how that could be effected with the least inconvenience to the Powers of Europe. One mode was by a common agreement that the Maritime Powers should maintain in the Black Sea a force adequate to counterbalance the naval force which Russia has heretofore maintained; but this would only be "an armed truce, liable to be interrupted at every moment by chance collisions, and entailing on the Maritime Powers a perpetual expenditure to keep up, at a distance from their arsenals, an efficient force in the Black Sea, while Russia, having her arsenals at hand, and her harbours of refuge always open, would be relieved in a great measure from the costs to which the other Powers would be exposed." Another mode was by the reduction of the Russian naval force in the Black Sea within such bounds as would serve for the protection of peaceful commerce, without furnishing dangerous means of aggression.

After stating the views of our Government, which are well known, relating to the Danubian Principalities and the navigation of the Danube, the document concludes with the following declaration :—

The intimate acquaintance which your Lordship possesses with the various points to which I have adverted will suggest to you the fittest arguments in support of the policy of her Majesty's Government, which is to restore peace to Europe on a solid foundation. The blood and treasure which have been so freely expended in the cause of that policy would be altogether thrown away, if the only result of our efforts should be a hollow truce, to be broken whenever a suitable opportunity should arise for the attainment of the long-cherished objects of Russian ambition—the subjugation of the Ottoman Empire in Europe, and the enthronement of a Russian prince in the capital of Turkey.

STRAHAN AND CO.'S BANKRUPTCY.—On Monday Messrs. Rushworth and Jarvis offered by auction on the premises the banking establishment of Messrs. Strahan, Paul, and Bates, consisting of the two freehold houses, Nos. 217 and 218, Strand. The purchasers were the directors of the London and Westminster Bank, for the sum of £20,000.

THE WAR IN THE CRIMEA.

(From our Artist and Special Correspondent.)

BEFORE SEBASTOPOL, July 14, 1855.

A visit to the trenches last evening convinced me, in the absence of any information save that which is obtained by personal observation, that, undeterred by the failures of the 18th of June, our forces are as active as ever in the endeavour to approach the great Russian works, which still give us daily and nightly proofs of their strength and vivacity. Long lines of red-coats marching along the ravines in the dusk of evening, carrying in silence poles, gabions, fascines, and empty casks, prove by their number as well as by the implements they carry that our approaches towards the enemy are still carried on with activity untiring and spirit unflagging. Our ingenuity does not enable us, however, to discover what the enemy is doing inside of his parapets and embrasures, and our silence consists in getting a little closer every day, ultimately, by the employment of force and number, to overpower a resistance of which we are unable to discover the density or force. It is a remarkable fact, and one which has been noticed more than once, how little military art has progressed in that branch of ballooning I recollect the description of endeavours made by Dumouriez internal arrangements to meet the attacks which threaten him. In the history of our ingenuity does not enable us, however, to discover what the enemy is doing inside of his parapets and embrasures, and our silence consists in getting a little closer every day, ultimately, by the employment of force and number, to overpower a resistance of which we are unable to discover the density or force. It is a remarkable fact, and one which has been noticed more than once, how little military art has progressed in that branch of ballooning I recollect the description of endeavours made by Dumouriez of balloons I recollect the description of endeavours made by Dumouriez to see into an enemy's defences. A balloon sent high into the air enabled a man to examine at leisure what was invisible to those who were confined to *terra firma*. Notwithstanding the continual fire of the enemy, the balloon remained suspended above the hostile camps for many days, and was finally abandoned only on account of the difficulties attendant on filling and transporting it. There are, doubtless, very cogent reasons at the present day for not adopting this means of viewing the enemy's works. Probably the thing was impossible, or our Generals would have attempted it; but there are many people of considerable sense in both armies who ask is there no possible way of gaining topographical knowledge of the enemy's ground, except that costly one which consists of making attacks, followed by the loss of 4000 men? Where are the triumphs of science, and what use are they, if they cannot help in this? It is a problem well worthy of consideration. There is one circumstance in connection with this which deserves notice. The Russians, we are told, have numerous spies in our Camp. Every week has its tale of some person dressed in French or English uniform penetrating into our batteries, viewing our works, and retiring with their information to the enemy. No later than yesterday I was informed by a Lieutenant of French Artillery that as he was at breakfast in the trenches one of his men accosted an officer wearing the uniform of the French Engineers, and reminded him of the order that no person, whatever his rank might be, could be permitted to visit the trenches without special permission and previous communication with the chief of the battery. The man thus spoken to said he would merely walk round, and then come to the officer in command. The soldier, however, ordered him to follow, and took him before his superior. A conversation ensued, in which the pretended officer of Engineers claimed acquaintance with the officer of Artillery; and, although the latter did not recollect the introduction, the man spoke so fluently that he raised no suspicion. Next day a spy was arrested in the French Camp, disguised as a Lieutenant of French Engineers. Such is the story: it may be true, and not unlikely to be false; but of this there is no doubt—Russian spies, as far as they can be discovered, are men of education, and it is, I believe, a great distinction to a Russian officer to gain information, by disguise and stratagem as it is an honour for him to gain advancement by bravery in the field. The Russian spies are many of them officers; and these, stimulated by the prospect of success, and its reward, are the ablest men that can be employed. The manuals of military art tell you that information of the enemy's movements may be obtained from three chief sources—from deserters, from men whose prospect is a mere reward in money, and from men whose personal animosity leads them to stake their existence in giving information against the objects of their hatred. The first of these is characterised as almost worthless, the last as the most worthy of attention. The Russians possess a means more successful than any of these; they make spying an honourable employment—the mere proposal of which to an English or French soldier would be considered an insult of the grossest magnitude. If we cannot imitate the Russians in this, let us discover some other means equally successful; for we cannot continue to sacrifice 4000 men every time it becomes necessary to ascertain how a work is to be taken, or which is the safest way to attack it? We have none but the worst class of spies, I believe, and the prisoners we take know but little. Perhaps, indeed, it is on account of this that General Pelissier says, with nasal accent peculiar to him, "Je ne comprends pas l'usage qu'on peut faire des prisonniers ni à quoi ils peuvent servir!" I cannot understand the use of prisoners, nor what purpose they can possibly serve).

Hoping I may be pardoned this digression, I return to the siege. There is one remarkable feature about its present progress. The capture of the works which the Russians threw up against us in advance of the town has put us in possession of certain lengths of zigzag works forming the approaches from Sebastopol. The possession of these, however, increases our labour. We are forced to turn the parapets from our own to the enemy's side, and in the prosecution of this labour numerous casualties occur. On our part, indeed, it is said that the fire kept up by the Russians from their Bastion No. 2 (the Redan) has been so destructive as almost to stop our parties, in their progress. This was especially noticeable on the 10th, when they kept up a heavy discharge of ordnance for several hours, disabling no less than three of our guns in the Greenhill Battery. Notwithstanding all impediments, the works in the advance are progressing, not only on our part, but on that of the French; and our batteries kept up a well-directed fire against the Redan during the whole of the 16th and 17th. At noon of the last-named day a very large fire was seen burning in the vicinity of the Malakoff, but whether kindled by the Russians themselves or by one of our shells it is difficult to say. I am told that, as early as the 8th, the range of the newly-prepared batteries, both French and English, was tried, and some telling shots took effect amongst the fleet at anchor by the boom in the harbour; as yet, however, these ships have not been moved, and are still in the capital position which they took up for raking the Malakoff Tower before the 18th of last month. The view of these ships from our heights is much better than it was some time back. The suburbs in our direction being entirely destroyed—partly by us, and partly by the Russians themselves—there is nothing now between us and the harbour except the batteries, which exhibit their grim and jagged embrasures everywhere, and a few favoured houses, which have been purposely spared. It is well known that it was arranged amongst the Russians and Allied commanders that certain buildings painted of a peculiar colour, to be used as hospitals, should be spared. By this arrangement it was merely intended that we should spare certain public edifices; but, if we are to judge by the growl which the subject raises amongst the soldiers, there are more public edifices in Sebastopol than would suffice for a town of twice its size, and it is shrewdly suspected that the peculiar colour—green, I believe—has been applied to more than the stated number of buildings. Colour is a favourite study of the Russians. When Malakoff reared its white tower above the earthworks around it, it glittered in the sun of a pure white. One morning that interesting object had been partially eclipsed by a coat of brown. Now the tower exists no longer, and one great feature is lost in the landscape; the earthworks which surrounded it have taken considerable extension, and have thrown by their importance the redoubtable Redan into the distance. Beyond all these works we also see puffs of smoke from guns at the north side of Sebastopol, taking distant shots at our advanced parallels and behind these the camp of the Russians, which is considerably reinforced daily, if the truth is told, and yet never seems at all larger. I often wonder if there are any dummy tents and sentries there to impose on us as they did on the Turks at Giurgevo.

Our gallant allies, the Turks, have been forced to leave their beautiful encampment at Varnoutka, where they no longer bask in the shade of the groves of Baidar. I suspect that the army of Omer Pacha was but ill fed there, and that pleasant landscapes did not compensate the soldiers for lack of food. Omer Pacha, however, has found another picturesque spot whereon to pitch his tent, and is now at rest in the highest part of a large glade opening out on one side to Kamara, on the other to the sea. The Turkish artillery, which we had seen so neatly covered with green boughs at Varnoutka, I discovered on the 10th at Kamara, encamped near the church. From that spot one could see the road entering the gorge towards Baidar, at the opposite side of the vale from Kamara; and on the right, following the undulations a narrow glade leading towards the sea, was the way to Omer Pacha's quarters. The underwood, which in some places grows to a height of five feet, was sprinkled with little patches of grass, where little clumps of tents marked the presence of a small detachment. The sides of the glade are precipitous; and on their summits the Turkish sentries stood tall and gaunt in the evening sky; and the track—for it cannot be called a road—leading up was filled with arabas drawn by Bulgarians, who, by long absence from their native land, had lost the peculiar characteristic of the dress of their class, to assume the fez and dress of the Turks. A few Sardinians bending under loads of green wood straggled home at intervals. A prettier spot is not to be found anywhere, except, perhaps, in the neighbourhood of Bantry, than is this on which the Turkish Camp is pitched. From the spot where Omer Pacha sat in the evening, listening to the wild strain of a band, one could see the crags of Cape Ala dipping perpendicularly into the sea, and forming by its inland stretch one of the sides of a gully of considerable depth, the centre of which sloped down to the shore with a gentle decline. The sides and bottom were swarming with men gathering hay in the open spaces, whilst the faded horses fed upon the underwood. The sea formed the background, calm and unruffled, except where little flaws of wind covered it with sinuous lines. Two or three steamers seemed to sleep upon the water. From the heights to the right, as you looked to seaward, Cape Plaka was visible, and the nook where of old Orestes and Pylades contended for the palm of generosity, and a Greek chapel marks the spot which was hallowed to the ancients by a temple of Diana. Returning by the coast road which follows the brink of the precipice, we could distinguish the positions of our Marines on Balaclava heights, the battery which sweeps the road towards them, and the various impediments created by us in the shape of ditch and *chevaux de frise*, to prevent the enemy's approach. Close by was the ridge on which the Russians had brought heavy guns in the winter for the purpose of annoying our Camp on the heights, not knowing that the distance was too great to give their fire a practical effect.

On that spot where I stood gazing at the beautiful landscape, doubtless has reclined more than one lazy Cossack, watching with that interest which peculiarly attaches to spots which we see yet cannot reach; the English sentry behind the trench, the guns bristling through the embrasures of the redoubt, the bay of Balaclava, with the shipping lying there, and the plain round Kadikoi; the heights on which Bosquet so long held a position, and the distant ground where Inkerman was fought. It was evident at a glance that from this spot the enemy might, with good glasses, see every movement of our camps, every arrival and departure of our fleets of transports. It was easy, in the dim light after sunset, when objects are not very distinct, for me to see the cavalry watering their horses, and the little pools which dotted the plain shining white upon the dim ground of the trodden fields.

Passing on towards Balaclava, I found that the old camp of the Marines and 1 Rifles was partially occupied by Turks and Sardinians. The service of Balaclava is still done by the Marines, assisted, since the departure of the Highlanders, by the newly-arrived 15th, which has been quartered at Kadikoi, in order that it may become acclimatised, but which has been suffering from cholera, consequent on exposure to great heat.

Although the Turks have withdrawn their main body from the vale of Baidar, that ground has not by any means been abandoned. There was too much valuable forage in the meadows there not to tempt us to remain. Accordingly, when Omer Pacha withdrew the greater part of his force, the French commissariat entered into a contract to supply the forage of the vale to the cavalry; and they obtained the assistance of three regiments of dragoons and hussars to protect them in getting in the harvest. As for the strategic value of the occupation of this portion of the Crimea, I suppose that it was soon discovered by the Allies to be of little account; and if any idea was entertained of moving in that direction, for the purpose of turning the position of the Russians in the field, it has apparently been abandoned, either because a movement in that direction was impossible, or that it was fraught with dangers too great and risks too serious to be run at the present time. It is said, indeed—but I cannot vouch for the truth of the report—that Omer Pacha is about to return with his forces to Eupatoria, where he is to have the assistance of one of our Light Cavalry brigades.

The caution of the Russians, and especially that of their cavalry, when they meet the reconnaissances which are sent out daily by the French, is very great. They seek to manœuvre, so as to bring the French parties that meet them into the vicinity to their batteries, but they find their match in the Chasseurs d'Afrique, who have had more than usual practise in the art of eyading tricky movements made by an enemy to entrap them.

Within the last few days the Sardinian sentries at the aqueduct have forbidden the passage to amateurs desirous of visiting Tchorgoun and Karlooks. The officer of this post, however, was kind enough, a few days ago, to lead me and a few friends to the summit of a mound forming on the right side looking towards Sebastopol the barrier through which the Tchernaya river breaks its way out of the vale of Karlooks. The view thence extended over towards Inkerman on our side and Karlooks on the other, and in front of it was a mound higher still than that on which we stood, where the Sardinians were making an advanced field battery. The Russians had built a redoubt where we stood, from which the Bersaglieri were taking the materials for a field work, or parapet, for musketry. I was much interested by the officer's explanation of the arms used by these Bersaglieri. Their rifle takes a conical ball, but have no cartridge. The powder is first put in with a horn which gives the charge by the pressure of a spring, and the ball is dropped in without a wad. The piece when fired is taken in the left hand, close to the trigger, and falling forward is brought into horizontal position, and maintained there by a spike fast to the bottom of the stock, which catches at the armpit. The right arm is not used to steady the piece, which, being supported as I have described, is not subject to waver. The aim is therefore truer than usual. This rifle is the invention of General della Marmora, brother of the Sardinian General-in-Chief, and the same who died the other day of cholera. The Sardinians are still suffering from the malady, which carried off two of their general officers, and they compute their loss from it and fever at from sixty to seventy men per diem. It is strange that whilst these troops are suffering from sickness with more than usual severity, the cholera is also raging at Piedmont, where it finds many victims. Yet the army, after it embarked, suffered little or no loss from cholera in its passage to the Crimea. The weather has been very trying, indeed, here, even to men accustomed to Italian heat. On the 11th the thermometer was at 105 in the sun, with light misty clouds scudding low, before a south-west wind. Yesterday the heat was intense, marking 85 to 90 in the shadiest places.

We hear from Trebizond news which, if it be true, and I have no reason to doubt its authenticity, is of the utmost importance. Old Schamyl, the prophet of the Circassians, is dead, and has been succeeded by his son, who has, it is said, signed a peace for eight years with the Russians. The force which opposed the Turks near Kars skilfully moved between that place and Erzeroum, and Kars has, it is now said, fallen, and, according to the latest accounts, the Pachs of Trebizond had marched out towards Erzeroum with 10,000 irregulars. If peace between the Russians and Circassians be realised, we have no reason to congratulate ourselves upon the abandonment of Anapa to the latter.

Amongst the losses which we have had since the affair of June 18th is that of Captain Mansell, of the 39th, killed on the 10th instant, whilst on duty in the Quarries.

I send you the illustrated bill of the Zouaves' last performance at the Inkerman Theatre, and I intend to visit that place of entertainment at its next opening.

Lucanic as Lord Raglan's despatches commonly were, they are fair outstripped in that particular by those of General Simpson. His latest, dated July 26, 5 p.m., merely says—" Cholera has not increased since my last report, and the army continues in satisfactory health." This is all we know regarding the state of affairs up to last Wednesday afternoon, and it amounts to nothing positive. The letters by the *Euphrate* steamer come down to the 19th inst., but they only repeat what former letters told us regarding the progress of the siege works. A fortnight ago a general impression prevailed that the monotony of the trenches would be exchanged for active operations. That, however, seems to have been postponed. The preparations are probably not yet complete. When the steamer sailed, the French were making visible progress in their sap towards the Malakoff. Half-way between that stronghold and the Mamelon, where our allies are firmly established, a long trench was visible, which showed how far they had advanced in the interval since the last attack. The Russians have made no serious attempt to retake this latter position, although they made a little sortie on the night of the 6th inst., in which some sharp fighting took place, the end of it being that the Russians retired after somewhat interrupting the French works. But the enemy is understood to be much more actively employed in strengthening the Malakoff itself, which he must feel to be the key of Sebastopol. Should this now celebrated hillock fall into the hands of the Allies, no ingenuity or obstinacy of defence can delay the capture of the southern side beyond a few weeks. The Russians are day and night at work deepening the ditch and constructing abattis. A very large body of troops is constantly under arms, and every means are used to avoid a surprise like that which gave the French such easy possession of the Mamelon. Nor is it merely the Malakoff and Redan which the enemy is strengthening. The Russian engineers are said to be constructing works on a very large scale behind the fortifications with which the Allies have been brought in contact. The whole harbour is alive with boats. Craft of all shapes and sizes are continually crossing and recrossing, carrying gabions, fascines, and trunks of trees for the construction of abattis, as well as provisions and ammunition. They discharge their cargoes and immediately return for fresh ones, each boat seeming to make some twelve or fourteen trips a day. The ships' boats seem all to be employed at this work, which is no doubt performed by the sailors. The large supply of wood yielded by the forests of the Crimea has been one of the chief aids to the defence of Sebastopol. Fuel for the steamers and for cookery has been obtained in abundance, and the want of coal has probably been little felt. Trees felled and brought a distance of ten or twelve miles form the strong abattis, six feet high, which is one of the chief defences of the Redan. Fascines for the works have been obtained from the same quarter, and are brought in vast quantities.

As for attacking the Russian position, that appears to be considered all but hopeless. Nature seems as if she had constructed the plateau they occupy as a vast defensible position, which 50,000 men may hold against four times their number. Of the reduction of Sebastopol proper before the winter few parties have any doubt. That the Russians will hold out with all the obstinacy of their character, even after the destruction of their ships and the capture of the Malakoff, may be expected; but the possession of a new position, commanding the harbour and the bridge of boats which crosses it, must overawe the garrison to retreat. The Russian generals, though brave and determined on an obstinate defence, may fairly receive credit for the possession of prudence and forethought. As long as a place can be held with the chance of success, or even of damaging the enemy, they will hold it; but all their proceedings give reason to believe that they will not allow their troops to be cut to pieces merely for the credit of having made a desperate resistance, and held, without advantage, for a short time longer an untenable position. When they see that their retreat is seriously endangered, it is not improbable that they will altogether abandon the southern side, which they can hardly hope to hold should the Allies be able to command the harbour. They, no doubt, count on being able to prolong their resistance until the winter sets in; if this be impossible, they will most likely abandon the northern side, which it may be impracticable to lay siege to before the spring of 1856.

On the night of the 12th the battery which the French had constructed between the Mamelon and the Malakoff was knocked to pieces by the powerful fire of the latter. A colonel and about thirty officers and men were put *hors de combat*, and the siege works have received a decided check. In fact, as the Allies advance to the actual defence of the place, they must expect to meet more elaborate works, and obstacles heaped on one another with all the care which nine months of preparation admit. Even now the enemy are strengthening the Malakoff every day.

THE BLACK SEA FLEET.—ANOTHER EXPEDITION.

On the 10th of July the fleet was ready to weigh anchor; whither it was to sail no one could say. The rumour in the Camp was that it was going to Odessa, and this version seems probable from what we hear from that place of the great anxiety of the Russians, who expect each moment to see the ships of the Allies in their waters. Since the bombardment of Taganrog measures of defence have been adopted. The arms of the Don have been closed up and rendered inaccessible. Batteries have been erected on the coast, and a flotilla of gun-boats have been established on the river. There is also a strong garrison of Cossacks, and troops under the orders of Lieutenant-General Bagovert are massed near Nicolaieff.

We should not be surprised to hear of an attack on the forts of Kimbourn and Ozokow, which guards the entrance to the Bay of Cherson, the estuary into which the Dnieper and the Bug discharge their waters. This spot is well known to be one of the principal depôts of the military and naval stores of the Russian empire, and of provisions for the army, and though we do not know how far it is possible to approach Cherson and Nicolaieff, we cannot but think that the seamen who found their way within gunshot of Taganrog would pilot a gun boat near enough to those arsenals. The mouth of the Danube might also be attempted now that the admirals have a flotilla of gun-boats capable of passing the bar.

ABANDONMENT OF THE SIEGE OF KARS.

The latest intelligence from the seat of war in Asia, if it may be relied on, goes far to confirm the statement of the Earl of Clarendon, on Monday evening, that there is little danger of Kars being taken by a *coup-de-main*, as the alarmist newspapers have been predicting. Letters received by the *Euphrate* steamer, which left Constantinople on the 16th instant, state that General Mouravieff had suddenly abandoned the siege of Kars, with the view, as was supposed, of surprising Erzeroum, which is weakly garrisoned by the Turks, or of drawing the Turkish army into the field. Should the Turkish general be so rash as to venture on a pitched battle, his troops would stand very little chance against the Russian cavalry and artillery. In defence of Kars we have no doubt the Turks would fight well. Lord Clarendon says that, in spite of their sufferings last winter, the Turkish army has manifested the greatest energy and courage. The inhabitants of Kars, he says, have displayed the best spirit; they have been supplied with arms, and are ready to oppose the enemy. The enemy appeared on the 23rd ult. there was a considerable Russian force between Kars and Erzeroum, which destroyed some stores of corn. After the failure of the attack on Kars, it appears that the Russians sent for some heavy guns; but, on account of the broken state of the roads, they were unable to bring them on.

The Governor of Trebizond reports that, on the news of the arrival of the Russians on the Turkish frontier, the inhabitants arose *en masse* to meet them, and there was great difficulty in preventing a general rising at once setting out. The Governor estimates the number of those who appeared under arms at 30,000.

AUSTRIA AND RUSSIA.—THE ENTENTE CORDIALE.

The *Journal des Débats* of Sunday last contains an analysis of a note from M. de Nesselrode to M. de Buol, dated July 5, which goes farther than anything that has yet seen the light to prove the existence of that "secret understanding" between Austria and Russia to which circumstances have long pointed, but which the Western Governments were lamentably slow to suspect. Immediately after the dissolution of the Conferences M. de Buol addressed to Count Valentine Esterhazy, the Austrian Plenipotentiary at St. Petersburg, a series of despatches, informing him, down to the minutest particulars, of what passed at Vienna in the closing sitting of June 4, authorising him at the same time to furnish M. de Nesselrode with copies. These despatches, consisting of a confidential nature, were, it must in justice to the Austrian Government be said, communicated to the Cabinets of Paris and London. The note of M. de Nesselrode, above alluded to, was addressed to Prince Gortschakoff, the Russian Ambassador at Vienna, for the information of the Austrian Minister, and about the 12th of July the Prince and M. de Buol had a conference on the subject. The following is what the *Débats* has learnt of the contents of the note:—

M. de Nesselrode follows step by step, and in all their details, the despatches and notes of the Austrian Chancery, and approves of them all without reserve. M. de Buol having taken great credit for the course pursued by Austria from the beginning of the quarrel, M. de Nesselrode outdoes him in praise, and holds up the conduct of Austria as a model of wisdom and foresight. M. de Buol having confided to Count Esterhazy his regrets that the propositions which he had at one time hoped to induce the Western Powers to accept, had been broken off, M. de Nesselrode expresses his sympathy with M. de Buol's regrets, and shares he hopes that negotiations may soon be resumed. M. de Buol cannot possibly desire peace more ardently than M. de Nesselrode does, and M. de Nesselrode deplores equally with M. de Buol the unfortunate differences which can only have occurred in consequence of an unaccountable misunderstanding. According to M. de Nesselrode, the last propositions of Austria offered a *very acceptable solution*, and Russia would *scarcely have asked even for a trivial modification* of them. The moment that Russia was to treat directly with Turkey her dignity was untouched, and she might, without any wound to her honour, have made almost all the concessions indicated by Austria. Austria desires to occupy the Principalities. So much the better for everybody. Russia is even more anxious than Austria can be for the independence of Turkey. If the Court of St. Petersburg has shown itself facile in regard to the first points, if it has made no serious objection to the arrangements relative to the Principalities and the free navigation of the Danube, the Court of Vienna knows perfectly well that it was, above all things, out of consideration for Austria, and of the third point was not settled as easily as the two first, the Court of Vienna will admit that it was not the fault of the Court of St. Petersburg. M. de Nesselrode makes the following reflection which he submits to the instinctive experience of M. de Buol. One day when the Plenipotentiaries assembled at Vienna, they found themselves obliged to suspend their deliberations on the Third Point, because some of them were waiting for further instructions; it was proposed by one of their number to pass on to the discussion of the Fourth. The majority opposed that. And why? The real motive was not then disclosed, but no one can now be ignorant of it. Every one was persuaded that it would be even more difficult to come to an understanding on the Fourth Point than on the Third. It was foreseen that the Turkish Plenipotentiaries would offer an inflexible resistance to whatever the European Powers might propose to assure to the different religious communions the enjoyment of their privileges; and that, unless violence were done to the Porte in the interest of civilisation, the negotiations must have been broken off upon that point. It was desired to avoid this, and therefore it was that the Plenipotentiaries separated upon a Russian question. In conclusion, M. de Nesselrode renews his protestations against the intentions imputed to Russia of making war upon Austria. Such a war, it is declared, is impossible The Russian armies have been, *and may be again*, at the service of Austria. They will never fight against her. To assure M. de Buol of this, the Russian Chancellor employs the most solemn expressions—expressions such as bind in the strongest manner the honour and conscience of men.

THE HANGO AFFAIR.

The *Journal de St. Petersbourg* contains a very long reply to the letter addressed to the Russian Government by Admiral Dundas relative to the Hango affair. The Cabinet of St. Petersburg, finding the sensation which that incident had produced, confided to General de Berg the mission of instituting a rigid examination into the circumstances of the case, and, in the report of the officer appointed to carry it on, he says:

No flag of truce was seen flying on board the *Cossack*, nor in the boat which came towards the landing-place, nor in the hand of the officer who landed on the Russian territory. This declaration has been confirmed by every one who witnessed the occurrence. While the affair was going on on shore, the sailors who remained in the boat had time to throw overboard a small swivel-gun, with which the boat was armed. Among the number of the persons in the boat, three were found which had been recently discharged, notwithstanding the assertion to the contrary made by Brown, the seaman. Three others were loaded with ball. The crew of the boat had on them 300 cartridges, 400 caps, and two incendiary tubes, with their matches attached. These arms, taken from the enemy, prove that the expedition of Lieutenant Genesse, even though he had ostensibly covered it by a flag of truce, could not have been simply to send despatches, but that it had the double object of reconnoitring the coast and of sounding the disposition of the Finlanders.

The same journal publishes a reply of Prince Dolgorouki to Admiral Dundas, dated the 11th, announcing that, in consequence of the latter's observations, the Russian Government has resolved to allow communications under flags of truce to take place at Libau, Windau, Wasa, and Torneo, as well as at Cronstadt, Sweaborg, and Revel. But it states that some naval officers have destroyed boats belonging to private persons which were not engaged in traffic; and that, as such acts are contrary to the Admiral's own declarations, the Russian Government expects for the future that his orders against such acts will be strictly obeyed. "Any deviation from the rules laid down by the Admiral can only," says the Prince, "serve to keep alive between nations formerly friends an animosity which will survive the cessation of hostilities."

DESPATCHES FROM GENERAL SIMPSON.

War Department, July 26.

Lord Panmure has this day received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Lieutenant-General Simpson, Commanding her Majesty's Forces in the East:—

Before Sebastopol, July 14, 1855.

My Lord,—I announced to your Lordship by telegraph, on the 11th, the death of Lieut.-Colonel Vico, of the French army, which melancholy event took place in the afternoon of the 10th inst.

It is impossible for me to find words to express my regret at this sad visitation.

Lieutenant-Colonel Vico joined the English Army as joint Commissioner the latter end of May, 1854, and had, up to the time of his death, never been absent from his duty for a single day. At Varna, where the cholera raged, and carried off hundreds—at the landing of the Allied armies at Old Fort—at the Bulgsanc, where his colleague, Lieutenant-Colonel Hogan, was taken prisoner, and from which time he had the sole charge of the communications between the French and English head-quarters—at the glorious battle of Alma —at that of Balaclava—at the stern and bloody fight of Inkerman—in fact, at every place, and on every occasion, where he thought his services could be of use—was Lieutenant-Colonel Vico to be found.

I know that the late Field Marshal Lord Raglan held him in the highest estimation, and placed the most implicit confidence in him; and although my acquaintance had, comparatively speaking, been but a short one, it had been long enough for me to appreciate the many excellent qualities with which he was endowed.

A pious Christian, a brave and gallant soldier, a single-hearted, upright man, a kind and generous one, who thought no personal sacrifice too great for the public good, he has gone from us, beloved and regretted by every English man who had the advantage of knowing him and enjoying his friendship

I have, &c., JAMES SIMPSON,
Lieutenant-General Commanding.

The Lord Panmure, &c. &c. &c.

Before Sebastopol, July 14.

My Lord,—I have the honour to transmit the numerical and nominal returns of casualties in this army from the 9th to the 12th instant.

Captain Mansell, of the 39th Regiment, who was killed in the trenches on the 10th instant, was a most gallant and meritorious officer, and his loss is much regretted.

I also enclose the return of casualties in the Naval Brigade, the day we opened fire on the Redan—considering which circumstance, your Lordship will rejoice to find that the list is not heavier. The two men who are returned as killed and wounded dangerously, respectively, received their injuries by the accidental bursting of the guns they were serving.

The weather, which had been oppressively hot since the date of my last despatch, has since changed to a far cooler and more agreeable temperature

The health of the army continues good, and their confidence and cheerfulness unabated.

There has been no change in the disposition of the Allied troops since my last despatch. I have, &c.,

JAMES SIMPSON, Lieut.-Gen. Commanding.

The Lord Panmure, &c. &c. &c.

PASSAGES FROM THE JOURNAL OF TWO SOLDIERS IN THE CRIMEA.

[THE friend to whom the survivor of the Two Soldiers sent this journal for editorial revision in England is authorised to detach any passage for publication in any form available. The life of turning out, of fighting, of returning to Camp, cooking, cleaning, laughing, talking, reading, grieving, hoping, working in the trenches, mounting guards and pickets, going to Balaclava on "fatigue," and returning with the latest news from England, is described with more of the individuality of non-commissioned and rank-and-file society than the usual correspondents of the press are familiar with. But the military events which the Two Soldiers describe are already so well known as not to bear republication in a newspaper. For the present, a few passages are selected relating to the books sent from England, last winter, to amuse the army.]

LONG JOHN GURNEY AND THE BOOKS.

"Ten men for fatigue immediately," cried our Orderly Corporal, with his copy of the alphabetical list of the company in hand; "the first ten men for duty. Where is Long John Gurney? Who is first for duty? Let me see (consulting his book). All from N to Y on picket; from A to the third F on guard; the other F's two cooking and one standing orderly. Garvington, you are first—turn out, Garvington. Ah! I forgot; wounded in the trenches yesterday. Gadsby, ("Gone to hospital!") So he has. Garrett; nothing the matter with him, surely ("Dead—frozen to death last night") That has not been reported. Is it fact?" "It's as fact as death," replied John Gurney. "Well, then, Gliptis, you are first for duty; turn out instantly for fatigue, side-arms and haversacks. Glass; Gorham; Gurney——" "Stop a bit, Corporal; not so fast!" cried Gurney; "I am putting soles on the Captain's boots." The Corporal proceeded—" Hardy; Henderson; Hogan (cries of "Hogan's dead!") "When did he die; he went to the trenches yesterday, did he not?" "Yes; and he is there now, dead and buried. A precious orderly, Corporal, you are, not to know your dead men from your living!" "I have not come off picket myself, and no one has corrected my list. Hogan; well, if he be dead he cannot go on fatigue, that's clear; we must pass him." "But," called David Lloyd from the interior of a tent, "if so pe you excuses so many you will pe town to my name, and it is not my turn pe turtles this day." The Corporal continued (while the voice of the Sergeant-Major was heard calling "Why is that fatigue party not paraded?") "Hughes, Inglis, Inman ("In hospital!"). So he is. Jenkinson ("Doctor's orderly!"); Johnson turn out; Johnson; you are wanted, though. All the other 11 turn out; Lloyd—David Lloyd; turn out, David." "No, I am for no duties before John Gurney." "True. John Gurney—where are you? Long John Gurney?" "I am mending the Captain's boots, and am excused." "It is only pretence," exclaimed Lloyd. The Corporal told Gurney it was a fatigue party to Balaclava. Upon which Long John, with a shout of delight, rolled from his seat (there was no room to rise in the tent) and accoutred himself on his knees, exclaiming, "The Captain don't want his boots till the day after to-morrow; besides, I want thread and bristles, and things I can only get at Balaclava." David Lloyd hearing that the party was going on that, the pleasantest duty which fell to our lot, said, "Long John Gurney, I will volunteer, and let you finish the Captain's poots. "Mash obliged, Taffy; but it is my turn for duty now. You stay where you are, and be first in turn for outlying picket to night; and first food for the Russians in the morning." "No," responded David, "I will pe no food for Russians till it pe the pressed will of Heaven; put Tavit Lloyd will always pe ready for the tutues in his turn" (Cries of "Bravo, Taffy!")

We had no two better soldiers than David Lloyd, the irascible yet gentle Welshman, and John Gurney, the long legged, long headed shoemaker from the Borders. John was a man of reading and understanding. When he took some first out he was sent to choose some for our company. He was not allowed a choice, however; but was peremptorily told to take a lot laid out by an illiterate policeman who acted as storekeeper to the Chaplain at Balaclava. But they must be poor books indeed which John Gurney could not educe information from. When we saw him unfold an odd volume of the "Annals of Commerce," a packet of political pamphlets about Corn-laws, and Tithes, and an annual Report of a Mutual Life Assurance Association, on each one remained for a sensible story, the dismay in our tent equalled that in the good Vicar's family when Moses unfolded the green spectacles. But John found the Report on Life Assurance suggestive, and made curious calculations of the value of lives as estimated by the sums we should like to eat, or the pay to draw at one hour of the day compared with another. On this day, going down to Balaclava, he entertained the party with information he had derived from that odd volume about commerce and the statistics of life.

"They tell us," said he, "that the castle was built by the Genoese, in olden times; but I can tell you more than that. The Crim-Tartars, who then, in the fourteenth century, carried the spices, and silks, and precious stones of the East overland, to meet the merchants of Hy West, invited them to form their great Oriental emporium in Balaclava or Sebastopol. Richard the Second, King of England, was applied to, in the year 1379, to allow a commercial harbour of the same kind, with its protecting castle, to be established at Southampton; and that was to become the great emporium of the West. The projectors were Genoese merchants. They had carried goods to Flanders, Normandy, and Bretagne, also to posts in the British Islands. Now, comrades, those goods had been first shipped in the Balaclava harbour. Yonder is the castle which protected them as they sought to be protected at Southampton. It was a grand scheme of international trade. Walsingham, a very old historian, says that, had it been carried out, the price of pepper in England would have been only four pence a pound. And who can tell but Sebastopol might have been an English city of commerce at this moment, instead of a stronghold of half-and-half barbarians! And who can tell how much war and bloodshed might have been avoided had this grand plan for uniting the East and West been carried out! And why did it not succeed? I'll tell you. The merchants of London were jealous, not of the Genoese, for they traded with them, but of Southampton. They invited the principal Genoese propounder of the scheme to London to confer with him; and when he was in the streets a band of their hired assassins fell on him and took his life. Had that life not been taken in the streets of London, who knows but the English would have had no call to take Sebastopol at this day?

"And," continued John, "another thing that old and odd volume told me was this, that the English and French have been allied together in an expedition to open the seas for commerce before now, to put down the common enemy before now. In that same reign of Richard the Second of England, the Genoese and Venetians and other mercantile powers of Europe, entreated the French and English Kings to send a joint army against the corsairs of Algiers and Tunis. It was commanded by the Earl of Derby, and was speedily successful."

The "fatigue" party had their burdens to bear and the heights to climb on their return from Balaclava; they cared not, therefore, to listen to John's fragments of history, nor cared he to talk. The police storekeeper of a fortnight before, who issued only such books as he chose to select, was dead. On application this day John had been invited by a person of politeness to select from the waste heaps of topsy-turvy volumes any twelve or twenty which he chose to carry away. Among others he chose a broad thin book in a dull yellow cover—the colour of the Russian on our maps—which, published in 1836, justified all the then best ideas of future aggressions of Russia. It had been published in London, and reprinted in Edinburgh, from whence our copy came. By marginal notes written by some previous reader we learned that it had been owned by the Imperial press of St. Petersburg, and circulated throughout Russia. John Gurney spread himself on the earth, before the camp-kettle fires, to read it. He rolled from side to side in indignation as he read, but would tell no one what excited him, further than "I declare to you, men, I am like one of those boiling kettles," and read on. He carried the book in his haversack to the trenches, and read it at relief hours there. He affirmed that, "As I am still a living man, by God's providence and not by Russian goodwill, this book has done more to provoke this war and cause this most terrible of collisions between the East and the West than any other single thing. It has justified what the despot has done, and palliated all his supposed designs. A marginal note says, that when the author of this book had become the leader of the commercial classes of England, leader of all the aristocracy and most of the working people, the Emperor Nicholas thought the time was come, and went to England, time 1844, to dispose of the 'sick man's' effects at Constantinople."

When John had thoroughly mastered the thin yellow book, so that he could explain as he read it, what a commotion it made in our part of the Camp to be sure! As this journal may be read at home, let us attempt a description of how its Russian, its un-English advocacy was listened to and commented on at our chief place of meeting, the Camp-kettles—arena of our cooks, and politicians, and newsmen. The title of the book was "Russia: A Cure for Russo-phobia." By Richard Cobden, Esq., author of "England, Ireland, and America."

THE DUNMOW PROCESSION, JUNE 20, 1751, FROM A PRINT OF THE TIME, BY DAVID OGBORNE.

REVIVAL OF THE CEREMONY OF THE FLITCH OF BACON AT DUNMOW.

The history of last week [illegible] will be remembered for the revival of this curious and interesting old custom. The publication of Mr Harrison Ainsworth's [illegible] last year [illegible] and some [illegible] of Great Dunmow, a small market-town about two miles from [illegible] was originally given [illegible] a number who placed themselves in communication with Mr Ainsworth for the purpose of reviving the custom. Mr. Ainsworth entered warmly into the plan, and not only subscribed handsomely towards the expenses but offered to give the flitch. When this was made public the applications were more numerous than could have been expected, and eventually Mr Ainsworth found [illegible] Those first selected were Mr Blackwell a surgeon of [illegible], with his wife, [illegible]. Mrs Blackwell [illegible] and [illegible] to choose another couple. This [illegible] Mr James Bacon, a [illegible] and his wife, [illegible] The Chevalier is a French gentleman, and the wife an Englishwoman, and both of them are favourably known by their literary labours. As the Lord of the Manor of Little Dunmow refused to allow the revival of the custom there, the next best thing was to hold the ceremony in the town of Great Dunmow, which, at the present day, is by much the more appropriate place of the two, and there accordingly it was [illegible] on the 20th of June. [illegible] from the metropolis [illegible] but more than one half of the number who would have been collected in them had the day been fine. In spite however of the inclemency of the weather, people poured in from the country around in great numbers, some of them in waggons and carts decorated with flowers and green branches, and [illegible] the streets at an early hour. The town was overwhelmed [illegible] part of the procession was to be performed [illegible] were [illegible] and [illegible] the Lamb Inn, and [illegible] other appropriate [illegible]. Although the [illegible] were admitted only to the [illegible] spectators of both sexes, [illegible] to act as the jurors. At two o'clock Mr Harrison Ainsworth, as the lord of the flitch, took the chair to preside over the court, the two sets of claimants, with their

THE DUNMOW FLITCH OF BACON CUSTOM.—EXAMINATION OF CANDIDATES IN THE TOWN-HALL, AT GREAT DUNMOW.

two witnesses each, were ushered into the places appropriated; and the counsel (consisting of Mr. Robert Bell, for the claimants, and Mr. Dudley Costello, opposed to them) took their seats. The prezes, or crier, with mock ceremony, opened the court, and Mr. Ainsworth from the chair delivered an appropriate address, in which he traced very lucidly all that is known of the history of this custom; dwelt on the advantage of keeping up old customs like this, which furnished innocent and exhilarating amusement to the people, and tended to protect rather than endanger morality, and upon the injudicious but fruitless opposition which a party had made to it in the present instance. The jury was then called over and received its charge; after which Mr. Bell addressed the company on the history of such courts, instancing others of the same character which had formerly existed in various countries, and comparing them with the Courts of Love in the middle ages, of which he gave a rather learned but very amusing account. He concluded by confuting two objections which had been made to the court; first, that it was illegal because held in Great Dunmow instead of Little Dunmow; and, secondly, that the claim was in neither case admissible because not put in at the exact period of a year and a day after marriage.

Mr. and Mrs. Barlow, as the first claimants, were first brought forward. They were a good-humoured and intelligent looking couple, excellent examples of good old English humanity; and they evidently carried with them the sympathies of the audience, among whom were many of their friends and acquaintance. Mr. Barlow, it appears, is a man who has raised

himself to a respectable and comfortable position in life by his own industry and good conduct, having been originally a mere ploughboy; but, having entered into service as a man of all work, he saved sufficient money to put himself apprentice to the business of a carpenter, in which he worked for some years as a journeyman, and subsequently set up in business for himself, and it was stated as a proof of the respect in which he is held by his townspeople, that they had shut up all their shops during the day in order to come to be witnesses of his triumph. The chief examination by Mr. Bell, and the cross-examination by Mr. Costello, of these claimants and their two witnesses, were carried on with admirable gravity, but they produced a very contrary effect upon the audience who were kept in a continual roar of laughter for considerably more than an hour. The position in society of the second claimants, the Chevalier de Chatelain and his lady, made their case far less calculated to afford amusement, and it was passed through more rapidly. At about half-past four this part of the proceedings was concluded, and both sets of claimants were declared worthy of the prize.

During this time the weather outside had undergone a propitious change, and the rain of the morning had given place to bright sunshine, leaving, however, behind it an abundance of mud. The procession set off from the Town-hall, immediately after the termination of the court, to the great satisfaction of the crowd in the streets, who cheered it loudly as it went along. At the head rode a "marshal" or herald, in dress of the olden time; then followed a party of the riders of the circus on their horses; next came a car decorated with garlands, in which rode the "ladies and gentlemen" of the jury. These were followed immediately by four yeomen, also in antiquated costume, carrying a frame, in which was suspended the first flitch of bacon, banded with wreaths of roses. This was followed immediately by the first successful couple, seated on men's shoulders, in a chair which appeared as though it were made of flowers. These were followed by another party of the equestrians of the circus, and by the second flitch, carried in the same manner, and by a similar chair, in which were the Chevalier and Madame de Chatelain; and the rear of the procession was brought up by Mr. Ainsworth in a carriage and a party of gentlemen on horseback. The procession proceeded through the town to a place out side called Windmill Field, where there was a large enclosure, in which stood the temporary building of the circus, and a large booth for refreshments. From a rough calculation we should judge that hardly less than 7000 persons were assembled on this occasion; and there was a great struggle to get into the enclosure, by those who were unwilling to pay the shilling demanded for admission. It was here that the concluding part of the ceremony took place. This consisted in taking with due solemnity the ancient oath of the flitch, thus expressed in rhyme:—

We do swear by custom of confession
That we ne'er made nuptial transgression,
Nor since we were married man and wife,
By household brawls or contentious strife,
Or otherwise at bed or at board,
Offended each other in deed or word,
Or since the parish clerk said amen,
Wished ourselves unmarried again,
Or in a twelvemonth and a day
Repented in thought in any way,
But continued true and in desire
As when we joined in holy quire.

When this oath was taken by each couple, it was the duty of the officer who administered it to reply:

Since to these conditions, without any fear
Of your own accord you do freely swear,
A whole flitch of bacon you shall receive,
And bear it hence with love and good leave;
For this is our custom at Dunmow well known.
Though the pleasure be ours, the bacon's your own.

After this ceremony, the two couples were carried in their chairs to another part of the field, where the flitches were delivered to them, and acknowledged by the Chevalier in a rather short address, but by Mr. Barlow in a long one, in which he endeavoured to demonstrate to all married pairs how easy it was to live without quarrelling.

The remainder of the day, until a late hour, was passed in various sports and amusements, for which ample provision had been made. A party of near thirty gentlemen dined at the Saracen's Head with Mr. Ainsworth, who was supported by several of his literary friends, namely, Messrs. Robert Bell, W. F. Ainsworth, T. Wright, Dudley Costello, J. W. Kaye, Wrixall, &c., and passed a very pleasant social evening. An excellent haunch of venison had been presented by the Viscountess Maynard Generally speaking, the proceedings of the day seem to have produced a favourable impression, for they presented none of the objectionable characteristics which some people seem to have expected, while the "performance" itself was carried on in a much more refined style of burlesque than any one looked for. No one could deny that there here no honest couples as in days of yore, as immaculate a jury, as good counsel, and as honest a judge, and many a good honest English yeoman, with plenty of sturdy lads and buxom lasses. A universal wish was expressed that it might be repeated another year.

HISTORY OF THE CUSTOM

The "flitch of bacon at Dunmow" is one of those numerous old local customs of which the origin seems to be entirely forgotten. All we really know is, that at an early period the custom existed in the priory of Little Dunmow of delivering a flitch or a gammon of bacon to any couple who claimed it, and could swear a year and a day after their marriage that during that time they had never once offended each other by deed or word, or ever wished themselves unmarried again. It was probably a custom attached to the tenure of the manor, as it was continued after the priory was dissolved, and the land had passed into secular hands. Three cases are recorded as having occurred before the dissolution of the priory, but we probably owe the knowledge of these to mere accident or caprice, and they do not prove, as some seem to think, that it was not given much more frequently. On the contrary, we can only account for the great celebrity which the custom at this place enjoyed throughout England at a very early period by assuming that the prize was frequently claimed and adjudicated. So early, indeed, as the middle of the fourteenth century, the author of the celebrated satirical poem of "Piers Ploughman," who lived in the borders of Wales, alludes to the custom in a manner that implies a general knowledge of it among his readers; and most readers of the present time will remember how, somewhat less than half a century later, Chaucer puts an allusion to it in the mouth of his "Wife of Bath," showing that it was then a matter of common notoriety at the West of England. About the middle of the fifteenth century, that is in the reign of Henry VI., we have another curious allusion to this custom, in an English theological poem. The writer, speaking of the general corruptions of the times, which affected even domestic life, says quaintly:—

I can fynd no man now yt wyle enquere
The parisyn wais into Dunmow;
For they repent hem within a yere,
And many within a weke, and sooner, mc. trow,
That rawth the was to be rough and over-grow,
That no man may fynd either path or gap,
The wornd is turnyd to another shape.

Beef and moton wylle serve wele enow;
And for to fetch so ferre a yrd boon this,
Which hath long hangyd, rusty and tow,
And the wyf lyth yvele, is sonborous and thyk,
And tho- mught stomoie, and take the ayk (i.e., *break thy neck*),
Therefore bide at home, whatsoever hap,
Tylle the wyf be hool and sounder asop.

It was about the date of this poem, in the 23rd Henry VI (1445), that the first recorded delivery of the flitch of bacon took place; it was then delivered to Richard Wright, yeoman, of Bradbourghe, in Norfolk. In the 7th Edward IV. (1467) Stephen Samuel, a husbandman, of Little Easton, in Essex, received a gammon of bacon; and a gammon was similarly given, in 1510, to Thomas Fuller, of Coggeshall. According to the old ceremonial at Dunmow, the party claiming the bacon—who was styled the pilgrim—was to take the oath in rhyme, given above, kneeling on two sharp stones in the church; and the convent attending and hearing a variety of certificates. The pilgrim was taken on men's shoulders, and carried, first about the priory church and yard, and afterwards through the village, attended by the monks of the convent, the bacon being borne in triumph before them. When the ceremonial was continued with little alteration after the dissolution of the monastery, but the adjudication then took place in the court baron of the lord of the manor. A case occurred in 1701, when two couples obtained each a gammon of bacon. The first claimants on this occasion were William Lansley, butcher, of Much Easton, in Essex, and his wife; and the second, John Reynolds, steward to Sir Charles Earrington, of Hatfield Broad Oaks, and his wife. They took the usual oath, kneeling on two stones in the churchyard; but the jury consisted only of five maidens, without any of the other sex, and four of the maidens appear by their names to have been sisters. In 1751 the bacon was claimed by Thomas Shakesbaft, weaver, of Weathersfield, in Essex, and his wife. A special court baron was held for the investigation of the case, a widow being then lady of the manor, and six maidens and six bachelors were duly canvassed as the jury. The claimants had been married seven years, and no objection having been found to their claim, they went through the usual ceremonies and received a gammon of bacon. This case appears to have made great noise in the country, and no less than five thousand persons are said to have been present—the road being literally blocked up by the various vehicles from the town of Great Dunmow to the Priory. It is said that on this occasion the successful candidates realised a large sum of money by selling slices of the bacon to those who had come to witness the ceremony. This procession was represented in a large print, engraved by C. Mosley, after a painting "taken on the spot" by David Ogborne, which is now scarce, and fetches a rather high price. We have engraved this Hogarthian scene from a copy of the print obligingly lent for the purpose by Mr. Joseph Clarke, of the Roos, Saffron Walden.

From this time the custom appears to have become obsolete, even the stones on which the claimants knelt in taking the oath were carried away; and the old chair of state came to a state in which the carpenter bore some resemblance to

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

During nearly the whole of the week some inactivity has prevailed in the market for most national securities; yet, owing to the great abundance of money, and the consequently small amount of Stock in the hands of the jobbers, prices have kept up remarkably well. As the bill authorising the new Turkish loan of £5,000,000 will, no doubt, shortly receive the Royal assent, notwithstanding the strong opposition given to it in the House of Commons, subscription lists will be opened in London early next month. Already we hear of numerous persons who have expressed their readiness to take large amounts in it. As we have anticipated, the raising of the new French loan is proving a most easy matter. Most of those who have sent in for large sums will receive no Scrip at all. The subscription lists in London have been well filled; yet it is most probable that the sums subscribed will be returned. The Scrip has been already done in the Stock Exchange at 1¾ to 2 per cent premium.

We have again to report very large arrivals of bullion from Australia about £500,000 has come in, and there have been received £195,000 from New York, more than £265,000 from Mexico and the West Indies. From other quarters the imports have been under £20,000. The demand for gold for shipment to the Continent has rather increased, but the quantity sent away is trifling. The demand for money out of doors has rather increased, and the discount market has consequently been tighter. In the Stock-exchange the best bills are taken at 3¼ per cent. Money on "call" is worth 3¼.

The Corn Market on Monday was steadily. Prices were very firm. The Three per Cents marked 90¾ ⅞; the Three per Cents Reduced, 91¾ ⅞; and the New Three per Cents, 92¾ ⅞. Bank Stock, 214; India Stock, 231; India Bonds, 30s. to 34s.; Exchequer Bills, 10s. to 23s. prem.; Exchequer Bonds, 101 to 100¾. On the following day prices answered a tendency to give way, arising from several private sales of stock. Consols for Account were 91¾ to 90¾; Ditto, for Money, 90¾ 91 to 90¾; Three per Cents Reduced, 91¾ to 92, and the New Three per Cents, 92¾ ⅞. Bank Stock, 213¾ to 215; India Stock, 231; India Bonds, 30s. to 33s. prem.; Long Annuities, 1860, 20⅛; Ditto, 1885, 18 15-16; Exchequer Bills, 19s. to 23s. prem.; Ditto, Bonds, 101. Prices were very steady on Wednesday, with a fair business doing in most securities. Consols for Account were 91¾ to 91; Three per Cents Reduced, 92¾ to 91¾; the New Three per Cents, 92¾ ⅞; the New Two-and-a-Half per Cents, 71 to 70; Long Annuities, 1860, 4 1-16 to 4; Ditto, 1885, 18¾; Bank Stock, 213½ to 213¾; India Stock, 229½ to 230; Bank Stock, 214 to 215. India Bonds, 31s. to 34s. Exchequer Bills, 19s. to 23s. prem.; Exchequer Bonds, 101. On Thursday Consols were but very little inquired for, and the price:—The Three per Cents were 90¾ ⅞ 91, both for Money and Time; the Three per Cents Reduced, 91¾ ⅞; and the New Three per Cents, 92¾ ⅞. Bank Stock, 214 to 215. Exchequer Bills, 21s. to 24s.; India Bonds, 33s. to 31s. prem.

The Peruvian Minister having given notice that the Redemption Fund on Peruvian Stock is to be increased on the Active Bonds from 1 to 6, and on the Deferred from 2½ to 6 per cent, the Active Bonds have been in good request, and prices have advanced about 1¾ per cent. All other Foreign Securities have been very inactive during the week, and the quotations have continued steady. Brazilian Five per Cents have marked 102, Ditto, New, 100; Buenos Ayres, Six per Cents, 87; Mexican Three per Cents, 21; Peruvian Deferred Interest, 22¾; Ditto Three per Cents, 59¾; Sardinian Five per Cents, 97; Turkish Six per Cents, 95¾; Dutch Two-and-a-Half per Cents, 65¾; Dutch Four per Cents, 93¾; Spanish Passive Bonds, 4¾; Granada One-and-a-Half per Cents, 16¾; Ditto Deferred, 9¾; Greek Bonds, 24 to 5; Spanish Three per Cents, 21¾; Ditto Deferred, 9¾; Russian Five per Cents, 109¾; Ditto, 1822, Cents, 69¾; Swedish Four per Cents, 88; Danish Five per Cents, 102¾; Portuguese Four per Cents, 49¾.

The quantity of gold in the United States, according to the deposits in the several mints since their commencement, amounts to 270,669,255 dollars.

There has been a large business transacted at most Joint Stock Bank Shares, the prices of which are very firm:—London and Westminster, 44¾; Australia, 44¾; Commercial of Cuty, 61; Colonial, 21; London, 23¾; London Chartered of Australia, 20¾; Do., New, 4¾; London Joint Stock, 21¾; London and Westminster, 44¾; Provincial, 41¾; Royal of Ireland, 21¾; Union of Australia, 73¾; Miscellaneous Securities have continued steady, as follows:—Canada Bonds, 104¾; Ditto, New, 100¾; Crystal Palace, 2¾; Electric Telegraph, 18¾; General Steam Navigation, 4¾; Shipping Company, 17¾; London Docks, 103; South Australian, 89 ex. d.; Ditto, New, 89¾; Peninsular Steam Navigation, 56; Ditto, New, 53¾; Scottish Australian Investment, 2 In Canal Shares very few purchases have been effected:—Ashton and Oldham, 139¾; Birmingham and Liverpool Junction, 215¾; Grand, 69; Leeds and Liverpool, 67½; Oxford, 110; Regent's, 14¾ ex. div.; Stourbridge, 285. So few transactions have taken place in Waterworks and Gaslight Shares that the quotations are ruled almost nominal. Insurance Companies have been without change. Hungerford Bridge Shares have marked 13; Vauxhall, 3¾; and Waterloo, 1¾.

Most Railway Shares have been rather dull, the purchases having, in a great measure, been regulated by the rumours afloat respecting the approaching dividends. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 23¾; Ambergate, Nottingham, and Boston Junction, 8¾; Eastern Counties, 8¾; Eastern Union, 7¾; Edinburgh and Glasgow, 88¾; Edinburgh and Northern, 103; Great Northern, 89; Ditto, A Stock, 89; Great Southern and Western (Ireland), 101; Great Western, 65¾; Ditto, Stour Valley, 85; Lancashire and Yorkshire, 91¾; London and Brighton, 101¾; London and North Western, 99¾; London and South Western, 86¾; Ditto £50, 49¾; Manchester, Sheffield, and Lincolnshire, 24¾; Midland, 70; North-Eastern, Berwick, 79¾; North Staffordshire, 9¾; North Wales, 9¾; Scottish Midland Junction, 48¾; Shrewsbury and Chester, 11¾; Shrewsbury and Hereford, 11¾; Oxford, Worcester, and Wolverhampton, 26¾; South-Eastern, 61¾.

LIKE LEASED AT FIXED RENTALS.—East Lincolnshire Six per Cent, 137; Manchester, Bolton, and Bury Canal, 32¾; South Staffordshire, 7; Wilts and Somerset, 84 ex div.

PREFERENCE SHARES.—Chester and Holyhead, 13¾; Eastern Counties Five per Cent, 20; Great Northern Five per Cent, 112; Great Western Chester Shares, 20; Ditto, 1½, North British, 10¾; Oxford, Worcester, and Wolverhampton Six per Cent, 102; South-Eastern, 24.

FOREIGN.—Antwerp and Rotterdam, 9¾; Bombay, Baroda, and Central India, 5¾; Dutch Rhenish, 13¾ ex int.; Grand Trunk of Canada, A Issue, 11¾ ex int.; Great Luxembourg Shares, 3¾; Great Western of Canada Shares, 29¾; Madras, 23¾; Namur and Liege, 15¾ ex int.; Namur and Liege, 6¾; Scinde, 2¾; Zealand, 18¾.

Mining Shares have been rather flat. On Thursday Imperial-Colonial Cobre Consols were done at 4¾; Cobre Consols, 6¾; Great Fergouth, 2; United Mexican, 3¾.

Friday Evening.

The amount of business transacted in the Consol market to-day has been limited, yet very little change has taken place in prices. The Three per Cents are 90¾ 91; the Three per Cents Reduced, 91¾ ⅞; and the New Three per Cents 92¾ ⅞. All Foreign Bonds and Railway Shares are flat

THE MARKETS.

CORN EXCHANGE (Friday). The arrivals of English wheat up to our market this week, coastwise and by land-carriage, have been rather on the increase, yet the show of samples in to-day's market was very moderate. For no kinds we had a steady demand, and, in some instances, rather more money was paid for selected qualities. The imports of foreign wheat have been over 20,000 quarters. Good heavy samples were held at an advance of 1s per qrr.; but low and ordinary parcels met a slow sale. Floating cargoes were steady. The show of foreign barley being large, that article was dull, and 1s to 2s cheaper. Malt changed hands slowly, on former terms. Good sound oats realised full quotations; but dealing in secondary grades rather cheaper. Beans, peas, and flour moved off slowly, at late rates

Arrivals this Week. English wheat 4,920 quarters, barley, 110; malt, 300; oats, 1,140; flour, 1,040 Irish wheat, 2,000; barley, 300; oats, 2,000 Foreign, wheat 20,310, barley, 13,790 oats, 2,760; flour, 2,760 sacks

Average.—Wheat, Essex and Kent, red, 70s. to 72s.; ditto, white, 76s. to 78s. Norfolk and Suffolk, red, 70s. to 72s.; ditto, white, 75s. to 78s. Scotch and Irish, 70s. to 76s.; rye, 50s. to 52s.; grinding barley, 31s. to 33s.; distilling ditto, 35s to 36s.; malting ditto, 37s. to 38s.; Lincoln and Norfolk malt, 68s. to 70s.; brown ditto, 67s to 69s.; Kingston and Ware, 68s. to 72s. Chevalier, 72s to 73s.; Yorkshire and Lincolnshire feed oats, 23s to 25s.; potato ditto, 26s to 28s.; Youghal and Cork, black, 24s to 25s.; ditto, white, 26s. to 28s.; tick beans, 33s. to 43s.; grey peas, 37s to 40s.; maple, 40s to 42s.; white, 40s to 42s.; boilers, 42s to 47s.; per quarter. Town-made flour, 45s to 70s.; Suffolk, 38s. to 42s.; Stockton and Yorkshire, 36s. to 40s. per 280 lbs.; American flour, 33s. to 36s. per barrel.

Seeds.—Linseed is in fair request, at full prices. In other seeds very little is doing, at late rates.

Linseed, Baltic, crushing, 50s. to 70s.; Mediterranean and Odessa, 60s to 72s. per quarter. Coriander, 20s. to 24s. per cwt. Brown mustard-seed, 9s. to 14s.; white, ditto, 8s to 10s.; tares, 5s to 11s. per bushel. English rapeseed, 42s. to 43s. per quarter. Linseed cakes, English, 12l. 5s. to 13l. 15s.; Foreign, 11l. 10s. to 11l. 5s. per ton. Canary, 40s. to 50s per quarter.

Provisions.—The prices of Irish provisions in the metropolis are from 10d to 10½d per pound of sprime mess, 9½d to 9¾d; per 4 lbs. loaf of fine, 8½d to 9d; per 2 lbs. ditto, 4½d to 4¾d; per 1 lb. ditto, 2½d to 2¾d; per stone of 8 lbs., 6s 8d to 7s 4d; per 4 lbs. loaf of seconds, 7½d to 8d; per 2 lbs. ditto, 4d to 4¼d; per 1 lb. ditto, 2d to 2¼d; per stone of 8 lbs., 6s 4d to 6s 8d. Fresh butter, per dozen pounds, 15s to 18s; middling ditto, 12s to 14s; fine Cork, 11s to 12s; middling ditto, 10s to 11s; fine Limerick, 11s to 12s; middling ditto, 10s to 11s; fine Waterford, 11s to 12s; middling ditto, 10s to 11s; fine Kerry, 11s to 12s; middling ditto, 10s to 11s; per cwt. Best Carlow bacon, 70s to 72s; middling ditto, 66s to 68s; fine Limerick, 70s to 72s; middling ditto, 66s to 68s; fine Waterford, 70s to 72s; middling ditto, 66s to 68s; per cwt. Best Irish hams, 80s to 84s; middling ditto, 72s to 76s; per cwt. Best Irish lard, 72s to 76s; middling ditto, 68s to 70s; per cwt.

Hops and Straw.—Old meadow hay, £4 0s to £5 5s.; new ditto, £4 0s. to £5 5s.; old clover, £5 5s. to £6 15s.; new ditto, £4 15s. to £6 15s.; old straw, £1 5s. to £1 15s.; per load. Trad. quiet.

Wool. The public sales are going on well, and prices have not have changed hands to any fully to the quotations. [illegible]

[illegible] Consols, 90¾ 91, Kalon, 31s per [illegible]

Liverpool.—Favourable reports continue to reach us from the whole of the plantations. The demand is therefore moderate, yet very full prices are considered. Arrivals since last week, 2,000 bales to the prices. Today, 2,250,000. The imports are 19 bales from Bombay, Mid and Mid Kent pockets, 4¾ 5s. to 4¾ 7s.; World of Kent 4¾ 0s. to 4¾ 2s.; Scinde 4¾ 0s. to 4¾ 5s.; per cwt. *Mercury From Smith Mar-Friday.* The supply of beasts on sale in to-day's market being considerably on the increase, the trade for all breeds of beasts ruled heavy, and Monday prices were with difficulty obtained. The show of sheep, which was moderate, was in fair request, at late quotations. Their quality was very inferior. The calf trade was tolerably firm, at full quotations. Although we were somewhat but scantily supplied with calves the veal trade was rather brisk, and the late quotations were realised. Pigs, 8s dearer In consequence of the [illegible] [illegible] the prices were steady, at late rates. Today, 2,250,000. The imports are 19 bales from Bombay, Mid and Mid Kent pockets, 4¾ 5s. to 4¾ 7s.; World of Kent 4¾ 0s. to 4¾ 2s.; Scinde 4¾ 0s. to 4¾ 5s.; per cwt.

Mercury From Smithfield Market Friday. The supply of beasts on sale in to-day's market being considerably on the increase, the trade for all breeds of beasts ruled heavy, and Monday prices were with difficulty obtained. The show of sheep, which was moderate, was in fair request, at late quotations. Their quality was very inferior. The calf trade was tolerably firm, at full quotations. Although we were somewhat but scantily supplied with calves the veal trade was rather brisk, and the late quotations were realised. Pigs, 8s dearer In consequence of the [illegible] [illegible] the prices were steady, at late rates.

Per 8 lbs. to sink the offal—Coarse and inferior beasts, 3s 8d. to 4s 0d.; second quality ditto, 4s 2d to 4s 4d; prime large oxen, 4s 6d to 4s 8d.; prime Scots, 4s 8d to 5s 0d.; coarse and inferior sheep, 4s 6d to 5s 8d.; second quality ditto, 5s 10d to 6s 0d.; prime southdown sheep, 6s 0d. to 6s 10d.; large coarse calves, 4s. 2d. to 4s. 6d.; prime small ditto, 4s 8d. to 5s 0d.; large pigs, 4s 4d. to 4s 6d.; small ditto, 4s. 8d. to 5s 0d.; lambs, 6s. 10d to 7s 8d.; suckling calves (with tops), 2l. 2s to 2l. 12s; quarter old store pigs, 24s to 27s each. Total supply this week: 1,960 oxen, 140 cheep and lambs, 13,000 calves, 580 pigs. Foreign supply: Beasts, 1,000; sheep and lambs, 1,000; calves, 400.

Newgate and Leadenhall (Friday).—Each kind of meat is cheerfully, and the quantities of every sort are moderate.

Per 8 lbs. by the carcase:—Inferior beef, 3s. 4s. to 3s. 8d.; middling ditto, 3s. 10d. to 4s. 2d.; prime large ditto, 4s. 4d. to 4s. 6d.; prime small ditto, 4s. 8d. to 4s. 8d.; large pork, 3s. 8d. to 4s. 0d.; middling ditto, 4s. 2d. to 4s. 4d.; prime ditto, 4s. 6d. to 4s. 8d.; small ditto, 4s. 8d. to 5s. 0d.; veal, 4s. 4d. to 5s. 0d.; prime ditto, 5s. 2d. to 5s. 4d.; lamb, 6s. 10d. to 7s. 8d.; per cwt. Total supply this week: 1,960 oxen, 140 sheep and lambs, 13,000 calves, 580 pigs.

Newgate and Leadenhall (Friday).—Each kind of meat is cheerfully, and the quantities of every sort are moderate.

Per 8 lbs. by the carcase:—Inferior beef, 3s. 4s. to 3s. 8d.; middling ditto, 3s. 10d. to 4s. 2d.; prime large ditto, 4s. 4d. to 4s. 6d.; prime small ditto, 4s. 8d. to 4s. 8d.; large pork, 3s. 8d. to 4s. 0d.; middling ditto, 4s. 2d. to 4s. 4d.; prime ditto, 4s. 6d. to 4s. 8d.; small ditto, 4s. 8d. to 5s. 0d.; veal, 4s. 4d. to 5s. 0d.; prime ditto, 5s. 2d. to 5s. 4d.; lamb, 6s. 10d to 7s. 8d.; per cwt. Total supply this week: 1,960 oxen, 140 sheep and lambs, 13,000 calves, 580 pigs.

2nd Dragoon Guards. E. W. Park to be Cornet

[illegible] ... Ensign J. N. Astley to be ... [illegible] ... Cornet H. Topham to be Cornet

[illegible] ... to be Lieutenant-Surgeon

[illegible] ... to be Surgeon

Royal Artillery.—Second Lieut. R. W. C. Ord to be Captain. Lieut. P. W. ... Bettesworth, C. B. Buck, C. B. M. Turner, and H. Irvine to be Second Captains. Second Lieut. ... Sergeant-Major J. Sergeant to be Adjutant and Acquittant.

[illegible] ... Ensign and Major. Quartermaster-sergt. T. W. J. ... Quartermaster.

[illegible] ... to be Lieutenant.

[illegible] ... Ensign C. S. Hope and H. Kerr to be Lieutenants, J. ... Wasson to be Ensign.

[illegible] ... Ensign and Lieut. H. J. Rochfort to be Ensign.

[illegible] ... Taylor to be Lieutenant. E. Curtis, F. S. Hamilton to be Ensigns.

Staff.—Lieut. and Captain J. H. Lyons to be Captain.

1st Regt. of Dragoon Guards.—Lieut. J. D. Dunn to be Captain, Ensign T. B. ... Hutton to be Lieutenant.

[illegible] ... Ensign C. F. Grenville, A. M. Low to be Lieutenants, J. ... Ensign G. W. ... H. J. Rochfort to be Ensigns.

[illegible] ... Taylor to be Lieutenant, E. Curtis, F. S. Hamilton to be Ensigns.

Staff.—Lieut. and Captain J. H. Lyons to be Captain.

1st Regt. of Dragoon Guards.—Lieut. J. D. Dunn to be Captain, Ensign T. B. ... Hutton to be Lieutenant.

[illegible] ... Ensign C. F. Grenville, A. M. Low to be Lieutenants, J. ... Ensign G. W. ... H. J. Rochfort to be Ensigns.

[illegible] ... Taylor to be Lieutenant, E. Curtis, F. S. Hamilton to be Ensigns.

2nd Regt. of Dragoon Guards.—Lieut. H. S. Harrison to be Ensign.

Staff.—Lieut. G. Prevost to be Captain.

1st Regt. of Foot.—Lieut. and Captain J. W. Boswell to be Lieutenant-Colonel. Lieut. R. G. Scott, G. R. Morgan, J. F. F. Aylmer, to be Ensigns.

[illegible] ... Ensign J. Sadleir to be Lieutenant, Ensign I. W. Hoare to be Ensign.

[illegible] ... Ensign N. Macdonald to be Captain; Ensigns H. J. ... Cochrane, C. Pritchard to be Lieutenants; W. Hammersham to be Ensign.

[illegible] ... Ensign J. Sadleir to be Captain; Ensign A. S. Rich to be Lieutenant. H. N. Sale to be Ensign. Quartermaster-Sergeant H. ... Bowyer to be Surgeon.

[illegible] ... Ensign C. J. Burgess and F. Grieve to be Lieutenants. [illegible] ... Ensign W. F. W. E. Hayden, J. R. Hamilton, A. G. F. Griffiths, to be Lieutenants; W. R. Crowther, A. Jenkins to be Ensigns.

[illegible] ... Ensign R. Wolstead to be Ensign.

[illegible] ... Staff-Surgeon Second Class T. C. O Leary to be Surgeon.

[illegible] ... Ensign T. Tretter to be Lieutenant.

[illegible] ... Ensign D. T. Arundell to be Ensign.

[illegible] ... Ensign J. Wood to be Ensign.

[illegible] ... Ensign F. Mitchell to be Lieutenant.

[illegible] ... Ensign F. Mahony to be Ensign. Staff-Surgeon Second Class [illegible] ... to be Surgeon.

[illegible] ... Ensign G. Dundas to be Lieutenant. J. S. Keddie, P. C. [illegible] ... to be Ensigns.

[illegible] ... Ensigns R. Woolhouse and J. Richardson to be Lieutenants. [illegible] ... Ensigns J. Bellingham, R. St. Lawe to be Adjutant.

[illegible] ... Lieut. and Adjutant D. Edwards to be Lieutenant-Colonel. [illegible] ... Lieut. J. Darrell to be Adjutant.

[illegible] ... Quartermaster-Sergeant W. M'Kay to be Quartermaster.

[illegible] ... Lieut. J. H. St. John to be Captain, Ensign W. R. Nowell to be Lieutenant. Ensign J. Mackay, T. Harte to be Ensigns.

93rd Regt. Ensign S. Wood and [illegible] ... W. Lomax to be Lieutenants. [illegible] ... Lieut. the Hon. A. G. F. Jocelyn, Lieut. G. Mansergh to be Captains.

96th Regt. Ensign J. T. French and J. A. Browning to be Ensigns. Quartermaster W. Thompson to be Paymaster; Quartermaster-Sergeant J. Sherarn to be Quartermaster.

[illegible] ... Ensigns F. F. Tomas, W. R. Lascelles and F. A. Bligh, to be Lieutenants. R. B. Butler, P. L. O' Phillips, and F. W. Hambleton, to be Ensigns. Lieut. ... Brett to be Adjutant.

Ceylon Rifle Regiment. J. J. C. Miller to be Ensign.

Twenty-first Royal North British Regiment of Foot Fusileers.—Lieut. and Captain J. Hope to be Captain and Lieutenant-Colonel, vice [illegible] ... Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Twenty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirtieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Thirty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fortieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Forty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fiftieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Fifty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixtieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Sixty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Seventy-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eightieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Eighty-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninetieth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-first Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-second Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-third Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-fourth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-fifth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-sixth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-seventh Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-eighth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

Ninety-ninth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

One Hundredth Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

One Hundred and First Regt. of Foot.—Lieut. and Captain W. Reid to be Captain and Lieutenant, vice Hope.

One Hundred and Thirty-eighth Regt. of Fo

THE LATE COLONEL YEA.

AMONG all the officers who fell in the unfortunate attack on the Redan, on the 18th of June, there was no one more deeply lamented by the men under his command than Colonel Yea. The late Lord Raglan, in one of his last despatches, says he "was not only distinguished for his gallantry, but had exercised his control of the Royal Fusiliers in such a manner as to win the affections of the soldiers under his orders, and to secure to them every comfort and accommodation which his personal exertions could procure for them." No one can wonder at the devoted attachment which was manifested towards him.

The correspondent of the *Times*, in his account of the burying of the dead in front of the Redan, gives similar testimony to the virtues of the lamented officer:—"I saw in one place two of our men, apart from the rest, with melancholy faces. 'What are you waiting here for?' said I. 'To get out for the Colonel, Sir,' was the reply. 'What Colonel?' 'Why, Colonel Yea, to be sure, Sir,' said the good fellow, who was evidently surprised at my thinking there could be any other Colonel in the world. And, indeed, the Light Division will feel his loss. Under occasional brusqueness of manner, he concealed a most kind heart; and a more thorough soldier, one more devoted to his men, to the service and to his country, never fell in battle than Lacy Yea. I have reason to know that he felt his great services and his arduous exertions had not been rewarded as he had a right to expect. At the Alma he never went back a step; and there were tears in his eyes on that eventful afternoon as he exclaimed to me, when the men had formed on the scope of the hill after the retreat of the enemy, 'There! look there! that's all that remains of my poor Fusiliers! A colour 's missing, but, thank God, no Russians have it!' Throughout the winter his attention to his regiment was exemplary. They were the first who had hospital huts. When other regiments were in need of every comfort, and almost of every necessary, the Fusiliers, by the care of their Colonel, had everything that could be procured by exertion and foresight. He never missed a turn of duty in the trenches, except for a short time, when his medical attendant had to use every effort to induce him to go on board ship to save his life."

Colonel Yea, who was born on the 20th of May, 1808, was the eldest son of Sir William Walter Yea, Bart., of Pyrland Hall, Somersetshire. He entered the Army in 1825, when only seventeen years old, and commanded the Royal Fusiliers, as Lieutenant-Colonel, throughout the Crimean campaign. It will not be forgotten how terribly his corps suffered at the battle of the Alma. He was made Colonel in December last, and had lately been commanding the First Brigade of the Light Division.

THE LATE COLONEL YEA.—FROM A PHOTOGRAPH BY ROBERTSON, OF CONSTANTINOPLE.

THE NEW CASTLE HOSPITAL.

WHETHER the Allies intend to winter in the Crimea or not, they are evidently making themselves very much at home in that part of it where they have pitched their tents. While the Russians, on what they choose to call their own soil, are decimated by disease, and unable to find hospital accommodation for the thousands of wretched invalids with whom Sebastopol, Simpheropol, and Bagtcheserai are crowded, the English invaders, although 3000 miles from their native land, are building excellent hospitals, where, if we can only obtain a sufficient number of medical officers, the sick and wounded will receive all due attention. The site chosen for the New Castle Hospital is in the immediate vicinity of the old Genoese castle overlooking the harbour of Balaclava, where it will form a very prominent landmark.

As regards the health of the troops, the official despatches speak favourably, but a good deal of sickness still prevails. Medical men are said to be greatly overworked; so much so, indeed, that many of them have been rendered unfit for duty. At one period there was but one medical officer capable of doing duty at the General Hospital at that place, and during that time he was compelled to attend to twenty-one wards. That those in attendance at that hospital should have been subject to sickness is not much to be astonished at. The situation of the General Hospital, overlooking, as it does, the Turkish burial-ground, and that formerly used as the burial-ground of the English, is avowedly admitted on all hands to be one of the most unhealthy spots in Balaclava.

The malaria arising from the place, and which, of course, is infused all over the building, is so great at times as to create nausea. A few weeks ago every dispenser in the place was laid up; and, with that obstinate pertinacity for fixed rules which seems to pervade all branches of the service, no remedy was adopted to ameliorate the condition of the place. If men in health, after being in a close confined building of this description, are infected by the influence of the air they breathe, what must be the effect upon the unfortunate patients? The Turkish burial-ground is described as a perfect nuisance; it would be well if some of the sanitary officials turned their attention to the spot. It is said the Turks have a prejudice against throwing lime into the graves, and that for this reason they have been left to their own course in regard to their peculiarities in the disposition of their dead. It may be all right enough to respect customs, and not willingly to infringe upon the prejudices of a people whom it may be policy to keep in with; but no custom on earth justifies the sacrifice of dozens of lives for the sake of respecting an idle and absurd prejudice. It is to be hoped that some measure may be adopted to remedy this evil ere long, and that a few loads of lime or charcoal, or some other disinfecting agent, may be liberally distributed over a spot so much in need of purification; otherwise the consequences will be much more serious than hitherto.

The New Castle Hospital has been erected on a beautiful spot; but no place will continue healthy where large numbers of human beings reside, unless the conditions of health are strictly observed.

A letter from St. Petersburg, addressed to a German newspaper, gives some details regarding the number of sick and wounded in the Russian army in the Crimea. At Simpheropol and Nicolaief, just as at Sebastopol, buildings are wanting for their reception, and medical men to attend to them. The unfortunates are thus handed from one place to another, and are sometimes days without shelter. Councillor of State Mansuroff had been dispatched to Simpheropol to establish a hospital for sailors. The statements in the *Naval Journal* are harrowing. On the 12th of June a convoy of 307 wounded arrived at Simpheropol, but they were obliged to be moved on somewhere else for want of room. Three convoys of sick and wounded arrived at Nicolaieff in a single week making the seventh, eighth, and ninth convoys of the kind. The first convoy, which left Sebastopol on the 21st of May, consisted of 339 men; the next, leaving on the 22nd, consisted of 126 men, of whom 111 reached Nicolaieff; the third, which left Sebastopol on the 27th May, with 218 men, reached Nicolaieff with 193. On the 11th June 266 sick and wounded left Sebastopol, as well as a large number of women and children

THE NEW CASTLE HOSPITAL, AT BALACLAVA.

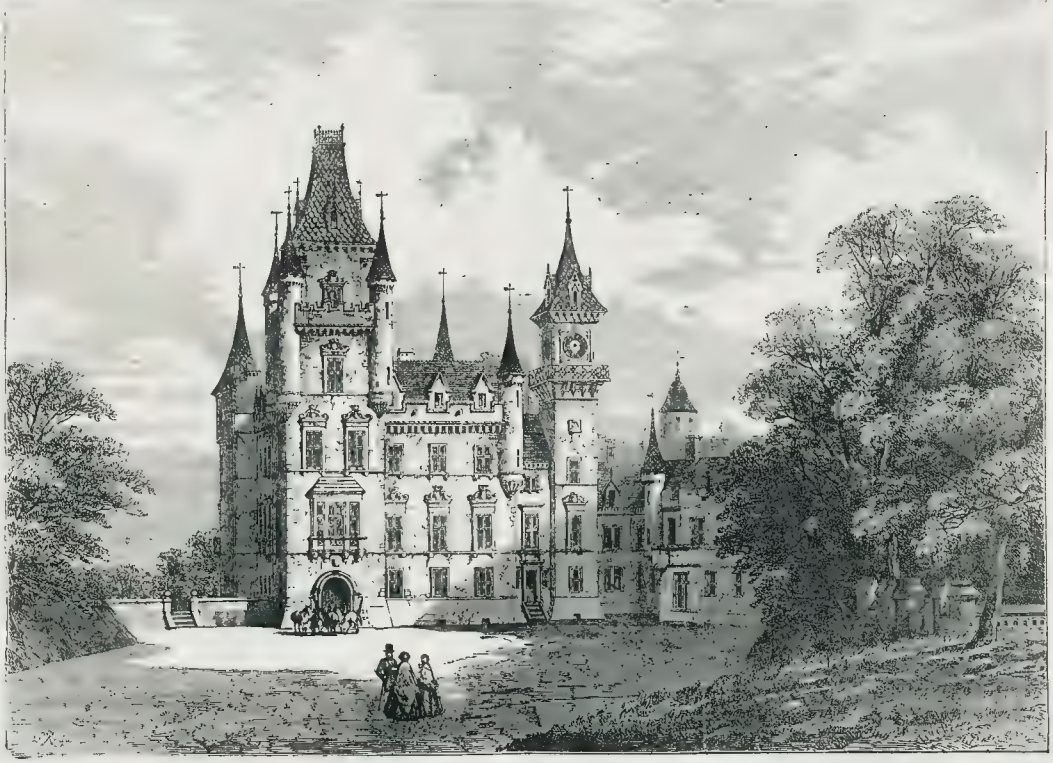
DUNROBIN CASTLE, FROM THE EAST.

DUNROBIN CASTLE,

THE SEAT OF THE DUKE OF SUTHERLAND, IN SCOTLAND.

THE Castle or Tower of Dunrobin was reputed to be the oldest inhabited house in Scotland. It still exists, forming part of a splendid structure recently erected by his Grace the present Duke of Sutherland; but its ancient honours are lost in the new building; its old rough walls are encased in fine hewn stone; and the stern solitary fortress that for centuries overlooked the sea and overawed the turbulent predatory bands in the north, has sunk into a mere unnoticed corner of a great modern baronial mansion. The history of a castle, with its various transformations and enlargements, is often an interesting illustration of the history of a people or a district. Let us for a few moments trace the fortunes of this old northern stronghold, identified with the annals of an illustrious family, whose head has for many generations been the Premier Earl of Scotland.

In the eleventh century commenced what has been called the Scoto-Saxon colonisation Scotland; displacing the original Celtic owners and rulers of the soil, and substituting for them English, Norman, and Flemish adventurers and men-at-arms. This policy, begun by Malcolm Canmore and his Saxon Queen, the Princess Margaret, was followed by David I.; and among those whom the favour of David induced to settle in Scotland, was one Freskyn, a Flemish chief, to whom the King granted certain lands in West Lothian. The people of Moray, about this time, rose in arms against their new Saxon lords, and Freskyn,



DUNROBIN CASTLE.

having distinguished himself by his bravery in repelling the insurgents, was rewarded with a grant of some of the most fertile lands in the province of Moray. He retained and transmitted his possessions. His grandson, Hugh Freskyn, assumed the surname of De Moravia, or Moray, and he still further augmented the family wealth and importance. On the opposite side of the Frith lived a wild race of Northmen, supposed to be descended from the warlike nation of the Catti, conspicuous in Roman history. The ruler of this territory, Harold, Earl of Orkney and Caithness, in 1196, was in rebellion against the Crown; and Hugh de Moravia espoused the Frith to do battle in the Royal cause. He was, like his ancestors, conspicuous for gallantry; and King William, having deprived Harold of Sutherland, or the "Southern land" of the Earldom of Caithness, made a grant of the territory to Hugh de Moravia. The Flemish chief must have had no small energy, and a numerous band of followers, to have been able, even for a season, to keep this southern land; for Harold was powerful and ferocious, and in about two years after this time he signalised himself by apprehending the Bishop of Caithness, cutting out his tongue, and putting out his eyes; for which he was appropriately punished by the Sovereign, who marched into Caithness for the purpose of avenging the cruel death of the Bishop: and Harold, being taken, was mutilated precisely as he had mutilated the Bishop, and was afterwards hanged on a gibbet. Hugh de Moravia, released from a powerful enemy, kept his princely gift of Sutherland till his death, about the year 1214. He left two sons, William and Walter; William succeeded to Sutherland, and Walter to the lands in Moray. "Willielmus Dominus de Sutherlandia filius et heres quondam Hugonis Freskyn," as an ancient deed testifies, died Comes, or Earl of Sutherland, about the year 1248. He had been able to restore the fallen honours of the Church in her northern principality; for, in 1222, he placed his relative, Gilbert de Moravia, in the see of Caithness, and Gilbert raised a cathedral church at Dornoch, building it with his own hands, as the chartulary informs us: and having the glass for the windows sent on the spot, under his own eye. This cathedral, re-edified, still exists, and holds the ashes of many of the Earls of Sutherland, including the remains of the late and first Duke, who, as his son, the Earl of Ellesmere, has expressed it, "came a Saxon, but remained a Gael"

The family of Freskyn as Earls of Sutherland, was now fixed in the north: and we have a regular lineal descent down to the present Duke, who is the twentieth Earl of Sutherland. The Celtic title is *Morfhear chatt* (pronounced Morrar Chat), or *Iarea Morphear Chatt*—the feminine prefix being *Iarea*; and by this name the late Duchess-Countess was universally and affectionately known by her Celtic people. The family crest, a cat-o'-mountain, still further marks the early connection with the country of the Catti.

The foundation of the old Tower of Dunrobin probably dates from the first or second of the Freskyns. The name (*dun*, a hill or mount, seems to point to an Earl Robert as the founder; and an old brass plate in the Castle states that it was built by Robert, Earl of Sutherland, in the year 1722. This date, however, does not agree with the dates assigned to either of the Earls of Sutherland of that name, who can all be accurately traced by means of deeds and charters. The *Robin* who gave his name to the mossed hill was most likely an older Thane of the country, who had seized upon the site of some one of those Pictish towers which are so common in the county of Sutherland. The founder, whoever he might be, selected a favourable position, either for peace or war. Dunrobin, as quaintly described by a cadet of the family—Sir Robert Gordon—in the reign of Charles I., "is a house well seated upon a mount hard by the sea, with fair orchards, where there be pleasant gardens planted with all kinds of fruits, herbs, and flowers, used in this kingdom, and abundance of good saffron, tobacco, and rosemary: the earth is excellent, and chiefly the pears and cherries." The latter distinction is still maintained; but the saffron and tobacco of Dunrobin exist only in the old genealogist's chronicle. Of late years has added that woods also flourished in this locality. The neighbouring county of Caithness is almost treeless, and in the West Highlands great difficulty is experienced in rearing plantations in consequence of the cutting sea-blasts. Around Dunrobin, however, is a mass of fine thick foliage, with picturesque old trees; and the terraced gardens, now laid out with great taste, bear witness to the general amenity of the climate

Security, not convenience, was aimed at in the construction of old Scottish mansions. The tower of Dunrobin was exactly 50 feet 4 inches high, while over wall it was 57 feet 4 inches. The lower part was constructed of clay, but the upper part is built with good lime. The confined apartments, with their loophole windows were, of course, hung with old tapestry. About ten years since the tower was tied together with iron rods carried through the walls, and secured together by iron nuts fastened outside. In this mansion, rude and limited as was its accommodation, a long line of Earls of Sutherland was content to dwell, all *viri potentes*, and held in high veneration and respect. William, the second Earl (who held the office for the long period of seventy-seven years), was one of the Scottish nobles who so manfully addressed the Pope in 1320, and thus secured the principle that the canon law of the Vatican had no authority in Scotland until ratified by the native councils. He also fought for Bruce at the army at Bannockburn. His son and successor fell at the Battle of Halidon-hill; and his grandson married and brought to Dunrobin the Princess Margaret, daughter of King Robert Bruce, thus connecting the Earls of Sutherland with the Royal family of Scotland before the accession of the Stuarts to the throne. To mark this Royal descent, the family arms show a double tresure, flowered and counterflowered with fleurs-de-lis. It was not until the end of the seventeenth century that any material additions were made to the original tower. At that time a northern and western wing were added, built at direct angles with each other, and having a turret staircase in the corner, according to the fashion of old Scottish houses. The south side of the court was enclosed by a wall, and the garden and grounds were carefully and tastefully laid out.

Ideas of elegance and luxury were now beginning to gain ground, but their approach was slow; and as yet the external aspect of the country was little better than that of wild mountain and morass, without a road, and with only one bridge in the whole territory. The northern Earls seldom left home; they reared their native cattle and scanty crops of oats or bere, gathering round them a numerous body of tenants and retainers, who cultivated the lands of their chief, and paid their rent in kind or in labour—the higher tenants sitting rent free, in consideration of the number of men they could raise for military service. Around the castle was a hamlet, or collection of black huts, the castle mull, and the malting barn. The Earl's authority, of course, was absolute. So late as the time of the present Duke's grandfather, justice was administered in person by the Earl of Sutherland. His Lordship perambulated the precincts of his village, preceded by his running footman, who carried in his hand a formidable cane, with a silver top, on which was engraved the cat, the badge of the family. With this ensign of authority, the bearer of it was called upon to inflict punishment on all offenders, according to the judgment of the Earl. Westward of the Castle was a more important and feudal spot—*Crock na Croich*, or the Hangman's-hill, which was visible both from the Castle and the hamlet. Some years since, when a walk was made across the hill, two skeletons were found, probably the remains of the last persons executed under the power of Sutherland, prescribed in Scotland. These jurisdictions existed until after the Rebellion of 1745, when the Scottish barons and gentry were deprived of their peculiar privilege of "pit and gallows," but compensated by grants of money from the Crown, amounting in all to about £150,000.

As an appanage of the old Earldom, or part of its establishment, we may note the "Fisher Town," which stood at a short distance from the Castle, and consisted of a miscellaneous collection of thatched huts, occupied by a Scandinavian colony, that gradually merged, by importations and intermarriages, into the Celtic population that now prevails in all Sutherlandshire. The name of this place is Scandinavian, namely, Golspie, which in old deeds is written Golsby, and Gilsby. *Gil* is still a common name for a glen in the north of England; and *by* is a residence or habitation. And the habitation, in this case, was another tower, Golspie Tower, connected with which is one of those vivid illustrations of feudal violence that start up in most of the annals and traditions of the north. The dowager Countess of Sutherland, Margaret Baillie, in the reign of James IV., contracted a second marriage with Alexander Dunbar; and this having given offence to the friends of the first alliance, Sutherland of Dilrid dissolved the connection by slaying Dunbar. King James offered a grant of the whole estate of Dilrid to whomsoever should deliver him up to justice—a tempting reward, which seduced Sutherland's own uncle, Mackay of Strathnaver, who conveyed his ferocious kinsman to the King, and thus became possessed of the lands of Dilrid, Strathnaver, and Golspie Tower. The Royal Charter conferring the lands is dated November 4th, 1499; and this was the first charter of the family of Mackay of Reay (attewards ennobled), and the heads of the clan Mackay, a numerous and powerful sept in the North Highlands. Golspie Tower has gone; and the old "Fisher Town," with its smoky huts, has given place to a handsome village, that bears the name of Golspie—a peculiarly neat and picturesque place, with a sort of metropolitan inn, in which not only are trout dressed, in a style that would have charmed Izaak Walton, but all modern luxuries may be commanded.

From one generation to another the Earls of Sutherland waxed apace and enlarged their demains. About a century since the estate and parish of Assynt, which had been forfeited to the Crown by the attainder of the Earl of Seaforth, was sold to William, the eighteenth Earl. The late Duke, when Marquis of Stafford, purchased the whole of the Reay country—a Highland principality, famous for its deer forests, and for a vast extent of wild mountainous seaworthy unplughed land, which now comprises the earldom of Sutherland, the lordship of Strathnaver, the barony of Assynt, and the Reay country—in all, eight or nine hundred thousand acres. It may be traversed from end to end, and athwart in all directions, for the late Duke made about nine hundred miles of road, with bridges, &c., and not one turnpike-gate stops the traveller. If this is not quite so great a feat as converting the bride of Lome into marble, it is at least as patriotic and useful. And let us remember that no great improvement stands alone. It gathers round it kindred and concomitant advantages, which operate for all time coming.

Little, however, was done to the old barony mansion. It had sunk into an occasional summer residence. The late Duchess-Countess built a wing to the north—an extensive addition; but the foundation of this new structure was unsound, and a considerable sum had to be expended in supporting it.

In 1845 the present capacious and lordly mansion was designed and commenced by the present Duke of Sutherland. His Grace was, we believe, his own architect, but he had the assistance of Mr. Leslie, of Aberdeen, and at a late stage of the works, Sir Charles Barry was consulted as to the interior details. A discovery was fortunately made soon after the commencement of the building, and made at an exactly critical point of time. Among the papers of Sir Robert Gordon, the historian of the family, which had slumbered in manuscript for a century and a quarter, was found a memorandum addressed to his nephew, John, Earl of Sutherland, who died in 1679. This paper was transmitted to Mr. Loch, commissioner for the Duke, who carried it to his Grace. It contained this opinion and advice:—"Dunrobin is not a fit residence for your position. You will require to add to it; if you do, *take care you do not build upon the fosse.*" Here, then, was the cause of the failure that had attended the Duchess-Countess's erection; she was ignorant of the fosse, and had built over it. The present edifice now marched for and found, and the ground being excavated, the foundations were carried down to the solid earth. At this time was discovered the foundation of the drawbridge, close to the old tower; and in the fosse itself was the foundation of the Castle mill, with the millstone—relics of the old Castle of a time, when, near this spot, an extensive village of thatched huts were clustered together under the protection of the Castle.

The new edifice represented by our Artist, and which absorbs the tower, is a large building, five storeys in height. The style is the Old English, or Baronial; but, without strict adherence to any exact order of architecture. The stone is a beautiful white sandstone, from the Duke's quarries at Brora, in the county of Sutherland. Above the principal windows, the motto "Sans Peur" is carved in raised and beautiful characters, with date, initials, &c. The interior of the building, the lobby and stairs, are faced with Caen-stone. The dining room is forty by twenty-three feet. The drawing-room windows overlook the sea, and command an extensive view. The state-room, or "Queen's Apartments,"—as they are called, in expectation that they will be graced with the presence of her Majesty—are richly furnished and ornamented. Below is a terrace-walk, a slope covered with noble trees, and parterres, winding-walks, &c.; the sea separating the whole, and forming the most prominent, as it is the grandest, feature of the landscape. The morning sunshine, from the sea and woods, lights up the state-rooms with enchanting effect; and the moonlight is scarcely less striking over the wide expanse of the firth, while the intermittent lighthouse on Tarbet-ness forms an interesting object in the distance. In approaching the Castle by the long avenue and park (in the park is a famous breed of cattle), the situation appears low, and the effect of the building is disproportioned to its size and ornate style. In reality, however, the site is an elevated one—part of the rocky sea beach, and from the sea the appearance of the lofty pile is in the highest degree imposing. His late Majesty, William IV., delighted to tell the Duchess-Countess how well he remembered the old tower of Dunrobin, as he saw it sailing over the cliffs, when cruising on the coast in his youth.* Such is Dunrobin—a princely seat, in a magnificent Highland country. Scrope, St. John, and other author-sportsmen, have made the rivers, lakes, and deer forests of Sutherland familiar to all; but the tourist, who careth for neither rod nor gun, but is content to go forth, like Wordsworth's philosophic pedlar,

> With no appendage but a staff,
> The prized memorial of relinquished toils,

will find ample enjoyment in surveying its rocky headlands and caves, and its wild interior glens and mountain passes, in which are mingled scenes of savage sublimity and of soft pastoral grace and beauty.

* The King, then Duke of Clarence, visited Orkney at this time; and, *inter nos*, there is a story that he once commanded on landing at Kirkwall, was throwing out of the inn-window penny pieces, which he had previously made burning hot over the fire! The eager scrambles of the young islanders, followed by the sudden dropping of the hot copper coins, formed a scene of princely mirth and delectation

---

ANCIENT TUMULUS.—A short time ago, as Mr. William Fotheringhame was levelling a tumulus on his farm at Newbiggding (above Corse), in Cluney, he came on a grave containing two skeletons, which, on being opened, was found to contain a stone chest or coffin, constructed of four large flags, and was lying in a direction east and west. The skeletons were almost entire, and in a remarkable state of preservation. The cover of the coffin was a large flag, on the top of which, when the first tumulus was opened, were found two smaller chests, about the same length, divided in the middle by a flag partition, but having nothing in the interior

THE WELLINGTON COLLEGE.—An appeal has been issued for additional donations to the Wellington College. The governors think they should not be justified in estimating the total outlay at less than £35,000. Towards this sum they have on hand a balance of £29,000, leaving therefore a deficiency on the estimated outlay of about £25,000, exclusive of the annual sum which may be required to enable them to extend the full benefits of the institution to the whole number of 220 boys, which the building is calculated to accommodate

DESTRUCTION OF AN ELEPHANT.—The large elephant, 120 years of age, late the property of Mr. Wombwell, being incapable of locomotion from diseased feet, the present proprietor gave directions for its destruction in the easiest manner possible. Accordingly, Mr. R. Fish, veterinary surgeon, and Mr. Flewitt, chemist, of Birmingham, proceeded last week to carry his wishes into effect. In ten minutes from the application of chloroform the animal became totally insensible, when the first incision was made without effect, and two large doses of strychnine without producing any perceptible feeling of pain. Not succeeding in these endeavours, a continuous application of chloroform was made, in the course of which the animal might exist under it; but, after three hours' perseverance in this course, no difference of respiration being observed, the administration was stopped, and in one hour and a half all effects of it had gone away. The only known means of destruction left was the knife and the bullet. The latter was first tried (the animal being again chloroformed) and wounded a branch of the carotid artery, from which blood flowed in a tolerably steady flow. The wound was then enlarged by a knife, and the artery fully divided. In a few minutes the huge animal ceased to live, having died without a struggle, or evidencing the slightest feeling of pain

THE STADE DUES.—We have just had an instance of the great vigour and consciousness display when they have once taken a "notion" into their heads. They look upon the payment of the Sound dues as to be resisted because not levied in virtue of any just and legally established rights; and in the same manner, they refuse now to acknowledge the claim of Hanover to levy the Stade dues, and insist upon passing up the Elbe to Hamburg without delivering up the ship's papers to the Hanoverian authorities at Brunshausen, as required by and complied with by every other nautical flag. The example was set a few days ago by Captain Marcyman, of the American barque *Undine*, who flatly refused to give up his papers on passing the Hanoverian guardship at Stade; and, though he ultimately agreed to be escorted in bringing his vessel up to Hamburg, and discharging his varied and valuable cargo without the payment of the ominous Stade dues.—*Letter from Hamburg, July 16.*

NOVEL SENTENCE.—A sentence recently passed in Switzerland upon a man found guilty of sacrilege, shows considerable ingenuity in the art of punishment. The criminal is to be exposed for a quarter of an hour in the iron collar called *carcan*, at two successive fairs, and under the surveillance of the executioner; to receive publicly sixty strokes of the rod from the hand of the same officer; five years of hard labour; to remain ten years within the boundary of his native commune; never to be able to marry, and to lose all civil and political rights; to pass through certain religious exercises; and, finally, to confess his crime in the church—a rod in his hand and a cord round his neck! The tribunal from which his sentence proceeds is that of Obwald.

By the death of Mrs. Ferguson, of Archfield, in East Lothian, the mother of Lady Mary Christopher, that lady, or her husband in her right, will succeed to an estate the rental of which was last year £38,000, and which is likely to increase. Mr. Christopher has also, in Lincolnshire, estates to the value of £14,000 a year in right of his wife, for which he takes the name of Christopher

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

AFTER twenty years' concealment, a very curious and unpublished document connected with the *Spectator*, and signed by Addison and Steele, has newly come to light. As the document is altogether unknown to the biographers of the two Essayists we shall give its purport. On the 16th of November, 1712, Addison and Steele met at the Fountain Tavern, in the Strand (where Fountain-court now is), and sold to Samuel Buckley (after words Deputy Governor, but better known as the editor of "Thuanus") their "full sole right and title to one moiety, or half-share," of seven volumes of the *Spectator*, for the sum of £575. We can fancy the then two full-grown Carthusians taking t'other bottle at the Fountain after signing and receiving. The sum is not large, but it gives us a notion of the market worth, at the time of publication, of what is now a standard work. A further evidence of the value of the copyright is afforded by the reverse of the document, containing Buckley's assignment (dated 13th October, 1714) to the younger Tonson, of the share he had purchased from Addison and Steele, for the sum of £500—or £75 less than he had paid for it scarcely two years before. Tonson was ultimately the sole proprietor of the *Spectator*

The "Memoirs of Sydney Smith" are running into a second and enlarged edition. The new matter will embrace (so we learn on excellent authority) some important letters and particulars connected with his early life in Edinburgh. Sydney's unlooked-for residence in the Scottish capital gave a colour and turn to his whole career; and any letters that throw light on his Edinburgh doings will be valuable.

The majority of the picture exhibitions of the London season are advertised to close this day. The receipts, we hear, have not been up to the average standard, and the sales have been few and discouraging. The war has had its influence on the Fine Arts, and has been the means of withholding many shillings that, but for Sebastopol, would have found their way into the tills and treasuries of our Art exhibitions. Mr. Albert Smith, however, still finds encouragement; and Mr. Gordon Cumming is still attent on opening when other people are closing. London, the lion-hunter alleges, is now—thanks to railways—never fashionably empty

During his residence in Paris as a juror, Mr. Charles Knight has discovered (literally discovered) a work recently printed in New South Wales, which Mr. Knight, in his *Town and Country Newspaper*, is pleased to entitle "A New Supplement to Boswell's Life of Johnson." Johnson was acquainted with two authors of the name of Campbell—one a Scottish Campbell, the other an Irish Campbell. Of his intercourse with the Scottish Campbell we unfortunately possess few and meagre particulars. Of the Irish Campbell, Boswell, who took him by the hand when he came to London, has recorded some slight memoranda. What Boswell omitted to do for his friend, the Irish Campbell performed for himself. The story of the discovery runs thus:—Behind an old press in one of the offices of the Supreme Court of New South Wales, Mr. David Bruce Hutchinson discovered a MS. Diary written in a clear bold hand, commencing the 23rd February, 1775. The name of the Diarist is not to be found in the MS.; but it is evident from the particulars he supplies that he was no other than Dr. Thomas Campbell, of whom it is told by Boswell that he left Dublin for London in the year 1775, "principally" for the pleasure of conversing with Dr. Johnson. By whom or in what way he was introduced to the great moralist no one has told us; but in the year 1775, in the month after the "Diary" commences, Boswell met him at Thrales', and became at once so intimate with him that he took him to dinner at Dilly's, and at General Oglethorpes', where the Irish Campbell had the pleasure of meeting the hero of his worship. From Boswell's book it would appear that Campbell did not excel in conversation; and, if his "Diary" is really genuine, he seems to have been but a dull hand at recording what he heard. As the book is as yet altogether unknown in this country we shall give a taste or two of Campbell's quality:

> He said that Kendrick had borrowed all his dictionary from him. "Why," says Boswell, "every man who writes a dictionary must borrow." "No, Sir," says Johnson, "that is not necessary." "Why," says Boswell, "have you not a great deal in common with those who write before you?" "Yes, Sir, says Johnson, "I have the words; but my business was not to make words, but to explain them." Talking of Garrick and Barry, he said he always abused Garrick himself; but when anybody else did so, he fought for the dog like a tiger. As to Barry, he said he supposed he could not read. "And how does he get his part?" says one. "Why, somebody reads it to him. And yet I know," says he, "that he is very much admired." Mrs. Thrale then took him by repeating a repartee of Murphy. The setting Barry up in competition with Garrick is what irritates the English critics; and Murphy standing up for Barry, Johnson said he was fit for nothing but to stand at an auction room door with his pole. Murphy said that Garrick would do the business as well, and pick the people's pockets at the same time
>
> Talking, after dinner, of the measures he would pursue with the Americans, he said the first thing he would do would be to quarter the army on the cities; and if any refused free quarters, he would pull down that person's house, if it was joined to other houses, but would burn it if it stood alone. This and other schemes he proposed in the manuscript of "Taxation no Tyranny," but these, he said, the Ministry expunged
>
> Talking of America, it was observed that his (Johnson's) works would not be admired there. "No," says Boswell, "we shall soon hear of his being hung in effigy." "I should be glad of that," says the Doctor, "that would be a new source of fame," alluding to some conversation on the fulness of his fame which had gone before. "And," says Boswell, "I wonder he has not been hung in effigy from the Hebrides to England." "I shall suffer them to do it incorporeally," says the Doctor, "if they can find me a tree to do it upon."

This Boswellian discovery reminds us of a *find* (as coin-collectors call such things) just made, and of greater moment. Mr. Monckton Milnes has now in his hands many unpublished notes of conversations made at the time by Boswell himself on the backs of letters. Some are tinged with coarseness, but all are characteristic. Mr. Milnes is about to print a selection of Boswell's memoranda for private (why not for public?) circulation.

The admirers of Sir Joshua Reynolds are observing with faces of pleasure that a clever enthusiast in art, Mr. William Cotton, of Ivy-bridge, in Devonshire, is about to publish a complete and carefully-compiled catalogue of all the known works of Sir Joshua. Mr. Cotton has access to the pocket-books in which the great painter recorded the names of his sitters and the times of sitting. These have been of immense assistance in settling the chronology of his works. We mention Mr. Cotton's labour of love thus particularly in the belief that some of our readers are able and ready to assist that gentleman with particulars of certain pictures in their own immediate neighbourhood. Mr. Cotton, we know, will thankfully acknowledge any assistance he may receive. The catalogue cannot be too full of necessary particulars. Where Mr. Cotton is "most at a loss is, we understand, in the prices which Sir Joshua received for his pictures. Sir Joshua's original receipts must still exist in many families.

Artists are regretting that the recent act of a thief—working in a spirit akin to that of the scoundrel who smashed a few years ago the Portland Vase—will have an evil effect in discouraging collectors from giving increased facilities for the public inspection of their treasures. Some miscreant has stolen a picture (it is not named) from the people's Palace at Hampton Court. Is the picture irrecoverable? Surely it must have been done as a freak, and an advertisement requiring its return, and "no question asked," would lead to its restoration. Already there has been a talk of *screwing* the pictu res to the walls for security—not from fire, but from human fingers. The fellow who smashed the Portland Vase has been the means of closing that exquisite piece of art from the public eye, for now, in its restored state, it is only to be seen by the chosen few. Twenty thieves, fresh from breaking windows, might soon succeed in closing all our free exhibitions.

WAR OBITUARY.

(Continued from page 58.)

AGAR (Captain the Hon. Charles Welbore), of the 44th, whose death before Sebastopol, on the 18th June, of wounds received the same day, in the attack upon the Cemetery, we have already recorded, was beloved and respected by his brother officers. His Colonel reports his full writes:—"Charles Agar of my regiment, was severely wounded in the assault, and died a few hours afterwards; poor fellow, both his legs were carried off by a round-shot. The service has lost a most gallant officer, and we, his brother officers, a universal favourite." Another officer writes:—"I heard myself from the men of his company that 'Captain Agar led them on like a hero, and that they all admired him as much in action, as they had previously liked him.' "

BAINBRIGGE (Lieutenant Edward), Royal Engineers, was killed whilst directing the construction of a battery in the right attack before Sebastopol, on the 6th April last. The report on his death states that "he displayed an intelligence and earnest zeal in the execution of his duties which called forth the admiration of the officer under whom he served." Bainbrigge's name was honourably mentioned by Lord Raglan in his despatch of the 7th April, and his Lordship ordered a monument to be erected to his memory. Lieutenant Bainbrigge was the third son of Lieutenant-General Bainbrigge, C.B., and grandson of Lieutenant-Colonel Bainbrigge, who was killed at the head of the 20th Regiment at the Battle of Egmont-op-Zee, in Holland, in 1799.

BALL (Lieutenant Edward Alfred), of the 93rd Highlanders, died at Balaclava on the 9th June, in his 20th year. He was son of the late Francis Leeson Ball, Esq., and had entered the Army about a year ago.

BELLEW (Lieutenant William), 1st Royals, died at the Camp before Sebastopol, from wounds received on the 7th June. He was fourth son of the late Sir Michael Dillon Bellew, Bart., of Mount Bellew, co. Galway, and grandson of Christopher Bellew, Esq., of Mount Bellew, by Olivia-Emily, his wife, only daughter of Anthony Nugent Lord Kyerston. Lieutenant Bellew's first commission bore date 16th Feb., 1855.

DICKSON (Major William Francis), of the 62nd, was killed on the 7th June, before Sebastopol, whilst defending the trenches against repeated attacks of the Russians. He was eldest son of the late Lieut.-General Sir Jeremiah Dickson, K.C.B. He entered the Army 29th Jan., 1839, and obtained his majority 29th Dec., 1854.

HELY-HUTCHINSON (the Hon. John William Hely) of the 13th Light Dragoons, died recently at Scutari Hospital. The death of this gallant young officer, the universal favourite with all who came within the influence of his warm and generous nature, has caused the deepest regret. He was the only son of the late Earl of Donoughmore by Barbara, his second wife, daughter of Colonel William Reynell, of Castle Reynell, co. Westmeath. His grand-uncle, John, Lord Hutchinson, was a distinguished military officer, and succeeded Sir Ralph Abercromby in the command of the army in Egypt. Captain Hely-Hutchinson was born 1st September, 1828. He entered the Army 8th October, 1847, and obtained his troop 10th March, 1854.

LOWRY (Lieutenant Thomas Graves), Royal Engineers, who fell, at the age of twenty, leading the storming party in the attack on the Quarries before Sebastopol, was the youngest son of R. W. Lowry, Esq., D.L., Pomeroy-house, Tyrone; grandson to Admiral Graves, and grand-nephew to Admiral Sir Thomas Graves, K.C.B., who was in command with Lord Nelson at the Battle of Copenhagen. Lieut. Graves Lowry was appointed to the second company (Captain King's, R.E.), lately returned from the capture of Bomarsund), and sailed in the *Royal Albert*, for the Crimea, in Nov., 1854. The company was sent up to the right attack, Gordon's batteries, where they cheerfully endured the hardships of a Crimean winter, and in spring fell one after another in their post of duty and of danger. On the death of Captain King, in April, Lieut. Lowry, the junior and only remaining officer, was put in temporary charge of the Company. On the 7th of June he led the storming party with skill and courage. Having finished his work successfully he might have retired, but he preferred remaining to assist. When the place was carried he joined Captain Browne in setting the working party to make the lodgment. The 2nd seams advancing to the attack, and Lieut. Lowry standing on the parapet, to urge the covering party to attack them with steadiness, he was shot through the head. His body was brought into Camp next morning, and buried with that of the lamented Captain Dawson, R.E. (who fell the same day in the trenches).

MANSFIELD (Captain William Henry), 44th Regiment, died on the 24th of June, of wounds received in the assault on Sebastopol on the 18th. He was in his 36th year, and had served nearly ten years. He was third son of the late Alexander Mansfield, Esq., of Mornystown Lattin, Ireland. His Colonel, in writing home says:—"In him the regiment has lost a gallant officer and a good soldier."

MARSH (Lieut. Hans Stephenson St. Vincent), Adjutant of the 33rd Regt., was killed in the advanced works before Sebastopol on the 24th June. He was second son of Captain Digby Marsh, R.N., and was educated at Sandhurst, where he took the highest honours, and was presented with his commission into the 56th Regt. He soon after exchanged into the 33rd, and on the occasion of the Duke of Wellington's funeral, had the distinguished honour of carrying the regimental colours; and just previous to the regiment being ordered to the East, he received the new ones in Dublin barracks, which he announced in a letter to his friends, with the hope that he should carry them again in the first battle with the Russians. During the intervening before he landed in the Crimea, he applied himself so diligently that he mastered the Turkish language so as to understand and speak it fluently. He landed in the Crimea on his twenty-first birthday—September 14th, 1854, and having passed through the fiery ordeal of Alma, where he was five times hit, without any serious injury, he had the happiness of carrying his regimental colours safe off the field. At Inkerman he commanded a company, and was engaged for eight hours, having been the previous twenty-four hours on duty, and being just on his return from the front at sunrise when the battle began. On the 22nd March he was Adjutant on duty, and acting as Aide-de-Camp to Colonel Kelly, who commanded the troops, when the Allied works were attacked by the enemy. Lieut. Marsh's conduct on this occasion elicited the highest approval of Lord Raglan, Sir George Brown, and many officers of distinction. We had sustained so heavy a loss of officers on the occasion of the enemy's sortie and the gallant charge (in which Lieut. Marsh bore a conspicuous part) made on the right by Colonel Kelly and Major (now Colonel) Gordon, R.E. that, when they were wounded, Lieut. Marsh took command of the troops, and, losing not a moment, proceeded to the support of the left of our works, where the enemy had entered in large masses. He reached the mortar battery just as the Russians entered at the opposite end; and, with his gallant brother officers, the Hon. Captain Browne and Lieutenant McHenry, prevented the guns being spiked. The former was killed, the latter severely wounded, as was also the Russian Commander. Lord Raglan's despatch states that the gallant Col Tyden coming up, ejected them speedily from the works, "and fairly pitched them over the parapets," well supported by the young Adjutant of the 33rd, who was next morning honoured by an order to write the report of the battle. Lieutenant Marsh, besides having fought at the Alma and Inkerman, greatly distinguished himself both in the successful attack upon the Quarries, and in the recent affair of the 18th, and again amongst the many of our officers who gained great distinction by their bravery in the attack and capture in question, Lieutenant Marsh was one of the foremost. Lieutenant Marsh, as already noticed by the *Daily News* Correspondent, was promised his Brevet majority, by Lord Raglan, immediately after he should have got his Company, as also to be placed on the Staff, as rewards for his gallant and distinguished conduct. The following is from a private letter written by Lord Raglan, and dated only three days before he was to follow his brave young soldier to the grave:—"Before Sebastopol, June 20th.—Lieutenant Marsh was a young officer of great gallantry and high spirit, and had distinguished himself on several occasions."

OWEN (William), 33rd Royal Welsh Fusiliers, was killed on the night of the 29th ult., in the trenches before Sebastopol. He had not completed his twenty-first year, and had not been a year in the army. He was third son of Sir John Owen, Bart., M.P., of Orielton, by Mary-Frances his second wife, daughter of Edward Stephenson, Esq., of Farley-hill, Berks. Lieut. Owen was in one of the covered approaches before the Quarry works, when a shell from a cohorn mortar fell a short distance in front of the parapet, and bounded over among the troops. It exploded almost immediately afterwards. Mr. Owen did not, unfortunately, adopt the usual precaution of throwing himself on the ground, and a fragment struck him, as he was standing up, on the lower part of his body.

SAVAGE (Captain John Morris), Royal Artillery, died of cholera, before Sebastopol, on the 22nd June, aged twenty-six. He entered the Royal Artillery, 18th December, 1847, and became Lieutenant, 9th October, 1848.

TROUTBECK (Captain J. Cortlandt), of the Land Transport Corps, died of cholera, before Sebastopol, on the 13th June, aged 35. He was a descendant in the female line of the great Dutch family of Van Cortlandt, which became established in America, and took an active part against the Royal Military party there.

WHITE (John Hore-y), Acting Assistant-Surgeon to the 3rd Foot, died on the 2nd inst. in the Camp before Sebastopol, of fever after cholera, aged twenty-eight. He was third son of the late Rev. William White, of Wolverhampton.

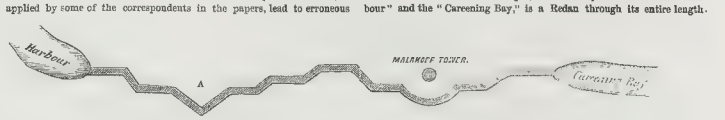
WOODFORD (Edmund Samuel Grimshaw), Lieutenant 2nd Battalion of the Rifle Brigade, was killed before Sebastopol, on the 30th ult., by the bursting of a shell, while on duty in the advanced trenches. The gallant young officer, who was but eighteen years of age, was only son of Lieutenant-Colonel Woodford, of the Cliff, Preston, Lancashire, who served formerly in the same regiment.

WHY IS SEBASTOPOL NOT TAKEN?

(From a Correspondent.)

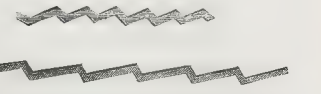
THE slow progress of the siege of Sebastopol must be a matter of wonder to those who are unacquainted with the circumstances with which similar operations are accompanied. Some infer from the siege of the citadel of Antwerp, which is within the recollection of many, that Sebastopol might have been taken with equal facility, the French having accomplished that capture in twenty-one days. It was true they literally ploughed up the soil within the fortress with their shells. But there is no comparison between a petty superfices of a few acres, and one of two or three square miles, that cannot be half invested. The siege of Sebastopol—if it can be called a siege at all, and not an attack upon an intrenched camp—may be easily explained to those unacquainted with similar subjects if they will give a little attention to the peculiar circumstances under which the present operations have been conducted.

There are a few terms used in relation to these operations which, as applied by some of the correspondents in the papers, lead to erroneous



The line of defence of Sebastopol, as limited by the head of the "Harbour" and the "Careening Bay," is a Redan through its entire length.

conclusions. Thus we read of the Redan and the Redan Fort. It should be the Redan Battery. Even this is not strictly correct, because the whole line of the Russian defence, from the Careening Bay to the head of what the Russians call the Harbour, is a Redan, and nothing else. The term applies to a line of works, or to a wall, thrown or built up to resemble the teeth of a saw, or any mode in which the re-entering and salient angles continuously flank or defend each other. These are equally Redans:—



The term has been applied exclusively to the Russian battery A, perhaps because it was so called by our soldiers, without regard to the true meaning of the word in fortification. A bastion is a mass of earth which is generally raised at the angles of a regularly fortified place, composed of two flanks and two faces (Fig. 1). The part B is the face, and C is the flank. Sometimes the flanks are circular (Fig. 2). The space between the two bastions is called a curtain a plain wall which the flanks protect from their respective bastions, running to where the curtain joins the next bastion.

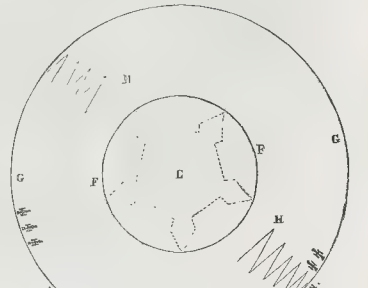
FIG 1.

FIG. 2.

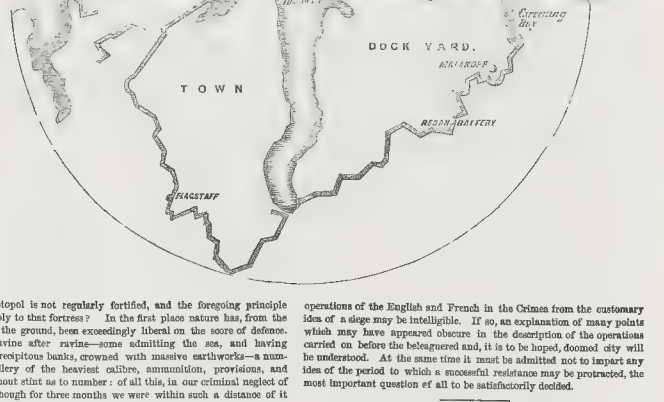
A line of circumvallation consists of a ditch and parapet of earth round a besieged town, to prevent any communication with the place from without, or the escape of any of those who are within. The terms used in the science of fortification are numerous, but more than the above are not necessary to explain the peculiarities of the present siege, which is all that need be attempted.

A place regularly fortified is intended to resist the utmost power of a besieging force for the purpose of delay, or as a hindrance to any subsequent operations, such a force may contemplate. The present state of improvement in artillery, and in the means of the attack of fortified places, has far exceeded that in the art of defence, which last has stood still for more than a century. Indeed the protraction of a surrender to the latest possible moment, before the storming party mounts the breach, is all that can be hoped, in places fortified in the best manner. Where art alone is unassisted by the nature of the ground, and all communication with succour is cut off, the fall of a place attacked by regular approaches, may be predicted to a nicety of time—a circumstance not a little remarkable.

The principle upon which a regularly-fortified place falls may be easily comprehended by the following diagram. Suppose the encente, or circuit of the fortress (E), is a circle of a mile in diameter, or three miles in circumference. Suppose it to have five bastions standing on level ground, and rendered as strong as art can make it. The siege commencing, a line of circumvallation (G), is drawn round it by the besieging army. It is seen in a moment that if the line G be double in circumference that of F, it can concentrate upon the smaller circle double the amount of fire that the smaller circle can bring to bear upon the larger, and that the fire of



the last must diverge in place of concentrating. Hence the defence of the strongest works dependent upon art alone will only be a question of a little difference of time. The approaches and parallels (H) will go on successfully. Marshal Girard took the citadel of Antwerp on the day he prognosticated he should have possession of it. The result of this principle cannot be denied, and hence in modern warfare fortresses so situated are much less valued than they were formerly. Outworks upon outworks, so very costly in making, must all be subject to the great principle thus laid down.



But Sebastopol is not regularly fortified, and the foregoing principle does not apply to that fortress? In the first place nature has, from the character of the ground, been exceedingly liberal on the score of defence. Cut into ravine after ravine—some admitting the sea, and having steep and precipitous banks, crowned with massive earthworks—a numberless artillery of the heaviest calibre, ammunition, provisions, and soldiers without stint as to number: of all this, in our criminal neglect of espionage, though for three months we were within such a distance of it that we might have been made acquainted with the minutest points in relation to the locality of all this we knew nothing. We came at once, not upon a fortress, but upon one of the strongest of natural military positions, since rendered stronger by unlimited means—means not temporary, but continuous. We assaulted redoubts of earth standing on the verge of precipitous ground. We have taken but one—the Mamelon. We have killed and wounded thousands of the enemy, but fresh troops replace them. No line of circumvallation cuts off the free communication of the garrison with exhaustless resources; and this remarkable and sanguinary siege consists rather of the reiterated assaults of one army upon another, the ground being in favour of the side attacked, than any siege at all. So far from the present siege resembling that of a regular fortress, it does not even present a complete semi-circle to the besieging force. In a place properly invested, every pound of powder expended, every soldier disabled, is so much gain to the attacking force; but here every pound of powder expended is replaced, as well as every disabled man. A battery ruined one day is repaired the same night. Hence we find no analogy with the sieges of regularly fortified towns. In truth, Sebastopol is not a fortified town; but a place defended by lines and redoubts, placed in front of a numerous army. From this arises the inconclusive character of the operations, and the necessity of taking the town by storm, as was seen soon after the army arrived before the place, but opposed by Lord Raglan.

It is possible that the above explanation of the different nature of the operations of the English and French in the Crimea from the customary idea of a siege may be intelligible. If so, an explanation of many points which may have appeared obscure in the description of the operations carried on before the beleaguered and, it is to be hoped, doomed city will be understood. At the same time it must be admitted not to impart any idea of the period to which a successful resistance may be protracted, the most important question of all to be satisfactorily decided.

RUSSIAN FORCES IN FINLAND.—The *Vaktaren (Watchman)*, a Stockholm paper, gives the strength of the Russian forces in Finland as follows:—Four Grenadier regiments of 3200 each—12,800; twenty-two battalions of the Line, 600 each—13,200; two battalions Sharpshooters, 1000 each—2000; three Marine equipages, 3000; ten Field Batteries, 250 each—2500; Cossacks, 2000; Sappers, 250—21,250 The amount of cavalry, irrespective of Cossacks, is here not mentioned; the figures given are the nominal strength of the troops; the effective strength would, of course, be somewhat smaller. Taken altogether, including the newly-raised Finnish battalions, the whole Russian force in Finland is computed at 50,000 men.

RUSSIAN COMMANDERS.—The following is the list of Russian military commanders in charge of districts:—Perowski, in Orenburg; Orbelian, on the Caspian territory; Mouravieff, with Rebutoff, Baklanoff, and Kovalevsky, in the Transcaucasian district; Serebrikoff and Chornutoff, in Tschernomoria, the Don districts, and East Crimea; Gortschakoff II., with Osten-Sacken, Nachimoff, Wrangel, Labanoff, Wranor, and Korff, in the Crimea; Luders, with Uschakoff and Schabelski, in New Russia, Cherson, as far as the Bug, Bessarabia, Tschernigoff, and Khankoff; from here northwards Panitsine, up to the confines of Paskiewitsch's command; in the Baltic provinces, Sievers; in Esthland, Grabbe; in St. Petersburg, Rudiger; in Finland, Berg; in Archangel, Vice-Admiral Chrischtschoff.

THE SPANISH GRAIN TRADE.—An extraordinary corn trade has sprung up between this place and the United Kingdom, in consequence of the closing of the Black Sea granaries through the war, and the stoppage of the usual supplies from the United States and France. During the quarter ending the 30th ult., twenty-one British and eighteen French vessels conveyed from St. Sebastian to different British ports 27,267 quarters of wheat and 7393 sacks of flour, respectively worth £79,747, and £16,832, free on board.—*Letter from St. Sebastian.*

ENGLISH SONGS AND MELODIES.

BY CHARLES MACKAY AND SIR H. R. BISHOP.

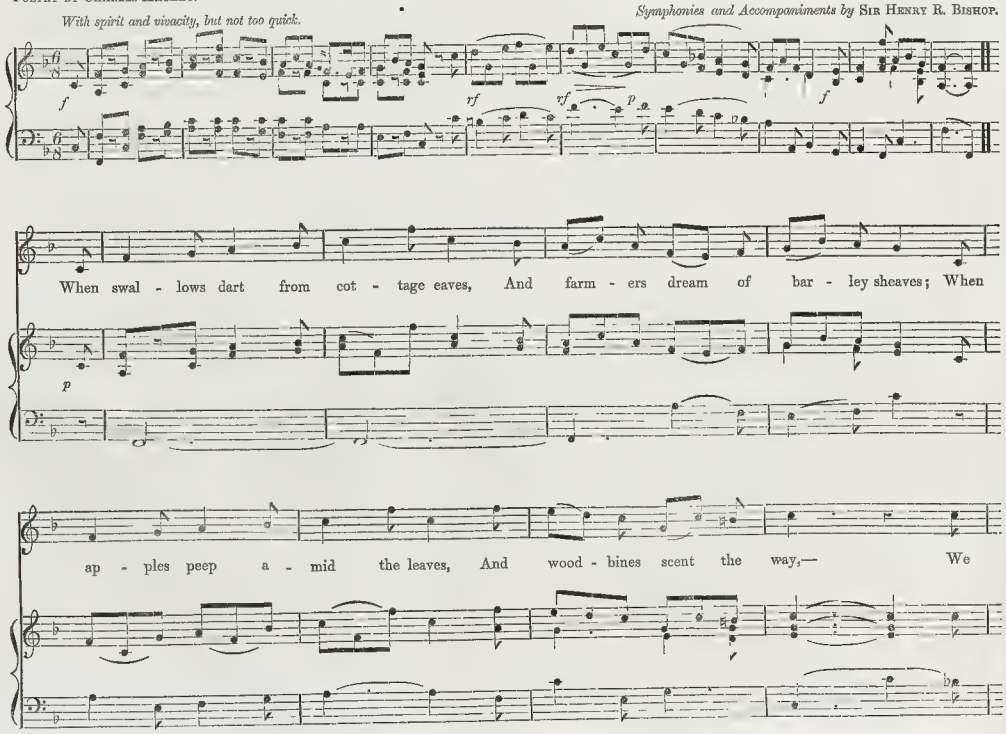
'MID THE NEW-MOWN HAY.

Poetry by Charles Mackay.

Air, "It fell, about the sweet May-time."

Symphonies and Accompaniments by Sir Henry R. Bishop.

With spirit and vivacity, but not too quick.



When swal - lows dart from cot - tage eaves, And farm - ers dream of bar - ley sheaves; When
ap - ples peep a - mid the leaves, And wood - bines scent the way,— We

love to fly from dai - ly care, To breathe the bux - om coun - try air, To

II.

A stranger comes with eyes of blue:
Quoth he, "I'm LOVE, the young and true;
I wish to pass an hour with you
This pleasant summer day."
"Come in! come in! you saucy elf!
And who's your friend?"—"'Tis FRIENDSHIP'S self!"—
"Come each, come both, our sports to share;
There's welcome kind, and room to spare,
Amid the new-mown hay."

III.

The ring is form'd;—but who are these?
"Come, tell your errand, if you please;
You look so sour and ill at ease,
You dim the face of day."
"AMBITION!" "JEALOUSY!" and "STRIFE!"
And "SCORN!" and "WEARINESS OF LIFE!"
"If such your names, we hate your kin;
The place is full, you can't come in,
Amid the new-mown hay."

IV.

Another guest comes bounding by,
With brow unwrinkled, fair, and high,
With sun-burnt face and roguish eye,
And asks our leave to stay:
Quoth he, "I'm FUN, your right good friend!"
"Come in! come in! with you we'll end!"
And thus we frolic in a ring,
And thus we laugh, and dance, and sing,
Amid the new-mown hay.

NOTE ON THE MELODY.—This beautiful air is known in the rural districts under the name of "Jockey to the Fair." A writer in *Notes and Queries*, vol. vii. p. 59, under the signature of "H. G. D." says that this is "a very celebrated Gloucestershire ballad, at one time popular, but rarely heard now. I have before me an old and much mutilated broadside of it, which at the conclusion has the initials L. and B."—Nothing is known of the authorship of the music, which is lively, elegant, and thoroughly English in its character. The present version, which Sir Henry Bishop believed to be the best and most correct one, was taken from the singing of a lady, who learned it in childhood in the county of Durham.

OUR LODGERS.

NO. I.—THE PARLOURS.

I KEEP a lodging house—No, my wife keeps a lodging-house. Perhaps I had better say *we* keep a lodging-house, as I am resp onsible for the rent, rates, and taxes, and my wife is responsible to me for the lodgers. I have not much to do except to check the tradesman's book s, and make out the lodgers' weekly bills; the former operation being a mere exercise of common compound arithmetic; the latter an art a cquired after many years' anxious study and practice. It requires no small skill, I assure you, to get a profit out of everything; and I should not rest in my bed if I thought any of our lodgers had done me by esca ping paying, either in meat or in malt, for every accommodation received on my premises. In the good old times, before lock-making had arrived at its present perfection, I have heard my mother say—she k ept a lodging-house too—that ours was the best business of the day, and that she had reared honestly a large family out of the tea-caddies, cellarets, and meat-safes of her lodgers; but when p eople became mean enough to secure those repositories, the good old soul took it greatly to heart and I think her end was hastened by the discovery that a lodger of sixteen years' standing had had a "Chubb's patent" put on to an old cheffonier. It is no use lamenting the past; it is much better to "meet the situation"—and I flatter myself that I do so.

We have met with some very odd people at times—very odd people; and, having a great deal of leisure, I have from time to time written down a description of some of Our Lodgers. The names I shall use will, in all cases, be fictitious, when the persons described shall have honourably paid their rent, and given fair and proper warning; but in all cases where shabbiness has been exhibited, the correctest description of any peculiarity of person will be given, in addition to the real name of the party forming the subject of the sketch.

I shall begin with our late "parlours." Mrs. Blackday (real name having died without giving the usual notice to quit)—Mrs. Blackday was an undertaker's widow. She had married her h usband solely on account of his profession; being naturally of such a melancholy turn of mind that when she went out for a day's pleasure she always spent it in one of the cemeteries. When Blackday died she was inconsolable for upwards of a month, and then became reconciled to her loss only by the idea that she could wear widow's caps to the end of her days. It was something terrific to see her read a newspaper, as she was always under the belief that she had a personal interest in everything of a painful description. Her chronological data were also rather peculiar, as she seemed to remember every circumstance of her life by connecting it with what she had had for dinner.

One day, addressing me, she said, "Mr. Mungo (name fictitious), I am in such a nervous state to-day that I have had the *Times* in my hand more than a quarter of an hour and have not dared to open it. I felt just in the same way three days before Blackday was measured—I mean died. We had the pa per then in the afternoon; and I recollect we'd had a boiled leg of mutton, and turnips, and greens; no, not greens—I am wrong there—only turnips; when I felt that something had occurred somewhere or other, and that I should read it for the first time in *that* paper. I did read it: "THE WRECK OF A VESSEL.—NAME UNKNOWN." At that time I had a second cousin at sea, so judge what my feelings were. If we hadn't had a letter the next day—no, the day after, because I recollect we had hashed mutton two days running, and it was the second day—saying that he had arrived safely at Portsmouth, I think I must have died with anxiety."

I was anxious to please her then, as she said she had no relations for whom she cared a button, and she had not told us that all she had to leave was the trouble of burying her; so, to cheer her up, I hinted that her present fears would prove as groundless as they had done before. She took heart of grace—or rather of course that may be—and began at the "*Births*," as a matter of course; and having added up the number of "little strangers," sighed heavily and exclaimed, "Very numerous!" The "*Marriages*" appeared to have more interest for her, and at last she paused, as though struck by a name she knew.

"'John Johnson, Esq., to Emily Brown, youngest daughter of ——. John Johnson? I wonder if that is the Johnson I knew at Manchester. Of course, it must be. A drunken, dissipated fellow! And he has married Louisa—no, Emily—Brown. Poor thing! If I had known it, I think I should have gone to—where were they married? Oh, at Brighton—and forbidden the banns. He must kill himself in a few years, though that's a poor consolation to a young bride. Hey! what! Mary Smith! has she married again, after her experience? Mr. Mungo, that woman's first husband was an Armageddon, Sir."

"But are you sure that the bride is the same person? Mary Smiths are plentiful as blackberries," said I. "Mr. Mungo, I have an instinct that never deceives me. '*Deaths*,' '*Deaths*,' I never read them now; they bring back the only happy recollection of my married life. Poor Blackday idolised his business, and the grief which he always put into his face, whether the job was rich or poor, was worth the amount of his bill at any time. I remember a highly-respectable widowed party telling him so one day when we'd had a roast sucking-pig and early potatoes for dinner." Here she gave a loud shriek, and let the paper fall upon her knees; but I was not alarmed for her, as I knew her peculiarity. However, I was obliged to say "What's the matter?"

"There's another 'BOILER EXPLOSION,' and civil engineers run in my family. Oh! (and she crumpled up the paper between her hands) oh! I wonder if it's Edward Gills, or Thomas Styles, or Edward White (no; he's a confectioner), or James Grey, who has fallen a victim;—perhaps all!" And then, in a sepulchral tone, she read aloud, "BOILER EXPLOSION—NO LOSS OF LIFE." She raised her eyes gently from the paper and looked as though she were a deceived woman who had been defrauded out of an enormous amount of sympathy.

But she would not be made happy if she could help it; so the same speculations occurred over "A balloon accident," "A breach of promise of marriage," "A case of child-dropping," and "A man run over by a wheel-barrow."

Her false alarms were not confined to the newspaper; and I would not have put up with the trouble she gave had I known she had only an annuity. If there was a cry of "Stop thief" in the street she roused the whole house to see that her six silver tea-spoons were safe in her tea-caddy. We thought ourselves lucky if the house were not on fire five nights out of the seven. If a vagabond boy gave vent to his feelings by screaming out "Variety," she knew by instinct that some relative of her own had been run over by a coal-waggon; and, in short, nothing could happen of an alarming nature but she immediately made it her personal property.

Where she went to in the summer we never knew; and, as she kept on her apartments, and paid the rent in advance, we took but little trouble to discover. Some one said that they had seen her sitting at a window which overlooked Pere la Chaise, but I think the prospect must have been too cheerful for her.

She died in December last. "Mr. Mungo," she said, "eighteen years ago—I recollect it as yesterday—Mr. Blackday and I had a loin of veal, stuffed, and three pounds of Yorkshire reds, and currant dumplings; it was the anniversary of our wedding-day. I will thank Mrs. Mungo to let me have the same dinner to-day, only making the potatoes two pounds instead of three, and limiting the dumplings to one—a widow dumpling, if I may say so."

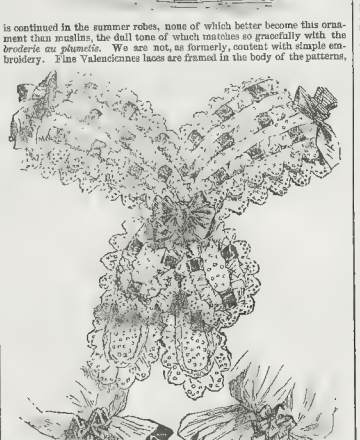
Of course Mrs. Mungo did as desired; and whether the old lady over-ate herself, or whether the veal was rather underdone, I don't know, but she was taken very ill in the night, and in less than a week we lost "the Parlours."

L

PARIS FASHIONS FOR AUGUST.

WITH the abrupt change in the temperature, summer toilets have succeeded those of winter without any transition. White robes are much worn. The luxury in embroidery which we pointed out for the winter

is continued in the summer robes, none of which better become this ornament than muslins, the dull tone of which matches so gracefully with the *broderie en plumetis*. We are not, as formerly, content with simple embroidery. Fine Valenciennes laces are framed in the body of the patterns,



and these lights, cleverly managed, render the robes yet lighter and more graceful. The Exhibition shows us some chefs-d œuvre of this kind. We recently observed in a window three robes bearing the somewhat pompous names of "La Majestie," "L'Altesse," and "La Grande Dame." The first is almost entirely covered with embroidery, mingled with Valenciennes; the second has four flounces, and is ornamented with similar embroidery with point d'Alençon.

From these splendours we turn to what is worn at balls and soirées. The favourite material is white muslin, either without flounces, with an apron ornamented with *boullonnés*, through which are passed ribbons of light colours; or with skirts of several flounces, through the hems of which similar ribbons are passed. The corsages that are worn with these last-mentioned robes have always *basque frencées*, which form an upper flounce. The sleeves are also *boullonnés*: they are now begun to be made full almost up to the shoulder, confined by little bands. The sleeves are also mingled with ribbons and little pieces of very narrow black velvet. Sleeves closed at the wrist are much more worn than in previous years. Robes are of very clear shades, the grey, formed of little squares ("*Tom Ponce*"), are very recherché; but the richest novelties are the robes with large white taffeta stripes, ornamented with garlands of rose-leaves and lilac lines. They are also made with somewhat darker shades. Bounets are necessarily white, and for the evening the head-dresses also. The flowers most worn are white roses, myrtle, jessamine, lilies, white lilac, narcisus, &c.; worn either in tufts or long trails.

THE ILLUSTRATIONS.

In-door Dress.—White muslin cap, embroidered with a row placed flat upon the front on the rolls; the crown is covered with three similar bands, placed crosswise, and forming, like the flounces upon the crown of each side, a tuft of rose-coloured ribbons.

Peignoir of white muslin, with a single flounce in the middle of the skirt, with large scallops, and in each a rich bouquet of *en broderie au plumets*, which gradually disappears in the ground. The front has two columns of embroidery lengthwise; the centre, which narrows up to the waist, is filled with similar bands placed crosswise. This *peignoir* is drawn in at the waist by a double bow of white muslin, the two extremities of which have embroidery similar to that which is within the scallop of the flounce. A small white muslin *pardessu* finishes by a flounce which rises the third upon the skirt; above a band similar, to that of the robe runs all around and extends in front as high as the neck. The sleeves à *double boullonné* are at the end of the same embroidery, together with the muslin bow, which closes the dress at the neck. It is impossible to find a toilet either fresher or in better taste

Fichu Ristori.—This low dress handkerchief has the flaps crossed and hanging down before and behind; the ground is composed of *boullons* of black tulle or à *pois*. Through each *boullon* is passed a sky blue, rose, or other shaded ribbon, according to the tone of the toilet. Over the velvet fastenings is rich lace on *guipure*, in a sort of draught-board pattern. Next are tulle sleeves with ribbons of right colours.

Travelling Mantelet of Prussian velvet, marroon coloured. This is a new material from the Exhibition, and was immediately adopted by persons of high fashion.

PRIZE MONEY.

(From the London Gazette of Tuesday.)

BY THE QUEEN.—A PROCLAMATION.

Victoria, R. Whereas by our Royal Proclamation, dated the 29th day of March, 1854, after referring to our Order in Council, bearing date on the said 29th day of March, 1854, whereby we ordered that reprisals be granted against the ships, goods, and subjects of the Emperor of Al the Russias, his subjects, or others, inhabiting within any of his countries, territories, or dominions (save and except any vessels to which our Licence has been or might be granted, or which had been directed to be released from the embargo and had not since arrived at any foreign port), so that our fleets and ships should and might lawfully seize all ships, vessels, and goods belonging to the Emperor of All the Russias, or his subjects, or others inhabiting within any of his countries, territories, or dominions, and bring the same to judgment in any of the Courts of Admiralty within our dominions, duly authorised and required to take cognizance thereof, we did order and direct that the net produce of all such prizes taken by any of our ships or vessels of war (save and except when they should be acting on any conjunct expedition with our army, in which case we reserved to ourselves the division and distribution of all prize and booty taken, and also save and except as hereinafter mentioned), should be for the entire benefit and encouragement of our flag-officers, captains, commanders, and other commissioned officers in our pay, and of all subordinate warrant, petty, and non-commissioned officers, and of the seamen, marines, and soldiers on board our said ships and vessels at the time of the capture, after the same should have been to us finally adjudged lawful prize. And whereas we think that officers and crews of any of our ships and vessels of war who shall be placed or sent in charge of any ship or vessel which shall be hereafter captured or detained by any of our ships or vessels of war, shall share in prizes made during their absence by the ship or vessel on the books of which they may then be borne; we do therefore hereby order and direct that all officers and crews of any of our ships and vessels of war who shall be placed or sent in charge of any ship or vessel which shall be hereafter captured or detained by any of our ships or vessels of war, shall share in the prizes captured during their absence, by the ship or vessel of war on the books of which they may be borne at the time of such prizes being captured, in all respects as if they had been actually on board such ship or vessel at the time of such prizes being captured by her

Given at our Court at Osborne-house, Isle of Wight, this 21st day of July, in the year of our Lord 1855, and in the nineteenth year of our reign

GOD SAVE THE QUEEN.

A FRENCH FLOATING BATTERY. The floating-battery *Devastation*, launched last spring at Cherbourg, is now ready to sail for the Baltic. The last two experimental trips made by that movable fortress were most successful. Its greatest speed under steam was 4½ knots an hour, and its average speed 3¾. This result was considered the more satisfactory as the special construction of the vessel, the bottom of which is flat and the bow round, must lessen its speed. It is almost incredible that so enormous a mass, covered as it is all over with thick iron plates, and every gun of which weighs 9350 lb, should only draw 7½ feet of water. M. Guleysse, the engineer, has succeeded in attaining the salutary end which the *Devastation* obeys the rudder is truly remarkable. A steam-frigate, which left Toulon in the beginning of the month, is expected at Cherbourg to take in tow and conduct to the Baltic that splendid floating battery.

IMPORTANT REFORMS IN POLAND. The Warsaw correspondent of the *Indépendance* refers at some length to important reforms about to be accomplished in Poland. In the first place, the Commission of Inquiry, which has hitherto held cognizance of all political offences, is dissolved, and such offences will in future be tried by the ordinary tribunals. Secondly, the Polish language will be substituted for the Russian in all official business and proclamations. Thirdly, instead of the various communes now charged with the different official departments, officials with the title of "Ministers" will be appointed. "These reforms," says the *Indépendance*, "indicate to a certain extent the commencement of the reconstruction of the kingdom of Poland."

THE AUSTRIAN ARMY. The effective of the Austrian army now stands at about 400,000 men. Next spring—unless the ordinary course be departed from—there will be a new levy throughout the monarchy. The army is just now severely tried by disease. The deaths in the military hospitals are one in thirty-five. The cholera was raging at Lemberg when the Emperor was lately there. One officer—Col. Wussin—died within a few hours after receiving the approbation of his Sovereign. Provisions in Austria are rather advancing in price, although the harvest promises to be an average one.

DESTRUCTION OF BRITISH SHIPPING AT MAZATLAN.—A frightful disaster occurred in the harbour of Mazatlan on the night of the 18th of June. A considerable number of vessels were, according to custom, moored outside the harbour. They were mostly laden with valuable cargoes, and were awaiting an anticipated revolutionary movement, in order that they might enter the port by paying a part only of the heavy duties enacted by the tariff. The movement, however, did not take place, and the Government having abated somewhat of its demands, these vessels sailed into the port in the latter part of May. A few days afterwards, during the night, a violent south wind arose, the waves of the harbour were lashed into fury, the storm became furious, the craft became unmanageable, were driven from their anchorage, and were brought into violent collision with one another, six of the vessels were nearly entirely destroyed, and twenty-three of the crew drowned. The cargoes lost are estimated at above one million dollars. The vessels are as follows: the *Benjamin Rhea*, from Liverpool, with a return cargo of iron and copper, two of the crew drowned; the *John Patchett*, loaded with dry goods; the *Tartar*, with a full cargo from Europe; the French ship *Mouette*, vessel and crew totally lost, with a return cargo of mother-of-pearl, dye wood, and skins; the Peruvian brig *Magnet*, from Guayaquil, with a cargo of liquors, not insured; and the American schooner *Copeland*, in ballast. The latter was to have left the next day for San Francisco.

One day last week no less than twenty strayed children were in the Glasgow Central Police-office at once, and the notice was given to the public by a board affixed to the entrance-gate announcing that there is "A strayed child in the office."

The census of the city of New York, just taken, shows the population of the island to amount to about 750,000. Five years ago it was 517,000 Brooklyn, on the opposite bank of the East River, numbers about 300,000, and Jersey city and Hoboken, on the North River, will carry up the town population of New York, without taking in the surrounding villes, to over a million.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

THE WAR IN ASIA.

The Earl of AIRLIE inquired whether any official information had lately been received by the Government respecting the progress of the war in Asiatic Turkey? The noble lord accompanied his question by a prolonged statement of the events which, he alleged, had placed that portion of the Turkish dominions, especially the fortress of Kars, in imminent danger of capture by the Russian army.

The Earl of CLARENDON stated that the last intelligence from Asiatic Turkey bore date of the 23rd June. At that time the Turkish army was neither discouraged nor demoralised, the Russians had been repulsed in more than one attack, and Kars was considered safe from any sudden attempt at its capture

HOUSE OF COMMONS.—MONDAY.

The Nuisances Removal Bill was read a third time and passed.
The Metropolitan Buildings Bill went through Committee.
The Passengers Act Amendment Bill was considered in Committee, and some considerable progress made with the clauses of that measure.

WRITS FOR SOUTHWARK AND MARYLEBONE.

A new writ was moved by Mr HAYTER for the borough of Southwark, Sir W. Molesworth having vacated his seat by accepting the office of Colonial Secretary.

A new writ was also ordered to issue for the borough of Marylebone, in the room of Sir B. Hall, who has accepted the office of Chief Commissioner of Public Works.

THE TURKISH LOAN

The report of the Committee on the Turkish Loan being brought up, Mr. S. WORTLEY expressed much regret that the House should, on a previous night, have been taken by surprise on the question, so as almost to have passed a vote negativing the resolution proposed by the Government. He admitted that the project of the guarantee was in many respects imperfect, but deprecated the language which had been used in the late debate, and remarked upon the inconsistency evinced by members who professed to support a vigorous prosecution of the war, and yet registered their suffrages against the proposition for guaranteeing the Turkish Loan

Mr BRIGHT, with much warmth, repudiated the charge of having been implicated in a conspiracy, or of co-operating in a surprise, on Friday night. His resistance to the resolution then proposed was altogether in accordance of party influences, and was prompted chiefly by his sense of the dangers and disadvantages that attended even a distant approach to the system of subsidies. If there was one thing of which Parliament should be jealous, and which the people of England during forty years of peace had more frequently pronounced their opinion upon than any other, it was the reopening of the system of subsidies, which in the last war had been proved to be so inefficient for any useful purpose, but so efficient for plunging the country into debt and increasing the burden of taxation (Cheers from below the gangway). He agreed generally in the arguments which he had heard advanced the other night against this Loan; but there was one which he thought more important than the others. He feared that this Loan was but the beginning of a gross and scandalous mismanagement, which would lead to late entanglements and embarrassments the end of which it was impossible to foresee. With regard to the division itself (said Mr. Bright) I have no hesitation in taking my full share of the responsibility (hear), and I would ask, do those who, in the press, venture to lecture me and others upon the course we are taking, suppose that we are mere sneaking cowards? (Hear, hear, and a laugh) Are we, because we are determined to act in accordance with our conscientious convictions of what the interests of our country require, to be browbeaten by the press, and told that we do not represent the feelings of our constituents and of the country? (Hear, hear.) I say it is for us to judge for ourselves as to that matter, and we are prepared to take the responsibility. It was not necessary, said the hon. member, for any man to have a seat in this House, but having it, he should have regard to what he conceives to be the true interests of the country. The noble Lord might yet find that the division of the other night was a useful one to him. He believed that had the question been put to the House free from the pressure of Government necessity, that apart from the members of the Treasury bench, not ten members would have supported it on the division. There was no reason for alarm either as to the fate of the Government or the continuance of the French alliance as resulting from the vote upon this Loan. There would be a Government when the noble Lord no longer sat upon the Treasury bench, and England would exist long after this war, despite the imaginary fears of the noble Lord, or the browbeating to which the press of London commonly resorted when any member of the House of Commons ventured to say anything rational upon the subject of the war (hear, hear).

Mr. Serjeant SHEE, having voted for the resolution on Friday, offered some arguments in vindication of his decision, and criticised the allegations brought forward by Mr. Gladstone and other opponents of the proposed guarantee.

Sir H. WILLOUGHBY believed that the words and conduct of Austria had destroyed all hope of active co-operation in that quarter. Englishmen was thus left with no other ally than France; and, in the pending emergency, he saw no better means of augmenting the antagonism opposed to Russia than by strengthening Turkey with resources towards carrying on the struggle.

Mr. ALCOCK had opposed the resolution simply because he believed that the guarantee would lead to eventual entanglements. He did not object to the proposal for aiding Turkey with money, but wished to have that assistance granted in an open and direct manner, without any pledging conditions as to future employment

Mr. RICARDO justified his opposition to the guarantee in the previous debate, and added some further arguments touching the injurious consequences which he anticipated from the completion of the proposed convention.

Further remarks in vindication of the course they had respectively adopted on Friday were presented by Mr. DENDY and Sir D. L. EVANS.

Mr. LAYARD contended that the necessity of Turkey demanded, and her honourable conduct warranted, the assistance of more wealthy Powers. He claimed for that country the credit of being just in her pecuniary transactions even to generosity, and cited evidence to show the increase of her trade. Adverting to the vote of Friday, he brought a heavy accusation against Mr. Gladstone, as having acted an unworthy and unpatriotic part on that occasion.

Mr. GLADSTONE replied to this charge, observing that Mr. Layard himself confessed in the commencement of his speech that the proposed convention, which on Friday found no voice raised in its defence, except that of two cabinet ministers. He asserted the right of the House of Commons to interfere in circumstances such as now presented, characterising the assertion that such interposition was improper as a "servile doctrine"

Mr. M'GREGOR, though disapproving of the joint guarantee, would not allow the faults of the convention to outweigh the French alliance, and the effect its rejection would produce in Russia and Germany.

Mr. DISRAELI stated that, even if England were called upon to pay the whole five millions, it would but counterbalance the larger army which France maintained in the Crimea.

Mr. LAING declared that, so far from wishing to disparage the alliance with France, his principal reason for voting against the resolution had been the fear that it might endanger our amicable relationship with that country.

After some further remarks from Mr. Cayley, Mr. Crossley, Mr. Muntz, and Mr. Phillips, the subject dropped, and the report was agreed to without opposition.

On the motion for going into Committee of Supply, Mr. PALK sought some explanations from the Government touching their preparations for the war, demanding especially what measures were being taken to reinforce the army in the Crimea

Mr. F. PEEL declined to answer the queries thus urged, pleading that the information required would be very acceptable to Russia; he stated, however, that efficient reserves had been formed at Malta, and that recruiting for the Foreign Legion was proceeding satisfactorily.

HOUSE OF LORDS. TUESDAY.

THE FIRE COMPANY.

The Earl of HARDWICKE, in moving the suspension of the Standing Orders, in order to allow of the second reading of a private measure, entitled the Fire Company Bill, contended that the importance of the object in view warranted such an exceptional proceeding.

Some discussion took place on the question; and, upon an intimation from Earl Grey and Lord GRANVILLE that the Government had no intention of abandoning their bills for amending the law of partnership, the motion was negatived without a division.

HOUSE OF COMMONS.—TUESDAY.

The Irish Loan Bill was brought in and read a first time.

TENANTS' COMPENSATION (IRELAND) BILL.

The House having gone into Committee for the purpose of resuming progress on the Tenants' Compensation (Ireland) Bill,

Lord PALMERSTON said, the Government had taken up this bill in the hope of being able to effect a compromise between the contending parties; but, disappointed in this hope from the tenacity with which each clung to their own extreme views, he felt that, in the present state of the bill, and at the present period of the session, it was hopeless to expect to pass it into law, and he, therefore, moved that the Chairman should report progress, and not ask leave to sit again, as there was no use in wasting the time of the House, which might be more usefully applied to the consideration of bills which might have a chance of passing during the present session.

This proposition excited a prolonged and confused discussion, in the course of which much displeasure was expressed by several Irish members at the surrender of the bill by the Government. Ultimately, however, the motion was agreed to, and the Chairman was ordered to report progress on the understanding that the bill should be withdrawn.

PARTNERSHIP AMENDMENT BILL.

The House afterwards went into Committee on the Partnership Amendment Bill; but the discussion that ensued referred only to the question whether the measure, along with its companion, the Limited Liabilities Bill, should be proceeded with this year.

Lord PALMERSTON expressed his intention to persevere with the bills, although the day on which the Peers had consented to discuss new business would be passed before they could reach the Upper House.

A division was taken on the motion of Mr. MUNTZ, and the Chairman ordered to report progress by a majority of 89 to 41. The resumption of the Committee on the bill was then fixed for Thursday, at twelve o'clock.

The Encumbered Estates (Ireland) Act Continuance Bill went through Committee

The House adjourned at four o'clock for two hours; but, very shortly after resuming at six, was counted out.

HOUSE OF COMMONS.—WEDNESDAY.

SHORT TIME BLEACHING WORKS BILL.

Mr. CHEETHAM presented petitions from Lancashire against the bill.

Sir G. GREY hoped that the hon. Member (Mr. I. Butt) would not press the bill during the present session.

Mr. I. BUTT thought it was desirable that the House should express its opinion on the bill, and therefore he should persist in moving that the bill be read a second time. The present bill had originated with the working classes of Bolton, who were desirous to have such an arrangement with regard to a limitation of the hours of labour as was come to by the masters and workmen of the west of Scotland that of sixty hours per week. A Royal Commission had been appointed, and it appeared from the evidence taken before the Commissioner, Mr. Leonard, that boys and girls from ten to eighteen years of age were employed in bleaching works continuously for eighteen hours a day, having them at each time to sleep, much less to improve their mind. The work, too, was carried on in an air before the temperature of which it was fearful to do. He therefore appealed to the House whether they would allow such a state of things to exist another year. He hoped the House would not be abominable bad at present evidence, but only bad. He certainly should press the House to express its opinion on the bill, and hoped that the bill be read a second time

Mr KIRK moved an amendment, that the bill be read a second time that day three months. He would not have opposed the bill if Ireland had been excluded from its operation. He believed that no such things took place in Ireland as had been described. In Ireland they only worked for eight hours in the winter, and it was therefore unfair that they should not be allowed to work a longer time in the summer

Mr. CROOK seconded the motion for the bill being read a second time. The evils that existed with regard to labour in bleaching works rendered it absolutely necessary that the House should interfere at once to remedy the evil.

Sir G. GREY thought it was inexpedient that the bill should be proceeded with this session. At this period of the session it was impossible that the bill could have proper consideration, as he was aware that there was considerable opposition to it.

Lord SEYMOUR thought it was most inexpedient to proceed with the bill this session. It was admitted on all hands that there was a necessity for legislation on the subject, and that a bill should be introduced upon a full inquiry, which would receive the consideration of the House.

Lord J. MANNERS had heard no argument to show that the present system should be allowed to exist another year, or even a day longer, and nothing could be done without legislation and inquiry now to remove the horrible evils that at present existed.

Mr. CLAY admitted that legislation was necessary, but it was most desirable that the House should be called upon to consider such a measure as would meet the whole question.

Mr. WILKINSON thought the House would do more harm than good if they were to sanction the second reading of the bill; and he should therefore support the amendment.

Mr. J. B. SMITH also urged Mr. I. Butt to withdraw the bill, and introduce it an early period next session.

Mr. DUNCAN thought it was desirable that the discussion of the bill should be postponed.

Mr. W. WILLIAMS said it was absurd to suppose that the trade of this country depended upon the slavery of boys and girls.

Mr. BRIGHT said the hon. member for Lambeth, who spoke of slavery knew nothing of bleaching works, either in Lancashire or Scotland, and he would venture to say he never was over one in his life, or ever in Scotland at all, and had not ever read the evidence contained in the report (Laughter). He was opposed to the proposed bill, because he thought it was wrong in principle; but he gave notice that it any bill should be introduced on the subject next session, he would move that the subject be referred to a select Committee.

Sir J. SHELLEY thought it was most inexpedient to proceed with the consideration of the bill

Lord GODERICH supported the second reading.

Mr. COBBETT thought the House ought to affirm the principle of the bill even if it went no further.

The House having divided, the numbers were—For the second reading, 67; against it, 72: majority against the second reading, 5.

The bill was consequently lost.

CHURCH-RATES ABOLITION BILL.

Sir W. CLAY moved that this order be discharged. Finding so little chance of carrying it this session, he thought it right to take it off the paper (Hear, hear). He should renew it next session.

The bill was then withdrawn.

HOUSE OF LORDS. COMMITTEE FOR PRIVILEGES, JULY 24. The claim of Sir James Carnegie to the dignities of Earl of Southesk and Baron Carnegie, was allowed. Sir Fitzroy Kelly and the Recorder of London were counsel for the claimant; the Attorney General and the Lord Advocate of Scotland appeared for the Crown. Viscount Montgarret's claim was allowed, the application for an adjournment by Mr. Freeman, counsel for Mr. P. Butler, being refused. The claim of the Earl of Annesley, whose case had been adjourned, was allowed; Mr. Alexander and Mr. Peter Burke appearing as counsel for the Earl. The Grandison Peerage case was again adjourned.

OPENING OF THE DUTCH-RHENISH RAILWAY.—This new and important line, which throws Holland in direct communication with the whole of Central Europe, and places Amsterdam, Rotterdam, Utrecht, and Arnheim within about two hours' reach of each other, was opened on the 20th inst., by the King, represented by his brother, Prince Henry, Duke of Gelderland, and the Princess of the Netherlands, the Duke of Nassau, and the municipal authorities of the chief cities of Holland. We shall illustrate, from our own Artist's sketches, the inauguration ceremony and festivities next week.

RELEASE OF CECCHETTI.—Intelligence has been received from Florence that Cecchetti, whose name has become notorious of late as having been condemned to a year's imprisonment for disseminating Protestant principles, has been set at liberty, his punishment having been commuted to a year's exile from Tuscany. The Grand Duke was disposed, it is said, to have granted a full pardon, but was restrained by the fear of being supposed to have given way to the passionate and harshly-worded diatribes of the English press and English banker residing at Florence was the immediate instrument of exhibiting clemency for Cecchetti, and the affair was immediately over. Cecchetti will repair to Piedmont, where he will live on a pension secured to him by the beneficence of his friends in London. He will be able to return to Tuscany in a year if he desires it.

RUINOUS STATE OF RUSSIAN TRADE. Most of the correspondence, whether commercial or otherwise, that reaches us now from Russia contains details of this, that, or the other large industrial undertaking, for the support of which, by the compulsory labour of their serfs, the landed proprietors, who are the principal Government dealers, being suspended for want of the requisite funds to work, or the raw material to work upon. The Steam Navigation Company of the Wolga and Kama, founded in 1844, under Imperial patronage, has just been wound up and dissolved, "on account of its unsatisfactory position." A branch of this company conducted an insurance business, which also is now at an end. Various manufactories in Moscow belonging to Government, that have hitherto been kept going on in spite of all difficulties, are now being stopped. The Altai and Nertschinski Gold and Silver Mining and Smelting Works, that have been under the direction of the Ministry of Finance ever since 1830, are now put under the protection of the Imperial Cabinet, with the remark that, as the latter is not in a position to assign it any capital to work with, the State Treasury will for the present supply what is necessary for current outlays. In the inland provinces, where the nobility have for the most part embarked their fortunes in manufactories for the purpose of conferring a value on their wide-stretching estates and numerous serfs, the blockade of the Baltic is most extensively felt. The want of raw sugar, and of raw cotton more particularly, have brought them to a stand-still. The noble proprietors of so many human live stock, now become not but valueless to them make a virtue of necessity, and parade their patriotism in parting with their superfluous serfs for the purposes of the militia; the dissatisfaction with the war and the necessary policy of Russia are pointed out among these large landed proprietors, even although they belong to a man to the old Russian party. Remarks such as the following are quoted as being frequent in men's mouths:—"We can't hold out against this blockade another year." "What is imported by land carriage is next to nothing," &c. The St. Petersburg Gas Company can give us more gas from the total want of coals, all the stocks of which have everywhere been laid under embargo by the Government for the purposes of the military works; and the large iron-foundry and machine works at Katharinenhof has been stopped in consequence. The liberality of the Government in throwing open the coal-fields on the Crown domains to anybody that likes to work them will, under these circumstances, excite neither surprise nor admiration.—*Letter from Berlin.*

THE SILENT MEMBER.—(No. XXVII.)

LONDON has a great deal to be ashamed of; and, if a city could blush, its countenance would be in a state of perpetual suffusion at the thought of the Thames, the corporation, the statues, the cabmen, and a hundred other minor blots on the general character of the metropolis. Within the last week, however, London has had some slight cause of self-gratulation, or, at least, might have had, if it had been possible to sink the Thames, which has come into very unpleasant prominence during the recent hot weather. London—I do not mean the City, which is sometimes called "London proper" (a title it deserves, not so much for its propriety as for its property), but the entire metropolis—has reason to be proud of the position held by some of its representatives in the House of Commons. It used to be the custom to decry the metropolitan members, and point to their alleged incapacity or insignificance, as an argument against extending the suffrage, or giving an increased share of the representation to the inhabitants of large cities. The members for the metropolis used to be sneered at by the anti-Reform party as noisy demagogues who occupied the time of Parliament by talking a great deal, but who seldom or never succeeded in passing any measure of practical utility. There may have been some truth in the allegation, but no justice in the censure with which it was accompanied, for the failure of a proposal is not always to be regarded as a proof of its inutility. Perhaps the House of Commons that rejected the plans of the metropolitan members may have been really to blame for the little good that was effected by the latter. Things, however, have changed within the last few years; and the representatives of the metropolis are, many of them, at a high premium. It is true that Lord John Russell has fallen considerably below par: but the terrible discount at which he is every where quoted may be considered as more than balanced by the rise that has occurred in the representatives of Marylebone and Southwark. The latter, who was once looked upon as an impracticable Radical, has been called on to fill the place vacated by Lord John Russell as Colonial Minister. It has been the foolish custom to denounce every man of liberal views and popular principles as a renegade the moment he accepts an office in which he has an opportunity of putting his principle into practice for the good of the community. Reversing the rule applied to patent medicines, that "none are genuine without the Government stamp," the public have been too apt to proceed on the supposition that with reference to politicians or statesmen "none that have the Government stamp are genuine." This foolish and somewhat suicidal feeling is happily wearing out, and it is beginning to be admitted that the positions of a true patriot and an official servant of the public are not incompatible. Sir William Molesworth and Sir Benjamin Hall have neither of them renounced their principles, while both have been very useful in their respective places. Thus, elevations to higher and more important offices may be regarded as a tribute to public opinion, and a sort of tribute that would have been oftener rendered if it had not been the custom of the public to withdraw confidence from all who sought an opportunity to give effect to their views by entering what might become really as well as nominally the service of the country. It has been stated that another metropolitan member, in the person of Sir John Shelley, is to be selected for office as President of the Board of Health; and, when it is remembered that the General who has returned from the Crimea with the largest crop of well-earned laurels is also a metropolitan member, it will be seen that the metropolis has done itself great credit by the choice it has made of its representatives.

Before the Session closes, I would earnestly call on the House to do something to mitigate the inconveniences which are on almost all hands admitted to arise from the Beer Bill of last Session. Concession to public opinion may just now be made with a good grace; for sufficient evidence has been taken by the Select Committee of the House of Commons to justify the immediate passing of some measure to prevent the continuance of what is felt to be a grievance by the middle and lower classes of society. It cannot be said that anything like coercion has been employed, for the witnesses by whom the Beer Bill has been condemned are of them men holding a public position, and many of them employed in the administration of the law and the preservation of order. It is to be hoped that the Legislature will feel the propriety of doing something forthwith to prevent the dissatisfaction that would inevitably result from allowing things to remain as they are on this subject until the next Session. Energy of action on the part of Parliament will no doubt be required, for time is short, and speeches are still too long, but it is not impossible to pass an Act through both Houses before the day of prorogation. It is a mistake to suppose that anything short of an Act of Parliament will accomplish the desired object; for even the suspension of the operation of an Act will require the concurrence of both Houses, and, in fact, a new Act must be passed either to suspend or to repeal the former one. It is with a friendly feeling to all parties that I express my opinion on this subject, for it would be sad indeed if dissatisfaction should declare itself at a moment when the Legislature is not sitting; and it is always painful to see concessions made to the demands of importunity after the moderate claims of common sense and justice have failed to secure attention. I have enough confidence in the wisdom and good intention of Parliament to feel assured that if the Legislature felt the case to be urgent the remedy would be at once applied; but it is possible that the necessity may not present itself to the legislative mind, and that the Session may be brought to a close without any step being taken to release the public from a grievance which is likely to press more heavily during the recess—the usual period of locomotion than it has done while the Houses have been sitting.

It is sad and yet amusing to observe the frequency with which the Grand Jury at the Middlesex Sessions declares its own absurdity and uselessness, while Mr. Serjeant Adams complacently concurs in the opinion of that ancient body as to its utter worthlessness. On almost every occasion of the Grand Jury presenting itself in Court, it declares a wish for its own abolition; but as the deathblow cannot be administered by any hand but that of the Legislature, and as Parliament will not do the deed, the Grand Jury continues to drag on a miserable existence, which, if suicide were lawful, or if Serjeant Adams could knock the unhappy sufferer on the head, would speedily terminate. The learned Assistant-Judge can, however, hold out no hopes of euthanasia to the Grand Jury, which continues to live on in a state of grandeur which would be hateful enough if it did not happen to be purely nominal. The House of Commons had passed a bill for the destruction of this unhappy body, when the Lords arrested the blow, and condemned the Grand Jury to another year at least of a miserable and aimless existence. It is certainly a cruel position to be placed in to have one's absurdity continually thrown in one's face, to be constantly expressing one's own sense of one's own worthlessness, to be told one ought to be got rid of, to be always giving utterance to a wish to be got rid of, and at the same time to be informed that the thing is not to be done for at least another twelvemonth

Several bills have as usual been thrown aside on the customary plea that there is no time to carry them during the present Session. And this plea is hardly reconcilable with the fact that the House of Commons was counted out last Tuesday, just as if there was nothing at all to be done, or, if there was, that there was not sufficient hands in attendance to do it. On the very same evening that the "count out" occurred, and a night was consequently lost to the business of the nation, Lord Palmerston withdrew the Tenants' Improvement Compensation Bill for Ireland, on the ground that "there was no time to go on with it." Lest there should be any doubt as to the accuracy of the Premier's calculation, the House managed to throw away half a night, so that, if there might otherwise have been time to proceed with the measure which Lord Palmerston withdrew, the waste of the remainder of the evening by emptying the House would of course prove that his Lordship was right in saying that there was no time for further progress.

H.M.S. "EXMOUTH" AND "BLENHEIM" COVERING GUN-BOATS DURING AN ATTACK ON THE FORTS AT THE MOUTH OF THE NARVA.—(SEE NEXT PAGE.)

THE GUN BOATS "PINCHER" AND "SNAP" ATTACKING THE FORTS AT THE MOUTH OF THE NARVA.—(SEE NEXT PAGE.)

THE GUN-BOATS "THISTLE" AND "WEASEL" CUTTING OUT TRADING CRAFT, OFF CRONSTADT.

THE BALTIC FLEET.

WE have given several Engravings this week of some of the late operations of the Baltic fleet, from sketches taken on the spot. That of the two gun-boats, *Pincher* and *Snap*, attacking the forts at the mouth of the river Narva, took place on the 13th of June. Another Engraving represents the *Exmouth*, Admiral Seymour, and the *Blenheim*, Captain Hall, covering the two gun-boats during their spirited attack on the Russian forts.

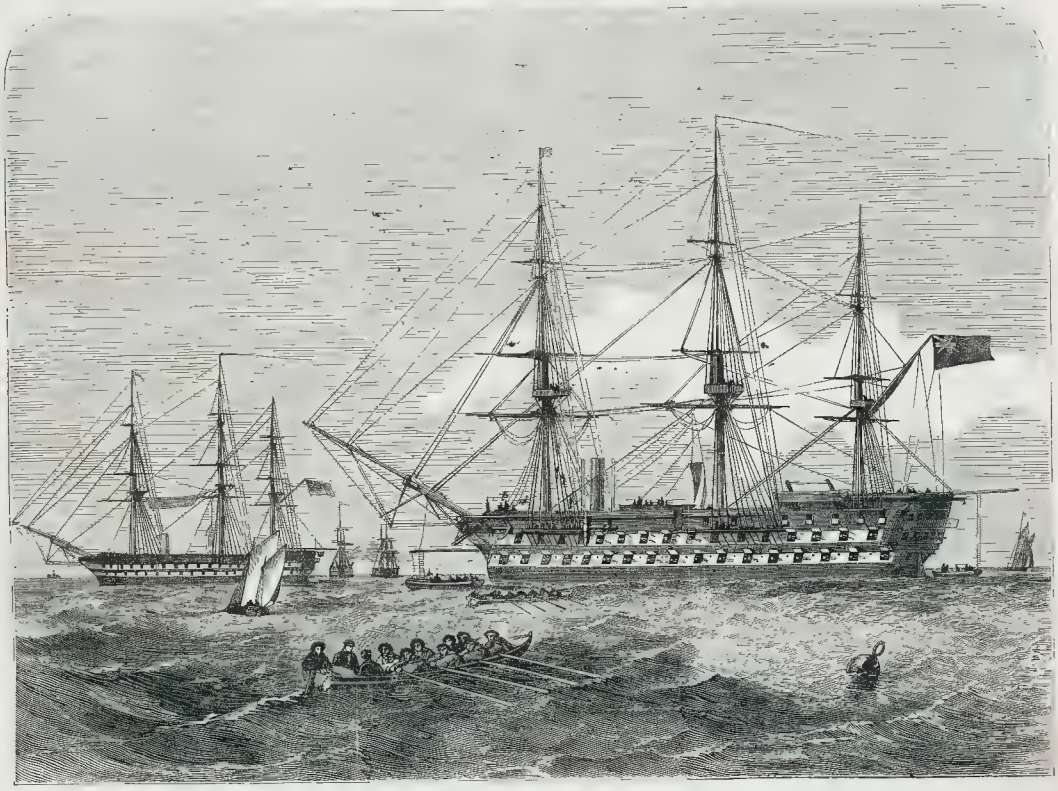
The work in which the two gun-boats *Thistle* and *Weasel* are engaged, as given above, is the cutting out Russian trading vessels along the shore, in the neighbourhood of Cronstadt, under the protection of the *Royal George*, which may be seen on the left hand, with one of her boats in the foreground.

The Engraving of the *Nile* practising, at general quarters, off Seskar, shows the ample proportions of that noble vessel as she rides at anchor.

It will be seen from Captain Yelverton's despatch, in this week's Supplement, that he almost managed to have a fair fight with a Russian vessel:

"Having opened the bay called Trangsund," says the Captain, "we saw a Russian man-of-war steamer, with two large gun-boats in tow, not far off. This most novel and unexpected sight of a Russian man-of-war for once clear of a stone wall, and to all appearance inclined to give us a fair and honest fight, created the greatest enthusiasm amongst the men and officers. I directed Mr. Hale, commanding the *Ruby*, to open fire on her at once; but she very soon retired out of range, having, I think, received some damage."

This is always the way with the Russian men-of-war. When they are three or four to one, as at Sinope, the Russian navy can perform wonders but they always flinch when they find that they have not greatly the advantage in point of numbers.



"THE NILE" EXERCISING IN GENERAL QUARTERS, BALTIC FLEET.

TAKING OF NYSTAD AND CHRISTINESTAD.

(From a Correspondent.)

On the 11th of June the *Firefly* and *Porcupine* in company left Nargen Island and proceeded to Ubo. The lighthouse is placed on the largest island, and consists of a square tower of stone, standing on a wide base; the height, including the lanthorn, being ninety-one feet. The upper story is fitted up as a neat little chapel, where a priest used to officiate two or three times a year before the war broke out. The village is composed of a number of wooden houses, and several windmills, and a red-coloured Custom house. The men, who are pilots and fishermen, were removed with their families at the breaking out of the war; they returned last winter, but the men were again taken away in April, and there are now about sixty or seventy women and children on the island. They, however, do not appear to feel the want of their lords and masters, for they have about twenty boats of different sizes, and carry on a thriving fishing trade. Though a little startled at first by the appearance of two English ships, they all went out at four o'clock to lay down their nets in a very systematic manner. Their traffic is chiefly with the Kirkar Islands, where they exchange salt fish for casks, salt, &c. One boat returned from those islands shortly after we anchored, *manned* by two matrons and two young girls. She had two sprit sails and a jib, and was handled in a seamanlike manner. When boarded by a boat the younger ones were suddenly taken sea-sick, and found stowed away under a sail. Their cargo consisted of empty barrels, salt, coffee, some oysters, and a gun lock.

On the 14th the vessels proceeded on their way, sounding and buoying the shoals, and at night anchored in Fogle Fiord—*Ajax*, *Driver*, *Cuckoo*, and *Harrier*, in company. On the 15th the *Firefly* proceeded with the *Driver*, *Harrier*, *Cuckoo*, and the barge of the *Ajax*, as despatch-boat

As the vessels were now in unknown waters it was necessary to proceed with great caution, as the course lay amidst a continuous cluster of rocks and reefs which are not laid down on any chart. The sun, however, being in a good position the rocks were seen in time to avoid them, and the ships anchored in safety on the north side of Wadaskar. This group belongs to one man, whose grand children live on the island, and there is sufficient pasturage for four sheep and two cows. The lily of the valley, cowslip, and small "primula" are indigenous, and eider ducks resort there in great numbers during the breeding season. The ships weighed and stood to the north, and in a short time a schooner was reported at anchor under Lilla Wehax. A boat was sent from the *Firefly* to cut her out, and on boarding her it was found that she had been scuttled in three or four places. The officer, however, was in time to plug them up, and brought her alongside about four a.m. with a large boat that had returned from Abo, having delivered a cargo of salt at that place. The crew stated that the price of salt was six to seven roubles a bag. On the 20th June a narrow sound was examined and buoyed, and, a four-fathom channel having been found, the ships weighed, and without further check steamed up to within a mile and a half of the town of Nystad, never having less than four fathoms all the way. Considering the small scale of the chart, the numerous islands and rocks which are not inserted in it, and that there was no pilot, it was very satisfactory that the ships had arrived before the town without having once touched the ground through a navigation of forty-six miles of unknown waters. Lieutenant Ward, of the *Firefly*, with the master, was immediately sent to within a thousand yards of the town, and on their return a flag of truce was hoisted in each ship, and a blank gun fired. Mr. Burstall, the First Lieutenant of the *Firefly*, was then sent in with a summons to the town, with directions not to go out of range of the guns. The people now were collecting on a rising ground in the town, and the telegraph, which was of a new construction, having ten balls and a red flag, was kept in constant motion. In about half an hour a boat, bearing a flag of truce, came out of the harbour, and took Captain Otter's letter on shore. Information had been received that two batteries had been erected lost year by the Finnish recruits—that one had been dismantled, but that the other was masked. On examining with the glass the south-east point of Hanko, the former was discovered It had been constructed of stout wooden framing, filled in with earth, and had been carefully taken down so that it might easily be reconstructed. A little before midnight a boat, containing the deputy Burgomaster, the head man being sick in bed, pulled out to within half a mile of the ship, and on being invited came on board with a letter in answer to the summons. He had with him a lawyer, who had married a lady in Falmouth, an interpreter, and several merchants, who could speak English. The answer stated that as the town was unprotected no resistance would be made, and that, though they had very strict orders from Government not to deliver any provisions to the enemy, yet that they would be furnished according to the demand. It further stated that there were no Government vessels or stores in the harbour. The Burgomaster was then informed that whenever any of her Majesty's vessels came in, they would hoist a flag of truce, and he must then send off a bullock and six sheep within three hours, as well as vegetables, for which a fair price would be paid, that the flag was to be answered in some conspicuous place in the town, upon which the vessel would not approach nearer, and that unless the Commander-in-Chief objected, the small fishing-boats would not be molested, but any found carrying cargo would be taken. Information was then sought about the Hango massacre, and it was ascertained, to the great joy of all, that only five were killed and eight taken prisoners. It was stated that the soldiers who committed the atrocity were Russians, and not Finns. Captain Otter then told the Burgomaster that he should send in an armed boat to examine the harbour, to see that his statement that there were no Government vessels or stores in the harbour was correct; and that he was induced to take this unusual step in consequence of the breach of the laws of nations and of humanity committed at Hango Mr Hains, the master of the *Firefly*, was sent in on this expedition, with orders to shoot the Burgomaster the very first person should any attack be made upon them; and, as he was a very portly gentleman, he could not not well miss his man. At the same time Captain Story, of the *Harrier*, and Lieutenant Ward, of the *Firefly*, were dispatched to destroy the masked battery, which was so well disguised that it could not be detected until close upon it. The position was well chosen. It was built close down to the water's edge, of immense large stones, and fascines imbedded in clay, and pierced for five guns, though more appeared to have been mounted. It had been built with care, and would have been a formidable barrier to any ship going up to the town. The channel here is about half a mile across; and nearly opposite, on the island of Warko, is the other battery already described. In a short time the battery was completely destroyed, and a large amount of timber, used in the construction of it, burnt. Mr. Hains, the Master of the *Firefly*, found, on proceeding up the harbour, only one schooner and two or three smaller vessels, not worth taking out. Immense piles of wood and plank were seen on different parts of the harbour and islands; but, as the Burgomaster had declared it was all private property, it was not destroyed.

The vessels then got under way, and, leaving the *Harrier* to watch the entrance into Nystad, the *Firefly* and *Driver* shaped a course due north, sounding as they went along, and, on the 27th, arrived off Christinestad. Here they captured a fishing-skiff, the crew of which gave them all the needful information respecting the place, except that they knew nothing about the pilotage, or what size vessels could go up to the town. They said that five or six Swedish schooners, besides smacks and boats, had been over from the opposite side of the gulf with groceries and salt, and supplied them so well that the latter article had fallen to four roubles from double that sum, the price at one time last year. They took back tar, and during the winter the hemp was passed over the ice, so that the only export remaining on hand was the deals, which are not required in Sweden, and are sent to Denmark and England. This article, however, is the most important one, and immense stacks of it, roofed over and weather-worn from the exposure of two winters, were afterwards seen in the harbour. In the afternoon the four paddle-box boats went into the harbour and took possession of High Island, so as to cover the men while destroying the batteries on the main opposite. A flag of truce was then sent in, with a demand for a new schooner which had been scuttled the night before, for all Government property—particularly arms, a supply of provisions, and with a notice that the forts would be destroyed. Captain Gardiner pulled in to a point where the flag had been answered, and met the Burgomaster, who, like him of Nystad, was in excellent condition. He pleaded great poverty since the trade had been stopped, and three of their ships taken; but said that, as they were unarmed, and the soldiers had left them in April, they must abide by our decision. Lieutenant Ward was then sent to destroy the batteries whilst Captains Otter and Gardiner pulled up past the town to examine the schooner. Five large ships were building, one nearly 400 tons, ready for launching, the others in frame, and two schooners unrigged. As they got higher up, the town improved in appearance, the houses were clean, well-built, and prettily painted. A wooden bridge or viaduct crossed the harbour, and from this point the view became very picturesque. Numbers of the inhabitants followed the boats along the shore, and knots of well-dressed girls, in their broad-brimmed hats, took possession of the jetties to obtain the nearest view of the ruthless enemies who had come to burn down their houses. They had heard of the liberal manner in which the torch had been applied last year, but as yet not an enemy's ship had been seen in their waters. After examining the schooner, the two Captains returned to the Burgomaster, and informed him that the schooner must be pumped out, and her sails and fittings put on board, ready to be delivered up on Saturday, when a flag of truce would be hoisted, and that the reason for this was, that she had been scuttled after the ships had appeared off the town. By this time Lieutenant Ward had nearly destroyed one of the batteries, but they took a great deal of pulling to pieces and blowing up. Two of them had embrasures, one for four guns, the other for three. They were perfectly masked with growing trees, and a number of rifle-pits were concealed by the bushes. The platforms were laid for the guns, and there was a wooden shed for barracks in the rear. All this timber made a splendid blaze, and after the application of 80 lb. of powder and the liberal use of the pickaxe and crowbar the batteries were pretty well demolished. On the morning of the 28th the two ships weighed and ran down the coast to the south, sounding and fixing positions. On the 29th they picked up the *Harrier*, who had burnt and scuttled upwards of forty vessels of from 240 to 800 tons. They had been secreted in a thick cluster of islands N.E. from Nystad, where they thought no enemy could find them.

OFFICIAL DESPATCHES.

DESPATCHES FROM GENERAL SIMPSON.

War Department, July 26, 1855

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Lieutenant-General Simpson, commanding her Majesty's forces in the East:—

Before Sebastopol, July 10, 1855

My Lord,—I have the honour to enclose the returns of casualties to the 8th instant.

Your Lordship will regret to see that the lists of killed and wounded are heavy; but the nearer we approach the defences of the place the greater number of casualties must be expected.

Brevet Major Harrison, 63rd Regiment, was killed on the evening of the 7th inst., whilst proceeding to the trenches. He was a most excellent officer, and is a serious loss to her Majesty's service

It will give your Lordship much pleasure to mark the improvement in the general health of the troops

At five o'clock this morning a heavy fire was opened upon the Redan by the Allied batteries I have, &c., JAMES SIMPSON,

The Lord Panmure, &c. Lieut.-General Commanding

RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED AND WOUNDED FROM THE 6TH TO THE 8TH JULY, 1855, INCLUSIVE.

KILLED.

7th July.—63rd Foot: Brevet-Major G. N. Harrison Private John Essey. 48th: Private Patrick Halfperny, 31st Privates Benjamin Lang, Michael Gleaney, Michael M'Elroy. 47th Private James Preston. 3rd: Private Andrew Donkin. 72nd Private Charles Gilbert. 88th Private Hamilton Hall.

WOUNDED

7th July—Royal Engineers: Lieut. Le Geyt, severely

63rd: 2nd Battalion, 1st Foot: Private John Claypoole, severely. 3rd: Sergeant Johnson, severely; Private Donald Ross, severely. 4th: Private Archibald Fergusson, slightly. 7th: Private Charles Cowing, slightly. 30th: Corporal John Thompson, severely. 47th: Private William Windsor, slightly. 49th: Privates Richard Osborne, severely; John Kilfoyle, William James, slightly. 77th: Privates Thomas Leith, James Hamilton, slightly. Royal Artillery: Gunner Solomon Fristy, slightly. Royal Sappers and Miners: Corporal Jeremy Sweeney.

8th July: Royal Marine Artillery: Attached to the Royal Artillery, Corporal William Speak, slightly (omitted to be returned on previous day)

7th July—Coldstream Guards: Private Job Gibson, slightly. Scots Fusilier Guards, Private Robert Jones dangerously. 4th Foot, Privates John M'Kenna, William Stanstie, severely. 14th: Private Thomas Riley, slightly. 31st: Private John Daly, slightly. 49th: Private John Bourke, slightly. 50th: Privates Samuel Groves, dangerously; William White, James Flanagan, Thomas Slattery, slightly. 77th: Privates John Crawley, dangerously; Michael Reilly, severely. 90th: Private Alexander Cochrane, severely; Thomas Bailey, slightly. 1st Battalion 4th Brigade: Private James Finch, slightly

8th July.—2 Foot: Privates Patrick Coleman dangerously; William Campbell, slightly. 7th: Private John Reed, severely. 21st: Corporal James M'Murry, slightly. Privates Martin Heaney, John M'Guire, John Jenner, slightly. 41st: Private Patrick O'Reilly, slightly. 47th: Private Corporal James Barth; Private Samuel Cover slightly. 47th: Private James Anderson, slightly. 50th: Privates Michael Keenan, severely; Joseph Nayle, John Burke, slightly. 89th: Private John Dowgall, Hugh Mulvey, dangerously, Alexander Dugwall, severely. 93rd: Private John Micklead, Joseph Martin severely

Supplementary Return of Non-commissioned Officers and Privates Wounded on the Morning of the 8th June 1855. 18th Foot: Corporal James Mark, dangerously. Privates Matthew Hanrahan, dangerously; Michael Byrnes, dangerously; Thomas Jordan, severely, Henry spalding, dangerously; Thomas O'Brien, severely; Patrick Hanlan, severely; Bernard Mackey, severely Donald, slightly.

Supplementary Return of an Officer Wounded on the 7th June, during the period from 2nd to 7th July, 1855.—Royal Engineers: Captain E. C. de Molineux, slightly

Supplementary Return of Officers serving in Trenches &c., during the period from 2nd to 7th July, 1855.—Royal Engineers: Lieut. E. M. Jones.

DESPATCHES FROM REAR-ADMIRAL SIR EDMUND LYONS.

Admiralty, July 23.

Despatches, of which the following are copies, have been received at the Admiralty from Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Black Sea:—

Royal Albert, off Sebastopol, July 10.

Sir,—Their Lordships will have great pleasure in learning that Commander Osborne, of the *Terrible*, mentions in favourable terms a letter he had received from Lieutenant W. N. W. Hewitt, the Commander of the *Beagle*, report ng the destruction of the floating-bridge in the Straits of Genitchi..

2 I have now the honour to enclose a copy of that letter, and to draw their Lordships' attention to the excellent arrangements made by Lieutenant Hewett, as well as to the gallant and able way in which his orders were executed by Mr. Martin Tracey, midshipman, of the *Terrible*, Mr. John Hayles, acting gunner of the *Beagle*, and the boats' crews, one of whom, Stephen Trewavas, ordinary seaman, lent from the *Agamemnon*, was wounded, and is particularly mentioned as having cut the hawse-rope

I am, &c., EDMUND LYONS.

To the Secretary of the Admiralty. Rear-Admiral and Commander-in-Chief.

Beagle, off the town of Genitchi, July 4.

Sir,—I have the honour to inform you that on my arrival off this place I immediately proceeded to minutely examine the communication between the town and Arabat Spit, and on so doing found it to be by means of a ferry, of two large flats and hawsers, which I determined to destroy, if possible.

Accordingly, on the forenoon of yesterday, I dispatched my gig, under Mr. John Hayles, acting gunner, and the paddle-box boat, under Mr. Martin Tracey, midshipman, of the *Terrible*

I have much pleasure in reporting that they succeeded entirely in destroying it by cutting the hawsers and casting the boats adrift, which was done under a very heavy fire of musketry at about eighty yards, the troops completely lining the beach, and the adjacent houses being filled with riflemen

Great credit is due to Mr. Hayles for his activity and zeal in destroying the same, and to Mr. Martin Tracey for the effectual fire he kept up in covering his retreat the firing from the ship and paddle-box boat at the same time causing great confusion and loss amongst the enemy as they retired from their exposed position.

Mr. Hayles speaks in the highest terms of the boat's crew, especially of Stephen Trewavas, ordinary seaman, lent from the *Agamemnon*, who cut the hawsers

I enclose a list of casualties, which, I am happy to say, is very small, although the gig and paddle-box boat were riddled with musket balls

I have, &c., W. N. W. HEWETT, Lieutenant Commanding.

To Commander S. Osborne, Senior Officer of her Majesty's ship *Vesuvius*.

RETURN OF WOUNDED ON JULY 3 DURING BOAT ATTACK OF HER MAJESTY'S SHIP "VESUVIUS" PADDLE-BOX BOAT, AND GIG OF "BEAGLE," IN DESTROYING THE FERRY OF TOWN OF GENITCHI AND ARABAT SPIT.

John Hayles, Acting Gunner, slight contusion of left forearm from spent musket-ball; Stephen Trewavas, Ord., severe wound of right shoulder from musket-ball.

DESPATCHES FROM REAR-ADMIRAL THE HON R S. DUNDAS.

Admiralty, July 23.

Despatches, of which the following are copies, have been received at the Admiralty from Rear-Admiral the Hon. R. S. Dundas, Commander-in-Chief of her Majesty's ships and vessels in the Baltic:—

Duke of Wellington, at Nargen, July 17.

Sir,—I transmit herewith, to be laid before my Lords Commissioners of the Admiralty, a report of proceedings during the past week from Captain Yelverton, who rejoined me yesterday at this anchorage in H.M. ship *Arrogant*, and who, with the *Magicienne* and *Ruby* gunboats in company, visited the south coast of the Gulf of Finland, and attacked some military posts of the enemy at Koundra Bay, and in the River Portsoki.

Returning afterwards to the former station in the Bay of Viborg, he proceeded with boats towards the town, and engaged with a superior force of the enemy defended by batteries.

I request you will express to their Lordships my approbation of the conduct of this enterprising officer on all occasions; and I would beg to recommend to their favourable notice the conduct of Captain Vansittart, of the *Magicienne*, and of Lieutenant Haggard, of the *Arrogant*, and Lieutenant Dowell, of the Royal Marine Artillery, and the excellent behaviour of all the officers and men

Captain Yelverton has spoken favourably also of the conduct of Mr. Hale, mate, in command of the *Ruby*.

I regret much to have to report the loss of Mr. Story, midshipman, of the *Arrogant*, with nine others wounded in the boats of the two ships, of whom one is since dead. I have, &c., R. S. DUNDAS.

To the Secretary of the Admiralty

Her Majesty's ship *Arrogant*, off Viborg, July 14, 1855

Sir,—I have the honour to acquaint you with my proceedings during the week

The *Magicienne* rejoined me on Wednesday, and I proceeded direct to Koundra Bay, on the south coast, where I had been led to think that troops were concentrated. It turned out to be a large Cossack encampment, on a most commanding position, from which I dislodged them with shell and rockets from the *Ruby* and ships' boats. Some opposition was made to our landing, and shots fired from behind hedges, &c.; but I succeeded in examining the place, which I did not injure, as it contained only private property

The following morning I anchored at the mouth of the River Portsoki, and landing on its right bank, destroyed a Cossack barrack and stables, driving the soldiers into the country. I then came on here.

Having anchored the ships as close as I could to the Island of Sralsund, I proceeded in the *Ruby*, accompanied by Captain Vansittart, of the *Magicienne*, and Captain Lowder, R.M., of this ship—the latter officer having under his command a strong detachment of marines. We towed with us the boats of this ship, under the command of Lieutenants Haggard and Woolcombe, and those of the *Magicienne*, under the command of Lieutenants King and Lordly

Having opened the bay, called Trangsund, we saw a Russian man-of-war steamer with two large gun-boats in tow, not far off. This most novel and unexpected sight of a Russian man-of-war for once clear of a stone wall, and to all appearance inclined to give us a fair and honest fight, created the greatest enthusiasm amongst the men and officers

I directed Mr. Hale, commanding the *Ruby*, to open fire on her at once, but she soon got out of range, and was retired out of sight, having, I think, received some damage. We had now reached the entrance to the Sound; Viborg was in sight, and a fair prospect of attacking three large gun-boats, lying with another steamer under an island about one mile off. We were here brought up by a barrier, impeding the passage of the gun-boat and launches

At this moment a masked battery on the left bank, not more than 350 yards off, opened on us a heavy fire of musketry, and round and grape shot. This was instantly returned and kept in check by a rapid and well-directed fire from the *Ruby* and all the boats. The enemy's steamer and gun-boats then came from under the island and also opened fire on us

As it was impossible to get the *Ruby* through the barrier, I returned towards Strasland, the enemy's riflemen following us along the banks, but driven from their position as fast as they took them by the fire from the *Ruby* and boats.

An explosion took place in one of the *Arrogant*'s cutters, which swamped the boat: the men were saved, but I regret to say that Mr. Story, the midshipman in command of her, was killed.

In endeavouring to save the crew the boat drifted close to the battery, and would have fallen into the hands of the enemy, had not Lieut. Haggard, of this ship, and Lieut. Dowell, R.M.A., of the *Magicienne*, in the *Ruby*'s gig, with a volunteer crew, towed her out under a very heavy fire

I cannot sufficiently praise the conduct of all the officers and men who were engaged in this affair, where their cool and determined courage enabled them to handle most severely, and to keep in check for upwards of one hour, the enemy, superior in number, with the advantage of local knowledge and a good position.

I beg to enclose a list of the casualties, and a list of the officers in the boat. I have, &c., H. R. YELVERTON, Captain.

Rear-Admiral the Hon R. S. Dundas, &c

LIST OF CASUALTIES IN THE OFFICERS AND MEN OF HER MAJESTY'S SHIPS ARROGANT AND MAGICIENNE, WHILE ENGAGED IN THE BOATS WITH THE ENEMY, OFF VIBORG, ON THE EVENING OF THE 10TH JULY.

KILLED. *Arrogant*: Mr. George F. Story, midshipman. *Magicienne*: Gunner Joseph Bayly, since dead; Edward Hoskins, coxswain of cutter, dangerously, William West, private R.M., severely; H. R. Wenkham, lieutenant, slightly; George Dapuralle, captain of gun, slightly; Harle Ford, ordinary, slightly; William Cowell, private R.M., slightly. *Monarch*: Victor Hann, ordinary, slightly. *Ruby*: Thomas Hall, ordinary, severely; Joseph Sunday, ordinary, gun-shot wound, slight, on the head; John Hughes, A.B., contusion of left ankle from splinter.

THE TURKISH CAMP. The health of the Turkish troops continues to be good. I think this may in some measure be attributed to the continual movement to which they are kept, and to the change of air attending it. The position which they have now chosen is in every respect excellent in this respect. Except the few battalions which are down near the bridge where the Worzozof road leads over the small tributary stream of the Tchernaya, coming from the mountains above Varnutka, all the troops are on the heights. From that part, where the head-quarters are, you get a beautiful view of the sea, and of the shipping in the roadstead of Balaclava. Notwithstanding the abruptness of the hills towards the sea, there is a small strip of beach just there, so that even the opportunity for sea-bathing is not wanting; but for all those who cannot swim it is rather a dangerous temptation, for after a few yards the beach ceases and the water falls suddenly, as if the cliffs, interrupted for a short distance by the beach, were continued again under the sea. When the Turks retured the other day from Baidar some troops were left at this point. Some of them asked for permission to bathe, which was granted. One of these who could not swim went beyond his depth, and was sinking; his comrade, who could swim, sprang after him, and, foolishly enough, gave him one of his hands to swim with. The consequence was, that he was unable to do anything, and both were on the point of being drowned when two others came to their rescue, and dragged them out by means of ropes which they had fortunately brought down with them. But the most remarkable part of the business was the manner in which the Turkish doctor tried to revive the man who had fallen in first, and who was unconscious. He gave orders to turn him upside down and keep the legs in the air, which would very likely have finished the poor man. Fortunately, the command of officers interfered, so the man, instead of being turned upside down, was rolled along the ground, which, somehow or other, did revive him.—*Letter from Hamilton*.

THE CARLISTS IN OLD CASTILE.—The band of Carlists commanded by the brothers Herros still wander over the wild steppes of Old Castile, occasionally burning a mail, thrashing any weak detachment of troops it can pounce upon, and evading pursuit by a wonderful celerity of movement and the assistance of the peasantry, who, although not disposed to fight for the Pretender, give all their sympathies to his champions. The evident protection which the land of Herros receives from the widely separated rural populations of Old Castile has caused the Captain-General of that province to publish an edict, enacting that a hamlet containing less than twenty inhabitants which does not immediately inform the military authorities of the arrival or passage through it of the Carlists shall pay a fine of 500 reals (about £5); villages of from 20 to 50, 50 to 100 and more inhabitants shall be respectively mulct of 1000, 2000, and 4000 reals under similar circumstances. Second offences are to be visited with double fines, and third ones subject the culprits to extraordinary measures. The entire population of the village is to pay the fine. Municipal authorities who offend a second time are to be fined from 200 to 500 reals, and if offending a second time their houses will be closed. Any person who receives a Carlist in his house and does not report the fact to the authorities as soon as possible will be sent to serve as a soldier beyond the seas if less than thirty years of age; if more, the punishment is six years' penal servitude. Finally, doctors and priests who give medical or spiritual assistance to the Carlists without acquainting the authorities are to be considered as accomplices. This hamlet places many unfortunate persons between two fires; for the pains and penalties decreed by the Government against all those who befriend the Carlists are met by the latter with sanguinary threats if obeyed.

THE TURKISH LOAN.

LAST year a loan was negotiated for Turkey, nominally for £5,000,000, but of which only between £2,000,000 and £3,000,000 were actually raised. To defray the current expenses of her military and naval services, a further loan had become imperative, or Turkey must "come to a stand," and be unable to bear her part in the great struggle against Russian aggrandisement. The ordinary revenue of Turkey, it appears, is about £10,000,000, an amount of annual receipt quite inadequate to her present annual expenditure. The loan of last year, the principal portion of which was subscribed for in this country, was raised at eighty per cent, and, after deducting commissions, and numerous expenses incidental to remitting the money to Constantinople, the actual amount which reached the Turkish Treasury became shorn of more than its "fair proportions."

Had Turkey gone into the Money-market to raise her second loan, with no better terms to offer than on the last occasion, and no better guarantee than her own already over-taxed resources, she would have found it difficult to supply her wants to the extent desired. Under these circumstances she applied to her allies, in her hour of need, and the executive powers of both England and France agreed to guarantee, conjointly, the interest on a Loan of £5,000,000, to be applied to the military exigencies of the Sultan. A copy of the convention containing the guarantee was signed in London on the 27th of June, and contains the following five articles:—

> The first binds the Queen of England and the Emperor of the French to guarantee conjointly the interest of the Loan of £5,000,000, subject to the approval of the English and French Legislatures. The second fixes the interest payable on the Loan at four per cent per annum, and provides the payment of a sinking fund of one per cent per annum. The third provides that the interest and sinking fund of the Loan shall form a charge on the whole revenue of the Ottoman empire, and specially on the annual amount of the tribute of Egypt, which remains over and above the part thereof appropriated to the first loan, and moreover on the Customs of Smyrna and Syria. The Sultan engages to remit to the Bank of England on the 25th June and 25th December in each year the full amount of one half-year's interest and sinking fund on the whole amount of the Loan. By article 4, the allied Sovereigns of France and England consent to transmit to the Porte the proceeds of the Loan so as to save the expense that would otherwise be incurred by the Ottoman Government. Article 5 provides that the convention shall be ratified as soon as possible.

The French Executive on the 17th instant laid this Convention before their Legislative Assembly, by whom it was sanctioned; and it remained only for the Government of this country to submit to the House of Commons, in Committee, the resolution which on Friday night (last week) was the subject of one of the most interesting debates of the Session.

After a severe struggle, the Resolution was carried by a majority of *only three;* the numbers having been 159 for, and 132 against it. This trifling majority in support of a measure which Mr. Gladstone characterised as one of the "most serious and formidable" questions at the present moment, excited the greatest astonishment among all classes connected with the mercantile and moneyed interest in the City, and especially on the Stock Exchange. With the exception of a few persons who may have been "behind the scenes" of the House of Commons during the previous two days, and knew how the strings were being pulled—the general belief had been that there would have been no opposition, or scarcely any; and the surprise, therefore, was proportionally great on learning by how near a chance the resolution had been saved from annihilation.

The issue involved in the adoption or rejection of the Convention, was practically of far higher importance than the bare fact of a Loan to Turkey. Under ordinary circumstances England and France might have agreed, or refused, to stand sponsors to the Loan; and Turkey, on the one hand, would have got her money on all the easier terms, or, on the other, the Sultan, like many a "gentleman in difficulties," must have made the best bargain the position of his credit in the Money-market might allow. But the executive powers of both nations having *already* agreed on the proposition, and the preliminaries on one side having been *clenched* by the corroborative approval of the determining power in France, England would have stood in the unenviable position of stultifying the act of her great ally, had she negatived the undertaking of her own executive. It was urged in the course of the debate on Friday week that the conjoint guarantee of the two nations was likely to lead, at *some future time,* to dissension, supposing that France, from any cause, should neglect or decline to pay her quota of the interest; but this is a contingency, and a remote one. That dissension, or, to say the least, ill-feeling or mistrust, would be engendered in the mind of our ally by our refusal to accept the obligation which he had *already* endorsed, is *not* a remote contingency, but a present and certain fact. We should have placed France in the humiliating position of constraining her to undo what she had done, and ourselves in the still worse plight of having jeopardised the existence of those friendly relations which it is so much to our interest to maintain, and which we have taken such great pains to foster.

It was also urged, in opposition, that the guarantee of the Loan was, in effect, a *subsidy;* that during the last war the amount subsidised for Prussia, Sardinia, Austria, Portugal, Spain, Bavaria, Russia, and other Powers, exceeded fifty-eight millions, no fraction of which ever returned to this country; moreover, that no faith could be placed in Turkey's "promise to pay" from her utter inability to meet her engagements out of so slender an income. Greece, it was argued, was a case in point. In 1832 that country raised a loan upon the guarantees of England, France, and Russia: and Lord Palmerston on that occasion had said that "the guarantee contained in the convention would not involve England in the liability of paying *one shilling of the loan,* as it was distinctly arranged that the whole revenue of Greece should, in the first instance, be applied to the payment of the interest and the debt, by instalments; so that England could not be called upon unless on the failure of that revenue." And yet, Greece did not pay, and we had therefore to pay for her, so far as we, individually, had guaranteed. Mr. Pitt, in 1795, gave the same assurance to Parliament on the occasion of a loan to Austria, and the *dénouement* was much the same: not one farthing of the interest did Austria pay; and as regarded the capital, she finally effected a composition of about half-a-crown or three shillings in the pound.

It is quite possible it may so happen, in the case of Turkey, as it has happened in the cases of Austria and Greece, and many other Powers; but there is no help for it. War is unquestionably an expensive luxury; and if we are to have it, it is futile to grumble at the cost. The present is a case of emergency, and we cannot hang back at such a moment; we must stand forward with our subsidy, or guarantee, whichever we may please to term it; though, in sober earnest, it very probably matters not which. A very little forethought at the commencement of the struggle would have satisfied us that, should the war last more than a year, we should find ourselves compelled to replenish the exchequer of our weaker ally, as well as our own, or give up the contest altogether. It is no new thing we are called upon to do; we had done it before, all through the last war, and with scarcely raising a question: if we had not, the armies of our then allies must, for want of our aid, as Lord Palmerston says of the present Turkish army, have "fallen to pieces."

During the old war, which lasted twenty-two years, from 1793 to 1815, we added to the debt of this country £601,000,000, or an average of rather more than twenty-seven millions each year. In the first year of the present war (and the outset of a campaign is confessedly the most expensive) we have not, if we were to include this £5,000,000 as a *subsidy* to Turkey, reached that yearly average; and we may, therefore, consider ourselves, as yet, far more fortunate than "our fathers who went before us."

On Monday night the Chairman of the Committee brought up the Report upon the Turkish Loan; and a further discussion ensued, which was chiefly remarkable for the conciliatory spirit manifested on this occasion by those who had so strenuously opposed the resolution on the previous Friday.

CHESS.

TO CORRESPONDENTS.

PARACELSUS REDIVIVUS.—Pieces or Pawns are sometimes introduced into a Problem when not required either for the attack or defence, for the purpose of equalising the forces, and giving the position a greater resemblance to an actual End-game. In a word, "to dress the board."

E. I. B.—It is neat but very obvious. Try again.

LIBRA.—Persons wishing to subscribe for Mr. C. Jaenisch's "Chess Award" should send their names to that gentleman. His address is No. 47, Bedford-place, Bloomsbury-square.

10. K Kt to K B 3rd	Q B takes Kt	24. B to K 4th	P to K Kt 6th
11. P takes B	Q Kt to Q 2nd	25. P takes P	R takes P (ch)
12. Castles (on K's side)	P to Q R 3rd	26. K to R sq	Q takes Q Kt P
13. Q B to K 3rd	K Kt to K 2nd	27. Q R to Q sq	Q takes Kt
14. P to K B 4th	P to K Kt 4th. (b)	28. Q R to Q 8th	K takes P
		And wins.	

(a) The opening is much in favour of Black, from the greater freedom of his forces.

(b) From this point the game becomes more and more interesting to the end.

(c) Very well played.

(d) This was a miscalculation, evidently.

(e) The best move. Black has now an irresistible advantage.

(f) Had to Q 8th, first, would, perhaps, have been stronger play.

The following is one of several interesting games just played between the great German master, VON HEYDEBRAND DER LASA, and M. DE RIVIERE

(The Evergreen Opening.)

WHITE (M. de R.)	BLACK (Von H.)	WHITE (M. de R.)	BLACK (Von H.)
1. P to K 4th	P to K 4th	20. B takes P	Kt to Q 4th
2. K Kt to K B 3rd	Q Kt to Q B 3rd	21. B to Q 6th	K B to Q sq
3. K B to Q B 4th	K Kt to K B 3rd	22. B to Q B 5th	P to Q R 3rd
4. Q Kt to Q B 3rd (a)	K B to Q Kt 5th	23. P to Q B 4th	Kt to Q B 2nd
5. Castles	Castles	24. B to Q Kt 4th	K B to Q 3rd
6. P to Q 3rd	B takes Kt	25. B takes Kt	K R takes B
7. P takes B	P to Q 3rd	26. K R to K 3rd (c)	K to Q 2nd
8. Q B to K Kt 5th	P to K R 3rd	27. P to K Kt 5th	K to K 2nd
9. Q B to K R 4th	Q B to K 3rd	28. Q R to Q R 5th	K R to Q 3rd
10. K B to Q Kt 3rd	Q to K 2nd	29. K to Kt 2nd	K to Kt 3rd
11. P to Q 4 h	B takes B	30. K to Kt 3rd.	K R to Q 5th
12. Q R P takes B	P takes P	31. P to K B 3rd	K R to Q 3rd
13. P takes P	P to K R 4th	32. K R to K 7th	Q R to Q Kt sq
14. P to K 5th	P takes P	33. Q R takes Q B P	Q R takes Q K P
15. P takes P	Q Kt takes P	34. K B to Q B 7th	K R to K B 3rd
16. K R to K sq	Kt takes Kt (ch)	35. K R takes Q B P	Q R takes P (ch.)
17. Q takes Kt	Q to Q 3rd	36. K to Kt 2nd.	Q R to K B 7th (ch)
18. P to K Kt 3rd	Q to Q B 3rd		
19. Q takes Q (b)	P takes Q		

And the game was resigned as a drawn battle.

(a) The usual move now is K Kt to Kt 5th. See "The Handbook," p. 142.

(b) This enables White to equalise the forces; but Q to K B 3rd, followed by P to K R 4th, or K H to K 7th, according to Black's play, would have been more attacking and Chess-like.

(c) K R to K 5th would, perhaps, have been stronger.

CHESS ENIGMAS.

No. 928.—A Study, by HOERWITZ.

White. K at K H 6th, Bs at K Kt 8th and Q 4th, P at K Kt 2nd.
Black: K at K R 5th, P at K B 2nd.

White to play, and win.

No. 929.—A Study, by HOERWITZ.

Black: K at Q Kt 5th, Ps at Q Kt 4th, Q Kt 7th, and Q R 6th

White to play, and win.

THE "CHESS-PLAYER'S ANNUAL FOR 1856," Edited by Charles Tomlinson, author of "Amusements in Chess," "Chess, a Poem, in Four Parts," &c.—Large as is the literature of Chess, there is still abundance of material for the exercise of the pen and the pencil, which, under judicious treatment and management, might be woven into an attractive Year-book. Mr. Tomlinson has it in contemplation to produce such a work; and during its preparation he ventures to appeal to Chess-players and amateurs for support and assistance in his undertaking. Ladies and gentlemen who value the game for its own sake, would render essential service by contributing a sparkling game, a clever problem, an essay, an aphorism, a sketch, a tale, an anecdote, an illustration of the subject; or by giving their names as friends to the undertaking. A variety of material has already been written and prepared by the Editor, who earnestly solicits further aid, that he may be enabled to produce a work worthy of the subject—worthy to hold rank among the best literary efforts of the Chess world.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Great preparations are making for the reception of the Queen, Prince Albert, and the other members of the Royal family, on their approaching visit to Paris. Fêtes on a scale of unprecedented grandeur will be given at Paris and St. Cloud.

A congress of all the members of the Bourbon family, including Maria Christina of Spain, is to take place shortly somewhere in Germany. To that project is ascribed the arrival of the Duke and Duchess of Montpensier at Salzburg.

Prince de Saxe-Wiemar arrived by the last packet at Marseilles, from the Crimea, on his way to England.

The Duchess of Orleans, accompanied by her two sons, the Count de Paris and the Duke de Chartres, arrived at Frankfort on the 16th inst.

The King of Portugal and his brother were to leave Turin on the 19th inst. for Milan, the Lago Maggiore, and the Simplon.

The Greek Chamber has passed a vote of thanks to Lord Cochrane for the favourable manner in which the Greeks are mentioned in his "Diary in Turkish Waters."

The King of Denmark still suffers from the effects of the fall from his horse last month.

A letter from Erdmannsdorf states that the King of Prussia had another attack of fever on the 15th, which lasted the whole day. He passed, however, a tolerably good night.

The Earl of Lincoln has taken his departure on a Continental tour. It is understood his Lordship will extend his travels as far as Constantinople and Egypt.

The marriage of Prince Adalbert of Bavaria with the Infanta Maria Amelia, the sister of the King of Spain, is decided upon. A courier from Rome has brought a memorandum—some say a munition from his Holiness.

The French Minister of War has sent the sum of 50,000 francs to the Bavarian Ambassador at St. Petersburg, to provide for the wants of the French prisoners in Russia.

Certain noble young bachelors are about to give a ball at the house of the Earl of Ellesmere, in Belgrave-square.

On Saturday Sir George Brown breakfasted at the United Service Club with the Duke of Cambridge and a select few of the officers who have recently returned from active service with the British army in the East.

The Duke and Duchess of Brabant are expected at Venice at the end of this month, and will stay there about a fortnight.

The Marquis de Rochemore died at Arbec last week, at the age of ninety, in consequence of injury from being thrown from a carriage. The deceased accompanied Louis XVIII. throughout his exile; and, at the Restoration in 1814, returned with that Monarch to France.

Mr. Wilson stated in the House, on Monday night, with regard to the £150,000 for the support of the Exhibition fund, and the £100,000 voted by the House at the end of 1852, making together £300,000, that that sum had all been expended in the purchase of the property at Kensington.

It is said that the author of the pamphlet on the war, at one time secretary to Prince Napoleon, is Metalwerki, a leader in an insurrection in Prussian Poland in 1846.

Ex-President Fillmore visited the birthplace of Burns on Thursday week, and embarked for Belfast in the evening.

The Commissary-General Le Play has caused placards to be posted throughout the Paris Exhibition calling on exhibitors to affix the prices to their articles, as this information is not only desired by the public, but will serve as a base for the award of recompenses by the jurors.

Mr. William Brown, M.P. for South Lancashire, has been confined to his house by indisposition during the last few days.

The Provost of Queen's College, Oxford, the Rev. Dr. Fox, is very dangerously ill, and little hope of his recovery is entertained.

A large statue in bronze of General Rapp, designed by M. Barre[illegible], and cast by M. Chevriel, is being exhibited in the Champs Elysées, nearly opposite the Palais de Justice.

The Barette Committee, appointed by the House of Commons to investigate the claims of the commanders of the recent Arctic expedition for a reward for the discovery of a north-west passage, have come to a determination to recommend that £5000 should be given to Captain M'Clure.

Colonel Mayrel and Colonel Trobbe, Spanish Carlist refugees, have just been expelled from France, and sent to England.

Professor Longfellow has two volumes of new poems nearly ready for the press—both will probably be published before the year is out. One is a collection of lyrics; the other a narrative poem, based upon Indian legends.

Mrs. Hope has withdrawn the appeal lodged in the House of Lords against the decision of the Lord Chancellor, which deprives her of the care of her children.

A party of negroes, dressed in the newest style of Parisian fashion, now visit the Tuileries. These dusky gentlemen are functionaries at the Court of his Imperial Majesty Faustin I., better known as Soulouque. Among them are Generals Count Elie, Senator, Grand Chancellor of the Empire; Count Faustin, Viscount Lucas, his son; Baron Simon, Senator; and the Count de Val, Senator.

On the 17th inst. a duel was fought at Piacenza between Count Francesco Zenardi and Count Scipione Bonetti. The latter was dangerously wounded in the head, and Count Zenardi slightly in the hand. These are the only fatal meetings during the year between Italians and Germans.

The foundation-stone of a new theatre was laid in Lonsdale-street, Melbourne, by Mr. G. V. Brooke, on the 19th of April.

Ressini is staying at the waters of Trouville. A correspondent of the Siècle [illegible] composer travelled there partly by [illegible] which [illegible] him with great terror.

Colonel Dunn, who some short time back assassinated a lady of rank at Barcelona, avoided the [illegible] of the sentence of death pronounced against him by poisoning himself the night before his sentence was to have been carried into effect.

The estate of Dulech, in the county of Fife, the property of the late Lord Cunninghame, has been purchased by Mr. Meiklam for £38,000.

Lola Montez, with a theatrical troop under her charge, left San Francisco on the 6th June, in a sailing-vessel (the barque *Young Hickory*), bound for Australia. She will join the ship there, and will afterwards go to Europe via China, Calcutta, and Sebastopol.

A German singer, formerly of some celebrity, Madame Stockl-Heinefetter, a [illegible] physician in Bavaria.

Owing to the abundance of cash in the hands of the large discount-houses in London, they have lately reduced their rate for money at call from 2½ to 2¼ per cent.

The harvest is in full activity in the south of France, and is favoured by fine weather. The local newspapers say that it is generally satisfactory.

The Imperial Institution for Military Geography at Vienna has announced a map of all the military roads of Russia.

The bullion in the Bank of England has decreased three-quarters of a million sterling during the last fortnight, owing to heavy remittances to India, and to some slight extent to the Continent.

A young man named Andrew Moreland was on Saturday committed for trial, at Liverpool, on a charge of stealing two £100 notes from a desk in the Exchange, where they had been left for a few minutes.

A soldier, on trial for habitual drunkenness, in Paris, last week, was [illegible] president: "Prisoner, you have heard the prosecution for habitual drunkenness, what have you to say in defence?" "Nothing, please your honour, but half-a-bottle."

A Newcastle newspaper, in noticing the state of trade on the banks of the Tyne, says, that the manufacture of ipecacuanha is pretty brisk, and that one firm alone is manufacturing twenty tons a week.

A tomb of a Phœnician king has been discovered at Bayrout, at an immense depth from the surface. The sarcophagus is of black marble, with a curious Hebrew inscription, expressing the most elevated philosophic sentiments. The Duc de Luynes, who found the tomb, is about to present it to the French Institute.

The Australian papers notice the production of a vineyard, the property of Mr. Belperaud, which this season produced seven tons of grapes and [illegible] gallons of excellent wine, which is extremely pleasant, and without containing the heat of sherry, is something of the lemon flavour, and of a light character.

The *Echo du Mont Blanc* states, that a fire broke out on the 19th at Chamounix, which destroyed twenty-five private houses and three hotels.

A statistical congress is to assemble in Paris in the month of September and the Foreign Ministers have been requested to notify it to their respective Governments, so that all may be duly represented.

During a thunderstorm in Ireland, last week, a woman was killed by lightning at her own door, and a man was severely burnt. Several sheep were killed by the electric mad near Philipstown.

"THE ALLIANCE" SOUTHAMPTON AND HAVRE MAIL STEAMER.

THE NEW SOUTHAMPTON AND HAVRE MAIL-PACKET "ALLIANCE."

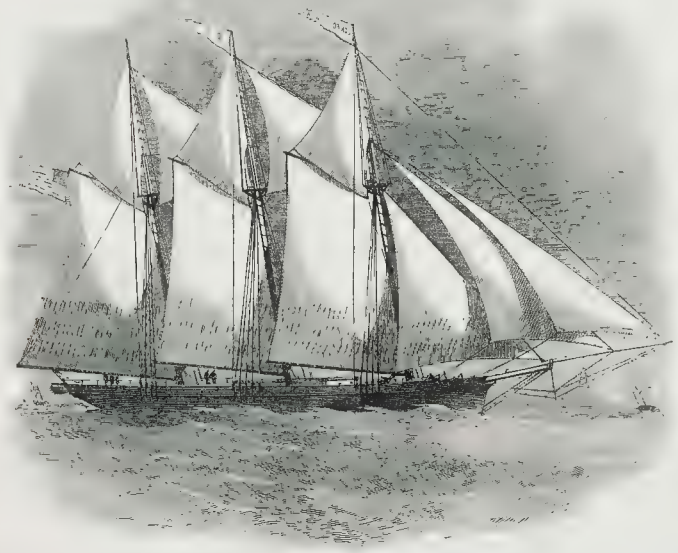
THIS fast and beautiful vessel, built by Messrs. C. Mare and Co., of Orchard-yard, Blackwall, and fitted with engines by the Messrs. Seaward and Capel, of Millwall, Poplar, has just been added by the South-Western Railway Company to their fleet of Continental steam-vessels—a fleet which reckons in its list some of the swiftest boats in the world. She has been built expressly for the Southampton and Havre station, and has given such promise of speed in the trip from the Thames to the Southampton Water as to justify the conclusion that some hours will be saved by her in the passage between the two ports above mentioned.

This vessel has been named the *Alliance* in commemoration of the happy union of the two rival countries, and in placing a boat of her qualities on this station, the management of the South-Western Company have proved that they are both ambitious and willing to keep pace with other ports in having vessels of the highest class of speed, for facilitating as far as possible the quickness of transit across the Channel. She is commanded by Capt. Smith, late of the *Atalanta*, who is well known on this station, both for his merits as a seaman and gentlemanly attention to the comforts of his passengers. The system of ventilation on board the vessels of this Company is admirable; and in the *Alliance* every advanced improvement for comfort in every respect has been carried out to the most minute details. Her dimensions and power are as follow:—

Length between perpendiculars	...	...	175 feet 4½ in.
Length on keel for tonnage	...	...	161 „ 2½ „
Breadth for tonnage ...	...	...	23 „ 7 „
Depth amidships	...	...	13 „ 8½ „
Burthen in tons	...	...	476 76-94ths.
Power	...	...	160 horses.

THE "ECKFORD WEBB."

THIS extraordinary craft recently arrived at Queenstown, where she has excited great interest from her remarkable performances. She is, in American nautical phraseology, "tern-rigged," with three masts, each 84 feet long, on which are set three fore and aft mainsails; over these are set three gaff-topsails; she has also staysails in the main mizen-topmast, but no square sails. Each mast is supplied with a splendid winch, by the aid of which two men hoist the sails in five minutes. She has in the log 309 miles for 24 hours; and the Captain (Graffam) states that during some of the hours she ran sixteen miles. She arrived from Charleston in twenty-one days, notwithstanding unfavourable weather during the passage. The *Eckford Webb* was built by Mr. Thomas Dunham, of New York. Her dimensions are—length, 137 feet; breadth, 30 feet. She carries 494 tons; and her draught of water is 11½ feet. Although loaded with 60 tons ballast, and 1560 square bales of cotton, she received orders from Messrs. N. G. Seymour and Co., and proceeded to the Baltic. She has only six men crew.



"THE ECKFORD WEBB," OF NEW YORK.

THE LATROBE TESTIMONIAL.

THIS superb piece of plate has been presented, under gratifying circumstances, which are thus described in the inscription:—

TESTIMONIAL PRESENTED TO MR. LATROBE, LATE GOVERNOR OF VICTORIA.

Presented to his Excellency CHARLES JOSEPH LATROBE, Esq., the first Lieutenant-Governor of Victoria, in commemoration of the high esteem in which he is held by his fellow-colonists, and of the signal success which, under Divine Providence, has attended his administration of the Government of the Colony during fourteen years.

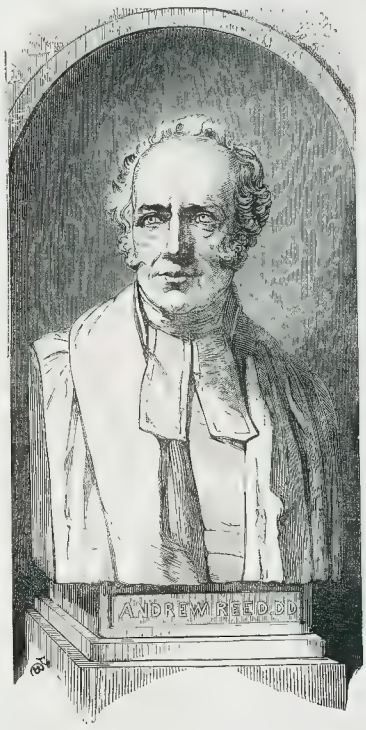
The Testimonial consists of a handsome Dinner Service of silver, value £800, with the centre Candelabrum represented in the Illustration. The figures on the base of the Candelabrum are a native Australian, with weapons and shield, carrying an opossum; next is a digger, bearing his "swag:" and a shepherd, with sheep. The branches rise from rich fern-trees growing from the base.

Mr Latrobe was also, on leaving Victoria, presented with a Gold Cup, value a thousand guineas. The Cup bears the same inscription as the centre ornament. The latter and service have been manufactured by Messrs. Smith, Nicholson, and Co., of Duke street.

ROBBERY AT ALDERSHOTT CAMP.—On Saturday morning information was received that Colour-Sergeant William Ferguson had stolen £30 in gold belonging to the company of the 1st Royal Surrey Militia, of which he was Pay-Sergeant. He was formerly in the police at Cambridge, Oxford, and Tunbridge-wells and is a pensioner from the East India Company's service.

MARBLE BUST OF THE REV. ANDREW REED, D.D., BY FOLEY.

THE original of this ably-executed bust will be recollected as the founder of the Asylum for Idiots, whose handsome new establishment, at Earlswood Common, near Redhill, was opened a few days since.



MARBLE BUST OF DR. ANDREW REED, BY FOLEY.

Dr. Reed is well known, and highly esteemed, both in England and America, as pastor of one of the largest and most important churches belonging to the Congregational order. The fact that he has held this position for more than forty years, with honour to himself and great usefulness to his people, is no small eulogy; and it was to commemorate the *fortieth* anniversary of the settlement of their pastor over them that the congregation united in spontaneous and liberal contributions to signalise so happy an event, the possession of a faithful and enduring representation of their friend and guide; and we congratulate them that the sculptor, Mr. Foley, has succeeded so admirably in his artistic commemoration. But to the high position of a distinguished divine Dr. Reed adds that of the enlightened philanthropist.

If the reader has visited that noble erection at Clapton, the London Orphan Asylum, he may have noticed in the board-room, a fine portrait of Dr. Reed, by Patten, with an inscription acknowledging him the founder of the institution on the building itself, the date of formation in 1813 The mind instantly reverts to those bygone years, and wonders to contemplate a young man of six-and-twenty, just started on the great theatre of life, encountering the arduous and self denying duties which must have devolved upon him in the course he had selected. A few years later we find Dr. Reed labouring for the attainment of a new object—the establishment of a Home for Infant Orphans. And who that has visite Epping forest will forget the Asylum at Wanstead, with its groups of happy little children, so cared for as to be ignorant of the sorrows of the orphan -

In 1844 Dr Reed started a new Asylum for Infant Orphans, now known as the New Asylum for Fatherless Children. having a fundamental rule, securing to the child a religious training, which shall in no way interfere with or oppose the opinions held by its surviving parent or guardian.

And last, but not least, we see him, with undiminished energy, securing a home, in the best sense of the term, for the Idiot—the poor Idiot, so long neglected and forgotten, scorned, and degraded! It remains for posterity fully to appreciate these services; and when the individual whose memory will be associated with the greatest benefactors of his race shall no longer live and act among them, it will be a satisfaction to feel that what the art of man could do to preserve his remembrance and identity was previously accomplished.

There is room enough, and work enough, for all, but he is most wise who early seeks to discover his place and his mission, and diligently pursues that course unmoved by cavil such a man is Dr. Reed.

"SERMON-TIME IN A SCOTTISH PRESBYTERIAN COUNTRY PARISH CHURCH BY J. STIRLING.

"THE LOVERS' WALK. BY A. MUNRO.

THE last of our Illustrations from the Exhibition of the Royal Academy for the present year will be found to afford a faithful view of the value of the contributions to the collection made by men without the pale of the Academy. To Mr.

"THE LOVERS' WALK."—SKETCH FOR A MARBLE GROUP, BY A. MUNRO.—FROM THE EXHIBITI OF THE ROYAL ACADEMY.

"SCOTTISH PRESBYTERIANS IN A COUNTRY PARISH CHURCH -THE SERMON."—PAINTED BY J. STIRLING.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

J. Stirling we are indebted for permission to engrave his "Sermon Time in a Scottish Presbyterian Country Parish Church" (No 357 of the Middle Room); and to Mr. A. Munro we are under similar obligation for permission to copy his poetic group of "The Lovers' Walk."

Mr. Stirling, to use a Scottish expression, has evidently "sat under" more Scottish ministers than one. He has been, it is clear, an attentive observer of the effects of many sermons in very different congregations. Mr. Phillips in his "Collection the Offering in a Scottish Kirk" (engraved in our paper a fortnight ago) was not more attentive to the progress of the church ladles for collecting alms than Mr. Stirling has been alive to the influences of a Scottish sermon. Who does not remember Hogarth's inimitable "Sleeping Congregation!" But there is in Hogarth what Mr. Stirling has purposely omitted, a touch of caricature, admirable in its place, where Hogarth has placed it, but not in keeping with the spirit of Mr Stirling's composition. Hogarth would have made that young fellow with his thumbs in the arm pit openings of a new waistcoat looking a little more suspicionsly at the girl who is standing near him, laboriously attentive to the threatening and painstaking discourse now in its fifthly or sixthly division. The girl, too, might have had a divided duty between the minister in the pulpit and the young man in the seat before her.

The man who is offering the mull to the sleep overtaken listener, on the left of Mr. Stirling's composition, reminds us of an incident that occurred in a Scottish kirk during sermon-time, and not very many years since. The minister, in a most pathetic, and, as he thought, convincing part of his discourse, had his eye arrested by the frequent half-concealed and unseemly exchanges of snuff-boxes and mulls that one portion of the congregation is wont to do otherwise. He hemmed and looked unutterable things while continuing his discourse. But his hems and looks were to very little purpose. It was time, he thought, to interfere. He stopped his discourse, and, thrusting his voice into the midst of a certain part of the congregation, he exclaimed in a loud Scottish accent, "Nae blin' hoying o' snuff-boxes; nae blin' hoying o' snuff boxes!" There was an immediate but not a permanent effect; and the discourse (it was too long) came to a much-wished for termination Mr Stirling's picture is carefully and conscientiously painted

We have had several opportunities of speaking of Mr. Munro's talents and of directing attention to the earnest and thoughtful beauty of his works. In his "Lovers' Walk" we see the result of a careful observance of nature and of a like careful study of the works of Faxman and Stothard He calls it "A Sketch for a Marble Group," and finds his motto in Mr. Allingham's songs:—

> So set shall fall the whisper'd tale
> Soft the double shadow

We hope to see it in marble, and in a place in which it will be seen to advantage.

MUSIC

THE lessee of DRURY LANE, encouraged by the success of his season of low priced Italian opera, has begun an additional season of English opera in the same house. He commenced on Saturday last, with Balfe's pretty opera, "The Bohemian Girl" The theatre was as full as possible, and the performance was received with the warmest applause. The character of Arline was sustained by Miss Lucy Escott, the young American singer, whose successful appearance in Italian opera has been already noticed. She was not less successful now: she acted with grace and feeling, and sang beautifully. The highly-popular air, "I dreamt that I dwelt in marble halls," was vehemently encored. Mr. Wilbye Gayler has not sufficient strength for a principal tenor part in a great theatre; but his voice, though weak, is not unpleasing, and his performance altogether was respectable. Mr. Hamilton Braham did justice to the part of *Count Arnheim*; and Mr. *Corri Rudolf* was quaint, gay, and amusing. The orchestra and chorus were good; and the whole *mise en scene* was creditable to the theatre

A DISPUTE has taken place between the Committee of the Birmingham Festival and Madame Clara Novello, which has given rise to a correspondence in the local papers. The Committee, it appears, offered Madame Novello, for the approaching festival, the same terms which she had accepted in 1852. These terms, however, she declined, demanding, as the Committee state, a sum considerably larger; upon which the negotiation must be broken off. This is the whole question between "vacillating" Madame Novello (or her brother in her behalf) accuses the Birmingham gentlemen of illiberality, while they answer the charge Neither party specifies the sum demanded and refused; but the fact that Madame Novello was offered the same terms as she had received in 1852 by the public appears to us decisive of the question What was sufficient for her in 18 2 ought to be sufficient for her now. The inordinate terms demanded by, and conceded to, those performers who are denominated *stars* has long been complained of as injurious both to our dramatic and musical entertainments. The evil, of late, has increased, and we think that the Birmingham Committee have done well to make a stand against it.

THE RUSSIAN GOVERNMENT AND THE GRAIN MERCHANTS. Considering the amount of trouble and sophistry which the Russian Government has lately expended in trying to make the world believe that Central Europe showed that England was in her practice of this year departing from the principles that she put forth last year with regard to the treatment of neutrals, it may be worth while to draw attention to the treatment experienced at the hands of the Russian Government by foreigners whose stores of corn were laid under embargo at Odessa, in the spring of last year. At the time above mentioned the exportation of corn from Odessa was prohibited, and the stocks then lying in the granaries there were taken possession of by the local authorities, on the understanding that the grain was to become the property of the Crown for the supply of troops quartered in those parts, but that the proprietors should at the time of its being made over receive full payment of its value in hard cash, so as to secure them against all loss. In the course of the summer these various quantities of grain were turned over to the representatives of the Government, who gave acknowledgements for the quantities received, but no payment. In consequence of repeated complaints made on this subject a committee was appointed by the Russian Government to sit in Odessa to examine the claims made by different houses in that port, and submit them, when approved, to the Governor-General. This ensued in course of time, and in January of that year Prince Gortschakoff published the decision that all stores of grain for which the Government had given receipts should be paid for at the price of 372 silver copecs per quintwert a price certainly below the actual cost. But even this payment was fortunate coming. From that time till now the only news the parties concerned have obtained on the matter has been contained in an announcement which has also appeared in the organ of the Russian Government, the *Journal de St. Petersbourg*, and which runs as follows:—"With regard to the corn belonging to foreign subjects which was left lying at Odessa after the possibility to export it, the Military Council in St. Petersburg has submitted for Imperial resolution: The Governor-General has to instruct the committee appointed in Odessa to examine the claims of the merchants with reference to the price and the quantity of the grain, as well as the expenses upon it, to draw up a statement of the same, and bring them to the knowledge of the parties concerned, with the request that they will lay before the commission any objections they may have to make against them. The commission will then decide upon their merit, and submit their decision to the Governor-General, who will forward the same to the Military Council in St. Petersburg, accompanied by his own remarks As the final decision must also be made dependent on political circumstances, it will be referred to the Minister of War for the purpose of his laying his judgement upon the matter before the Ministerial Committee. A more lucrative mode of official chicanery it is difficult to imagine. The ready-money payment of the prime cost, with expenses, as promised, has become an indefinite expectation of an uncertain amount, to be fixed at some future time; and the judgment on the whole question is now submitted to the Governor-General, the Military Council, and the Ministerial Committee, with the assistance of the Minister of the War The grain that was originally "taken for Government account" is now "grain that was left lying there;" and whether any payment at all is ever to be made for it or not is now "dependent on political circumstances."—*Letter from Berlin.*

FALL FROM A CLIFF AT BROADSTAIRS.—A very melancholy accident happened at this little watering place last week. A young lady, of the Sophia Weatherby, took a walk out on the cliff between the bridge and Dumpton-stairs; she was seen by a gentleman, who cautioned her not to go near to the edge. He had not proceeded far, however, when on turning round he missed her, and gave an alarm. She had been seen to fall by persons on the pier, who immediately put out a boat and rowed to the spot, when they found she had fallen from the highest part about three—nearly eighty feet. She was then quite dead; both ankles and a thigh being broken, and there was a severe laceration of the head. She was taken to the *Tartar* frigate, where medical aid was procured, but without effect. There were many conjectures as to the cause of the fatal accident. The edges of the cliff, from the encroachments of the sea, are very dangerous, and persons unacquainted with the coast cannot exercise too much caution while walking there.

A very interesting experiment was made at Collegno, in the neighbourhood of Turin, a few days since, of the application of water and air as motive powers. The experiment, which was made in the presence of the Minister of Public Works, succeeded perfectly in driving a large corn-mill.

A new line of steamers is to be established between Quebec and Montreal and Liverpool. Vessels of 1750 tons, and 350-horse power, are to make fourteen fortnightly trips from Liverpool to Canada, and five monthly trips to Portland, in each year, at an annual bonus of £24,000 sterling

NOTES OF THE WEEK.

CONSIDERING how systematically the Colonies are "snubbed" by their affectionate mother country, they may regard themselves as in great favour just now. For once a Colonial Secretary has been appointed, not because he is wanted in the Ministry, not because there is nothing else for him, not because anybody can mind the Colonies for him while he attends to something of real importance, but because he is evidently the best man who could be selected for the place. Sir William Molesworth's is the most fortunate appointment which could be made, especially at a crisis when the Colonies are unreasonable enough to think that they deserve attention from somebody beside managing clerks. He has fairly served his time to the work. He has for years devoted his best energies to the subject of Colonial administration, and the colonists know it. His elaborate speeches on this topic—carefully composed, and as carefully learned by heart, as they were—used to be considered bores by the majority of the House of Commons; but they were read with gratitude in the antipodes. To adopt the tautological slang of the day, Sir William is decidedly the right man in the right place. His successor at the Board of Works resigns the Board of Health, where he has effected very considerable good; but the change will enable Sir Benjamin to work with a stronger hand for the purification of the Thames—the one thing for which he ought to live. His reputation should be based upon his reversing the feat of Hercules, and turning the river out of the foul stable.

Those who look upon politics as a game in which—as in a couple of other favourite games—all is fair, are amused at the clever way in which Lord Palmerston has played with the Irish members. When their hostility might have been dangerous, the Bulwer-Lytton and Roebuck motions coming on, his Lordship owned himself unable to resist the mild entreaties of the "screw" (Parliamentary for earnest representations of a deputation), and the Tenants' Compensation Bill was restored to something like what the tenant constituencies desired. The Bulwer-Lytton motion was withdrawn, and the House declined to come to a decision on the question raised by Mr. Roebuck; the Irish members are no longer useful, and on Tuesday Lord Palmerston threw the bill over. This is certainly a good way of doing business, and not altogether unlike that of the frank young person who, being pressed by a creditor to give him a bill, assented, on the distinct understanding that the bill was to be dishonoured at maturity

The whitebait that are sacrificed to the waves of a defunct session are already swimming up towards their doom. The Ministerial dinner will soon be fixed There will be some change of faces at the Quartermainian board from the group that assembled last August To parody Scott—

> Where's Herbert land, and Aberdeen,
> Where's fluent Gladstone to be seen,
> Where's Graham now, that dangerous foe,
> And where's the Bedford Plempo!

if the Premier should grow sentimental, as he gives the toast of the night (I admit that probabilities are against that catastrophe), he may "improve the subject" very pathetically, and warn his loyal followers against bad company and evil examples, which have led so many statesmen to an untimely end. How changed from the days when Sir James Graham was ordered by the then Premier to stand up, after the whitebait dinner, and, when, after receiving great commendation for having been most regular in "divisions" of all the Ministers, the portly Sir James was presented by the grave Premier with a neat little china mug, value sixpence, inscribed: "To Jemmy, for being a Good Boy." Will there be as neat a reply as Sir James's, who is said to have acknowledged the present in grateful terms, but to have added, that he had not deserved so beautiful a cup as that—he would rather have had a "pliaser mug," as more likely to remind him of the donor

On Sunday night I see that London escaped an improvement A rather fierce fire broke out in Wych street, and, but for the intrusive interference of the Brigade, there is no saying but that the whole abominable quarter between that street and the Strand, including Holywell-street and the dens adjacent, might have been swept away. But the supererogatory zeal of the firemen prevented the best thing that could happen to that part of the town, and unfortunately there was an excellent supply of water. A single house was destroyed, and the holocaust was prevented The ghost of Sir Thomas More, Reader to New Inn, is under cloud to walk about that pleasant retreat, but must have felt insulted at the engine of the "Ancients being put into requisition for so bad a purpose as the stopping a conflagration, for the plaintiff was not even on Sunday night.

Elephanticide seems the order of the day. Wombwell's poor old elephant, aged (they say) 120 years, has been put to death because his feet were diseased, and the operation appears to have been performed in the most merciful manner, and not at all after the fashion in which they slaughtered the friend of my boyhood, old Chunee, of Exeter 'Change, whom I knew when he lived in the little back room, before his den was thrown into the great apartment. There was a song at his death setting forth the manner of his murder:—"How did he fall? Forty men strong and tall, with powder and ball, his carcase did maul and so did he fall." And I remember there was even sapient talk of introducing "a cannon" to terminate the sufferings of the noble animal. But the old Wombwell elephant was dismissed gently, under chloroform, with a wound in the carotid artery. This was well. I am more sorry for the good-natured lady elephant, who used to carry about the children in the Zoological Gardens, and who actually died of nervousness, in consequence of the thunderstorm, on the morning the news was published that Lord John had resigned. Several of the keepers, under Mr. Mitchell's most wise and anxious direction, did all they could towards calming her nerves, but she became hysterical, and prostration followed. She died of fright, not having quite reason enough to understand more of electrical phenomena than a churchwarden who fixes a lightning conductor so as to ensure the church receiving the full stroke, as may be seen, *in passim*, I hear, in places where Sir William Snow Harris's teaching is unknown.

I suppose, taking one thing with another, London is about as unsafe and disagreeable a place to live in as can well be imagined. Nevertheless, it is better than any other place I know, and when I run over its faults it is with the same result as the lover in one of the witty old comedies mentions as that of his resolutely writing down all his mistress's faults, and saying them over every day to cure himself. "Gad, Sir, I became as fond of her faults as if they had been my own." It really must be admitted that a Londoner has a good deal to put up with If he leaves his house on Sunday the thieves break in and steal his watches and his rings. If he goes out of town they also break in, half-murder his maid-servant, and clear away his plate. If he walks about late they knock him down, and take away his purse and pocket-handkerchief. If he goes into the Park, the police, whom he pays to beat the thieves, beat him, and if he strays into the country on Sunday, they won't let him have any thing to drink when he comes back. If he goes on the river, he is poisoned. If he stays at home, a continuous horde of costermongers, milkmen, fruiterers, fire-stove ornamenters, chair-menders, organ-boys, watercress girls, newspaper-hawkers, beggars who are not common beggars to their Cho-ristian friends, image-venders, fly-paper makers, old clo' men, rabbit-skin women, fishmongers, nigger-bands, and noisy vagabonds of every description, are permitted to howl, shout, grind, screech, and bawl up and down the street from morning till night, till, if well, he becomes furious; and if ill, he is thrown into a nervous fever;—and if he forgets to pay the police-rate for the protection and order of his street, his goods are seized *sans façon*. On the whole, therefore, London is a pleasant place to live in, and yet will anybody tell me of a pleasanter?

THE SUICIDAL POLICY OF THE PEACE PARTY.

(Abridged from the Times.)

TO JOHN BRIGHT, ESQ., M.P.—(NO. II.)

DEAR SIR,—I see from the report of your speech in the House of Commons on Monday evening that you are not pleased with what I have said regarding your misrepresentation of Manchester. You accuse the Press of an attempt to browbeat the Peace party for having acted conscientiously, and ask if any one supposes that you are to be frightened out of your opinions:—

"Do those people out of doors, who in the public press write letters to us, think that we are mean, sneaking cowards? (Hear, hear). Are we to be browbeaten by the press? Are we to be told by it that we do not represent our constituents, or defend the true interests of our country? [If it is true, why should they not tell you? If it is not true, why should you be so angry?] Why, Sir, on that subject we judge for ourselves [trusting to the impunity of septennial Parliaments], and take the responsibility with our constituents (Hear, hear). It is not necessary for any man that he should have a seat in this House, but it is necessary that, having a seat, he should have regard to the interests of his country, and should act as the way which his own conscience tells him is most consistent with his duty (Hear, hear)."

Now, admitting all that, so far as your conscience is concerned, have you ever considered how many thousands there are in Manchester whose conscientious convictions, although quite as strong as yours, have taken the opposite direction? Are their consciences to guide them only once in seven years? The rule seems rather hard; but perhaps you will explain what you mean in your next speech. With my present lights I cannot help thinking that the Earl of Aberdeen had as much right to retain the Premiership as you have to misrepresent the most influential town in Great Britain, on the most important question that has come before the Legislature for half a century. If you could only take a calm, impartial view of the matter at issue between you and the press, you would at once perceive that your conscience is an affair on your own theory of representation. But that subject I must reserve till next week. Meantime it may be useful for you to consider this very pregnant fact as regards the course you have taken. While the London and provincial press is all but unanimous in its condemnation of your present anti-English advocacy of Peace doctrines, Mr. Cobden and you, the representatives of the two most influential constituencies in England, are the oracles of the *Invalide Russe*, the *Journal de St Petersbourg*, and the *Kreuz Zeitung*. Is that doing justice to your constituents, or is it a sufficient defence for your conduct to say that you are acting in the way which your own conscience dictates?

Observe, too, that such convictions of duty are not unfrequently mixed up with very unworthy motives. I have no doubt that many of those who opposed the last war in favour of European independence, were martyrs to their own heroic sense of duty. I can admire such heroism as highly as you can do, but I cannot shut my eyes to the fact that the course taken by the leaders of that opposition, and their organ the *Edinburgh Review*, especially with regard to Turkey, was mainly dictated by the most selfish and unpatriotic motives, and inflicted great damage on the cause of freedom. * * * *

You are angry at being accused of having strong Russian sympathies, but I do not see that you have any cause to complain. You have staked your political reputation, upon which depends your "proud position as the representative of the manufacturing metropolis," on the prediction that the war must speedily prove a failure, of which all parties will, we take for ashamed, and it is very natural that you should say all you can in favour of Russia with a view to promote the fulfilment of your own prophecy But although such conduct is very natural, I do not say that it is honest, or patriotic, or wise, or honourable, nor shall I attempt to characterise the motives which have led you to compare with unprejudiced opponents to throw the Government into confusion, at the most important crisis which has occurred in the great struggle we are now waging.

Soon after the war began, our old friend, Colonel (now Major-General) Jebb imposed, in an article in the *Manchester Examiner* endeavoured to show that the Aberdeen Government was not in earnest, and that unless Manchester insured itself the war would be grossly mismanaged. * * * *

"The questions which are rising in most minds are, how the Government, in determining to have a war, has proceeded to conduct it. For peace and war with military or naval men, for military and naval men are always only too ready to act. What they have done, or not done, has been as the instruments of a superior power. If the business was in the immediate hands of our active commercial men, we could ask why troops were landed at Malta on the 2nd of the month, to give time for vessels to the Danube at the 23rd? And why, when troops arrived on the Turkish territory, they were without commanders, artillery, stable, hay, to the knowledge of the whole population, and in defiance of the most ordinary rules of war? If Manchester had intended to send a steam-engine to Gallipoli, it would never have kept back a quarter part of the machinery and the engineer. And why, when the engine was reported present, did it want as if with curious perfection that quarter of an enough piece of iron which prevented it from having power to pay, not only for a war, but for a mismanaged one."

"If the business was in the immediate hands of our active commercial town!" Ay, if it had been in such hands I have no doubt that many thousands of lives, and many millions of money, would have been saved. The people of Manchester must know, even if Colonel Thompson had not reminded them, that, whatever may be said about the origin of the dispute, "things are not to be mended by having to pay, not only for a war, but for a mismanaged one."

You, however, did not agree with the people of Manchester on that point. Your policy had been all along to support the Aberdeen section of the Cabinet in the resistance which they were making from the recklessly anti-Crimean clamours raised on the more speedily would the people become disgusted with the whole affair, and come round to your opinion. When the agitation in favour of the Sebastopol enquiry began, you refused to take any part in it, because it was likely to expose the delinquencies of the Peelites. With reference to the general outcry at that period, you said, "I shall be no party to the confounding public indignation on the mismanagement of the war." Those who were in favour of the war ought to remain "in the opposite" against the Government for what it had done or left undone: but as you had always opposed to it, and had predicted its failure, no one could expect you to join in the popular outcry

When Mr. Roebuck's motion was brought forward, the case was entirely altered. The question now was not as to how the war might be managed most efficiently. That you had no wish to see accomplished. Your aim was to drive Lord Palmerston from office, if possible, in the hope that, during the confusion which must follow, Mr. Gladstone and Manchester might be able to arrange matters quietly at Vienna, and commit the nation to a dishonourable peace. This was clearly your intention; and I leave your constituents to say whether they will rest satisfied with the principles that you have acted in the way which your conscience tells you is most consistent with your sense of duty. They will require a rather more business-like explanation of your policy than this vague appeal to conscience, or they have greatly altered since I had the honour of teaching them their duty with reference to members of Parliament. I am, dear Sir, your most obedient servant,

THOMAS BALLANTYNE.

CHOLERA IN SPAIN.—A private letter from Madrid, dated the 15th, says:—"The cholera extends its ravages gradually over nearly the whole of the Peninsula. In some provinces they are terrible, in others the malady is of a milder character, and makes fewer victims. In the provinces I have visiting namely, Jaen and the Rioja, are completely invaded by the epidemic, and in some localities it is frightful. It sometimes proceeds by bounds, as it were, and there are places which it visits several times. In other parts there are few persons attacked in proportion to the population; but from one moment to another it is feared its intensity may become greater. It is remarked that those parts which are in the neighbourhood of rivers or running water are those where the scourge is most felt. A village called Mira, with a population of 1200, has lost 500 persons. This, however, is an exception.

OUTRAGE BY CIRCASSIANS NEAR WARSAW.—The mail that left Warsaw for St. Petersburg on the 11th inst., was attacked about seven leagues from the Polish capital by five Circassians attached to the body guard of Prince Paskewitsch. Although the passengers freely offered all they had with them, they were all, with the exception of one lady, barbarously left to escape, murdered, as were also the postilion and the conductor. These infuriated savages did not even leave the horses alive, but destroyed them. A number of Jew carters, with the landlord of an *auberge*, at the head of his servants, who came to the rescue, all met their death at their hands, so that the highway was strewed with thirteen corpses. The murderers have been arrested. The Circassians are a people from some are and to be a tumultuous and violently with nostalgia as to be totally unmanageable both by themselves and others.

BITTER ALE AT THE CRIMEA.—MESSRS. Bass, of London, have several large vessels on their way to Balaclava with their renowned ale and porter, of which they propose keeping up a floating depôt of 800 tons, in their ship Tartar, for supplying the wants of the army at a very trifling advance on London retail prices.

TRADE OF SOUTHERN RUSSIA.—According to Letters from Galatz to the 8th inst., it appears that active measures were being taken to organise a regular system of transit for the produce of the southern provinces of Russia through the Austrian dominions; thus to neutralise, to some extent, the effects of the blockade of the ports on the Black Sea. Should this report prove true, it is thought the whole stock accumulated in Odessa and the neighbouring country will find an exit unless the Allied fleets interfere with vessels sailing from the mouth of the Danube.

NEW BOOKS, &c.

Shortly will be published,
THE COMIC TIMES. Price One Penny.
Published every Week.
Office: Cranbourne Court, Fleet Street.

Just published, price 5s., cloth,
MAUD, and other Poems. By ALFRED TENNYSON.

TESTAMENT, NEW. Containing 2 Panoramas 120 fine Engravings. 2s.
The whole above Series of Educational Works is intended to supply, at the cheapest possible rate, books adapted for Schools and Private Study for the old system of instruction, by which the names of things only the end system of instruction, by which the names of things only have been impressed and unaccountable. With the voyage it is necessary to speak to the eye as well as the mind—to give a picture of an object as well as a description: and the adoption of such a plan of tuition is not only by far the most effective, but also far less irksome to the teacher, and more pleasant to the pupil. The great success which has attended the works published in this Series, is a sufficient proof that such a class of works was required.
Published by HERBERT INGRAM and Co., 198, Strand, London.

LONDON LABOUR and the LONDON POOR. By HENRY MAYHEW. With 175 Descriptive Engravings. Complete sets can now be obtained in Volumes or without the section relating to "Those who will not work," which is now published, from matters of delicacy, in a separate form, and sets completed to 63rd Number, pp. 432 of Vol. I., and 432 of Vol. II.
LONDON NEWS BOLD, 230, Strand, and 8, Regent-street, Westminster Bridge.

CITY of LONDON HOSPITAL for DISEASES of the CHEST, Victoria-park. Physicians—Dr. WALSHE. Consulting Hours—Tuesdays and Fridays at One precisely. Under the privilege of having one patient constantly in the Hospital during the absence of Mrs. Bonham Carter, the Governor is desirous of recommending one in-patient and eight out-patients for every vacancy in the list of Governors, and means, by the exercise of this privilege of recommending one in-patient and four out-patients so long as the subscription is continued.
Donations and subscriptions will be thankfully received by the Treasurer, H. Richard Gurney, Esq., at 65, Lombard-street; the Bankers, Messrs. Barclay and Co., Lombard-street; by the Secretary, Mr. Samuel Rogers, Beaumont-chambers, Beaumont-street, Portland-place, and at the Hospital-gate; and by the Secretary, Mr. Richard P. Slater, at the Hospital.

CITY of LONDON HOSPITAL for DISEASES of the CHEST, Victoria-park.
Patroness—Her Most Gracious Majesty the QUEEN.
Vice-Patroness—Her Royal Highness the DUCHESS of KENT, K.G.
President—His Excellency the Lord-Lieutenant of IRELAND, K.G.
Treasurer—H. Richard Gurney, Esq.
The Committee of this Institution being most unwilling any longer to withhold the benefits of the Hospital from the Victoria-park from those who so urgently need the relief it was designed to afford, has resolved to receive 20 in-patients, and to add 80 out-patients to the further number of 30 so soon as early arrangements can be made.
They have resolved, also, on immediately extending the benefits conferred in the completion and furnishing of the building, still remain unfinished, and for which a sum of £2,000 is required, by admitting for from being equal to the maintenance of the establishment. They, therefore, have no hesitation in appealing to the benevolent for this benevolent object; for, beside a large [illegible] of funds not obtained, they will see only too clearly that the [illegible] of the total accommodation provided in the Hospital, amounting to nearly 130 beds, but they will be compelled to close the wards until they have received the necessary support.
H. SEWELL, Honorary Secretary.
RICHARD P. SLATER, Secretary.
City Office, 6, Liverpool-street, E.C.

HARDS' FARINACEOUS FOOD. The BEST FOOD and MEDICINE for INFANTS and INVALIDS. This superior preparation is light, highly nutritious, prevents acidity, and is constantly recommended by the Medical Profession. Sold by all Chemists and Grocers at Is. per Packet and Tins. Sold by Chemists and Druggists, Patent Medicine Vendors, Grocers, Oilmen, Confectioners, and Confectioners, in 1s. and 2s. packets and tin canisters, 2s. 6d. each.—Observe, all Genuine Packets and Cases are signed, "John Hards," and manufactured at the Royal Victoria Mill, Hartford, Kent.

BY HER MAJESTY'S ROYAL LETTERS PATENT for a valuable and extraordinary Improvement in the most powerful and WONDERFUL TELESCOPES, Camera, Reconnaissance, Opera, and Perspective Glasses, to know the distances, at Messrs. 9, and 3, FOLDING'S, Opticians, 39, Albemarle-street, Piccadilly, opposite the York Hotel. These possess such extraordinary power that persons, from 10 to 20 miles distant, can be distinctly seen and counted by the Georgian with his six satellites, Jupiter's moons, Saturn's ring, and the Double stars. With the same Telescopes can be seen a person's countenance from three and a half to six miles distant, and as object from sixteen to twenty miles distant. Also Telescopes for the weakest sight, and of large and all sizes, with increasing power. The Royal Exhibition, 1851. Valuable very small powerful waistcoat-pocket glass, the size of a watch, by which a person can be seen and known one mile and a half distant; country scenery and ships are clearly seen at twelve to fourteen miles. They are invaluable for shooting, delectating yachting, to sportsmen, gentlemen, gamekeepers and tourists. Gentlemen and Ladies' opera glasses of the greatest power. The valuable advantage derived from this invention is, that vision becoming impaired is preserved and strengthened, and very aged persons are enabled to employ their sight at the most minute occupation—as one with these glasses [illegible] as much as magnifying power and they do not require the frequent changes to the dangerous effects of further powerful assistance.
DEAFNESS.—The ORGANIC VIBRATOR, an extraordinarily powerful, small, newly-invented instrument, for deafness, entirely different from all others, to surpass anything of the kind that has been, or probably ever can be, produced. Being of the same colour as the skin, it is not perceptible. It enables deaf persons to hear distinctly at church and at public assemblies. The implement sensation of singing noises in the ears is entirely removed; and it affords all the assistance that could possibly be desired.—39, Albemarle-street, Piccadilly. Observe, opposite the York Hotel.

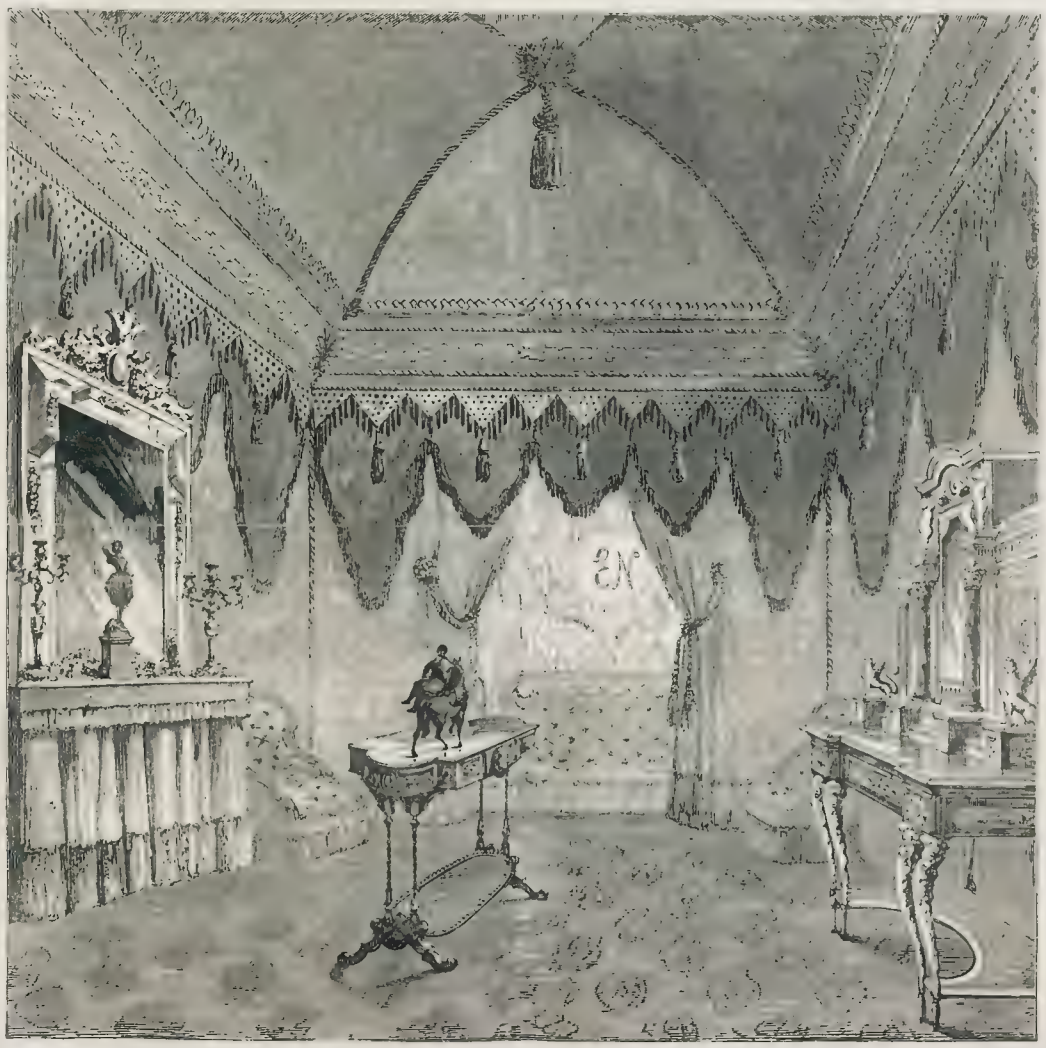
No. 755.—VOL XXVII.] SATURDAY, AUGUST 4, 1855. [PRICE FIVEPENCE. STAMPED (POST-FREE, 6d.

HER MAJESTY'S VISIT TO PARIS.

PARIS, July 31st.

THE cordial and brilliant reception of Napoleon III. and the Empress Eugenie in London has not been forgotten by the French people. Nor is it likely to be effaced from their remembrance, unless the reception which they are at this moment preparing for her Majesty Queen Victoria and her Royal Consort, in Paris, shall be of a splendour sufficient to eclipse the earlier glories of the Imperial visit to England. Even then it will not be forgotten, but remembered with all due honour as the precursor of an occasion still more auspicious and remarkable than itself. The Parisians are determined that in this respect they will not suffer themselves to be outdone. They have made it a point of honour to repay with usury to the Queen of the English, the friendly and generous greeting which London bestowed upon the Emperor of the French; and nothing will be wanting on the part either of the Government or the people that can adorn and add magnificence to the series of



BOUDOIR FOR THE RECEPTION OF QUEEN VICTORIA, AT THE UNIVERSAL EXHIBITION, AT PARIS.

spectacles, which will present themselves to the eyes of Queen Victoria at every step of her progress, from her landing in France till her departure from its shores. In England the people are not accustomed to great shows and sights. A coronation (may it be long ere we see another!); a Royal procession to open Parliament; the crowd on the "Derby-day;" or a pageant like the funeral of the Duke of Wellington: such are almost the only grand spectacles the Londoners ever enjoy. The first and last are such rare occasions that the festivals and shows of Englishmen are things of little account to those who have witnessed the more gorgeous pageantry of popular rejoicings in Continental Europe. In Paris the case is different. The French love shows, are accustomed to and excel in them—as they do in every thing that requires taste to conceive, a public educated in the love and enjoyment of art to appreciate, and an unsparing liberality to carry into effect. The whole aspect of the streets and public buildings offers itself to aid the efforts of the Government when it desires to impress the imagination of the spectators. In London the spectators are themselves the show. The streets are mean, dingy, and unpicturesque, and no decoration that art can supply can make them otherwise. Nothing but the presence of good-humoured, orderly, and rejoicing multitudes, can impart a ray of grandeur to them; and these, it must be said, are never wanting at the call of Loyalty or Duty. But in Paris the most beautiful and picturesque city in the world, almost every street and public building is an appliance and aid to popular enthusiasm, whenever the nation and the Government agree to have a festival. As regards the approaching visit of the Queen, they are heartily agreed, that her reception shall be alike worthy of the people that gives, and the Sovereign that receives, it; and that it shall assert and prove to all Europe how intimate and how affectionate is the alliance which subsists, not only between the Emperor and the Queen, but between the two great nations over whose destinies it is their high privilege to preside. The enthusiasm is already at fever heat. To what pitch it will ultimately rise we need not at present enquire, though we imagine that nothing equal to it in intensity has ever yet found expression in France—proverbial as are the susceptibility, the generosity, and the gallantry, of its people. Indeed, we suspect that the last-named quality of the national mind enters largely into the feeling with which the approaching visit is regarded; and that if we had a King upon the throne of England, he might be received with a magnificence worthy of Imperial France, but not with such a *furore* of acclamation as that which will surround the path of Queen Victoria wherever she may show herself.

We may not unreasonably ask ourselves what effect this auspicious visit—this sealing of the bond of alliance between the two first nations in the world—this graceful and heartfelt return of international courtesy and friendship—will have on the mind and the councils of the Emperor of Russia, and on those of the Emperor of Austria and the King of Prussia? No other, we should imagine, than a wholesome one. The Czar himself will be forced, if he reflect at all, to contrast the position of his own gloomy and threatened capital with those of the two great States who have taken up arms to set limits to his rapacity and ambition, if not to chastise them. St. Petersburg feels most, if not all, of the horrors of war. Its very existence is menaced by hostile fleets. It has no coal, either for its manufactures, for the lighting of its streets with gas, or for the household comforts of its people. It suffers a famine in some articles—such as salt—which are necessaries of life to all classes. Its commerce is almost annihilated. Its citizens are torn from the ruins of their business by a ruthless and inevitable conscription; and in the war which the Sovereign has provoked he has not a single victory to boast of, unless the massacres at Hango and Sinope are dignified to the Russian people with the name of honourable triumphs. Bankruptcy stares the nation in the face; and the vision of an impoverished, a proud, and a desperate nobility, plotting his overthrow as the punishment of his want of success, and the consequent stain upon the national honour, must sometimes arise before the mind of the Czar. To this must be added the depressing knowledge that the spirit of the whole civilised world is against him; and that his so-called friends in Germany cling to him not from love, but from fear, and would turn against him, if they had a reasonable assurance that he would be effectually beaten. The Sovereigns of Great Britain and France have no such dreary subjects of contemplation; and their people, though they have to submit to some sacrifices in pursuit of the great object which they have at heart, are happily relieved from the more pressing miseries of a state of war. The seas of the world are open to their commerce or to their pleasure. Their fleets can come and go wherever an errand of war or peace may direct them. Their trade and manufactures are uninterrupted. The multitudes suffer no want of any article of necessity, or even of luxury; and all classes are as well provided with everything which they need, as if Russia were submerged beneath the Arctic Ocean, or grew nothing of more value to civilised life than is to be gathered in the great desert of Sahara, or the pinnacles of her own Spitzbergen. Not only safety, but rejoicing, reigns within their capitals; and the people of both nations inaugurate with princely festivities the commencement of that new era of friendly intercourse and social progress which the war with Russia has been the means of expediting. So far from being threatened with bankruptcy, or even with a financial pressure, neither Great Britain nor France has made any serious inroad upon its resources; and a loan amounting to thirty millions sterling demanded by Napoleon III., has been taken up with such wondrous alacrity, that no less a sum than two and a half *milliards* of francs, or one hundred millions of pounds sterling has been offered to the Government by the French people. Such wealth, such confidence, and such zeal on the part of his opponents, must make the Czar reflect on his position. If they do not incline his ear to the counsels of prudence such facts cannot fail to exert some influence upon his mind, the more especially if he reflect at the same time that, contemporaneously with these indications of the power and resources of the Allies, Austria—one of the two States which strive to remain neutral—hopes that he may lose, and Prussia, the other, dreads lest he should win. The hopes of all other nations point in the same unmistakeable manner to his discomfiture, and the only fear that perplexes the well-wishers of the freedom and independence of Europe is that peace may be made upon dishonourable bases, and before the offender have been thoroughly punished for the wrong he has done. To expect that Alexander II., or any other Muscovite Sovereign, will forego that policy of aggression which is the inheritance of his race, and the secret spring of all their movements, whether in war or in diplomacy, is to expect too much; but France and England expect to deprive both him and his successors of the power—though, perhaps, not of the will to convulse Europe whenever it suits the purposes of their ambition. If the Czar and his friends—whether Austrian or Prussian—calculate upon any chance of success in any possible coolness between England and France, the approaching visit of Queen Victoria to Paris will tend to dissipate their hopes. Firm as the alliance previously was, the sojourn of her Majesty in France will make it firmer. The visit of Napoleon III. and the Empress Eugenie to London, endeared the one to the judgment, and the other to the affection, of the English people. Queen Victoria's visit will exert a similar influence on the still more excitable feelings of the French; and will long be commemorated by both nations as the most gratifying and splendid incident in their mutual history.

(From our Special Correspondent.)

PARIS, August 1.

THE month of August, 1855, is destined to be the date of one of the most remarkable epochs in the history of the Second Empire. The present is not the moment to go far back in this history. We take up the story of the alliance between England and France at the moment when Louis Napoleon landed, as Emperor of the French, at Dover. The welcome that met him there was the welcome of the English people to the able representative of a gallant nation. He was the personification of an alliance acknowledged by all parties to promise peace and healthful progress to the world. The cheers that greeted him were so much homage paid to France; and we may rest assured that if the Imperial throne have brought any days of unmixed pleasure to the great man who now occupies it, the week passed in England, as the guest of an English Monarch, are among them. He beheld, surging about him, a free people, using a wise liberty in his especial honour. He beheld the triumph of his policy in the strength of the alliance he had formed. And now, in return, the Queen is invited to make a triumphal progress to the capital of her late Imperial guest. From the moment when her foot shall touch the shore of Calais—under the walls, in every stone of which lies a story of historic interest—to that when she steps on board her yacht on her return to England, the Sovereign of the British people will find crowds of enthusiastic people to greet her. It is needless to state that no expense will be spared in the preparation of fêtes on a scale beyond any that have been held for very many years in France. A love of luxury possesses, at the present moment, every household. The wide-spread culture of art, which has been actively pursued throughout every department of France since the time of Napoleon the First, has produced a general craving for fine effects, gigantic shows, and monuments of fabulous extent. To please the people of Paris with illuminations thousands of lamplighters must be engaged, as on the 15th of every August. To content them with a ball, rooms not less spacious than those of the Hôtel de Ville must be thrown open. Thus, on ordinary occasions Parisian rejoicings far exceed in splendour those of any other capital. Where, then, may we reasonably fix the limit of the preparations for the reception of the Queen of England, lately the hostess of the Emperor and Empress? Even now, fabulous sums are named as set apart for expenses. Wonderful preparations are being made—not in one palace, but in three or four palaces. Fêtes and illuminations will be given—not only in Paris, but also at Versailles. Days of wondrous rejoicing are in store for Fontainebleau. The municipal authorities are adding "perfume to the violet" in the Prefect's house. No less than one hundred thousand troops are to be drafted from various camps, to present an imposing military spectacle on the Champ de Mars. The Imperial railway carriage is in course of elaborate preparation; and that the Royal guests of the French Emperor may make their entry into Paris by a pleasant route, a branch railway is being laid down from the terminus of the Northern Railway to one that will allow the Royal train to glide away to the great station of the Strasbourg Railway, which makes the fine termination of the Boulevard of the same name. Thus her Majesty, on her way to the Tuileries, will keep along the principal thoroughfares of the French capital—viz., the Boulevards, the Rue Royale (or the Rue de la Paix), and the Rue de Rivoli. The probability is, that the cortége will take the Rue Royale; cross the Place de la Concorde—and then proceed along the quay to the southern entrance of the Tuileries. Preparations are in active progress at every point from Fort Risban to the forest of Fontainebleau. The theatres also promise wonders. even Mdlle. Rachel is to be turned for a few days from the voyage to America, in order to offer intellectual entertainment to her Majesty at the Théâtre Francais. It appears, also, that the Boulevards are to be kept clear, on the evening of her Majesty's arrival, by companies of the National Guard of Paris.

Of the preparations in progress at the Universal Exhibition little can be said at present. The state of the Exhibition generally is such as to offer to any illustrious visitor a ready and a worthy welcome. It will be really curious to contrast the Exhibition as it will appear on the day when the Queen first visits it with the Exhibition of the 15th of May last. It will be difficult to believe that a beginning so faulty in every respect could be turned to a triumph of industrial art so complete. No detail has, at last, been thought too minute to occupy the awakened attention of the Imperial Commissioners. From the arrangement of the refreshment-stalls to that of the Panorama Building, with its brilliant shows from the Gobelins, Aubusson, Sèvres, and Christophe, with the Regent glowing in the centre of all—every part of the Universal Exhibition has been completed, and with that taste for which our allies have long enjoyed a just reputation. But not the least notable corner of the Exhibition buildings are the retiring rooms of the Emperor and Empress. They are remarkable for the richness of the materials with which they have been furnished, no less than for the effect with which these materials have been turned to account. The salon is exquisitely ornamented and hung with tapestry worked one hundred years ago by the ladies of St. Cyr, under the superintendence of Madame de Maintenon. This tapestry alone is worth £4000. In the *salon*, among other things worthy of note are, the carriage presented to the Empress by Prince Albert (ornamented with paintings of the four seasons); and the inkstand of Napoleon I. when at St. Helena. The *boudoir*, hung with blue watered silk, and furnished with some of the richest art-furniture of Paris, is in every way remarkable for the taste which presided at its arrangement. From the glass, in a frame of exquisitely-wrought crystal, to the quaint little statuette upon the table (a present made to the Empress), every object has its story, according to the very voluble attendant who waits upon visitors. Here the Queen will repose when her Majesty pays a visit to the Universal Exhibition; and hence the illustrious visitors of the Emperor will advance into the midst of the silk regions of Lyons.

THE BOROUGH OF GATTON.—When Sir Mark Wood was owner of this borough, there were only six burgage houses in it, and he himself, being the only freeholder, had the choice of members in his own person; and united in himself the functions of member of parliament, magistrate, churchwarden, overseer, surveyor of highways, and collector of taxes.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

THE Empress has carried out her intention of proceeding from the Baux Bonnes to Biarritz, whither the Emperor is gone to rejoin her. Their Majesties will return together, and will probably pass some days at the château of Villeneuve l'Etang, where preparations are being made to receive them. During the absence of the Empress, his Imperial Majesty gave at this residence a number of dinners, chiefly of a comparatively private character, though at one of the last were present various members of the diplomatic body.

The great interest of the day is the anticipated visit of Queen Victoria. Her Majesty is to disembark at Boulogne, and arrive by the Chemin de Fer du Nord; but, as the aspect of Paris in that quarter is far from favourable, it is arranged that for this occasion there will be established from the station of La Chapelle a line to communicate with the Eastern Railway, by which means all the objectionable part will be avoided, and the Royal cortége will enter the capital by the magnificent Boulevard du Centre; will pursue the whole line of the Boulevards to the Madeleine, and thence pass by the Rue Royale, the Place Louis XV., and the Champs Elysées, on to St. Cloud. It is rather a singular coincidence that it will be on the 18th of August, the "Jour de Ste. Hélène," that the Sovereign of England first enters the dominions of the nephew and successor of the Emperor Napoleon. The following day, being Sunday, her Majesty will pass in complete rest and retirement; and on Monday will commence her visits to the different objects of interest in and about the capital. It is said that, in order to save her Majesty the slight visit to St. Cloud, it is probable that the companies of the Théâtre Français and the Gymnase will perform at that palace. Already the most costly preparations are being made at the Tuileries, St. Cloud, and Versailles for the fêtes to be held there. At the latter château, the Salle de l'Opéra is being restored as it was in the time of Louis XV., and the most magnificent lustres, girandoles, carpets, &c., are being placed in it; while at the Hôtel de Ville are being established new apparatus for a most gorgeous illumination of gas, and a set of decorations in the most splendid style of Louis XIV. It is supposed that there will be a grand military spectacle in the Champs de Mars, as various important works are being executed in that quarter.

Great sensation has been caused by the speech pronounced by the Prince Napoleon at the banquet offered him by the Commissioners of the Exposition Industrielle, from the frankness and clearness with which he expresses the democratic principles he is known to entertain, and to which he has so faithfully adhered, under all circumstances.

Among the objects that excite the greatest attention at the Exhibition are some of the English weaving-machines; especially one from Coventry, for the manufacture of ribbons. This apparatus executes at the same time two wide ribbons, bearing the portraits of the Emperor and Empress, surrounded by tricoloured flags: these are drawn and tinted with a correctness, a delicacy, and a finish, equal to the works of the pencil, and the machine which executes them operates without aid, almost without surveillance. No particular workman is employed to attend to it, and it is only now and then that one of the employés gives it a glance, and sees that it is supplied with materials to work upon.

At the Beaux-Arts has just been placed the statue, commanded by the Duc de Luynes, of M. Simart, executed after the description left by Pausanias of the celebrated Pallas of Phidias. This statue is between seven and eight feet high; the head, hands, and feet are of ivory; the eyes, the necklace, and the ear-rings in precious stones; the drapery in silver gilt, of various hues. It has taken nine years of constant labour to accomplish, which is the more astonishing, the work being executed with a finish of the smallest and most delicate jewel.

"Paris," at the Porte St. Martin, continues to be the great success of the moment. The whole of the magnificent costumes, between one and two thousand in number, were designed by Mdme. Delphine Baron, who sustains two or three *rôles* in the piece.

AMERICA.

The mail steam-ship *America*, which left New York on the 17th ult., arrived at Liverpool on Sunday.

The Prohibitory Liquor Law appears to be the most exciting topic of the day. The public mind seems to have settled upon the conclusion that the whole affair is an unadulterated humbug. In the rural districts, and in some portions of Long Island, the liquor traffic has been generally abandoned, or the law is enforced, but in all the large cities it is a dead letter. Wherever the liquor interest is strong enough to resist the enforcement of the law, the authorities seem unwilling to meddle with the dealers. The question as to the intoxicating properties of lager beer is attracting much attention. The recent seizure of lager at Poughkeepsie is the more singular as Judge Strong, of that district, has decided that lager beer is not an intoxicating drink.

A Mexican correspondent, writing on the 23rd of June, furnishes some very interesting particulars with regard to the position and prospects of the late contending parties in Southern Mexico. After retiring from Chilpancingo, Santa Anna's forces were surrounded by the Revolutionary generals, well supplied with infantry, cavalry, artillery, and ammunition. Their names and head-quarter stations are noted. Alvarez was enjoying an unbounded popularity at Texas, near the city of Acapulco. The people are panting for liberty.

Colonel Kinney and a small party of Filibusters were wrecked near St. Domingo, while on the passage to Nicaragua. No lives were lost.

INDIA AND CHINA.

The steamer *Calcutta* arrived at Trieste on Monday with the India and China mails. The dates are—Calcutta, July 18; Bombay, June 27; Shanghai, June 4; Canton, June 8; Hong-Kong, June 10.

There is a very general impression at Bombay that after the rains a force will be despatched from Western India, either, as some imagine, to Egypt, *en route* to the Crimea, or, according to the more general belief, to the Persian Gulf, with the view of occupying Karrack and Bushire. The advantages of the latter plan, in the event of the Court of Teheran declaring for Russia and attempting to assist her with an auxiliary army in Asia Minor, are sufficiently obvious. It is in her southern provinces that Persia is vulnerable to us, and a blow struck there would paralyse her for movements beyond her frontier.

Kehun Dill Khan, one of the rulers of Candahar, the brother of Dost Mahomed of Cabul, the inveterate foe both of his brother and the English, has terminated his last intrigue and his life. He was discovered to have entered into a conspiracy to take away the Dost's life and create a revolution at Cabul, of which he intended to take advantage. His confederates were discovered and put to death, and soon after he was carried off by disease.

In one direction our frontier war appears to be going on upon a considerable scale. The Nepaulese, under Jung Bahadoor, are in the Thibet country nearly 100,000 strong, with 80 guns.

There is little news from Burmah. Seven of Captain Madigan's murderers have been tried and condemned. The mission to Ava was to start from Prome on the 1st of July.

Her Majesty's steamer *Styx* was at Shanghai, having left Admiral Sir James Stirling at Nagasaki on the 19th of May. His Excellency was about to sail for Hakodadi. It was reported that the Russian Admiral had embarked his men and the guns of the *Diana* frigate on board native craft, and had left Japan for the Russian settlements in the north.

The French frigates *Constantine* and *Sibylle*, and the steamer *Colbert*, were cruising in the Japanese waters.

Her Majesty's steamer *Styx* was waiting for the 9th of April mail, when she would rejoin the British squadron at Japan.

At Canton there was little of moment to report. The Mandarins are said to have retaken the important town of Shao-King-Foo, situated in the Canton province, and the rebels have retreated towards the defiles on the borders of Kwangsi, where they are likely to hold their ground and oppose an effectual barrier to transit from the tea-growing districts.

Piracy in the Chinese waters is as rife as ever. Her Majesty's steamer *Rattler*, Commander W. A. Fellowes, has, however, been actively employed of late, and done some good service against them.

THE SIEGE OF SEBASTOPOL.

The telegraphic intelligence from the Crimea has been unusually meagre for the last week or two. The most recent letters say that everything was planned for a general assault to take place about the end of last month, but it is probable that it would be deferred till somewhat later. Telegraphic advices from St. Petersburg, forwarded viâ Berlin, contain the following despatch from Prince Gortschakoff, dated the evening of Monday last, the 30th July :—"Nothing of importance has occurred before Sebastopol. The enemy continues a partial cannonade. We reply vigorously."

Letters from Paris state that official despatches have been received announcing the commencement of important fourth parallel, before Sebastopol. In corroboration of this we find, in a despatch from Kamiesch, dated July 29, the following statement :—"This port and Balaclava are crowded with vessels lately come from France and England. A grand expedition is preparing." There are various reports as to what the intended expedition is. One letter affirms that a grand attack will be made on Sebastopol simultaneously with the assault by land. Letters dated July 20 say that the attack would take place in fifteen days, which would be about the 4th instant. The last order of the day of General Pelissier says :—

The enemy, closely invested in the place, made, for several days past, efforts, by means of sorties, to interrupt our works before the Malakoff. They have completely failed in their two attempts. These combats, sustained with coolness and resolution, are a severe lesson which our marches of the trenches will give to the Russians whenever they try, by means of a sortie, to arrest the irresistible march of our works against the place.

The garrison in Sebastopol has lately been reinforced, but it is suffering greatly from disease.

THE SIEGL WORKS.

The new approaches, according to the latest accounts, were making satisfactory progress, although on our side the advance appears to be not quite equal to that made by our allies. Their works, when observed from certain points of view, seem to be almost in contact with the abattis of the Malakoff-hill. The actual distance between them is probably not more than eighty or one hundred yards. They have carried their trenches forward with remarkable determination and perseverance, notwithstanding the heavy direct fire of shell, grape, and musketry from the Korniloff bastion and the curtain on each side. The Russian works carried forward on the right, towards the line of Russian batteries extending from the Malakoff hill to the west side of Careening-harbour, though occupying a vast extent of ground, appear in a very secure and complete state.

The progress of the sap towards the Redan was stopped for some days, but great efforts have been made to render the works already advanced both more commodious and more secure. The necessity of this provision will be rendered apparent whenever the day may arrive for large bodies of troops to be assembled in the extreme front, preparatory to going forward to the assault. It will be remembered, that, when the Quarry work was taken, several trenches were found to be connected with it, two of which extended completely across the lower part of Frenchman's-hill to be connected with a covered approach to the Mamelon Vert. The nearest to our works of these two Russian trenches became our foremost, or third, parallel, in the right attack. Some call it the fourth parallel, reckoning the line of batteries between the 21-gun battery and our old advanced work as a second parallel, and the advanced work itself as the third parallel. This line of batteries and the old advanced work were by many others reckoned together as forming only one parallel, and by these the nearest Russian trench, having been properly converted and strengthened was looked upon as our third parallel. The more distant Russian trench had a very considerable curve given to its direction, the convexity being on the Russian side. This not only presented more free space and ease of movement for the enemy, but gave them also the advantage of a covering fire, in case at any time they should be called upon to resist an attack in this direction. Our approaches towards the Redan have been carried so far in advance of the Quarry Battery that the general line of the direction of the Russian trench just described has been left considerably behind; and it became necessary, not only for greater security, but also for other important purposes, to construct a commodious covered approach in front of the Russian trench, and with such a direction that it might be connected with the French works advancing up the Malakoff-hill. This has been completed as far as the ravine dividing our right attack from the ascent leading to the Malakoff. This work, which is solid and spacious, has its concavity turned towards the Russian works extended from the proper left of the Redan.

CASUALTIES AMONG NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED AND WOUNDED FROM THE 16TH TO THE 19TH JULY INCLUSIVE.

KILLED.

[illegible] Private Andrew Baxter, Land Sutherland 42nd; Private James Brodie, [illegible] Private Joel Foxwell, Royal Sappers and Miners Corps; [illegible]

JULY 19.—77th Foot: Private John Hanlon. 88th: Private John [illegible].

WOUNDED.

[illegible] Hughes Sweeney, severely; Jonathan Mounce, slightly. 17th Private Patrick Murphy, severely. 19th: Privates Joseph Sweetan, severely; Joseph King, slightly; [illegible]

JULY 17.—3rd Battalion Grenadier Guards: Private Eliot Sneath, [illegible]. 1st Battalion Coldstream Guards: Corporal James Goodhand, Privates George Land and Thomas Facey, slightly. 1st Battalion Scots Fusilier Guards: Privates William Wood and Benjamin Thomas, severely. 2nd Battalion 1st Foot: Private Thomas Burnham. Gen. Niemen, dangerously; James Fyvie, slightly. 30th: Private John O'Brien and Barth [illegible] severely. 38th: Private James Hannah, severely. 41st: Private Walter [illegible] Sergeant Samuel Forsyth, slightly; Corporal John Smith, dangerously; Private Richard Fitzgerald and William Cruickshanks, severely. 49th: Private [illegible] Gorman, severely. 47th: Private George M'Intosh, severely. 77th: Private H. [illegible] slightly. 88th: Corporal James Kidd [illegible]

JULY 18.—2nd Foot: Private James Lafferty, severely. 3rd: Private Neil Dunn, [illegible] severely; Private James M'Kenzie, slightly. 30th: Private John [illegible] 34th: Private Joseph Loughlin, [illegible] severely. 41st: Private Thomas [illegible] slightly. 50th: Sergeant J. Williams, slightly. John Private Francis Sedon, severely.

JULY 19.—1st Battalion 1st Foot: Private James Herbert, severely. 34th: Private H. Bowron, severely. 88th: Private James M'Gowan, severely. 88th: Private John Noonan, slightly. 89th: Privates George Spiers, dangerously; David Burke and Robert M'Quitty, slightly. 90th: Private Patrick Dwyer, severely. 97th: Private Henry M'Sweeney, severely. 2nd Battalion Rifle Brigade: Privates James Crosby and George Wilson, slightly.

ROYAL NAVAL BRIGADE.—Killed: John Warfield, A.B., for Majesty's ship Queen

THE WAR IN ASIA.

"Kars is still safe, but it is impossible to say how long it may be so. The latest accounts from the Russian head-quarters come down to the 9th July—ten days later than the last report. At that time the Russians were in position before Kars, and greatly hindered in their operations by the heavy rains, which had converted the streams into torrents, and had rendered the roads impracticable. Making a careful reconnaissance of Kars on the 26th, General Mouravieff moved the greater part of his army from Mukamed, so as to arrange position at Ken. Kieni on the 28th, and, leaving there a portion of the army under Prince Gagarine to watch Kars, he marched with the main body towards the Soghanlu Dagh. The object of this operation was evidently to occupy the Kaounian passes, especially that of Barduze, and to sweep up all the provisions and stores within reach of his cavalry. His route lay through Katanly, where he rested one night (here he left the road which a flying detachment reached on the 1st July, capturing a large convoy of provisions in the pass. On the same night the main body passed the summit of the Soghanlu, and halted for the night on the western incline; but he ventured no further on the road to Erzeroum. From his camp he sent out a detachment to Zevine—a village to the south of Barduze, and ascertained that it was not occupied. On the 4th July, "his object being obtained," he retired upon Keni-Kieni, reaching that encampment on the 6th July.

General Mouravieff, whatever may have been his object, thus really executed a patrol with the greater part of his army, and ascertained that neither Barduze nor Zevine was occupied except by a few irregulars, who naturally made off before a superior force. He found considerable supplies, but although he pressed the natives of the country into his service, he could not obtain sufficient to carry off all he found, and large quantities were therefore destroyed. No doubt this promenade in the mountains gave rise to the report that Mouravieff was marching on Erzeroum, disregarding Kars. If such were his object, he most probably found that he could not trust to his communications, the left flank of which was barely covered by General Sousiof, who was marching by Toprak Kaleh to bring the Erivan detachment into direct communication with the main army.

General Mouravieff pushed his patrols no further on the Erzeroum road than to Zevine. Had he seriously determined on a march to Erzeroum, or had not that determination been shaken by unforeseen difficulties, he would doubtless have endeavoured to ascertain whether Hassan Kaleh, the key of the valley of Erzeroum, was occupied in force or neglected. It is more than probable that the appearance of Vely Pacha on the left flank, although lightly spoken of in the Russian despatches, had in some degree determined the retrograde movement from the Soghanlu Dagh. It is remarkable that General Mouravieff abstains from all mention of any troops whatever in his front, and, so far as we can gather from these despatches, there were none within the range of his information. But this could hardly be the case; and the prudent reserve of the Russian Government leave us in ignorance of the real object of Mouravieff's advance, and the real reason why he retired.

It is now said that Omer Pacha is to be sent to Asia, and with him the Turkish army now lying useless before Sebastopol. This plan is generally approved. By sending off the Turks from the Crimea, where they have been of no use whatever, they will regain that independence of position which they possessed at the opening of the war. They do not seem well adapted for co-operating with European armies, but they have shown that they can do a great deal in their own way.

MURDER OF GENERAL BEATSON.

A telegraphic despatch from Constantinople, on Wednesday, brought the melancholy intelligence that the Bashi-bozouks, who had been for a long time under the command of General Beatson, have filled the measure of their iniquities by murdering their General. It will be recollected that, at the outset of the war, the celebrated French General Yusouf and our General Beatson undertook the disciplining of the fierce levies known as the Bashi-bozouks. General Yusouf, who had tamed the wild Arabs of the Desert and disciplined the tribes of Algeria, soon found that all his experience, his patience, and his firmness were utterly unavailing, and he gave up the attempt in despair. Our gallant countryman, however, persevered, and it was hoped his endeavours would be crowned with success. Latterly, a great body of the Bashi-bozouks have been encamped under his command on the further shore of the Dardanelles. Amongst these men, we regret to say, frequent signs of insubordination were manifest, and, about a fortnight ago, an act of atrocious violence was committed, which led to further mischief. Two officers of the corps were walking with their wives in the neighbouring country, when a party of Bashi-bozouks fell upon, and assaulted, and outraged the ladies. The moment the General heard of this villainy he ordered the miscreants under arrest. A great portion of their rascally comrades, however, sympathised with them, and, proceeding to the General's house in open mutiny, struck their yataghans into the ground, and, piling up combustible materials, threatened, and that in the most fearful earnest, that unless their comrades were instantly released from arrest they would set fire to the house, and burn the General alive, with his wife and children. General Beatson and his staff arrive, and, learning the mutiny, with their comrades, paraded about with every demonstration of triumph, and finally set out for Brousa, laying no touch hand upon the property of the inhabitants, and with apparent intentions of pillaging in every direction. This was the last thing heard of them, up to the receipt of the despatch on Wednesday, which indicates so sad a termination to a distinguished and honourable career.

STATE REFORM.—AN ILLUSTRATION.

In our Journal of June 16th we pointed out the necessity of having a Finance Committee of the House of Commons appointed every Session, to which the Estimates for the service of the year should be referred, and by which they should be examined. On Monday night the subject was noticed in the House by Mr. Wise, the member for Stafford, who adopted the view stated in this Journal, and expressed his regret that the Estimates were not referred to such a Committee. Had they been so referred, it is impossible that the proceedings which have taken place this week could have occurred to illustrate some of the vices of the present system.

On Monday the House of Commons, in Committee of Supply, began to vote the Estimates for the Civil Service. Their total amount is £6,345,963. They embrace eight distinct publications, in folio—each containing on an average about thirty-five pages. In the whole there are about 180 items or separate estimates, each being, as the rule, different to some extent from the estimate for the same service for the year before. In many cases the services and the estimates for them are entirely new. We may take as an example a vote proposed this year, for the first time, of £40,000 for the Cape of Good Hope, to carry into effect a very doubtful project of the Governor for securing the frontier of the colony and civilising the neighbouring tribes of Kaffirs, Fingoes, and other savages. To make the project effective, it will require most likely to be extended year by year; but the Governor modestly puts down the expense at £40,000 per annum for ten years. To vote the first £40,000 implies a sanction of the whole £400,000; and this estimate, with more than a hundred others, some of them similarly proposed for the first time, was submitted to the Commons at the end of July. The House is at the same time informed that it must break up for a fortnight. The Ministerial whitebait dinner is already announced. Many members have paired off for the Session, and all are now desirous of getting away. They have much more business to perform than they can get through, and they huddle it all up in a disgraceful manner. Legislation—the fountain of all administration, the greatest and most solemn of all labour—is actually at all times performed in a more confused and slovenly manner than any other business in the country; and, at the close of the Session, when it is most confused and hurried, then the money of the public, for purposes which require to be carefully scrutinised, is hastily voted. Estimates to the number of 180, amounting to a sum, in all, of more than six millions and a half, besides the supplemental votes for the war, are hurried through by the Chairman of the Committee of Supply in a few hours. Several of them are accompanied by elaborate explanations which are laid before the House to justify the vote, but these there is no time to study. Some of the votes violate the principles of economical science, to which the Secretary of the Treasury from his known opinions must be decidedly opposed, but he proposes and recommends them. In others the statements contradict the elements of arithmetic, being at one place £316,328, or with a supplementary estimate £891,233, and at another £846,670. They require, therefore, to be most carefully examined, both as to principles and detail, by the body which votes them, and professes to guard the property of the tax-payers from the largeness of officials. But the House of Commons is obliged to take them on trust; it has no alternative but to vote them or stop, as is said, the public service; and so these many millions are voted, as the rule, just as they are proposed by the Secretary of the Treasury. Practically, the control of the House of Commons over the public money, on which the nation relies to secure economy and the due application of its resources, is a mere nullity. It has dwindled into a fiction; and we wonder that the gentlemen who represent the people allow themselves to be made the instruments for continuing such a false and hollow mockery. If now and then a member remonstrates and resists as to some particular vote, the bearings of which he has made himself acquainted with, he has no feasible opportunity of explaining his views to the House or the public. In the month of July or August the House will not listen to him, and his opposition is overborne by the crowd of officials and impatient members who think only of hurrying the business to an end.

It is supposed, indeed, that these estimates are published in the early part of the Session. They are then ordered by the House of Commons to be printed; but the last of them was not laid on the table till July 26th; and many of the estimates published at an early period were corrected by subsequent estimates, and they could not be accurately known till the end of July. They are dated, Whitehall, Treasury Chambers, 27th March, 1855. But, being so dated, they contain documents—a letter, for example, from Lord John Russell, dated May 14, 1855; and a letter from Sir W. Molesworth, dated July 7, 1855—showing very clearly that these documents were not laid before Parliament till the end of July, though erroneously dated March 27. This indeed is one of the many specimens of the misleading confusion to be found in these estimates. But if they were all prepared and laid before the House in March, that would only place them in the hands of the members, leaving it optional to examine them. No member is especially bound to do so, nor are any of the members officially bound to examine them in concert. The result is, they never are effectually examined; and the money wrung from the hard-working tax-payers is spent more carelessly and more unadvisedly than the income of a prodigate. This is the great source of abuse; and till this be stopped Administrative Reform will be of little avail.

The one hundred and eighty items of the Civil Service Estimates embrace very different things—parks for the pleasure of Royalty, and harbours of refuge for ships exposed to wreck; the rewards of Ministers, and the expense of convicts: the encouragement of science and education, and the government of the Colonies; a provision for clergy, and for captured negroes, lying-in hospitals, and lighthouses, Army and Navy medals, street improvements, and Arctic discoveries—and for all these multifarious subjects one officer generally moves all the votes and gives all the explanations. The Secretary of the Treasury, for the time being, must be the best-crammed man that ever opens his mouth to tell what he is told—the widest conduit now known for conveying, when tapped, official knowledge in driblets to the public. That he is sometimes unable to give full and correct information on every topic that is brought forward is far less surprising than that he is able to give information on so many topics. As the representative of the Treasury, he has to answer for some half-dozen or more officials, each of whom ought to be, on the departmental plan which we suggested on June 16th, in the House, to explain the expenditure he recommends. What can the Secretary of the Treasury know of the Public Infirmaries in Ireland, or of the Universities in Scotland, or of the Hospital for Incurables, or of the merits of Dissenting ministers? Yet for all these, and a hundred more diversified subjects for which money is voted, one man is obliged to answer. The result is, that nobody is responsible for the expenditure, or really knows for what the money is actually wanted, or on what it is actually expended, but some very subordinate official, a chief clerk, or head of an hospital, who gets the money, crams the Secretary, and never appears to answer for the outlay. Till the House of Commons insists on having all the estimates of the money to be voted submitted for rigid examination to a well-constituted committee of its own members, and till that committee shall be able to order before it some one person responsible in every department for the expenditure, who shall really know why the money is expended, and what services are actually performed for it, the financial control of the House of Commons will continue to be a juggle and a farce.

At present, when the actual expenditure is fast running up to £100,000,000, this subject acquires great additional importance. We affirm—not lightly, not in ignorance, but with knowledge, and from a deep conviction—that the bulk of the officials, from the highest to the lowest, will take advantage of the disposition of the nation to contribute freely to the war, to swell the expenditure in every direction, and for objects even adverse to the war. While it has been promulgated, for example, that the sum applied to promote education and science has been lessened, it has, in fact, been increased £125,286 in the present year. While a small decrease in the total estimate for the Civil Service of £67,908 has been paraded as a merit, an examination of the details shows us that this sum is more than accounted for by the comparative completion of buildings, such as the two Houses of Parliament, which must at some time or other be finished; by the expense of the coinage being only half as much in 1855-6 as in 1854-5; and by an enormous charge of almost half a million for printing and stationery in 1854—a large portion of which defrayed the expense of the Census—being lessened by upwards of £70,000.

The legitimate expenses of the Civil Service, abating the extra expenses, which are not this year required, are greater than last year, and the apparent saving has no real existence. Instead of the expenditure on other objects being curtailed, it is increased; and, under cover of the large sum required by the war, money is obtained for other purposes. We are told that State Reform must begin with the electors, and we admit that there is no inconsiderable corruption in the electoral body, but it could not prevail amongst them were there no corruption at the fountain-head. It is the especial business of the Ministers who undertake to guide the nation to put a stop to corruption; but this is not the especial business of the people. When, those, however, who ought to put a stop to it encourage it; when they obtain votes of money on sham or no public pretexts; when they study rather how much they can get than how much they can save and dispense with; they are much more to blame than the people, for whose reform they pretend to be anxious. For all the mismanagement in voting the Estimates the Ministers are exclusively to blame. However necessary reform may be for the people, it is still more necessary for the Ministers. Till they set the example of being thoroughly efficient and honest, in the widest sense of the word, we shall look in vain for honesty and efficiency in the classes below them.

THE COMMAND OF THE ARMY IN THE EAST.—There have been many rumours lately in circulation of the recal of the present Commander-in-Chief of the English Army in the Crimea. These rumours, we are able to state, are without foundation, as not only has General Simpson not been recalled, but there is no reason to suspect the slightest intention of recalling him. At the same time, it is proper to state that General Simpson's health is not of the strongest, and that, therefore, it will excite but little surprise if he find himself unable to cope for a protracted period with the vast labours and incessant cares of the chief command. It is not probable, in the event of General Simpson's coming home, that a new Commander-in-Chief will be sent out from England, as Lord Raglan was almost the only one of the veterans of our last great war that was really fit for service.—*Morning Post.*

LAUNCH OF THE "MARLBOROUGH."—The intended launch of the monster ship *Marlborough*, at Portsmouth, on Tuesday afternoon, attracted an enormous crowd. It is said not less than 50,000 persons were present. All being in readiness, Mr. Abethell, the Master Shipwright, was presented to her Majesty, and gave into her hands the garlanded bottle of wine which hung suspended, and which, precisely at twenty o'clock, her Majesty dashed against the forward pressure, pronouncing the name of the noble ship—*Marlborough.*" Shouts arose on all sides, the bands of the Guard of Honour and of the Dockyard Brigade played the National Anthem and "Rule, Britannia," and the vessel returned to the Royal yacht, and slowly emerge from the shed. Mr. Abethell then gave the order to the artificers below to knock away the blocks, which occupied an eminently long time; at length, at twenty-five minutes past twelve, she moved, a gradual salvo from the lungs of the countless thousands proclaimed the fact, and never did ship appear to take the water more satisfactorily, until she got two-thirds out of the shed, when, to the astonishment of everybody, she slowly brought up, as if checked by some mighty influence, and remained immovable on the ways, the bows remaining under the shed and the after body in the harbour! So unlooked-for a casualty took every one by surprise, while the enthusiasm which greeted her exit from the slip subsided into silence. Meanwhile the ship hung fast till the next tide, a little after midnight, when the launch was completed by the united and energetic exertions of 2000 men, and the ship now lies safe in Portsmouth harbour. Next week we shall illustrate the Launch.

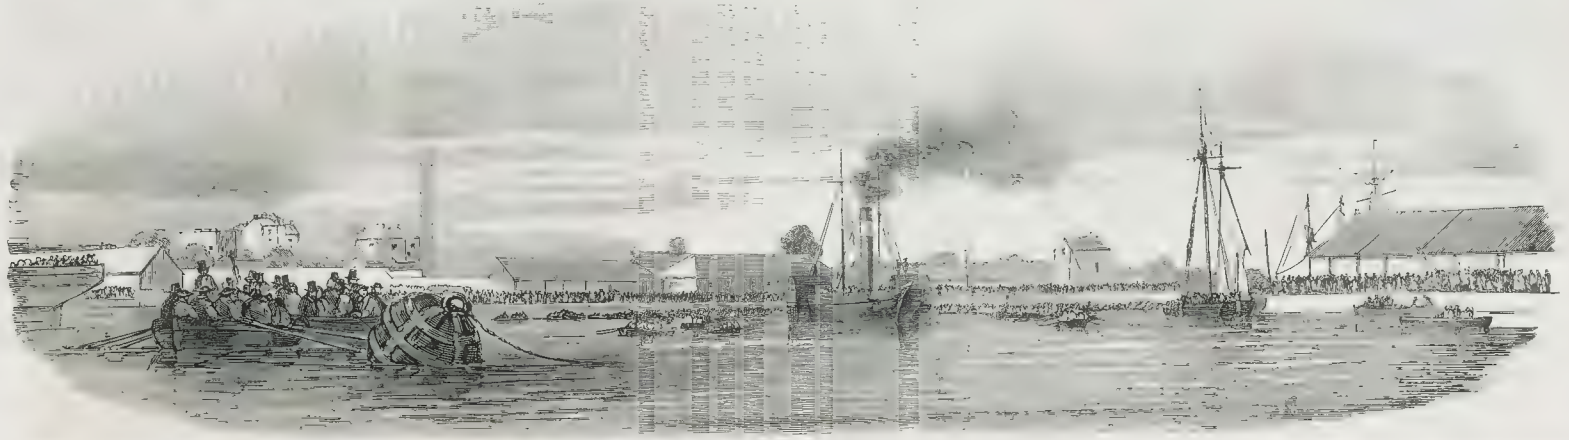
RIOT AND LOSS OF LIFE NEAR GODALMING.—For some time past a number of men have been engaged excavating the ground at Hascombe, a few miles from Godalming, in order to form the new Portsmouth direct line of railway. Several of the navvies on Saturday night, as was their usual custom, proceeded to a beershop in the neighbourhood, when, after drinking for some time, a quarrel ensued between the men. From words they came to blows, and the matter at last began to assume so threatening an aspect that the landlord of the house sent for the police. In a very short time the inspector of the Haslemere district arrived, followed by two or three of his men, who endeavoured, but in vain, to quell the disturbance. The navvies, the moment they perceived the police enter, signalled to others; and, to prevent their companions from being taken into custody, they commenced a fearful onslaught upon the police, by knocking them on the head with anything they could lay their hands upon. The inspector received one blow, but of such a violent character that he was stunned. Medical assistance was promptly obtained; but, while the surgeon was attending to the unfortunate officer, the navvies recommenced their work of cruelty, and severely beat the medical man. Some of the men were apprehended and safely lodged in confinement, and eventually the riot was quelled. The unfortunate inspector lingered in great pain for little more than one hour, when he died. The melancholy catastrophe has caused a painful degree of excitement throughout the district

APPREHENDED INCREASE OF IMPORT DUTIES.—In consequence of the rumours which have prevailed, and which are said to be without foundation, respecting an intention on the part of the Government to add ten per cent to customs duties, the payments of duty on imported goods in bond have amounted to about one million sterling in Dublin within the last ten days.

APPLES.—Merstham, on the Brighton Railway, has long been celebrated for its very productive apple-orchards. The rectory orchard, of little more than two acres, has been known to yield above 500 bushels of apples in a year.

FUNERAL OF THE LATE LORD RAGLAN.

ARRIVAL OF "THE CARADOC" AT CUMBERLAND BASIN, CLIFTON



THE WATER PROCESSION.—(SEE PAGE 134)

FUNERAL OF THE LATE LORD RAGLAN.

FUNERAL OF THE LATE LORD RAGLAN.—THE LANDING.—THE PROCESSION.—THE LYING-IN-STATE.—(SEE NEXT PAGE.)

FUNERAL OF
THE LATE FIELD MARSHAL LORD RAGLAN

THE morning of the 27th ult. was ushered in by the firing, from many points of the city of Bristol, of the dismal minute-gun, and the melancholy chiming of the muffled bells. The body of the deceased hero was transhipped from the *Caradoc* to the *Star* as early as six o'clock in the morning, and was placed on a bier covered with black cloth and crape, and surmounted by a catafalque of the same materials, on the deck of that vessel. At a little before eleven o'clock the mourners boarded the *Star* as follows: Lord Raglan, the Hon. Col. Paget, Col. Kingscote, Lieut.-Col. Somerset, Lieut.-Col. Burgher, Lieut.-Col. Nigel Kingscote, the Hon. Captain Calthorpe, the Earl of Calthorpe, Commander Derriman, R.N., Commander Maxse, the officers of the *Caradoc*, &c.

THE NAVAL PROCESSION.

At eleven o'clock the *Star* commenced slowly steaming up the float, attended by a guard of honour of about fifty boats, all uniformly manned the different vessels anchored in her course firing minute-guns. The naval procession was opened by the boat of the Commodore, Mr. Edward Morgan, Superintendent of the Customs. Every board was painted in funeral colours (black with blue stripes), and each bore an ensign at half-mast. The boats formed two lines from the larboard and starboard bows of the steamer, to a long way behind her. The crews rowed with muffled oars, and, upon the *Star* reaching the quay, the two lines joined at the end, and formed two sides of a triangle, thus preventing any of the numerous boats on the river from nearing the ship. On the quay, where the landing had been appointed to take place, was a spacious shed for the reception of the body and mourners, in the centre of which was a bier, and the roof and sides of which were richly ornamented with festoons and draperies of black cloth and velvet, interspersed with rosettes of black crape. The quay, to a considerable distance from this point, had been barricaded, so as to prevent intrusion.

THE DISEMBARKATION.

The procession in this manner having come up to the quay-head, near Prince's-street-bridge, the disembarkation took place at about twelve o'clock. The Mayor and Corporation, the Society of Merchant Venturers, the Corporation of the Poor, the Clergy, and the other public bodies and citizens who intended taking part in the proceedings of the day, had taken up their positions in Queen-square, where the ground was kept by a strong body of police, draughted from the Central, Clifton, Bedminster, and St. Philip's Divisions, under the command of the Superintendent, Captain Fisher, R.N. The military, pensioners, and Land Transport Service Corps proceeded on to the large area which forms the end of Prince's street. The Artillery took up a position on the Grove opposite Redcliff-parade, and a little below the Sailors' Home. The appearance of the quay at this period was exceedingly imposing—the decks of the shipping, the windows and roof-tops of the houses, and every available spot from which a view of the ceremony could be obtained, were crowded with spectators, while the melancholy nature of the occasion was attested by the half-masted flags, and other signs of mourning which were visible all around. The *Morning Star*, a ship of colossal proportions, was placed in deep maritime mourning, and formed a grand termination to the angle of the quay. As the body was landing, the battery of Artillery before referred to as having taken up a position near the Sailors' Home, fired, at intervals of a minute, nineteen guns, the heavy booming of which was heard reverberating amongst the distant hills.

THE PROCESSION THROUGH BRISTOL.

The coffin having been placed in the hearse, the funeral part of the procession was formed, and proceeded, accompanied by the military, to Prince-street. Upon its arriving at the end of the lower avenue to Queen-square, the Mayor and Corporation, and other public bodies joined, and the procession then proceeded in the following order:—

Body of Police
Detachment of Artillery, with howitzers.
Troop of Hussars.
Band of the 15th Hussars, playing the "Dead March."
Troop of Royal Horse Guards Blue.
Two Mutes.
Attendant. Page, with board of plumes. Attendant.
Eight Bearers, with truncheons.
Undertaker. Master of the Horse.
Ancient Domestic, mounted, and bearing on a cushion of crimson velvet and gold, the Coronet, Orders, and Field Marshal's Baton of the deceased Lord.

THE BODY,

In a hearse and six horses, richly plumed
Mourning-coach and four horses, plumed, with the Chief Mourner, Lord Raglan.
Mourning-coach and four horses, plumed, with the Aides-de-Camp of the deceased Field Marshal, viz.,
Lieutenant-Colonel Lord Burghersh,
Lieutenant-Colonel Somerset,
Lieutenant-Colonel Kingscote, and the
Hon. Captain Calthorpe
Mourning-coach and four horses, plumed, with the Commander of the *Caradoc*, Commander Maxse, and Medical Officers of the deceased.
Mourning-coach and four horses, plumed, with Members of the deceased Lord's Household.

Body Guard of Royal Horse Guards Blue. Pages. Body Guard of Royal Horse Guards Blue. Pages.

Troop of Royal Horse Guards Blue.
Troop of Hussars.
The Staff of the Bristol District.
The Enrolled Pensioners of the Bristol District
Large body of Artillery, with side-arms.
Police.

Pages. Mace-Bearers. Pages. Mace-Bearers.

Water Bailiff, Exchange Keeper, Market Constable, City Crier, &c.
Carriage with the Town-Clerk and City Solicitor of Bristol, D. B. Leigh, Esq., and W. Bryce, Esqrs.
Carriage with the High-Sheriff of Bristol, R. Phippen, Esq.; and the Under-Sheriff, W. O'Hare, Esq.
The Right Worshipful the Mayor of Bristol, J. G. Shaw, Esq., in his state carriage; with the Sword-bearer of State and City Treasurer.
The Aldermen of Bristol, in their carriages.
The Town-Councillors of Bristol, in their carriages
Fifty Sailors, uniformly dressed, and bearing the banner and insignia of the Society of Merchant Venturers.
Carriage with the Master and Wardens of the Society of Merchant Venturers, and the Treasurer, W. Claxton, Esq.

Flashing Party. Flashing Party. Flashing Party. Flashing Party.

Carriage with the Wardens of the Society of Merchant Venturers.
Carriage with the Members of the Society of Merchant Venturers.
Carriage with the Governor of the Corporation of the Poor, Dr. Rogers, and the Deputy-Governor, J. Protheroe, Esq.
Carriages with the Court of Assistants of the Corporation of the Poor.
Carriages with the Members of the Corporation of the Poor.
The Clergy and Ministers of Religion.
The President, Officers, and Members of the Bristol Licensed Victuallers' Protection Association.
The Officers and Members of the Bristol District of Odd Fellows, M. U., wearing mourning scarfs.
The Officers and Members of the Ancient Order of Foresters, wearing mourning scarfs.
Citizens, &c. &c. &c.
A detachment of Artillery, with field battery of four guns.
Detachment of Police.

The procession was of immense length, and its appearance was both solemn and imposing. Every person engaged in it was habited in deep mourning, and the military wore crape scarfs and hat-bands, and had their banners deeply craped. The state liveries of the Mayor and High Sheriff, and all the ornaments of the Mayor's state coach, were covered with the same material, as were also the canes, staves, and batons of office; and there were mourning rosettes on the handles and hammercloths of the different carriages. The procession thus formed proceeded at a slow and solemn pace through the city. Everywhere the thoroughfares were densely crowded, but the disposition to pay due respect to the occasion was manifested throughout the entire route and by every class of citizens, from the highest to the lowest. The shops, the banks, and the warehouses of the city were closed, the bells of the different churches chime muffled, and of the thousands of ladies and gentlemen and members of the middle class, who thronged the windows in the line of route, very few were to be seen who did not wear partial or entire mourning.

On the procession reaching the suburbs of the city, the thoroughfares were even more densely crowded than the city itself. At every vantage-point, stands had been erected, whilst the houses were crowded from roof to ground-floor. At the Fishponds the public bodies retired, and the funeral became, until it reached Badminton, a private one

THE INTERMENT.

The body lay in state for some hours at Badminton-house, and was visited by large numbers of the neighbouring gentry, as well as by the families of the tenantry on his Grace the Duke of Beaufort's estate. The windows of the great hall had been entirely darkened, and the hall itself hung with black: and, as the only light diffused was that given by a number of wax candles, the appearance of the hall during the ceremony was peculiarly sombre and impesing.

As the procession entered the church, the officiating clergyman read the solemn service of the dead, as prescribed by the formulary of the Church of England. At the proper point the coffin was lowered into the vault, and Lord Raglan threw upon it General Pelissier's wreath, which was buried with the hero. The remainder of the service was then gone through with, and in a few hours afterwards the grave closed for ever upon the remains of one who had thought it not too great a sacrifice to lay down his life in defence of his Sovereign, his country, and the world's freedom, and for whose memory the people of England must for ever entertain a grateful regard.

CALENDAR FOR THE WEEK.

SUNDAY, Aug 5.—9th Sunday after Trinity.
MONDAY, 6.—Prince Alfred born, 1844.
TUESDAY, 7.—Queen Caroline died, 1821.
WEDNESDAY, 8.—George Canning died, 1827. Marshal Ney shot, 1815.
THURSDAY, 9.—Louis Philippe acceded to the French Throne, 1830.
FRIDAY, 10.—St. Lawrence.
SATURDAY, 11.—Half-Quarter Day.

THE QUEEN'S VISIT TO PARIS.

COMPLETION
OF THE GREAT EXHIBITION IN FRANCE.

THE Subscribers to the ILLUSTRATED LONDON NEWS are respectfully informed that every arrangement has been made to ensure correct and splendid Illustrations of the above interesting events. All the best Artists in London and Paris are specially engaged for the occasion. Already immense preparations are in progress for the reception of the Queen at the Palace of Versailles, the Palace of Fontainebleau, the Palace of St. Cloud, the Elysée Bourbon, the Palace of the Tuileries, the Hôtel de Ville, the Louvre, the Great Exhibition at Paris, &c.

The Illustrations will include a Large Engraving of the

GRAND NIGHT FETE

AND ILLUMINATIONS IN THE GARDENS OF VERSAILLES,

such as have not been given since the time of Louis XIV.

The Reception of her Majesty at Calais, the Arrival in Paris, the Decorations and Triumphal Arches in the Streets of Paris, the State Visit to the Great Exhibition; splendid new and original Portraits of the Queen and Prince Albert; the Emperor and Empress of the French; the Prince of Wales, and the other younger branches of the Royal Family visiting France; will also be comprised in the Series of Illustrations

Next week, August 11th, splendid Views connected with the Royal Visit, and Views of the Great Exhibition, will be given. On August the 18th, her Majesty's Arrival on the Shores of France. And, on August the 25th,

PICTURES OF THE
GRAND ROYAL VISIT TO PARIS.

In the ILLUSTRATED LONDON NEWS for Sept. 1st will appear further splendid Views of the Fêtes; on Sept. 8th, completion of the Illustrations, with Views of the Queen's Return to England; and on Sept. 15th to this series of magnificent Pictures will be added the best specimens of Pictures from the Fine Arts department of the Paris Exhibition.

Persons wishing to subscribe to this series must order immediately, as the demand is sure to exceed the supply. Subscribers giving their orders to the various newsmen will be supplied in rotation as received.

ILLUSTRATED LONDON NEWS OFFICE, 198, Strand.

THE ROYAL AGRICULTURAL SOCIETY AT CARLISLE. The Illustrations of the Society's Show (Prize Animals, &c.) are unavoidably deferred till next week.

THE ILLUSTRATED LONDON NEWS

Publishes a Stamped Edition. The stamp must be folded outside; and this will frank the paper throughout the United Kingdom for fifteen days. Should any difficulty be found in procuring the stamped edition, it will be forwarded on application direct from the Office.

The Unstamped Edition cannot be forwarded by post except on the terms of the Treasury Minute for the Conveyance of Books and Printed Matter.

Unstamped, Fivepence; Stamped, Sixpence.

TO ADVERTISERS.—All Advertisements must be sent direct to the Office, 198, Strand. No connection with any person or persons as Agents.

LIST OF ENGRAVINGS
IN THIS WEEK'S "ILLUSTRATED LONDON NEWS"

Boulogne for the Reception of Queen Victoria at the Universal Exhibition at Paris ... ... page 129

Turkish Batteries commanding the Woronzow Road 157

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 4, 1855.

CRIMEAN despatches, both from the Commander of the Forces and from private hands, date to the 21st; but we learn only that operations are being pressed, and that every day brings the Allies nearer to the enemy's fortifications. Every movement on either side is jealously watched by the other, and a tremendous fire leaps forth at the smallest demonstration of real or apparent importance. The French are sapping their way from the conquered Mamelon to the stubborn Malakoff; and the English are erecting new batteries, improving the old, and watching for any opportunity of assisting the onward progress of their allies. The most favourable reports are given of the sanitary condition of the armies—cholera has nearly disappeared—and the soldiery manifest not only their habitual courage, but those animal spirits for which it would have been as heartless as foolish to look during earlier periods of the campaign, and before the privations caused by the ancient system had disappeared in presence of an improved organisation.

General Simpson's last despatch does not contain a single word upon the subject of the siege itself. He, however, describes the position of the Russians outside Sebastopol, on the Mackenzie heights, "with advanced posts by Chouli, Ogenbash, and the strong range of heights overhanging Urkusta and the valley of Baidar." Into this valley the French have pushed their cavalry, resting upon the Sardinians; and the high ridge protecting Balaclava is guarded by the Turkish army. Speculation has been ventured to the effect that this sketch, which, though interesting, has no very apparent object, is not intended merely to make readers at home to comprehend the position of the antagonists, but that operations more important than the "sending four squadrons of light cavalry to convey the Commissariat" may be in contemplation. Rumours of a great naval blow, of which no warning was to be given until the moment of its descent, have also been flying about, especially in Paris. Odessa in ashes was one of the results indicated; but in war time the social atmosphere is so unnaturally charged with electric matter, that all kinds of illusive sights and sounds are perpetually startling the excited watchers of events. There is, however, no improbability in the supposition that the Black Sea fleet is about to take a more prominent part in our operations than of late.

While the peacemongers at home are daily insulting the honourable spirit of the nation by insisting that the war is not really carried on with all the heart and soul of the people,—although the sight of the blood and the treasure England pours out not only unmurmuringly, but cheerfully, in the cause of liberty and humanity, might shame the cold-hearted and shallow men into silence, France has been giving an overwhelming refutation of that part of their calumnies which would connect her population with the indifference mendaciously charged upon our own people. The Emperor asked a new loan, avowedly for the war, and actually coupled the requirement with a conscription. The struggle among all classes has been, who should be first to present his tender for inscription, and in ten days £144,000,000 sterling have been subscribed. It may be that the terms upon which this loan is procured are somewhat more advantageous to the subscribers than by the strict rule of financial economy they should have been in the present state of French resources; but though it may be matter of question whether it is or is not wiser in the French Government to purchase, even at a sacrifice, the enormous immediate support, pecuniary and moral, which such an operation brings, there can be no doubt that where Frenchmen, never careless in money matters, rush, from all occupations and stations, to tender such a sum to the State, they are well satisfied with what the State is doing. In this loan-work the French have thrown up a battery which threatens, not Sebastopol, but St. Petersburg. It is beneath the long range of national credit that the Allies will eventually cripple their foe. Aim at the heart, and the motions of the extremities will speedily be paralysed. We wonder whether Mr. Cobden's newly-acquired patrician contempt for the "mob" is helping him with a scoff for the "ignorant masses" of Frenchmen who are loading cannon with their five-franc pieces, or whether he is reserving this and other denunciations for his farewell speech as the beaten candidate at the next West Riding election.

AFTER vigorous opposition and wearisome debates, the honest and wise measure of Limited Liability may be considered safe in the House of Commons. We hope it will be accepted in a generous spirit in the House of Lords, and forthwith become part of the law of the land. The discretionary power hitherto vested in the Board of Trade, of granting or refusing charters to companies, is of so odious a character, that both Mr. Cardwell and Mr. Bouverie refused to exercise it: if they consented, they exposed themselves to the charge of favoritism; if they resisted the application, they were accused of injustice. It is clear that two high functionaries of the Government ought never to have been placed in a position so invidious and so false. On the other hand, had chartered companies, with a defined liability, never been called into existence, many of our most useful public works never could have been executed. Under such circumstances it became necessary to introduce a new system of legislation, which should make general what had only been exceptional. The experience of the great maritime and commercial cities of Italy in the Middle Ages, of France, of Belgium, and of the United States, served as a practical guide in improving this department of our industrial policy. We were thus secured against the contingencies or errors of wild and rash innovation, and enabled to enter a channel distinctly buoyed, without the slightest risk of being stranded on hidden shoals, or being wrecked on sunken rocks.

From what cause or causes, then, arose the severe and organised opposition which this measure has encountered? Truth compels us to state that it was mainly resisted by selfishness. We had hoped better things from Mr. Muntz, but it was he who led this onslaught against an attempt to elevate labour by associating it with capital in a mutually beneficial union. The Liberal representative of Birmingham moved that the House should, after three months, resolve itself into a Committee on the bill, which was equivalent to its rejection. He was afraid that men of small means would be robbed by the directors if they entered into undertakings of which they had no knowledge. This is an amiable solicitude; but Mr. Muntz should remember that the cunning have swindled the simple under the existing system, and to their last shilling but, under limited liability, the amount of loss is restricted. Even in Savings' Banks, depositors have been plundered, although such investments were deemed free from all risk. Lord Palmerston effectually demolished these insinuations and objections, by stating that they proceeded on the "assumption that all these companies would consist of cheats and swindlers, and that all their creditors would be fools incapable of taking care of themselves." The argument founded on the insecurity of small capitals was well answered by Mr. Lowe, who maintained that "instead of a small capital being the badge of fraud, a large capital was so."

Every man who has had practical experience in trade, or who has carefully looked over the annals of bankruptcy, will acknowledge that there is much truth in this severe censure; and even now there are before the courts of justice two most prominent cases of firms, reputedly in the possession of colossal fortunes, who stand charged with fraud and theft, perpetrated under the deceitful guise of moneyed respectability.

Mr. Muntz challenges proof that any company has succeeded against an individual in his own trade; if no such proof could be afforded, it would add no strength to his argument. The principle of the Act is that the people are the best judges of their own interests, and should be free to invest their money as they please. If they make mistakes they must take the consequences of their own want of judgment and prudence. Mr. Muntz also insisted that there was no want of capital in the country. Why did he not define capital, and contrast it with legal tender? for of what avail is capital unless it can be communted into the instruments of production and exchange? Now it is to enlarge the power of getting and keeping possession of those instruments by uniting small sums of money together in a common enterprise that the chief merit of limited liability resides; it will call out capital from a dormant into an active condition, it will prevent hoarding, restrain foolish investments in foreign loans, and impart vitality to all the minor processes of native industry. Political economists would do well to remember, what they are too apt to forget or overlook, the simple fact that every mouth is a consumer, and every hand a producer; and that there are no markets but those which are created by human wants and desires. It is not wisdom to leave it to the caprice of colossal capitalists whether the people shall be employed or left in idleness; they should be able to create work for themselves through their own co-operation; and this independence of action limited liability must facilitate.

Mr. Muntz was well supported by the millionaires. Some dozen of the moneyed aristocracy gave him an energetic support, and in hearty chorus exclaimed, "Great is Diana of the Ephesians!" The existing law had worked well for them; and though they were all free-traders in articles they did not themselves produce, each had a fondness for monopoly when their pockets were touched. This inconsistency—we might use a harsher term—received a merited castigation from Lord Palmerston. We quote his language with pleasure, and should rejoice at more frequent opportunities of recording his condemnation of narrow views and party spirit:—

> I confess (said Lord Palmerston) I am quite surprised that gentlemen who have been the strenuous and successful advocates of the principles of free-trade should now turn round, and try to defeat these bills which are based on those very principles. I will say in a few words that this contest lies between the two great parties in this country. It is one of those instances in which, I won't say the public, but I think which the opinions of the few are to be set against the interests of the great bulk of the community. There is nothing, I am persuaded, that would tend more to the general advantages of the public than the setting free as these bills will do, small capitals, that they may be turned to profitable employment. The present law prevents that being done. These is, consequently, a great quantity of small capital locked up, which, if these bills were passed might be employed for the benefit of those who possess them, and also for the advantage of the community at large. It is a question of free-trade and monopoly. I don't say it offensively, but that is the real fact. You may call it as you will, but it is a principle well understood by every man in the country, I can assure you; and I tell the House that I feel so strongly on this question that I will urge the House to go on day by day, and morning after morning, with these bills; and if it is attempted to talk the bills out, and to consume the time by long speeches, the country shall at least see with whom the fault rests, and who it is that would deprive the nation of that advantage which I contend these bills would afford, if passed.

This is plain speaking, and, better still, it is honest and truthful speaking. The House cheered the noble Lord loudly and frequently, and the dissentients only made their case worse by vociferating "No;" for every man of common sense and common honesty saw plainly that the opposition solely proceeded from moneyed capitalists. Lord Palmerston showed, on this occasion, that he was willing to obey public opinion let him continue to do so on other subjects and his tenure of office will be permanent; he will accomplish more than this personal gratification—he will prevent Parliamentary Government from sinking into contempt, the inevitable fate that awaits it when the House of Commons manifests a want of sympathy with popular feelings.

We heartily give the Government every credit for making wise concessions when discussing the clauses of the bill in Committee. In the original draught it was contemplated to confine the benefits of limited liability to those undertakings which had "a capital stock of the nominal amount of not less than £20,000 divided into shares of a nominal value, not less than £25 each." This condition struck at the roots of the principle of the bill, and favoured that very monopoly of capitalists which Lord Palmerston had denounced. He, therefore, on the amendment of Lord Godarich to leave out the words above quoted, yielded the point after a brief discussion. It was further agreed to reduce the value of the shares from £25 to £10. To constitute a partnership with limited liability there must be at least twenty-five members. Insurance offices and banks are not within the scope of the Act. The former are able, under the existing law, to limit their liability; and bankers are not traders, but merely guardians of property committed to their safe keeping. The Partnership Amendment Bill, in consequence of the lateness of the Session, is postponed till next year.

THE COURT.

Her Majesty and the Royal family are in excellent health, and during the past week have availed themselves of the usual enjoyments of their marine residence.

On Saturday the Queen and Prince embarked in the Royal yacht, and cruised towards Spithead. In the course of the day his Serene Highness Prince Edward of Saxe-Weimar arrived on a visit to her Majesty.

On Sunday the Queen and Prince, the Prince of Wales, and Prince Alfred, the Princess Royal, and Prince Edward of Saxe-Weimar, attended morning service at Whippingham Church. The Rev. George Prothero officiated.

On Monday her Majesty and the Prince Consort drove out in the vicinity of Osborne.

On Tuesday the Queen and Prince Albert, accompanied by the Prince of Wales, the Princess Royal, and Prince Alfred, embarked in the *Fairy*, and proceeded to Portsmouth to attend on the launch of the *Marlborough*. After the Queen had christened the ship, her Majesty honoured Vice-Admiral Sir Thomas and Lady Cochrane with her company at luncheon. Before leaving Portsmouth the Queen visited the Crimean invalids now in the Military Hospital at Portsea.

On Wednesday her Majesty and the Prince Consort walked in the grounds of Osborne, and took driving exercise in the vicinity.

His Excellency Count de Persigny has, within the last few days, waited on Lady Raglan, to convey to her Ladyship, personally, the deep condolence of the Emperor and Empress of the French.

IMPERIAL PARLIAMENT.

(*Continued from page 131.*)

HOUSE OF LORDS.—THURSDAY.

The following bills were read a third time and passed, viz.:—Huddersfield Burial-ground Act Amendment Bill, Bills of Lading (No. 2) Bill, Turnpike Trusts Arrangements Bill, and the Sale of Spirits (Ireland) Bill. The Sale of Beer Bill, the Turkish Loan Bill, and several other Bills, were brought up from the Commons and read a first time.

HOUSE OF COMMONS.—THURSDAY.

The House met at twelve o'clock

Mr. STAFFORD called attention to a letter which appeared in the *Times* that morning, in answer to one which was published in that journal of the 8th of July last, relative to the treatment of our soldiers in the hospitals at Scutari, and impugning the accuracy of his statements in reference to the medical departments and the hospitals generally. He intimated his intention of bringing the matter more fully before the House next Tuesday.

LORD GEORGE PAGET'S PENSION.

On the order for going into Committee of Supply, Mr. DILLWYN called the attention of the House to a report that Lord George Paget had received a good-service pension of £100 per annum, with the view of inquiring into the truth of such report, and of ascertaining, if true, what the special services have been for which such pension has been awarded. He did not know anything about the matter further than what he had read in the public prints. The hon. gentleman, having adverted to the various incidents in the military career of the noble Lord, said he did not consider there were sufficient grounds for granting him a pension when there were so many who had pre-eminently distinguished themselves.

Mr. PEEL thought that no better choice could have been made. Indeed, that under the circumstances no other choice could be made. The sums voted by the House of Commons admitted of five or six pensions being given away, and the Commander-in-Chief thought it but fair that the cavalry should share in those pensions. Lord George Paget was selected as being the senior regimental Colonel engaged. There were ten regimental Colonels on the day of the charge of Balaclava, and he was the senior. He led his regiment in a most gallant manner against the enemy, rallied them on the other side, and brought them back with the greatest credit. To have passed him over would have led to the inference that he was wanting in his duty, which we do have been most unjust.

After some conversation the subject dropped.

SUPPLY.—THE WAR.

The CHANCELLOR of the EXCHEQUER moved a vote of three millions for the purposes of the war, in accordance with his statement on the 8th April last.

After some remarks from Mr. WILLIAMS, the vote was agreed to.

Mr. PEEL moved a supplemental vote for the Commissariat Service of the army in the Crimea. Basing his calculations upon the expenditure of May and June, he found that the expenditure of the year would be £3,700,000, of which £1,250,000 had been expended, leaving a sum of £2,450,000 to be voted. The expenses under this head had greatly increased. The Sardinian army had had to be provisioned, although the amount would hereafter be repaid. The Turkish Contingent under General Vivian had been provisioned, and now they would have to provision a considerable body of Foreign Legionaries who were not included in the former estimates. The hon. gentleman then proceeded to explain the details of the vote.

After some discussion the vote was agreed to.

The Chairman reported progress, and obtained leave to sit again at six o'clock for the consideration of the Militia and Ordnance Estimates.

The Militia Ballots Suspension Bill was read a third time and passed.

The Sale of Beer, &c., Bill was read a third time and passed.

The House adjourned at four o'clock.

At six o'clock the House resumed.

Mr. HEYWOOD gave notice that early next Session he should move for leave to bring in a bill to amend the law of marriage.

ADULTERATION OF FOOD, ETC.

Mr. PELLATT asked Mr. Scholefield on what day an opportunity would be given before the prorogation of Parliament for scientific witnesses to be heard by the Committee for inquiring into the adulteration of food, &c., so that both sides of the question might be before the public prior to the close of the Session.

Mr. SCHOLEFIELD said that both sides had already been heard. He did not know whether the Committee would be able to report this Session; if not, the members of the Committee would give the fullest attention to the subject next Session.

THE FOREIGN LEGION.

Lord PALMERSTON (in reply to Mr. M. Gibson) said that no violation of the German States had taken place in our efforts to raise the Foreign Legion. When a question of the legality of our proceedings was raised in America, Government, in order that such question might be waived, had discontinued enlisting.

A NEW PROJECTILE.

Mr. MONSELL (in reply to Mr. Roebuck) said that the new projectile invented by Mr Britain had been lately under the consideration of the Ordnance department, and the experiments tried up to the present time had proved successful.

ORDNANCE ESTIMATES.

The House having gone into a Committee of Supply,

Mr. MONSELL moved a vote of £70,000 to meet the expenses of the Ordnance department. The hon. gentleman briefly explained the improvements which had recently taken place in the Ordnance-office, and defended the principal one—namely, the creation of one central responsible head—on which those improvements were founded.

Mr. STAFFORD complained that sufficient information respecting the working of the new system had not been given to the House. He also expressed his opinion that, although some improvement had taken place since the abolition of the Board of Ordnance, dangerous anomalies still existed in the War Department.

Sir G. Tyler, Captain Vernon, and Colonel Dunne commented on the censured manner in which, under the new arrangements, civil, military, and naval duties were mixed up together

After some further discussion, the votes were agreed to.

On the vote of £15,000 for the erection of an iron building as a Museum at Gore-house, Kensington, Mr. Spooner, Mr. Bright, and other hon. members spoke in opposition to it.

Upon a division, the vote was a reed to by a majority of 85 to 33.

The House then resumed.

The Charitable Trusts Bill was read a second time.

THE REASSEMBLING OF PARLIAMENT.

On the motion for going into Committee of Ways and Means,

Major REID moved a resolution, the object of which was to obtain a pledge from the Government that no treaty or condition of peace would be finally settled without having Parliament previously called together.

Lord PALMERSTON acquiesced in the spirit of the resolution—that no treaty of peace ought to be concluded without the assistance of Parliament. He, however, thought the country ought to place sufficient confidence in the Government without a resolution of this kind. If anything important occurred during the recess, he had no doubt but that the Crown would call Parliament together for its advice and co-operation.

The motion was withdrawn.

WAYS AND MEANS.

The House then went into Committee of Ways and Means.

The CHANCELLOR of the EXCHEQUER moved a resolution—

"That, towards making good the supply granted to her Majesty, the Commissioners be authorised to raise any sum of money not exceeding £7,000,000 by the issue of Exchequer Bills:

"That in case the said Exchequer Bills be not issued for the full sum of £7,000,000, then the Commissioners of her Majesty's Treasury be authorised to issue Exchequer Bonds, bearing interest at any rate not exceeding £4 per cent per annum, to such an amount as, with the total amount for which Exchequer Bills shall be issued, will make up the whole sum of £7,000,000 authorised to be raised by these resolutions."

"That such Exchequer Bonds, if issued, shall be paid off at par, at the expiration of any period not exceeding six years from the date of such Bonds."

"That the interest of all such Exchequer Bonds shall be payable half-yearly, and shall be charged upon, and issued out of, the Consolidated Fund of the United Kingdom, or the growing produce thereof."

After some discussion, the resolutions were agreed to.

HOUSE OF LORDS. FRIDAY.

The following bills were read a third time and passed, viz.—the New River Company and Trustees of the River Lea (No. 2), Chinese Passengers Ships, Lunatic Asylums and Regulations Acts Amendment, Courts of Judication (Prince of Wales Island), Turnpike Acts Continuance (Ireland), and office of Speaker Bills.

The Turkish Loan Bill, after a short discussion, in which the Earl of Clarendon and the Earl of Ellenborough took leading parts, was read a second time

Other measures upon the paper were advanced a stage

HOUSE OF COMMONS.—FRIDAY.

The House met at twelve o'clock. The following bills were passed through Committee—viz., Lunatic Asylums (Ireland) Advances, Navigation Works (Ireland), Public Health Act (1854) Continuance and Amendment, Diseases Prevention, and the Ordnance Board Bills.

At the evening sitting, Mr. F. PEEL, in reply to a question from Lord R. Grosvenor, stated that there was no impediment to the prompt distribution of the medals to the relatives of the soldiers who have fallen in the present war.

THE ARCTIC EXPEDITION.

Sir C. WOOD, in reply to Col. Freeston said, that he had not yet seen the report of the Committee upon the Arctic Expedition, in reference to the granting of decorations to the officers and men employed in such expedition, and he was therefore unable to state what course would be pursued by the Government.

Mr. BOUVERIE, in reply to Lord Ebrington said, that the Geological Museum would be shortly open to the public two additional days in the week.

THE BALTIC FLEET.

Mr. M. GIBSON put a question to Sir C. Wood respecting the manner in which the war in the Baltic was carried on. He had seen in the public journals that Admiral Dundas has expressed an intention to destroy vessels which were so small as not to be worth the trouble of forwarding to England. He (Mr. M. Gibson) wished to be informed whether Admiral Dundas had the power thus to supersede the jurisdiction of the Court of Admiralty by destroying uncondemned vessels. He further inquired whether communications had been received by the Government from the United States, on the subject of the rights of neutral Powers.

Sir C. WOOD said he was not in a condition to answer the latter question. In reply to the former, he had only to say that Admiral Dundas did possess a discretionary power to capture or destroy Russian vessels.

STEAM COMMUNICATION WITH AUSTRALIA.

On the order of the day for bringing up the report of Ways and Means, a short conversation was introduced by Sir J. Pakington, took place, respecting the arrangements entered into by the Government for renewing the steam postal communication with Australia in accordance with the wishes of the colonists as contained in the address of the Legislative Council of Australia, in which they offer, on the part of that Colony to contribute £50,000 a year towards the cost of the steam communication.

Sir C. WOOD said that the Board of Admiralty would do everything in their power to give effect to the wishes of the colony.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, AUGUST 2

Month and Day.	Corrected Reading of Barometer at 32°	Dew-point Temperature	Mean Temperature of Day	Departure of temperature from Average	Degree of Humidity	Direction of Wind.	Rain in Inches.
	Inches	°	°	°			Inches.
July 27	29.712	57	61	— 1	87	S.W.	0.25

„ 31	29.71	52	66	— 1	67	W.	0.17
Aug. 1	29.85	52	63	— 4	67	S.W.	0.00
„ 2	29.87	54	67	— 1	73	S.W.	0.02

Note.—The sign — denotes below the average and the sign + above the average. The numbers in the seventh column are as obtained from the hygrometer, the saturation of the air is represented by 100

The reading of the barometer has varied but little during the week, the highest reading being 29·86 in. on the 29th, and the lowest, 29·71 in., on the 31st. The mean for the week, at the height of eighty two feet above the level of the sea, was 29·811 inches

The mean temperature of the week was 61·7°—being 0·9° below the average

The range of temperature during the week was 19°.

The mean daily range of temperature during the week was 18·6°.

Rain fell during the week to the depth of nearly seven-tenths of an inch.

The weather throughout the week was variable.

For the month of July the mean reading of the barometer, at the level of the sea, was 29·787 inches. The highest reading of the thermometer by day was 82°, on the 19th; and the lowest by night was 42°. The range of temperature during the month was therefore 40°. The mean of all the highest readings by day was 75°, and of all the lowest by night was 53°; the mean daily range of temperature was therefore 22°. The mean temperature of the month was 64°.

The mean temperature of the month was 61·8°, being 0·8° below the average value. The mean temperature of evaporation for the month was 58·2°. The mean temperature of the dew point was 52°. The mean degree of humidity was 83 (complete saturation being represented by 100). As to the fall of rain for the month was 6 inches.

Lewisham, 2nd August, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending last Saturday, the births of 1,264 boys and 1,177 girls were registered within the metropolitan district. The number of deaths was 1,019 males and 1,008 females, and 408 were females.

THE CAUSE OF POLAND.—The Council of the Literary Association of the Friends of Poland have called a meeting in favour of the employment of a Polish Legion as the most effective means of carrying on the war, and the restoration of Poland as the only means of securing a durable peace, to be held on Wednesday evening next, in St. Martin's hall, Long-acre. General Sir De Lacy Evans, M.P., in the chair. It was also stated in the circular convening the meeting that the cause of Polish freedom was supported by the Marquis of Breadalbane, the Earl of Shrewsbury, Lord Ebrington, the Earl of Yarborough, Viscount Ebrington, Sir John Villiers Shelley, Bart., M.P., Admiral Berkeley, Captain Townshend, R.N., M.P., Captain Scobell, R.N., M.P., William Hutt, M.P., Mr. A. H. Layard, M.P., and many other members of Parliament. Before the hour fixed for the meeting (half-past seven o'clock) a large number of persons began to assemble at the building, when it was found to be in the possession of the police that the meeting would not be held. A placard, of which the following is a copy, was also posted on the door:—"Poland.—In consequence of the sudden prohibition of General Sir De Lacy Evans, the meeting intended to be held this evening on the cause of the restoration of Poland is unavoidably postponed for a few days." This notification appeared to occasion some disappointment among the crowd, many of whom hinted that the hon. and gallant gentleman's indisposition, however much it was to be deplored, was scarcely a sufficient reason for postponing the re-creation of one kingdom, and the adoption of the only means of securing the peace of another

CHARING-CROSS HOSPITAL, WEST STRAND.—At the annual general meeting of the governors of this hospital on Tuesday last—Charles Lowe, Esq., in the chair—a report of the operations of the hospital for the past year showed that there had been admitted into the wards 1,131 patients and 14,378 out-patients, including a number of casualties and dangerous emergency, at a cost of £2685 18s. 1d. more than the cases recorded in former years, comprised a total of 1,[illegible] sick and disabled poor who had been partakers of the benefits of the charity, 1,[illegible] 1851, and the greater part of whom had been freely admitted without any recommendation, and restored to the blessings of health and to their occupations and families.

ALARMING BALLOON ACCIDENT.—On Monday evening a large number of persons assembled at the Adam and Eve Gardens, 404 St. Pancras-road, near the Great Northern Railway Station, Kings-cross, to witness the ascent of Mons. Godard in a newly-constructed balloon, to which he had given the name of "Red, White, and Blue." About eight o'clock the aeronaut took his seat in the car, and the balloon was then released, but had only risen a few feet when it came in contact with a newly-erected orchestra in the gardens, which caused Mons. Godard, to be thrown from his seat in the car. By much struggling he caught hold of the wicker-work, and thus suspended over the side. The balloon continued to ascend, till at length, when over St. Giles's Cemetery, the aeronaut let go his hold, and, falling into the cemetery, he had the misfortune to fall with a terrific force on the ground, striking the back part of his head. He was immediately conveyed by the police to the workhouse, in Shoe-lane, Fleet-street, and a surgeon sent for, who, however, on examining the unfortunate man, found that he had received several severe contusions on the head, from which, however, no immediate danger is apprehended. The moment the aeronaut dropped from the balloon, it darted upwards with great rapidity, and was soon lost to view; and up to Wednesday no tidings had been obtained of its resting-place.

THE NEW GOVERNOR-GENERAL OF INDIA.—A Court of Directors was held at the East India House on Wednesday, when the Right Hon. Viscount Canning was sworn in as Governor-General of India. He was afterwards joined with the Directors at the London Tavern, where they were honoured with the company of Her Majesty's Ministers, and many other distinguished persons.

INQUIRY INTO THE CONDUCT OF THE LONDON POLICE. The Commissioners reassembled on Thursday morning, at half-past eleven, in the Exchequer Court, Westminster-hall. Mr. Mitchell summed up the evidence on the part of the complainants; and, in conclusion, said he hoped the result of this inquiry would produce a salutary effect, and show that the cases of the people must be supported by the police. Mr. Lake then proceeded to address the Commissioners on the part of the police generally. Mr. Mitchell having replied, the Commissioners adjourned, the inquiry being closed. The report of the Commissioners will be made to the Secretary of State.

THE QUEEN'S VISIT TO FRANCE. A letter from Boulogne says:—"The Emperor will accompany the Emperor in his visit here to receive Queen Victoria. The [illegible] of infantry which now occupy the camps of the North, will march to the plain on the occasion, and be reviewed by the Emperor, the Empress, Queen Victoria, and Prince Albert. Two or three regiments of cavalry are also said to be on their march to the same point. It is said that the illustrious visitors will remain here four-and-twenty hours."

SKETCHES IN THE BALTIC.

THE FIRST SHOT FIRED AT CRONSTADT.

THE event commemorated in this Engraving took place on the 6th of July. The *Carte Blanche* (so called from being originally laden with paper) was formerly a coaster, of the same size as an ordinary canal-boat. It was fitted up by order of Commander Boyd, who, in the evening tried the range of a 32-pounder gun, which had been slung in a peculiar manner at an angle of 45 degrees, in one of the wood-boats captured a few days ago. The boat was moored across the stern of the flagship, and three or four shots fired; the fall of the first in the water was eagerly watched for, but it took so long a time before it fell that it was given up; but in a few seconds, exclamations of astonishment burst forth as a small column of spray rose in the air at a distance of more than 5000 yards, or over three miles; the shot took exactly thirty-one seconds for its flight. The boat was then towed a little nearer the shore, opposite one of the new earthen batteries, near the Governor's house, and a couple of shots fired, to ascertain if they were within range. Both shots went a long way over the battery, which immediately returned an ineffectual fire with mortars that would not carry the distance. These are, perhaps, the first shots from an enemy that ever alighted on the island of Cronstadt.

A week after, one of the officers of the despatch-boat sent from Cronstadt to receive a flag of truce and a despatch, said that one of the shot thrown from Commander Boyd's gun penetrated more than six feet into the earthwork of their battery. This proves that it would be quite possible to shell the city with guns slung in this peculiar manner, completely out of range of those on shore, but, unfortunately, there are no fuzes for shells that will carry the immense distance; the longest fuze we have burns only twenty seconds, whereas it requires one that will burn thirty-two seconds to carry it the distance Commander Boyd's gun throws it, so that it might not explode before it reaches its extreme flight.

DESTRUCTION OF RUSSIAN SHIPPING

The second Engraving represents an affair in which the *Harrier* and *Cuckoo* inflicted considerable damage on the shipping at Nystad. It appears that several boats belonging to these vessels were sent up among the rocks in the vicinity of the town to see what could be done. After proceeding about seven miles from the ship they came upon a large number of merchant-vessels of all classes, large enough for navigating the Gulf of Bothnia. Thirty of these they burned, and brought away one of 300 tons burthen—having been altogether about twenty hours absent.

Rear-Admiral Hon. R. S. Dundas, in a letter to the Secretary to the Admiralty, dated July 7, calls the particular attention of their Lordships to the active exertions of Captain Storey, of her Majesty's ship *Harrier*, which led a few days later to the destruction of a large amount of shipping discovered afterwards in another anchorage near Nystad.

The following are extracts from Capt. Storey's report:—

The boats of this ship (the *Harrier*) destroyed forty-seven ships belonging to the enemy, varying from 700 tons to 300 tons, on the nights of the 23rd and 24th inst.

On the first night the ships destroyed were one mile from the town of Nystad, and about three miles from the ship, and we were enabled to bring one barque, the *Victoria*, of about 450 tons, off with us.

During the night and following day we discovered 42 ships, the whole of which we either burnt or scuttled.

I have the greatest pleasure in being able to state that these proceedings were so successfully carried out without any casualty.

Owing to the distance we got away from the ship (ten or eleven miles) and the blowing weather, accompanied with rain, that came on during the morning, we were prevented from bringing my vessel out with us.

Thus, in two following nights and one day, were destroyed the whole of the Nystad shipping: probably upwards of 20,000 tons

The more recent news from the Baltic is quite as unexciting as that from the Crimea. The united forces of the French and English amounted to 40 sail, comprising 16 steam line-of-battle ships, 2 steam-frigates, 4 small steamers, 4 mortar-vessels, and 14 gun-boats. After a strict reconnaissance for a period exceeding three weeks of the north shore of Cronstadt, they weighed anchor at seven a.m. of the 14th inst. Rumours of an early movement, which had been prevalent for several days, were confirmed in the afternoon of the 13th by a general signal being made to prepare for sailing; and it was generally supposed that by far the greater portion of the fleet would proceed down the Gulf of Finland, a small squadron remaining off Cronstadt to watch the movements of the enemy. But two hours had barely elapsed after the anchors had been weighed on the morning of the 14th before the three Admirals, Dundas, Penaud, and Seymour, parted company in their respective ships, the *Duke of Wellington*, the *Tourville*, and the *Exmouth*, with the *Austerlitz* and *Merlin* in attendance, *en route* for Nargen. The *Espiègle* had been sent in advance at four a.m., with the four mortar-vessels, for the same destination. The remainder of the Allied squadrons, having been placed under the orders of Rear-Admiral Baynes, immediately after the departure of the three senior flag-officers, anchored about four miles N.W. by W. of Tolbookin Lighthouse, where they were to remain until further orders.

It was understood that the separation of the three Admirals from the main bulk of the fleet would be merely temporary, and that it had occurred in consequence of Rear-Admiral Penaud having conceived a plan for an attack on Revel, the practicability of which Rear-Admirals Dundas and Seymour had gone to ascertain by personal observation. If the result were so satisfactory as to justify the bombardment of that port, it was to be made by the entire fleet, with the exception of such portion thereof as might be necessary to watch the proceedings of the Russians off Cronstadt and other places in the Gulf of Finland.

On the 17th ult. the Commander-in-Chief, accompanied by Admiral Penaud, Admiral Seymour, and Commodore the Hon. F. F. Pelham, proceeded in the *Merlin* to reconnoitre Sveaborg and Helsingfors; they were also attended by two gun-boats and a French steamer. When about 3000 yards from the batteries several infernal machines were exploded by means of galvanic wires connecting them with the shore; but they seem more useless than those which explode by being struck, for it is next to an impossibility for any one on shore to ascertain by taking angles, or any other means, when a ship is so exactly over one of the machines that the explosion would damage her; this was proved by the experience of the 14th, for none exploded nearer than fifty or seventy yards of the ships. To be effective the machine should touch the ship's bottom, for if it exploded with two feet distance between, the shock would be diffused over such a large surface as to be harmless. Two line-of-battle ships have been sunk in the western channel. The *Amphion* saw them go down. One heeled over as she sank, and remains on her side; the other has her bulwarks just above the water. Only two ships and a few small vessels could be seen in the harbour, but the crest of every hill and small island now bristles with cannon. No less than seventeen new batteries and earth-works have been erected since we pointed out their weak places last year. Having satisfied themselves, the Admirals returned to the fleet about six p.m.

On the 18th ult. the *Merlin*, with the Commander-in-Chief, and a French steamer with Admiral Penaud, accompanied by two gun-boats, proceeded to reconnoitre Revel, and returned in the evening. Revel is an exceedingly strong place, and all the forts and batteries are on the main land, running along the water's edge for two or three miles; while nature has assisted to strengthen the place by making the only channel to run within range of every one. Altogether they mount about 400 guns.

On the 20th ult. a successful attack was made on a Russian fort at Frederickshamn, a fortress situate on the western coast of the Gulf of Finland, midway between Wiborg and Helsingfors. This expedition was commanded by Captain Yelverton, of the *Arrogant*, an officer who has gained for himself a well-merited reputation, on account of his intrepidity and cool daring, added to the dexterity with which he conducts his ships seathess through the most intricate and difficult passages. The particulars of the affair are as follows:—The *Arrogant*, *Magicienne*, *Cossack*, and gun-boat *Ruby*, having joined company at Hogland, proceeded on the 20th to Frederickshamn, off which place they anchored the same evening. Captain Vansittart then proceed in the *Magicienne's* cutter to sound, and approached to within 1600 yards of a six-gun fort, which opened fire upon him with a couple of well-directed guns, without, however, doing any harm. The next morning, the *Magicienne* leading, with the *Arrogant*, *Cossack*, and *Ruby*, got into position at about 1900 yards distance, and commenced the attack upon the fort. The enemy returned the fire of our ships with briskness for the space of an hour and a half, but were at length compelled to abandon the position, all the guns being disabled, and the fort itself terribly knocked about. No landing was attempted, Captain Yelverton not thinking it judicious to do so, as a great number of troops were plainly to be seen, drawn up behind embankments. Both the *Arrogant* and *Magicienne* were struck several times, and the rigging of the latter vessel was much damaged. On our side no one was killed. The *Ruby* had two men severely wounded, and one man belonging to the *Arrogant* was slightly injured.

It is said that the earthwork battery at Frederickshamn was but lately erected by the Emperor's orders. He went there on his way to Helsingfors a short time back, and found the place without soldiers or batteries. He immediately ordered 3000 of the former to be stationed there, and the latter to be built. The town was safe from harm until this happened, but is now partly in ruins. As the ships approached the town several ladies were quietly seated on the grass watching them, but the first broadside from the fort scattered them away. The enemy's loss must have been very great; numbers were seen carried away on stretchers; one mounted officer was seen to fall from his saddle, cut in two by a shell. It was not the intention to burn the town; some stray rockets set fire to some houses in the suburbs which communicated with a part of the town; but it did not reach the museum, or the church with its beautiful spire.

THE FIRST SHOT PLANT

UCKOO" DESTROYING RUSSIAN SHIPPING AT NYSTAD.

THE GOODWOOD RACE PLATE.

The Cup Prizes of Goodwood—symbols of those equine triumphs which have sealed the hopes and misgivings of sporting thousands have this year been represented in such results of the silversmith's art as afford quite most favourable subjects for our artist, and fairest grounds for our praise. From these stirring events of the turf in which the many find no interest beyond that which is engendered by pecuniary hazard—has mainly arisen that progress of art which in the more ambitious efforts of the silversmith are now displayed.

That, under a more perfect appreciation on the part of patrons, the arts generally would produce still nobler results cannot be doubted; and, in respect to Racing Plate, we are well aware how frequently the tender subtleties of light and shade, in which the artist finds so much delight, are sacrificed to a vulgar appetite and common-place admiration for the dazzle and glitter that silver can be made to yield. Dinner plates and dish-covers may be polished up to mirror-like lustre, and no great harm will follow. But the art of Cellini and Ghiberti ignores the tricks of "burnish," "frosting," and "scratch-brush," and can only be manifested under the sobering influence of oxidisation. We have heard that sporting gentlemen, in bemoaning the absence of spangling refulgence in cups that have been oxidised, have suggested their resemblance to pewter or lead. These critics must remember that it is the art that ennobles the metal, not the metal the art; and further, that even pewter or lead, upon which has been impressed the stamp of genius, is beyond comparison, more worth the racing for than any tawdry work in silver, whose true worth is at *per ounce*.

The Goodwood Prize Plate—comprising, in this instance, a vase and two historical groups—has emanated from the well known establishments of Messrs. Hancock, Garrard, and Hunt and Roskell, respectively. The vase—executed by Mr. Hancock, of Bruton-street, from the designs and model of Mr. H. H. Armstead, a clever young artist connected with the establishment—combines the utmost mastery and piquancy of detail, with exceeding simplicity and dignity of form. Its proportions are very noble, and the subjects in basso-relievo which adorn its sides, while well suited to a treatment in metal, happily illustrate the good-will between France and England—the subject of the entire work being that of the Field of the Cloth of Gold. On one side is represented the meeting between Henry VIII. and Francis I., between Guisnes and Ardres. The figures of Wolsey, the French nobles, and the courtly retinue have been introduced in this subject in the most ingenious manner, and with great artistic effect. The subject on the other side of the vase represents Francis victorious in the lists. The handles are partly formed of winged figures of Victory, by which are symbolised the successes which attended Henry and Francis in their holding the lists against all comers; and the details throughout have a symbolical reference, supporting the general character of the work. The metal has been oxidised; and altogether the production reflects the highest credit upon both artist and manufacturer. This plate has been "placed," as the *Goodwood Cup*.

The subject selected by Messrs. Hunt and Roskell, of Bond street, is one closely connected with our early history. In their spirited group—in our Engraving to the right of the vase—is represented the well-known incident of Robert of Normandy meeting, on his return from the chase, with a beautiful country girl, who, at the time, was engaged with her companions in washing clothes at a brook. She is represented in the group as being timidly conscious of observation, while Robert, mounted on a prancing charger, is wrapt in admiration of her loveliness. They were destined to become the parents of William the Conqueror. This work is likewise from the design of Mr. H. H. Armstead, and its execution thoroughly justifies the high reputation of Messrs. Hunt and Roskell. It has been awarded as the *Stewards' Cup*.

Messrs. Garrard, of the Haymarket, have produced the third group, illustrating the personal encounter between Sir Henry Percy (Hotspur) and the Earl of Douglas. The incident took place near Newcastle, A.D., 1388. Mr. Cotterill, by whom the group was designed and modelled, has represented the crowning triumph of Douglas in the capture of Hotspur. The work is animated with much spirit and vigour, and is worthy both of Mr. Cotterill and the firm to which he is attached. This prize has been awarded as the *Chesterfield Cup*.

Altogether these three Prizes must be considered of the first order.

CHESTERFIELD CUP. GOODWOOD CUP. STEWARDS' CUP.

THE GOODWOOD RACE PLATE.

NATIONAL SPORTS.

Goodwood once over, and the racing year gets rapidly into its "autumnal slope," and visions of the St. Leger and the Cesarewitch begin to rise in the distance. August is especially prolific in race-meeting, no less than nine of which are set down for next week. Ripon has its pleasant little St. Wilfred gathering on Monday and Tuesday, and the handicap of that likewise run off on the former of these days. North Staffordshire is fixed for Tuesday and Wednesday, Leith Subscription, Bridgwater, Burton-on-Trent, and Naring, for Tuesday; and Anvirle for Thursday. The great meeting of the week is Brighton, which claims Wednesday and Thursday for its "legitimate" and Friday for its Club racing. Its Biennial Stakes on Wednesday has a strong entry of bad horses; and West Langton, Chesthunt, Ariel, and Bucolic are among the twenty nine entries for the Two-year-old Biennial on Thursday. The Champagne Stakes on that day has a rare list of speedy animals; among which are Nabob, Dervish, Jack Sheppard, Oulston, Andover (said to be lame), Epaminondas, Lord of the Isles, Scherz, Orinoco, Knight of St. George, and Rataplan,—and the distance is only one mile.

De Clare is scratched for all his engagements this year; so John Scott must fall back on Bonnie Morn and the Marchioness for the St. Leger. St. Hubert's Goodwood running has settled him, but Rotherham is not unlikely to find friends before the great Doncaster day.

We hear that Bird-in-Hand will not show again before the Champagne Stakes at Doncaster, for which, judging from the Goodwood running, he will have a strong lot of winners to meet. The Hawley jacket has once more come to the fore with Sister to Alice dite, who left the high-priced Volvode struggling hopelessly in her rear. The Ham Stakes was a great surprise, as Fly by Night was behind Oil noodle, whom he beat so cleverly at Ascot; while Mary Copp (who is another of Flying Dutchman's stock) came in three lengths ahead of the latter. This filly was just beaten by Lord Eglinton when he threw up his stud so suddenly last month. Oddly enough, it is only another illustration of the truth that, whenever any racing man parts with his stud, there is sure to be some "great unknown" in it. Surplice was in Lord George Bentinck's, Wild Dayrell in the Duke of Richmond's, Kingston in Lord Peel's, and Scythian in General Anson's, when they sold off; while Lord Exeter was within an ace of selling his with Stockwell in it in the spring of 1852. The Bold Buccaneer is to come to the hammer at Tattersall's on Monday, and it is said that Sir George Brown has had 1100 guineas bid him in vain for the grey hunter which carried him so splendidly "up to the Russian gun" at the Alma. Gossip has it that the bid was from some English "Barnum;" but we cannot vouch for this part of the story. The show of horses of all classes at the recent Royal Agricultural Meeting at Carlisle was very excellent, and the Cumbrians took fully their share of the prizes The blood horse flat in this case confirmed that of the local Agricultural Show Judges (1854) as to the merits of Ravenhill and British Yeoman, who were again first and second; while St. Bennett, The Era, The Cure, Emerystone, Larriston, Cyclops, Witton, Turnus, Vulcan, Burndale, and Colstersdale, were the defeated ones, where Melbourne and Lanercost have been found before them.

The yachtsmen are making the most of their time. On Monday we have the Greenwich Annual, and the St. Mary's, Rothschilds', Regattas! Tuesday is apportioned to the Great Grimsby Regatta, and the "Leander-club Coat, Badge, and Freedom for Apprentices," from Putney to Hammersmith. The Royal Southern Yacht-club Regatta stands for Tuesday and Wednesday; the Manchester and Salford Regatta for Monday, Tuesday and Wednesday; the Great Marlow Regatta for Thursday, and the final heat for its Silver Challenge Sculls on Friday: while the Clyde Regatta-club (Glasgow) inaugurates its season with a regatta on Saturday.

The Marylebone Club and Ground are beginning to go afield, and on Monday they play a return match with the county of Sussex, at Horsham, and on Thursday with the Braxted park Club, in their own park. Kennington Oval will also be enlivened on Wednesday by a return match between the West Wickham and Surrey Clubs. "All England" will appear at Bristol on Monday, and Cardiff on Thursday, and the "United All England" will play the "North *v.* South" match at Farnbridge, on the same day. The latter corps have no match on Monday, as so many of their members will be engaged on the side of Marylebone at Horsham

Owing to the 19th of August falling on a Sunday, this grouse will have a day's respite. The accounts of them are still as unsatisfactory as those of the black game are good; and we observe the names of Lord John Russell and Mr. Padwick among those sportsmen who have taken moors.

GOODWOOD RACES.—TUESDAY.

Canon Stakes.—Brother to Grey Tommy, 1. Winkfield, 2.
Lavant Stakes.—Nectar, 1. Aphrodite, 2. Pyrrha, 3.
Sweepstakes of 500 sovs. each.—Honeysuckle, 1. Blaise, 2.
Stewards' Cup.—Cotterill, 1. Lord Albemarle, 2
Goodwood Stakes.—Cavalier, 1. Dirk Hatteraick, 2
Ham Stakes.—Mary Copp, 1. Polmoodie, 2.
Duke of Richmond's Plate.—Rosaline, 2.

WEDNESDAY

Sweepstakes of 10 sovs. each.—Sagacious, 1. Overreach, 2.
Sweepstakes 200 sovs. each.—Paletot, 1. Hurl, 2.
Handicap Plate.—Comfort, 1. Fiacrow, 2.
Goodwood Stakes.—Quince, 1. Herring, 2.
Drawingroom Stakes.—Dervish, 1. Dundee Lassie, 2.
First year of the Fifth Great North and South of England Biennial Stakes.—Mary Copp, 1. Regerd, 2. Wife, 3.
Sweepstakes of 100 sovs.—Treacherl, 1. Besika, 2.
The Anglesea Plate.—Robgill, 1. Georgy, 2.

THURSDAY.

Fourth Memorial Stakes.—Corcebus, 1. Pugnator, 2.
Molecomb Stakes.—Enchanter, 1. Spindle, 2.
Goodwood Cup.—Baroncino, 1. Oulston, 2. Rataplan, 3.
Sussex Stakes.—Bezonian, 1. Sunshine, 2
Third Memorial Stakes.—Scythian walked over.
Fifth Memorial.—Henrietta colt, 1. Oltenitza, 2.
Racing Stakes.—Pugnator, 1. Claret, 2.

FRIDAY.

Chesterfield Cup.—Punkestone, 1. Vanderdecken, 2.
Duke of Richmond's Plate.—Polestar, 1. Protest, 2.
Nassau Stakes.—Instructress, 1. Besika, 2
Sweepstakes of 100 sovs.—Acrobat walked over.
Queen's Plate.—Rataplan walked over.
March Stakes.—Polestar, 1. Lanercost, 2.

Doggett's Coat and Badge.—The interesting contest for the coat and silver badge, the gift accruing to the winner left by Mr Doggett for the purposes of encouraging the apprentices of watermen, and also commemorate the accession of the House of Brunswick, took place on Wednesday. The conditions of the wager are that a boat is rowed by six watermen's apprentices, duly qualified and selected by ballot for those out of young watermen's indentures, at Fishmongers'-hall. The distance to be rowed is from the Old Swan at London-bridge to the Old Swan at Chelsea, against tide. The following were the competitors:—William Ling, Tower-stairs; Henry James White, Mill-stairs, Bermondsey; William John Wallinger, Tower-stairs; Thomas Allen, St. George's-stairs, Horsleydown; Thomas Fitzgerald, King James's-stairs, Wapping; and John Osman, Horsleydown-stairs. The men took their stations at half-past four; but it was nearly a quarter to five before a clear start was effected. The race from London-bridge to Westminster was a very exciting one; the men to Blackfriars-bridge being nearly even on, without either having any decided advantage. White, of Millwall-stairs (white), gradually drew away, and succeeded in maintaining his position until they arrived at Chelsea, White coming in first; William Ling, of the Tower-stairs, second; and Wallinger, of the same stairs, third

Birmingham Musical Festival.—This celebrated triennial music meeting commences on the 28th of next month. The selections for the morning and evening performances speak highly for the judgment and taste of the committee, and leave no doubt but that this will be one of the most brilliant meetings ever held. The great treat for amateurs will be the performance of Mr. Costa's new oratorio, called "Eli," which he has composed expressly for the festival. Mr. Costa has certainly been felicitous in the selection of his subject; it is from the first four chapters of the First Book of Samuel. The evening selections are of as attractive a character as could be wished. To name such composers as Mendelssohn, Weber, Rossini, Auber, and Maclarren, is in itself a guarantee for the character of the concerted music. On Thursday selections from the "Etoile du Nord" will be given; and it is expected that the illustrious Meyerbeer himself will grace the festival by a visit. A composition of Prince Albert's forms part of the programme for the same evening. The list of vocalists embraces the very cream of the profession; and, with a single exception, includes all the great names known to fame in the profession in this country. Madame Rudersdorff and Mdlle. Bosio are the novelties of the season. In addition to these we have old favourites—Grisi, Mdme Castellan, Mdme. Vander Decken, and Miss Dolby. There is, as we have said, one name wanting—we refer to Madame Clara Novello; and we regret, for the sake of the lady herself, that she is not of this noble band. The committee, fully appreciating her merits, have brought her overtures; but the jarring manifested (to name no more) did not meet Madame Novello's views. There are on this occasion no less than four tenors—Mario and Sims Reeves, Signor Gardoni, and Herr Reichardt; both the last occupying a position of eminence in the musical world. Signor Lablache, Herr Formes, and Mr. Weiss complete a list which has never been surpassed.

The Beer Bill Committee.—The second report of the Beer Bill Committee is published. The Committee met eight times. Mr. Cobbett moved a resolution to the effect that, instead of hearing further evidence, the Chairman be instructed to prepare a report. This was unanimously agreed to, and at the next meeting Sir W. Joliffe proposed the report, the adoption of which, after some amendments, Mr. Cobbett moved. To this motion Sir John Pakington moved an amendment, stating that the committee had not yet received sufficient evidence as to the effect produced by the Act of 1854 to justify a report to the House. On a division Sir John Pakington alone supported it, the remaining eleven members present negatived it, and voted the report which was subsequently made to the House.

New National School, Hook Norton, Oxon.—On Friday (last week) the corner-stone of this school was laid by Miss Davis, daughter of Samuel Davis, Esq., of Swinford Park. The building will comprise a school-room for boys and girls, 36 feet by 16½ feet, a class-room, and a room which, together with the class-room, will form a boys' school on Sundays, when the usually mixed school-room will be appropriated to girls alone. A mistress's house and the necessary offices complete the group, which is of a pleasing character. The village is much indebted to Miss Davis for her bounty, as she not only gave the site, but contributed more than two-thirds of the amount of the builder's contract. The architect is Mr. E. G. Bruton, of Oxford.

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Rectories:* The Rev. A. Russell to the united parishes of St. George, Botolph-lane, and St. Botolph by Billingsgate; R. R. Kelvert to Langley Burrell, near Chippenham; Rev. C. W. Davis to Breane, Somerset; the Rev. H. Bagnall to Goldsborough, Yorkshire. *Vicarages:* The Rev. H. Newland to St. Mary's, Westbourne, Sussex; Rev. R. J. F. Thomas to Yeovil-cum-Preston. *Incumbencies:* Rev. J. H. Newton to Cambo, near Morpeth; Rev. C. S. Trip to Christ Church, Naulsea, Bristol.

The Rev. G. Pope, Fellow of Sidney Sussex, Cambridge, has been appointed Professor of Mathematics at the Royal Military College, Sandhurst.

OBITUARY OF EMINENT PERSONS.

MAJOR-GENERAL CORNWALL.

MAJOR-GENERAL WILLIAM HENRY CORNWALL, Assistant-Adjutant-General of the Coldstream Regiment of Foot Guards, died at his residence, Cadogan place, Chelsea, on the 21st ult., in the fifty-five year. The General was third and youngest son of John Cornwall, Esq., of Hendon, Middlesex, by his wife, Susannah Hall, only daughter of John Peat Hall, Esq., of Grosvenor-place, London, 4th September, 1781. He was educated under the care of the late Rev. Edward Wood, of Iver, Bucks, till he entered, in 1813, the Military College, Sandhurst. Shortly after the battle of Waterloo a Commission in the Coldstream Regiment of Foot Guards was given him by the Duke of Cambridge, but the regiment having being reduced and Mr. Cornwall placed on half-pay, he was gazetted Ensign and Lieutenant in the same regiment by purchase the 5th of October, 1820. He became a Lieutenant-Colonel in 1832. In 1836 he was selected by William IV. to attend upon Prince George of Cambridge; and he fulfilled the duties of a difficult situation to the complete satisfaction of his Majesty and the late Duke of Cambridge, and to the acknowledged advantage of the Prince. In subsequent years the Colonel accompanied Prince George in various distant tours, and also the Duchess of Cambridge and family on a tour in Germany in 1840. He was from 1837 one of the Duke of Cambridge's Equerries: and in 1846 he held a similar post in the household of the Queen Dowager Adelaide, his wife being also appointed one of Queen Adelaide's bedchamber women. The Colonel and his wife accompanied her Majesty—to whom they were devotedly attached—to Nice during the winter of 1847, and continued with her till her decease. In December, 1845, Colonel Cornwall was chosen by Queen Victor a to be her Majesty's Marshal: and, in January, 1847, her Assistant Master of the Ceremonies which situation he retained to his decease. He was gazetted Colonel in 1846, and subsequently retired on half-pay of the 83rd Foot. In the Brevet of the 20th June, 1854, he attained the rank of Major-General.

Major-General Cornwall married, in 1841, Louisa Grace, second daughter of the late Lord Robert Kerr, fourth son of William John, fifth Marquis of Lothian, who survives him. He leaves no issue. His remains were interred on the 27th ult., in the family vault, at Hendon.

The Major-General was directly descended from the Cornwalls, Barons of Burford, county of Salop, whose unbroken pedigree traces up to Richard, Earl of Cornwall, King of the Romans A.D. 1271, brother of Henry III., and son of John, King of England. The present representative of the family is the Rev. Alan Gardner Cornwall, M.A., Rector of Newington Bagpath, and of Beverstone, both in the county of Gloucester, and a Chaplain in Ordinary to Queen Victoria.

THE HON. EDWARD FITZCLARENCE.

LIEUTENANT the Hon. EDWARD FITZCLARENCE, son of the late, and brother of the present Earl of Munster, died on the 26th ult., from the effects of the wounds, at the English hospital, at Constantinople, which he had been conveyed from Balaclava. The gallant Lieutenant was in his twenty-second year, and was much lamented. He was with him took part in the unsuccessful attack on the Redan on the 18th June, and received some

terrible hurts that eventually proved mortal. He had to undergo amputation of the left leg, and the right hand. These operations he bore with a fortitude which seemed instinctive with him, but his constitution sank under them. Lieut. Fitzclarence was the fourth and youngest son of George, first Earl of Munster, by his wife Mary, daughter of George, Earl of Egremont, and was born on the 8th of July, 1837. He entered the 7th Regiment of the Line as an Ensign, in November, 1854, and, on January last, obtained his Lieutenancy. He accompanied, in the spring of this year, the depôt of his regiment to the seat of war, and he had only been a few weeks before Sebastopol when he was struck with alacrity the summons that called him to assist in the attempt on the Redan: and thus has added his name to the fair roll of British noblesse who have, with such earnest valour and ready devotion, sacrificed their lives in the Crimea.

COLONEL BENT.

COLONEL WILLIAM HENRY BENT, late of the Royal Artillery, and on the retired list of that corps was the fourth son of the Rev. George Bent, Rector of Hedsor and Hitcham, in Bucks, by Dorothea, daughter of the late Sir John Bent, Knt., of Wexham Lodge, Bucks. William Henry Bent having entered the British Army as an Ensign, worked through a career of considerable service. He accompanied the expedition to Walcheren, and assisted at the bombardment of Flushing. He was also present at several of the campaigns from 1810 to 1813 in the Peninsula, and shared in the glories of Badajos, Albuera, and Arroyo de Molinos. He was in the retreat from Madrid into Portugal, and was engaged in minor actions connected with the war. He was present at the battle of San Munos, and other affairs, and had the honour of long service close upon fifty years, married Charlotte, daughter of the late Lieutenant-General Samuel Rimmington, Royal Invalid Artillery, by whom he has left issue three sons and five daughters. Four of the sons are in the British service: and the third daughter is married to Captain Travers, R.A. Colonel Bent died a few days since at Heavitree, near Exeter.

WILLIAM SELWYN, ESQ., Q.C.

WILLIAM SELWYN, Esq., of Richmond, Surrey, a learned and laborious lawyer, and the well-known author of Selwyn's "Nisi Prius," died on the 26th ult. at Tunbridge Wells, aged 81. He was educated at the University of Cambridge, and was first Chancellor medallist in St. John's, in 1797. He was called to the bar in 1807, and twenty years afterwards became a Queen's Counsel. His work, entitled "An Abridgment of the Law of Nisi Prius" has long been a standard book in the legal profession, and has gone through numerous editions. The latest of which is dedicated to Prince Albert, who shortly after becoming a resident in this country read, amidst professional history with Mr. Selwyn. Mr Selwyn was for some time Recorder of Portsmouth. He married the daughter of R. T. Kynaston, Esq., and leaves issue. One of his sons is at the bar, and another is the Right Rev. George Augustus Selwyn, D.D., Bishop of New Zealand.

WILLS, PERSONALTY, AND BEQUESTS.—The will of the Right Honourable Lord Dudley Coutts Stuart, M.P., was proved in London under £80,000 personalty. John Henry Vivian, Esq., of Singleton, Glamorganshire, £200,000 personalty. Sir Charles Hicks, Bart., £25,000. Admiral Sir Charles Adam, G.C.B., £12,000. Robert Pratt, Esq., land agent, Norwich, £5,000. Lieutenant Wm. Walker Jordan, 44th Foot, Crimea, £3000. The Right Hon. Lady Caroline Scott, died intestate, personalty, £35,000. Mr. John Heard, of Gravesend, has bequeathed to the Kent and Canterbury Hospital, £500; Licensed Victuallers' Asylum, £500; Gravesend and Milton Dispensary, £100

SIR EDWARD BANKS, the builder of three of the noblest bridges in the world—Waterloo, Southwark, and London—began life as a common labourer, and worked as a navvy on the Merstham Railway, completed in 1805. He is buried at Chipstead churchyard, and his tomb bears his bas relief on an arch of London bridge, flanked with an arch of Southwark and Waterloo bridges

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

THE great success which has attended the new French Loan of £30,000,000—though no doubts were ever entertained but that the whole amount would be more than subscribed—is the broad topic of conversation in the City circles. According to the official statement, published in the *Moniteur*, the total subscriptions represent no less than £141,000,000 sterling. The Empire should be more than £34,000,000. These for 30 francs of rente and a consolidation up to £9,200,000. This startling announcement proves that for a country like France, such vast sums of money have been accumulating in private hands in France, and that the want of confidence of late in Government has operated against their employment. The subscription lists in London show a goodly army of names, and we learn that about £2,000,000 was paid into the hands of the contractors, prior to Monday, as the usual deposit. This sudden withdrawal of capital has had the effect of rendering money rather dearer; but our impression is, though, as yet, no positive arrangement has been made with regard to the foreign subscriptions, that nearly the whole of that amount will be short y released, and be employed in taking up the new Turkish Loan of £5,000,000 he particulars respecting which will be issued in a few days.

Seeing the large sums of immaterial estimates which have been agreed to by the House of Commons for war purposes, it was almost one time thought that new taxes would be inevitable; hence immense sale of tea, sugar, and coffee were made at the prevailing duties. It is now, however, ascertained that the estimates will be met by a fresh issue of £7,000,000 Exchequer Bills, or Bonds, as the Chancellor of the Exchequer moved a series of resolutions to that effect on Thursday evening.

The actual money purchases in the English Stock Market have been very limited during the whole of the week; nevertheless prices have been steadily supported in every instance. On Monday the Three per Cent Consols were done at 90¾ up to 91¼; the Three per Cents Reduced, 91¼; and the New Three per Cents, 90¾ ¾. Long Annuities (1885) were 16⅞; India Bonds, 30s. prem.; Onnams, 4½; Exchequer Bills, 19s. to 22s. prem.; Ditto Bonds, 101 to 103. There was a slight rise in some of the National Stocks on Tuesday, with some firmness in the market.—The Three per Cents Reduced marked 91¾ ¾; the Three per Cent Consols, 91¾; the New Threes per Cents, 90¾ ¾; and the Long Annuities, 16 13-16; India Bonds, 29s.; Exchequer Bonds, 19s. to 22s. prem. Exchequer Bonds, 100¾. On the following day prices were steady. Bank Stock, 214. Consols for Account, 90¾ ¾. The Three per Cents Reduced, 91¾ ¾; Three per Cent Consols, 91 to 90¾; New Threes per Cent, 90¾ ¾; Long Annuities, 1855, 4; Ditto, 1859, 3¾; Ditto, 1885, 14⅞. India Stock, 201. Exchequer Bills, 19s. to 22s. prem.; Ditto Bonds, 99 to 101. On Thursday Public Securities were steady, but very quiet. Consols were 90⅝ to 91, for money and time. The Three per Cents Reduced were 91¾ ¾; and the New Three per Cents, 90¾ ¾. Bank Stock, 214. Exchequer Bills, 19s. to 22s. prem. India Bonds, 28s. to 29s. prem.

The following statement shows the state of the note circulation of the United Kingdom, for the month ending July 7th:—

Bank of England	£18,9 1,514
Private banks	2,6 ,702
Joint-stock banks	6,310,448
England	4,11 ,402
Ireland	1,72 ,502
Total	£ 3,587,313

Compared with the same period in 1854, the above returns show an increase in England of £180,411, and an increase in the United Kingdom of £236,991.

The dealings in most Foreign Bonds have been far from extensive, but have ruled very firm. The following are the last official quotations:—Brazilian Five per Cents, 101¾; Mexican Three per Cents, 3-¾; Ditto New Second-and-a-Half per Cents, 21; Ditto Three per Cents, 26½; Peruvian Six per Cents, 64; Russian Five per Cents, 101½; Ditto Four-and-a-Half per Cents, 93½; Sardinian Five per Cents, 87½; Spanish Three per Cents Ditto, New Deferred, 19¾; Portuguese Six per Cents, 34½; Ditto Four-and-a-Half per Cents, 31; Ditto Defe red, 13; Dutch Two-and-a-Half per Cents, 64; Ditto Four per Cents, 98; Austrian Five per Cents, 87½; French Scrip has realised 2¾ prem.

As the exchanges have come more favourable both from Paris and Hamburg, there has been very little demand for bullion on continental account; but several large parcels of silver have been forwarded to the Crimea. The imports, since we last wrote, have been about £300,000, chiefly from Australia and New York.

Joint-stock Bank Shares have been very firm, and prices have shown a tendency to improve. Australian have realised 87½; City, 38½; London, 34½; London Chartered of Australia, 20½; London and Westminster, 47½; Union of Australia, 79½ ex div.; Ditto, New, 7¼ ex div.; Union of London, 28¾. Miscellaneous securities have realised the following quotations:—Canada Bonds, 126; Crystal Palace, 3; Ditto, Preference, 7½; Australian Freehold Docks, 17½; Electric Telegraph, 18½; General Steam Navigation, 7; Peninsular and Oriental Steam Navigation, 8; Royal Mail Steam Packet, 10½; Mexican and South American, 4; Royal Mail Steam, 7½. Canal Shares have been very inactive, but not changed.

84; Birmingham (Guaranteed £4 by the London and North-Western Railway Company), 89; Coventry, 200; Ellesmere and Chester, 90; Grand Junction, 140; London, 14 ex. div.; Stourbridge, 2-½; Trent and Mersey, 2-½; Warwick and Napton, 2-½; Wilts and Berks, 4½; Worcester and Birmingham, 2½. Railway Shares have ruled somewhat inactive, and prices have shown a tendency to give way. The following are the official closing prices on Thursday:—

ORIENTAL SHARES AND STOCKS.—Ceylon, 24; Edinburgh and Glasgow, 94; Great Northern, 91; Ditto, A Stock, 68¾; Ditto, B Stock, 68¾; Great Western, 64¾; Lancashire and Yorkshire, 89¾; London and Brighton, 20; London and North-Western, 98¾; Ditto Eighths, 1⅜; London and South-Western, 86½; Manchester, Sheffield, and Lincolnshire, 34¾; Midland, 69½; North Staffordshire, 11½; Oxford, Worcester, and Wolverhampton, 28; Scottish Central, 105; Scottish Midland, 70½; South-Eastern, 60¾; South Wales, 81; South Yorkshire and River Don, 11½.

LINES LEASED AT FIXED RENTALS.—London and Greenwich, 12¾; Wilts and Somerset, 99½.

PREFERENCE SHARES.—1 Term Contracts, 85 per Cent, 14½; Ditto, Northern Five per Cent, 111½; Ditto, Four-and-a-Half per Cent, 103; Western (Birmingham Stock), 1½; London and Brighton Six per Cent, 1½; Midland Four-and-a-half per Cent, 5 dis.; Norfolk Deferred Shares, 3½; Four per Cent, 89¾; Oxford, Worcester, and Wolverhampton, 102.

FOREIGN.—Antwerp and Rotterdam, 9½; Dutch-Rhenish, 9½; Paris Five per Cent, 94½; Great Central of France, 3½; Great Luxembourg, 3½; Ditto, Obligations, 3½; Great Western of Canada Shares, 23½; Lyons and Geneva, 17½; Northern of France, 86½; Paris and Orleans, 49; Royal Swedish, 4; Sambre and Meuse, 9½; Western of France, 30½.

Mining Shares have been a ready sale to price. On Thursday Brazilian Imperial, 2½; Ditto, Cocaes and Cuiaba, 4; Puntgliand Silver Lead, 14; United Mexican, 9¾.

Friday, Evening.

The Consol market has been steady to-day, as to price, but the business done has been very moderate. The Three per Cents are received by 91¼; the Three per Cents Reduced, 91¾ ¾; and the New Three per Cents, 90¾ ¾. Bank Stock, 214; India Stock, 204. Exchequer Bills, 19s. to 24s. prem.; India Bonds, 30s. to 32s. prem. Foreign Bonds have ruled steady, but Railway Shares have met a dull market.

THE MARKETS.

CORN EXCHANGE, *Friday*.—A very limited supply of English wheat was received fresh up to-day, per steamer and by land carriage. At the sale the show of samples of both red and white was small and the demand for the former rather sluggish, although prices remained the same as per last week. In foreign wheat, this week, are very moderate, yet the supply morning was good. Last trade ruled dull, and to-day sales were rather slow at late rates. In fine barley scarcely any here, very little was offering, and the demand was limited to the trade, which moved off heavily, at late rates. Malt ruled dull, but to-day rates were about last week's value. There was a fair show of oats. To-day the trade was rather dull, and prices, and fine cold at Monday's currency.

Arrivals this week.—English, wheat, 1150; barley, 350; malt, [illegible]; oats, [illegible]; flour, [illegible]; beans, [illegible]; peas, [illegible].

English.—Wheat, Essex and Kent, red, 76s. to 77s.; white, [illegible]. Norfolk and Suffolk red, 71s. to 76s.; rye, 48s. to 52s.; grinding barley, 32s. to 32s. 6d.; malting ditto, 36s. to 38s.; malting ditto, 40s. to 42s.; and Norfolk malt, 66s. to 70s. brown ditto, 62s. to 64s.; Kingston and Ware, 70s. to 72s. Chevalier, 72s. to 73s. To-day's wheat and fine barley fetched more, 2s. to 3s.; potato oats, 28s. to 30s.; Youghal and Cork ditto, 26s. to 27s.; Scotch and Irish ditto, 25s. to 26s.; feed ditto, 24s. to 25s.; potato ditto, 27s. to 28s.; maple, 36s. to 38s.; white peas, 38s. to 40s.; grey ditto, 36s. to 38s.; per quarter. Town-made flour, 48s. to 49s.; Essex and Suffolk ditto, 44s. to 45s.; Stockton and Yorkshire, 42s. to 43s.; per 280 lbs.; American flour [illegible] per barrel.

Foreign.—Wheat, [illegible] prices. Linseed and [illegible]; Baltic, [illegible]; Black Sea, [illegible]; Odessa, 68s. to 72s.; Taganrog, 68s. to 72s.; Egyptian, [illegible]; Barbary, [illegible]; Salonica, [illegible]; Genoa, [illegible]; Leghorn, [illegible]; Trieste, [illegible]; Venice, [illegible]; Ancona, [illegible]; Naples, [illegible]; Sicily, [illegible]; Marseilles, [illegible]; Bordeaux, [illegible]; Cadiz, [illegible]; Lisbon, [illegible]; Oporto, [illegible]; Gibraltar, [illegible]; Malta, [illegible]; Corfu, [illegible]; Zante, [illegible]; Cephalonia, [illegible]; Patras, [illegible]; Carlscrona, [illegible]; Gothenburg, [illegible]; Stockholm, [illegible]; Memel, [illegible]; Dantzic, [illegible]; Konigsberg, [illegible]; Pillau, [illegible]; Stettin, [illegible]; Rostock, [illegible]; Lubeck, [illegible]; Hamburg, [illegible]; Bremen, [illegible]; Emden, [illegible]; Antwerp, [illegible]; Ostend, [illegible]; Nieuport, [illegible]; Dunkirk, [illegible]; Boulogne, [illegible]; Calais, [illegible]; Dieppe, [illegible]; Rouen, [illegible]; Caen, [illegible]; Honfleur, [illegible]; Cherbourg, [illegible]; St. Malo, [illegible]; Granville, [illegible]; Guernsey, [illegible]; Jersey, [illegible]; Alderney, [illegible]; Sark, [illegible]; Havre

OPENING OF THE DUTCH-RHENISH RAILWAY.

GOUDA, IN SOUTH HOLLAND.

It will be remembered that in May last the section of this line between Utrecht and Gouda (a length of 20 English miles) was opened for public traffic. The remaining 12½ miles between Gouda and Rotterdam having been now completed, and intended to be opened for public traffic on Monday, July 30, the Direction appointed Friday, the 20th, for the official inauguration of the entire line from Utrecht to Rotterdam.

On this occasion a special train left the Rotterdam terminus at ten a.m., conveying his Royal Highness Prince Henry of the Netherlands, the Minister of the Home Department, the Minister of Finance, the Presidents of both the Legislative Chambers, the Government Inspector of Railways, the chief Government Engineers of North and South Holland, the local and military authorities of Rotterdam, Mr. Stephen Ballard (agent to Mr. Thomas Brassey, the contractor), &c. The train arrived at Utrecht at 10.55 a.m., thus performing the distance (32¾ English miles) in fifty-five minutes, including a stoppage of five minutes at Gouda station, to take up the Burgomaster and some of the guests invited from that town.

At Utrecht station the party were received by the resident English Director, Mr. C. W. Hesleden, and joined (on the subsequent arrival of special trains from Amsterdam and Arnheim) by the President and Dutch Commissaries and Directors, the Burgomasters of Amsterdam, Utrecht, Arnheim, the civil and military authorities of the province at Utrecht, as well as by the engineers and other officers of the Company and contractor, and the invited guests from those places. The English Commissaries, the London director (Mr. W. J. Chaplin, M.P.), the consulting engineer (Mr. Joseph Locke, M.P.), and the contractor (Mr. Thomas Brassey), were unfortunately prevented from attending

After partaking of some slight refreshment, the entire party entered the festive train (consisting of twenty-two carriages), and left at 11.45 a.m. for Rotterdam. Short stoppages were made at Woerden and Gouda, and the arrival at Rotterdam took place at one p.m. The pro-

OPENING OF THE DUTCH-RHENISH RAILWAY.—TEMPORARY STATION AT ROTTERDAM.

visional station in that city was tastefully decorated with evergreens and flags. In front waved the Dutch, English, and Prussian standards, whilst the spacious covered area of the interior (which was much admired) was adorned with flags bearing the arms of the various towns now connected with Rotterdam by the Railway. The company were received at the station by the Burgomaster and Corporation of Rotterdam, who presented an address to the direction, which was suitably replied to by the Chairman. The Minister of the Home Department then complimented the Company on the completion of the line, expressed his Majesty's great interest in the undertaking, and regret at being unable to attend the opening; and, on behalf of the King, presented the Order of the Netherlands Lion to Mr. Donker Curtius, as President of the Board of Directors.

The party then embarked on board steamers, with bands of music, the intention being to steam up and down before the city, and afterwards have a grand promenade and *matinée musicale* in the park; but at this stage of the proceedings the weather (which had been for some days of a very unsettled and unpromising character) interfered to frustrate the arrangements. The morning had been dull and showery, but now the rain commenced descending heavily, and the gala-decorations of the shipping in port were thus unfortunately quite lost on the company. An alteration in that part of the programme being thus necessitated, a *réunion* at the Picture Gallery (attended by a considerable number of the guests, was substituted for the promenade.

At five o'clock a *déjeûner-dînatoire* was given by the Corporation of Rotterdam, in the saloon of the Yacht-club House, to a party of about 220. His Royal Highness Prince Henry of the Netherlands presided; and was supported by the Minister of the Home Department, the Burgomaster of Rotterdam, and the various notabilities mentioned as present in the morning. The saloon was tastefully decorated, and the entertainment of a *récherché* character. After "the health" of his Majesty the King of Holland, Prince Henry of the Netherlands, and the usual loyal toasts, had been duly proposed and honoured, his Royal Highness the Chairman, in an able speech, gave "Success to the Dutch-Rhenish Railway Company;" which toast was appropriately replied to by the Chairman of the Company. The Minister of the Home Department then proposed "the Health of the Burgomasters and Corporations of the Towns on the Line." This toast was replied to by the Burgomaster of Amsterdam, who enlarged on the necessity of a hearty community of feeling between the two great commercial cities of Holland, urged the abandonment of all rivalry, except as to which could most advance the welfare of the common fatherland, and expressed a hope that, as the lines from Amsterdam and Rotterdam both meet at Utrecht, so both cities might unite in strenuous endeavours to promote the prosperity of the country. The Town Clerk of Rotterdam (Mr. Storm van s'Gravesande) then gave "the Health of the Shareholders of the Dutch Rhenish Railway

THE HOOG-STRASS (HIGH-STREET), ROTTERDAM.

Company," coupling therewith the health of Mr Donker Curtius, as Chairman of the Company. The Minister of Finance then proposed "the Health of the Ladies," which was received with acclamation. The Burgomaster of Rotterdam proposed "Prosperity to the Towns on the Lines of the Dutch Rhenish Railway;" to which the Burgomaster of Arnheim replied. Mr. van Dam van Isselt, Chairman of the Board of Commissaries of the Company, proposed "the Health of the Vice-Chairman (Mr. Hesselen), the other Directors, and the Engineers, by whose unremitting exertions this work had been accomplished. Mr. Hesselen, in returning thanks, congratulated the Company on having been so fortunate as to secure Mr. Brassey as contractor for the execution of the works; for had it not been for the ability and extensive resources of that gentleman, they would not now have been able to congratulate themselves on his completion. He also remarked that the European, or rather universal, reputation of Mr. Brassey had been fully established and justified in Holland during the carrying out of these works; and concluded by proposing "Health and Success to Thomas Brassey, Esq." Mr. Ballard (agent to Mr. Brassey in Holland) briefly returned thanks.

Shortly after this (about ten p.m.) the party adjourned to "a grand Vauxhall" at the Harmonie Club Gardens. The illumination here was very brilliant; but the proceedings were again interfered with by the heavy rain which commenced between half-past ten and eleven o'clock, and compelled the large party (of about two thousand persons) assembled to retire into the spacious concert halls, where the band continued the performance of many select pieces of music, and harmony and enjoyment were prolonged till an early hour of the morning.

We subjoin a few details of the construction of the railway. About fifty-seven miles have for many years been completed and in use, between Amsterdam and Arnheim. The completion of the undertaking was delayed till 1854, when Mr. Locke was engaged to examine the Dutch engineer's designs and estimates for completing the lines, and to advise the company. Mr. Locke's report and reduced estimate for completing the lines gave fresh encouragement to the shareholders (who are principally English), and the works of completion have proceeded with vigour, having been undertaken by Mr. Brassey, and managed by his agent, Mr. S. Ballard.

The most important part of the line, however, remains to be completed, namely, about twelve miles, extending from Arnheim to the Prussian frontier. The great engineering feature of this part of the work is a stupendous iron bridge over an arm of the Rhine, called the Yssel, nearly completed, from the designs of Mr. Edwin Clarke, of London, and the first bridge ever erected over the above river. This Prussian extension is expected to be soon opened, and will then connect the important seaports of Amsterdam and Rotterdam with the system of railways over the continent of Europe.

The line from Amsterdam to Arnheim was made on the broad gauge, but this has been altered, for the sake of uniformity, to the narrow gauge, so that carriages may run through from the seaports of Holland on the same gauge over most of the Continental railways. The greatest part of the line between Utrecht and Rotterdam passes over very deep beds of soft peat, and the foundations of the numerous bridges over the navigable streams have required great care and labour. Nearly 6000 bearing-piles have been driven, many of them upwards of 50 feet in length. The line is throughout an embankment: it mostly passes through a country artificially drained by windmills, the surface of the ground being under the average level of the sea. The works have been executed under the direction of a Dutch engineer, the Baron Van Reede van Oudtshoorn.

We have engraved four Views on the line, sketched by our own Artist. First is a street in Gouda, with its quaint gabled houses. In the second View is shown the Zuyd-plass Polder, through which the line passes about three miles. Fifteen years ago it was a lake of water 12 feet in depth, and covering a surface of 10,000 acres. The Polder is drained by two steam-engines and numerous windmills. What was once the muddy bottom of the lake is now dotted with farm buildings and well-tilled fields. The surface of the ground here is 16 feet below the average level of the sea; and the water, were it not kept back by artificial banks, would rise to a level above the tops of the railway carriages. The two remaining Views show the temporary Railway Station at Rotterdam, and the principal street of that city.

THE BANKRUPTCY OF MESSRS. ST. HILL, PATE, AND BATES.—At the Bow-street police-court, London, on Wednesday, Sir John Dean Paul, Bart., Mr. William Strahan, and Mr. Robert Meakin Bates, were again brought before Mr. Jardine, the sitting magistrate, on the charge of feloniously disposing of certain bonds, the property of the Rev. Dr. Griffiths, Canon of Rochester. Mr. Bodkin, for the prosecution, stated that they were still engaged in tracing the property, and were that day able to bring up such evidence as would clearly show that particular bonds, the undoubted property of Dr. Griffiths, had been made away with. After doing this he should ask for a further remand; and, as Mr. Beasty, an important witness abroad, and would not return until the early part of September, it might be necessary to ask for continued remands until then. The learned counsel then called Mr. John Hill, stockbroker, who deposed that he bought for the prisoners' orders, £2000 Danish Bonds. He did not remember who gave the order, but they were delivered to the prisoners, and the numbers ranged from 6,716 to 6,955, and were numbered 716 and 955 (these were charged to Dr. Griffiths, in his pass-book, at the sum the broker charged; viz., £2037 10s.).—Mr. Sludden, clerk in the banking-house of Messrs. Smith, Payne, and Smith, produced four Danish Bonds, numbered 660, 669, 681, and 682, which were deposited in March, 1854, at their bank, by Messrs. Barnet and Ellis, stockbrokers, on account of Mr. Joseph Sykes, a customer. They received the dividends on those bonds, and placed the amount to the credit of Mr. Sykes. The first dividends received were in September, 1854. Dr. Griffiths's pass-book was then produced; and from that book it was shown that, although the prisoners had not received the September and subsequent dividends, they had credited the Rev. gentleman with the amount.—Mr. Frederick Savory, clerk to Hanbury and Co., of Old Broad-street, agents to the Danish Government for paying the dividends on these bonds, proved that, in March, 1854, the dividends were paid to Strahan and Co., and in the following September to Messrs. Smith, Payne, and Co.—Charles Peppercorn, stockbroker, deposed that he had purchased in February, 1854, certain Dutch Bonds, costing £216 13s. 4d., amongst which was one numbered 1846. In September, 1853, he was requested by the prisoners, to raise £10,000 on Dutch Bonds, which they gave him to the amount of 50,000 florins. He accordingly procured £5000 from Messrs. Levy and Son, and £5000 from Messrs. Boden, and gave the £10,000 to the prisoners. One of the bonds deposited with Messrs. Levy and Son was numbered 2845.—Mr. Bodkin stated that this was all the evidence he had to offer that day. One link he had to obtain of evidence to connect the prisoners with the bonds deposited with Smith, Payne and Co. was Mr. Beatty, who was abroad, and would not return till Sept. Mr. Ballantine, for Sir J. D. Paul and Mr. Strahan, pressed Mr. Bodkin to say on what particular bonds the charge might be made, as otherwise they would then have the power to admit them to bail.—Mr. Parry, for Mr. Bates, made the same application, stating that even now no evidence had been brought against his client. After some conversation Mr. Jardine agreed to accept bail till Wednesday next, then to be again renewed for a week, of the prisoners in the amount of £6000 for himself, and two sureties of £3000 each.

CREMORNE GARDENS.—MR. SIMPSON, the indefatigable proprietor of these Gardens, has announced a series of grand entertainments for his benefit, on Thursday next. A magnificent military spectacle and fête are also in preparation, the proceeds of which are to be appropriated to the funds of the Wellington College, of which his Royal Highness Prince Albert is President.

CORPORATION REFORM.—At a Court of Common Council, on Monday last, Mr. J. H. Fry gave the following notice of motion:—"That it is desirable to co-operate with her Majesty's Government in passing through Parliament a bill for the Reform of the Corporation of London, founded upon the resolutions agreed to by this Court on the 24th day of February, 1854."

ST. MARK'S HOSPITAL FOR DISEASES OF THE RECTUM.—On Monday the Auxiliary Society, consisting of relieved patients and friends, held their twelfth annual festival, at Highbury-barn Tavern. Upwards of 100 sat down to an excellent dinner. Some of the gentlemen connected with the parent charity, and Mr. Salmon, the founder, were present. The chair was taken by J. Frith, Esq., in the room of Mr. Alderman Copeland, who was unavoidably prevented from attending. The usual toasts were given and warmly responded to, and the day passed off very pleasantly. The subscriptions at the table amounted to £18, including a donation from Mr. Alderman Copeland of £5.

THE PEEL MONUMENT IN THE CITY.—At a meeting of the Peel Monument Committee, on Wednesday, Sir Peter Laurie in the chair, it was unanimously resolved that the following shall be the inscription upon the pedestal of the statue of Sir Robert Peel, at the top of Cheapside:—"Peel, born 5th February, 1788; died 2nd July, 1850."

LONDON ILLUMINATED.—Sir Samuel Romilly was at his seat at Tatsfield, in Surrey, in 1814, when the rejoicings took place on account of the triumphs of the Allies, and he records in his Diary, "From Leith-hill we saw, on Easter Tuesday (April 12), at night, the light of the illuminations of London on account of the recent events at Paris."

THE SILENT MEMBER.—(No. XXVIII.)

THE Beer Bill of last Session is being repealed, or at all events is being passed through the Commons, almost as precipitately as it was enacted a year ago, when nobody except Mr. Brady, who appears to have been quite "alone in his glory," took the trouble to utter a word against the measure. The advice which I last week tendered to the House of Commons I now offer in a friendly spirit to the Lords, who, it must be admitted, are not backward in listening to the claims of public opinion when it has been pronounced in an unmistakeable manner. The Legislature may wisely and safely resist mere clamour, but the call for the repeal of the Beer Act of last Session is not a cry got up by a section of the community, but a reasonable demand founded on strong conviction and rather bitter experience. Amid the feeling of uneasiness that is not unlikely to prevail during the recess if the war should continue to drag its slow length along without any decidedly favourable result, it would be painful indeed to find that a real ground of discontent, which might have been removed by the repeal of the obnoxious Beer Bill, had been allowed to add to the general spirit of disquietude. A nation in difficulties, like an individual in trouble, is generally rather irritable; and however the "soothing system" ought to be practised by statesmen, it is at a moment when the public patience is sorely tried by burdens and anxieties which the present generation have not been accustomed to.

As the Session glides away it is melancholy to reflect on the little that has been really done, and the great deal that has been either attempted and given up, or not attempted at all, on the ground of the "difficulties" surrounding the attainment of the objects desired. It is time that this pusillanimous principle should be cast aside by the governing classes, whose duty it is to overcome difficulties, and not to succumb to them. The amount of difficulty should be the measure of the earnestness employed in removing obstacles, instead of being the excuse for refraining from continuous effort. In legislation, as in everything else, there is not much worth doing that can be done very easily, and there is no use whatever for a Government which, while admitting that certain things ought to be done, refuses, on the ground of the alleged difficulty, to proceed with the execution. Ministers are not paid five thousand a year each for doing that which is easy. And a Government will never properly fulfil its functions while there exists in official vocabulary the too familiar phrase—"There are difficulties in the way of the proposed plan, and though it is undoubtedly good in principle, we cannot undertake to put it into practice." Lord Palmerston shows glimpses, from time to time, of an energy still capable of dealing with all obstacles thrown in his way when pursuing the right path, and if he were more frequently to display the vigour he exhibited in pushing forward the new bill relating to the Law of Partnership, he would be far more successful than he is as a Prime Minister. A display of spirit animates the zeal of friends and discourages the hostility of enemies. When a Minister acts and speaks as if he knew himself to be in the right, those who are factiously opposing him begin to feel that they are in the wrong; and he gains an amount of moral power which is almost sure to lead to a successful issue. I do not wish to discourage the efforts of a *bona fide* friend to economy; but the cause is likely to suffer by a systematic carping at almost every item in the public expenditure. Imitators are apt to import the faults and peculiarities of their originals; and I am sorry to observe that Mr. W. Williams, who aspires to the position of successor to the late Joseph Hume, is adopting, and indeed far exceeding, all the captiousness on the subject of outlay, for which that great financial reformer was often ridiculed. Among other proposals of Mr. Williams for saving the public money, was the rather absurd one that the expense of lighthouses should be defrayed by the inhabitants of the places in which the lighthouses are built, as if the residents at a watering-place on the coast were in danger of being run down by ships coming on shore for want of proper signals. Nothing is easier than to jump up and object to every item in a Committee of Supply; but such a system will waste more of the public time than will be saved of the public money. It is to be regretted that Mr. Williams should weaken his own power of doing good by continually obtruding his objections where there is nothing that can be reasonably objected to.

The inquiry into the disturbances in Hyde-park, or rather into the conduct of the police, on the occasion referred to, has elicited some facts, not immediately connected with the object in question, but which the authorities will do well to act upon. The state of the cells at some of the police stations seems to be such as to need immediate reform, for it is certainly most unfair that persons against whom no charge has been proved, and who are not unfrequently quite innocent, should be exposed to injuries to health to which even convicted criminals ought not to be rendered liable. It is true that at periods when there is any sudden influx of persons taken into custody there may be a scarcity of accommodation, though there might be ample room for an average number; but nothing seems to justify the dampness and insufficient ventilation of such space as is set apart for the reception of prisoners. As long as the evil was not made the subject of notoriety it may have been lost sight of under the general apathy with which those evils are regarded, for which no one is especially responsible; but after the publicity given to the facts by the evidence taken before the Commission now sitting, it will be impossible that ignorance can be pleaded by those who, possessing the power, are morally, if not legally, bound to remedy the evil.

The morality of the British merchant, wholesale as well as retail, is placed in a somewhat doubtful light by the disclosures that have been made before the Committee for inquiring into the adulteration of drugs, drinks, and eatables. He is said to have been a bold man who first ate an oyster: but after what we have lately seen in the papers, it may almost be said that he is a bold man who ventures to eat anything. Adulteration has in fact become an art, or rather a regular profession; and publicans keep in their service a class of persons called "adulterators," whose duty it is to perform such mysteries as turning vitriol and water into gin, or producing large quantities of beer from comparatively small quantities of the genuine article. The Legislature will, naturally enough, be expected to provide some protection to the public against such a state of things; and the Legislature will, probably, find an excuse for doing nothing in the "difficulties" with which the subject is surrounded. If the matter is taken up in good time next Session, the "difficulties" will not be so great as they are likely to appear if the subject is only touched when members are anxious to get released from their Parliamentary duties. Nearly all classes, including the governing classes, work too hard at particular times, and indeed a better distribution of the hours of labour would be a boon to the whole community. The late hours of the Commons tell on some of the weaker members with damaging effect; and nearly the whole House has a worn and jaded aspect, as the Session approaches its termination. A better example on the part of the Legislature would give much help to the movement now making for a general half-holiday in all places of business on the Saturday—a consummation which would have more effect than any amount of restrictive laws in the diminution of Sunday drunkenness. A half-holiday on Saturday would give the working classes an opportunity of marketing, in time to prevent the necessity for making purchases on the following day, and would thus act more powerfully than any law that could be passed for the diminution of Sunday trading. The middle classes would be often able to avail themselves of excursion-trains for a run out of town; and even the labouring classes would in time find it practicable, by the aid of cheap travelling, to enjoy the same advantage. The health and the enjoyment of all would be materially increased, and the wealth of the country would be augmented rather than diminished by a state of things that would promote cheerfulness, and thus give an impetus to industry. A correspondence on the subject of Early Closing on Saturday has been recently published; and an earnest appeal made to the Lord Chancellor to close the Court of Chancery on Saturday, as a boon to the law-copyists, who are overwhelmed with work on Sunday, is answered by his Lordship's secretary, who is directed to state that the Chancellor "sees great difficulties in the way" of attaining the end desired. Here is the old official and legislative cause for abandoning or declining to enter upon an effort for the promotion of a good object. If every benefactor of his species had stopped in his pursuit when he saw "difficulties in the way," what would have become of almost every one of the great acts which have contributed to the happiness of mankind or the welfare of society?

LOWESTOFT REGATTA.

THE annual regatta of this important and rapidly-improving town took place on Tuesday, the 24th ult., under the patronage of the Earl of Albemarle, the Earl of Yarborough, Lord Alfred Paget, M.P.; Sir E. S. Gooch, Bart., M.P.; Sir T. M. Wilson, Bart.; Sir S. M. Peto, Bart.; Sir F. Kelly, Bart., M.P.; Sir S. Bignold, M.P.; Mr. R. Stephenson, M.P.; Mr. D. Waddington, M.P.; Mr. J. C. Cobbold, M.P.; the Mayor of Norwich; Lieut.-Colonel Beaumgisld, Messrs. A. Arcedeckne, E. L. Betts, H. W. Paton, J. Goodson; and Captain W. Andrews.

The weather was most unfavourable for the sight-seers, for till about three p.m., a drizzling rain descended, sometimes increasing to heavy beating squalls; and the wind, which was from S.W., was blowing at times very fresh. Still, from an early hour, steamboat trains arrived in quick succession from London, Norwich, Yarmouth, Cambridge, and other places within half of the line, and poured out their vast numbers over the esplanade, the north pier, the sea-beach, and the cliffs. The south pier was not very crowded, owing no doubt to the extra charge. As on former occasions, Mr. A. Arcedeckne, the Commodore of the Harwich Yacht-club, had kindly given his yacht the *Norvice*, 79 tons, for the use of the committee. It was gaily dressed with flags, and anchored off the harbour's mouth, whence the boys from which the yachts were started, and from which the judges viewed the finish.

THE FIRST PRIZE CUP, LOWESTOFT REGATTA.

The sports commenced with a schooner match for a Piece of Plate of the value of 100 guineas; no restriction as to sails or men, time for tonnage (as altered for the occasion), according to Adams's scale; three to start or no race. The following yachts took up their stations:—*Coquette*, 47 tons, Mr. E. G. Peel; *Georgiana*, 110 tons, Captain Thellusson; *May Fly*, 140 tons, Mr. G. P. Bidder. The course was from off the pier, round the Stamford Light Ship to the north, through the Pakefield Gat to the south-ward, thence to a station-vessel about fifteen miles to windward, leaving her on the port side, and returning to the starting-place by the Pakefield Gat, passing between the station-vessel (the *Norvice*) and the pier-heads. Precisely at 12h. 30m. 30s. the signal was fired to prepare, and at 12h. 31m. 30s. the gun for the start. The *Coquette* was very soon out of the match, and, after the other vessels had beat through the narrow channel on their way out to sea, they were soon lost to sight, and the attention of the crowd was turned to the starting of the other matches. They arrived at the flag-ship as under:

Georgiana ..	6h 32m. 33s.	May Fly	6h. 21m 51s

The *Coquette* did not arrive till nearly an hour afterwards. A protest was made by the *May Fly* against the *Georgiana*, on the ground that at the start she did not pass between the station-vessel and the pier; but there was nothing in the sailing directions to that effect. The committee, after much discussion, referred the matter to two umpires, who decided in favour of the *Georgiana*.

The second race was for a Piece of Plate, value £20, to be sailed for by yachts not exceeding 50 tons. For this race the following yachts came to their stations:—*Thought*, 25 tons, Coope; *Maud*, 25 tons, Captain Andrews; *Avalon*, 25 tons, J. Goodson. The course was from the moorings laid down abreast of the North Pier head, round the Newcombe, leaving the Buoys and the light ship on the port hand, and home, passing between the *Norvice* and the pier-heads, three times round. The *Thought* took the lead, followed by the *Avalon* and *Maud*, and they completed the third round as follows:

Thought, 5h 47m. 40s.	Avalon, 5h 53m. 40s.	1	Maud, 6h. 24m. 40s

A Purse of £20, to be sailed for by yachts not exceeding 20 tons. The same course as in the preceding race: twice round. For this prize the following yachts entered, and came to their stations:—*Vampyre*, 15 tons, N. Peppercorne; *Waverley*, 15 tons, T. C. Lucas: *Chanson*, 9 tons, Hon. C. Duncombe. All these little yachts set the ensign with great alacrity, and made a very good start, the *Vampyre* having a slight lead. The ship *Chanson*, after making a very good fight for the first time round, was at length compelled to succumb to her larger rivals, and in the last round she was so far distanced as not to be timed. The *Vampyre* fully maintained her previous character in this race, the *Waverley* never having a chance.

A Purse of 15 sovs for river lattees and cutter rigged boats; half a minute per foot allowed for difference of length. The following boats started:—*Iris*, 27ft. R. Reeve; *Kestrel*, 26ft., W. Butcher; *Shannon*, 16ft., W. Brighton; *Alma*, 24ft., C. Francis. The *Iris* took the lead and kept it easily to the finish. The *Shannon* gave up, and the *Kestrel* came in second, followed by the *Alma*, after a well-contested race.

The Yawl Race did not take place owing to the rule of three to start or no race.

A Purse of £20, for six-oared beach gigs. For this race three boats started, viz.:—*Pit Try*, Lowestoft; *Kate*, Lowestoft; and *Tauzer*, Southwold: and, after some well-determined rowing, it was won by *Tauzer*, and *Pit Try* second.

In the evening a Duck Hunt, and other amusements of a minor character, were followed by a brilliant display of fireworks opposite the hotel.

On Wednesday morning, the weather being far more propitious than on the previous day, most of the yachts sailed out of harbour, and were reviewed in front of the Royal Hotel. One column was led by the *Norvice* schooner, and the other by the *Maud* cutter, Captain Andrews. Mr. James Goodson, the respected Commodore of the Royal London Yacht-club, was among the guests of Mr. A. Arcedeckne, on board the *Norvice*, and flew his broad pennant at the fore of the schooner. The review, which was one of the most beautiful features of the Regatta, and which we have engraved, gave the greatest satisfaction to all who witnessed it; and, with some excellent boat races, concluded the Regatta.

In the evening there was a splendid banquet at the Royal Hotel, provided by Mr. S. Howett, and presided over by Sir M. Peto. Upwards of one hundred and fifty sat down, and the entertainment was kept up with great spirit to the last.

"L'ETOILE DU NORD,"
AT THE ROYAL ITALIAN OPERA.

IN our Journal of last week we gave a lengthened review of the performance of Meyerbeer's magnificent opera. We now engrave the animated scene in the first act of the "Etoile du Nord," in which the festivities of the dockyard labourers and country-people are interrupted by *Corporal Grisenko* (Lablache) and his savage troop of Cossacks, who are enticed away by the singing and dancing of *Catharine* (Mdlle. Bosio) and her band of village girls.

Children's Elastic Bodice and Coutille Corset, 8s. 6d. each
Elastic Belts and Supports, for corpulency.
Drawings of the new mode of [illegible]
CARTER and HOUSTON, 99, Regent-street, 6, Blackfriars-road, [illegible] Greenwich, and Crystal Palace

DINING, DRAWING ROOM, and BEDDECORATIVE ARTICLES.—Chintz materials for window-curtains of the best British and foreign manufacture, in silk, worsted, and other damasks, [illegible] Brussels and other carpets, the produce of the best looms in the kingdom, and printed on [illegible] in plain figures, such as most ornate patronage. A.C. SOUTTER, 323 and 324, Oxford-street (near Dean-street, Soho-square). Established 1822. Designs and estimates ©

CABINET FURNITURE, CARPETS, and BEDDING.—LEWIN CRAWCOUR and CO.'S NEW ILLUSTRATED FURNISHING GUIDE, containing nearly 250 designs and prices of fashionable and elegant cabinet and upholstery furniture, &c., as displayed in their numerous show rooms, is now ready, and will be forwarded gratis and post-free on application. The stock is of great extent and warranted unobjectionable, cannot be excelled for cheapness, and embraces all that is [illegible] quisite of capital and good taste combined can render it. Country orders carriage free. Crawcour and Co., Upholstery and Cabinet-makers, 7, Queen's-buildings, Knightsbridge, seven doors west of Sloane-street.

TO INVALIDS TRAVELLING.—Mahogany MEDICINE CHESTS, from 8s. Travelers. Medicine Cases in leather, from 2s. 6d. [illegible] bottles, best cut glass, [illegible] WILLIAM T. COOPER, Chemist, 26, Oxford-street

LEADEN COMBS, for gradually DARKENING the HAIR, securely packed, with directions for use. Post free 2s. 6d. or 30 stamps. Genuine only of the Sole Manufacturer and Proprietor, A. T. ATKINS, Broad-court, Long-acre, opposite St. Martin's-lane, London.

LOOKING-GLASSES, CONSOLE TABLES, WINDOW CORNICES, and GILT DECORATIONS of every description.—CHARLES [illegible] 295, Oxford-street, 1 door from Regent-circus. Established 1810. The most extensive assortment of [illegible] for immediate delivery. Purchasers of the best [illegible] the prices such that must ensure patronage. Books of Designs and an receipt of six stamps. Estimates free.

TO the OIL and ITALIAN TRADE, &c., PRESSED and HAND-PEELED LEMONS and ORANGES, ANCHOVIES, and ANCHOVY PASTE, also PRESSED and HAND-PEELED LIMES and TART FRUITS which they continue to prepare free from colouring

CLEANLINESS.—NIXEY'S BLACK-LEAD. This elegant chemical preparation for polishing stoves, &c., stands in brilliancy burnished steel with half the usual labour without waste or dust. Sold, throughout the kingdom, in packets, 6d. and 1s. each.—W. G. Nixey, Patentee, 32, Moor-street, Soho.

PATENT COMPRESSED VEGETABLES. The amalgamation [illegible] effected between our House and that of Messrs. ROBERTS, FAIRLIE, and Co., for the purpose of conjointly working our several patents, has placed at our disposal, in addition to the [illegible] of 1,000,000 tons per annum, the extensive Machinery of two large [illegible] factories, which enables us to execute large orders in a short [illegible] on most advantageous terms to purchasers. For CHOLLET and CO., Forfar; M. HUNT and CO., Agents, 51, Great St. Helen's, city

PURE RICE DIET.
HAYLOCK and CO.'S SUPERIOR BISCUITS (in all 40 kinds), including Cornflour, delicious Arrowroot, Wheatsheaf, Captain's, Cabin Lunch, Tops and Bottoms, Diabetic and Mixed Biscuits. Used by all respectable Invalids and Confectioners in all the principal towns in the United Kingdom as the purity of Haylock and Co.'s process of manufacture, see by Sir Charles Morgan's "Chemistry," Part III., Manchester, 8, 11, and 13, Lydia-Ann-street, Liverpool. London Wholesale Depôt, 14, Cockspur-street.

BURGLARS DEFEATED. [illegible] PATENT NON-POWDER-PROOF SAFES [illegible] Chubb and Son, 57, St. Paul's-churchyard, London: 16, Market-street, Manchester; Bunkey-fields, Wolverhampton; and 28, Lord-street, Liverpool.

UNIVERSAL LIFE ASSURANCE SOCIETY, 1, King William-street, City, London. Established by Special Act of Parliament, 6 Will. IV., cap. 54. Sir Henry Pinnock, K.L.S., Director. John Sewell, Esq., Deputy-Chairman. The successful operations of this Society have enabled the Directors, for the last twelve years to reduce the Premiums on Policies entitled to participate in profits by 40 per cent which will be found a most liberal reduction, if the original premiums be compared with those of other offices adopting a similar plan of division of profits. A Board day Thursday, at one o'clock.
MICHAEL ELIJAH IMPEY, Secretary.

SOMETHING ABOUT CHAMPAGNE

(With Illustration from Photographs taken at Pierry.)

WHAT a day! The heat is intolerable, and yet Baxter has dared to speak of dinner. Well, it is not his fault that the thermometer is 90 deg., so we will obey the summons. Capital Baxter! you are the best fellow that ever devoted his energies to a bachelor! This room, darkened by flowers in the window and the green shrubs at the lattice-work, has half dispelled the languor which made odious the idea of eating. What have you provided? Rum! A *soucket* of flounders—a *compote* of pigeon—and a salad of strawberries. Well, one may struggle with such a repast. No wine; the blood is already feverish will heat. Yet, stay! this is Ida's birthday, and she must be toasted as becomes the lady of my heart. You have remembered that, also, my good Baxter, and have prepared the only draught worthy of such an honour—a bottle of champagne iced to a degree. This bumper I drink in silence. How grateful—how delicious! Remove those grosser matters, and leave me alone with this sublimated liquor—create for love's libations. What other draught have of the grape goes direct to the heart like this and in a moment makes the pulse beat quicker? What pleasant memories are associated with the foaming glass, remembering as we do the silent tongues it has made eloquent, and the anxious hours it has converted into mutual bliss. Who has not lighted some bashful maiden down to supper and thought the task a bore until a glass—perhaps two—of this elixir has converted her into the sweetest prattler that was ever listened to? Or who has not seen some sorrowful boy that has sighed his heart devoted to her through a whole procession of quadrilles and polkas, smile at last when hiccoughed by a *toast* of champagne? Who has not seen the stately matron, erst enthroned in dreadful maternal majesty on the ottoman of state to frown down younger sons and conceal freckle-faced daughters, grow quite famous with young Peter of the Treasury when the sparkling Epernay has crept into her veins and made her old heart young again? What dull dinners have become lively, dashing affairs after the cheerful pop of our generous champagne had been heard in the room, stimulating, as it were, the drowsed spirit to imitate the vivacity of the sparkling liquor. Claret, port, madeira, are all diputitious liquors but who can argue over champagne? It leaps into your glass, challenging you to drink and be happy. "To one or not why, ask not wherefore,"—and Heaven knows these are times in most of our lives when that is "a consummation devoutly to be wished." May he who first created champagne rest in ever with the "inventor of the Leather Bottle," and that is in the best of places

Can it be possible that, whilst we have been rhapsodising, we have exhausted the bottle? That the fellow, so lively half an hour ago, is now "a dead man"? Let us be grateful, and give some account of its birth, parentage and education

About thirty miles east of Paris is the department of the Marne. In a small portion of this department enclosed between the town of Rheims on the north, Chalons-sur-Marne on the east, Vertus on the south, and Epernay on the west, the champagne grapes are grown. The river Marne separates this portion of the department into two unequal parts that on the north side being the larger. The champagne growers divide these parts into four districts. The first district, which is about eight miles long and one mile and a half in width, is on the north side of the river, on an elevation called the Montagne de Rheims, and comprises the parishes of Cligny, Rilly, Verzy, Verzenay and Mailly Trepail Anthouny, and Berry. The second district, about nine miles long and one and a half wide, is on the south side of the Montagne de Rheims, and consists of the parishes of Ay, Cumieres, Hauvillers, Dizy, Mareuil, and Avernay. The third district, cut in miles in length and two miles in width, is on the south side of the Marne and includes the parishes of Epernay where Messrs Moet and Chandon's establishment is situated, Cramant, Avize, Oger Le Mesnil, and Vertus. The fourth district, about five square miles, contains the parishes of Pierry (the birthplace of the dear departed), Moussy, and St Martin

The wines of these various places differ greatly in taste and character, and are the produce both of the white and black grapes, principally of the latter, but those wines which have the larger admixture of the white grape are supposed to possess the richer delicacy; or, as it is called, by the growers "finesse." The vintage commences about the end of September, and if continued by the early part of October the year is considered to be a good one as the white grapes are then obtained in greater abundance. And a busy and merry time is that same vintage. No labour is then. Every available woman, and child is pressed into requisition to gather the grapes, and every donkey and mule to carry them. Troops are seen in all directions ascending and descending the steep and narrow paths leading to the vineyards. In some places the grapes, after being gathered in the cool of the morning, are carried in baskets, and, whilst over the mode of transit, are then placed in the wine presses, the juice running into casks, where it is allowed to ferment. The grapes are not put into a mash-tub, but undergo three or four separate squeezings. In about a fortnight the casks are filled up, bunged tightly, and allowed to remain until the middle of January, when the wine is racked off and clarified

In May the process of bottling commences, each bottle receiving a lump of sugar candy (we suppose to keep it in good humour), and the cork is fastened with string. The bottles are then put to bed in a rack, with their necks downwards, at an angle of forty-five degrees, and from time to time shaken and placed more perpendicularly, so that the sediment may get into their necks. This result is brought about by quite some fifty shakings, which require to be done with so much skill and care that champagne nurses are subjected to a twelvemonth's practice before they are entrusted to perform this delicate operation. The nurse grasps the bottom of the bottle with the right hand, and by a sort of half twist of the wrist the sediment is made to descend into the neck. When the sediment is all deposited the wine, as you may suppose, is ready for disgorging, which is performed (Fig. 1) by the nurse holding the bottle in a slightly inclined position, cutting the string and instantaneously elevating the bottle, when the cork is blown out, and with it all the sediment. The great art is to perform the operation without wasting the wine, and the *dégorgeur* in the Engraving is cutting the string and firing the cork into the *dégorgeoir* before him, which receives the cork, the sediment, and any wine which may escape. This refuse (with the exception of the corks) is made into a villainous stuff, and named brandy

The "degorged" bottle is then handed to the corker who is provided with a steam apparatus which keeps the corks hot and moist. By means of a mallet and a machine called a "chantier" (Fig. 2) the bottle is recorked. A clever and strong man will manage 3000 bottles a day.

Le facteur, a dexterous fellow, then fastens on the string (Fig. 3); and passes the bottle to the next workman, *le feuille au fer*, who wires it up securely (Fig 4)

The bottle may now be said to have got over its troubles, and a fair damsel (Fig. 5) tenderly encloses its head in tinfoil. After which a respectable matron (as shown in Fig. 6), wraps it carefully up in paper, and puts it again to bed with sometimes three to four millions of brother bottles (as at Messrs. Moet and Chandon's), there to remain until exported to complete its mirthful mission, like the "dead man" before us.

We are affected by the recollection of its virtues, and must ring for a *demi-bouteille*.

L.

THE JESUITS.—A return, just published at Rome, shows that the Order of Jesuites at present consists of 5510 members; 1515 of whom are in Italy, 1447 in Spain, 1211 in Belgium, 381 in Spain, 171 in Germany, and 124 in England, America, and other countries. In 1797, when the order was at the height of its glory, it possessed not fewer than 19,316 members.

AMERICAN ENTERPRISE.—By a recent decision in one of the superior law courts of New York, it has been laid down that the Act only prohibits the sale of liquors of domestic manufacture. The next morning all the stores displayed signs certifying "none but imported liquors sold here." The *New York Herald* says on this—"The enterprise displayed by liquor-dealers in disposing of the American liquor in one night, and filling their shops with imported liquor by next morning, is certainly very extraordinary, and merits public notice."

GREAT FIRE AT CONSTANTINOPLE.—The *Moniteur* of Tuesday contains a communication, addressed by General Larchey to the Minister of War, giving an account of a conflagration which broke out at Constantinople on the 17th of July, and by which it appears the French military were placed in imminent danger. The fire began just after noon, and, favoured by the heat of the sun and an impetuous clanging wind, consumed 120 houses. The buildings occupied by the French were entirely of wood, and were only saved by the incessant exertions of the *pompiers*, who likewise saved many houses of the town, which must otherwise have been destroyed.

THE FRENCH ARMY.—The *Kreuz Zeitung* goes into figures to show that Prussia needs not fear a French demonstration on the Rhine; thus, France has 101 infantry regiments; of these 41 have been sent to the East, 2 are at Rome, 12 at least more, be in Africa, so that only 46 can remain in France. At least 10 regiments are wanted for Paris and other populous towns, leaving but 36 infantry regiments, or 108 battalions, free for other service. These united with a due proportion of troops of other arms, would furnish an army of at most 120,000 men, decidedly too few, the *Kreuz Zeitung* thinks, to extinguish Prussia. A recent reinforcement of the garrison of Strasbourg, and some remarks thereon in a Belgian newspaper, have called forth this display of German military legic.

THE WAR IN THE CRIMEA.

(From our Artist and Special Correspondent.)

BEFORE SEBASTOPOL, July 1st, 1855.

ONE of the curious phenomena attending the siege of large cities is in course of development at this moment before Sebastopol. On our first appearing on the shores of the ancient Taurida confident in the vivacity and unexpectedness of our attack—we landed with a force of fighting men destined, as we fondly hoped, to overcome every material obstacle in field and fortress. The Russians, we were taught to expect, were unable to cope with us in the open plains of the Crimea, and the walls of Sebastopol would not long withstand the force of our arms. In this conquering mood our fighting men advanced—vanquished the enemy opposed to us and stood expectant before the city whose walls bristling with cannon were to be the next trophies of their valour. In these wild hopes we were disappointed; and, as week after week and month after month expired in steady but prolonged efforts to overcome the resistance of the enemy, our soldiers toiled more as labourers than as fighting men, and spent in the work of pick and mattock, and in draught and carriage, those energies which should have been carefully husbanded for other purposes. A radical vice of our system of warfare, related by years of peaceful habits, was here exhibited, and it was not until nearly 25,000 valuable lives were lost to the service of the country that our leaders came to the conclusion that fighting men were destined to fight, and not to labour. Then it was that the phenomenon incident to long sieges began to show itself to our astonished eyes; and, like the Greeks at the beleaguering of Troy, the Allies before Sebastopol commenced the creation of small towns of their own, *en attendant* the capture of the city against which our efforts were directed.

At first, when few sutlers and venders of small wares diligently trafficking with a daily profit of 300 per cent, made their appearance, our chiefs were content to let them settle in the bases of Balaclava, whose contents rendered them almost unsuited for any purpose of their own; but as the numbers of the camp followers increased, and as the convoys gradually crept over us, that Sebastopol was not "going to be taken," it became necessary to devise measures for transforming our port of landing into a magazine, and in that view the hovels and gardens of the Armenian Greeks were devoted to destruction. I shall not pause here to enumerate what tremendous sacrifices of the lives and resources of our country, the necessity of these measures was forced upon the unwilling senses of our chiefs. There are historians of our fatal errors and delays, more able and not less convinced than myself of the truth that the town being destined to be transformed into stores for military purposes, the sutlers and camp-followers were sent away, and a piece of ground allotted to them on the spot where once stood Kadikoi. At first a row of worn and dirty tents marked the spot; next small cabins, composed of a few planks were erected, then buildings of wood of more ambitious form arose, and a street was traced out. Then dawned a new era in our military management, and we commenced the importation of labourers skilled and unskilled, who were destined to snatch the limbs of our soldiers from all but their own solemn-like duties. British "navvies" came to construct a railway, vast numbers of muleteers were engaged from Malta and Spain; and labourers for carriage, for draught, and for manual work generally, were also called in. These it became necessary to house, and a piece of ground was allotted to them as it had been to the sutlers, and camp followers. This influx of attendants upon our army formed a community which is gradually shaping out a small town on the outskirts of Balaclava
